As a result, in Order No. 298, the Commission continued "our stated policy not to remedy a price squeeze if it is due solely to state regulatory action or inaction." [33] The Commission remains concerned that it is difficult to generically isolate what might be referred to as a "CWIP-related" price squeeze, given the wide variations in regulatory treatment of numerous ratemaking issues among the States. Indeed, without considering *all* ratemaking disparities as between this Commission and a particular State commission, it may be impossible to measure the net effect of a differing treatment of CWIP. Nonetheless, the Commission, on an interim basis, will exert its best efforts to identify "regulatory" price squeeze situations in individual cases and to remedy them where appropriate. To do so, we must depend heavily on information supplied both by the filing utility and its affected customers.

The Commission seeks comments concerning:

9. The implications, particularly for purposes of financial indices and implementation of Federal policy objectives, of a shift to a practice of remedying price squeezes that are attributable solely to a State commission's failure to allow the utility CWIP in rate base or the State commission's failure to allow as much CWIP as this Commision permits utilities subject to its jurisdiction to file for in proposed rates.[34]

10. Whether the disparities between Federal and State regulation tend to balance out so that the rate treatment of one issue, such as CWIP, is not likely to offset the rate effects of all other rules dealing with other regulatory issues.

The Commission is particularly interested in comments from the State commissions on the issue of "regulatory" price squeeze associated with the Commission's policy on CWIP.

As discussed above, the *Mid-Tex* court accepted the first two purposes which the Commission announced as the justification for adopting the rule in Order No. 298: Mitigating bias against capital investment and ensuring more accurate price signals. 773 F.2d at 344. The Commission seeks comments (particularly from the investment community on questions 11 and 12) concerning:

11. What impact, if any, would a Commission policy of remedying "regulatory" price squeeze associated with CWIP have regarding capital investment in the electric utility industry?

12. Whether such a policy would be likely to increase utilities' cost of capital and, if so, by how much and for how long.

13. How would such a policy affect the accuracy of price signals sent to consumers?

14. If the Commission determines (beyond the interim period) that the public interest requires it to remedy a "CWIP-related regulatory price squeeze,"[35] what ultimate remedies should the Commission consider?

B. Double Whammy

Double whammy is a special type of anticompetitive effect which may result if a wholesale customer embarks on a construction program, either under its direct management or through participation with others in a joint venture, and simultaneously pays rates which include CWIP to its current supplier. The wholesale customer pays rates including CWIP based on the assumption that it will continue its current level of service over the anticipated service lives of the facilities for which the CWIP is requested. If its level or length of service is less than that represented by the proposed allocation of CWIP, it may subsidize other customers, which may create a competitive disadvantage. On the other hand, if the customer's level or length of service is greater than that represented by the proposed allocation of CWIP, the customer may be subsidized by other customers which may create competitive disadvantages for those customers.

This is clearly a significant issue. However, it bears repeating that allegations of double whammy have not been common. Out of all the CWIP rate applications filed under Order No. 298, it appears that only one has involved a double whammy claim.[36]

From the Commission's experience to date, it appears that most utilities requesting CWIP allocate the CWIP on the same basis that they allocate other rate base items, *i.e.*, ratios reflecting expected test period service levels. With respect to existing wholesale customers, the test period allocation ratios may not exactly reflect the anticipated changes in the wholesale customer's and system loads that will actually occur during the period the facilities for which CWIP is requested are expected to be in service. For that reason, the Commission is considering requiring a utility to employ forward looking allocation ratios to allocate CWIP in those cases where a customer establishes that its own construction program will make it increasingly independent of its current supplier.[37] By using forward looking allocation ratios, which presumably would better reflect the wholesale customer's demand on the utility when the facilities for which CWIP is requested will be in service, any anticompetitive potential may be

---

[32] 48 *FR* 24348, III FERC Statutes and Regulations (Regulations Preambles) ¶ 30,455 at 30,527.

[33] 48 *FR* 24348, III FERC Statutes and Regulations (Regulations Preambles) ¶ 30,455 at 30,541, n. 97.

[34] It appears that only eleven States completely disallow the inclusion of any CWIP in rate base for investor owned utilites. *See* Salomon Brothers, Inc., Stock Research, Electric Utility Regulation—Semiannual Review, pp. 10–19, August 8, 1985.

[35] According to Commission records, by December 1, 1985, 40 cases had been filed under Order No. 298 where non-pollution control and non-fuel conversion CWIP was requested. Price squeeze was alleged in 26 of those cases. Settlement was reached in 20 of the 26 cases where price squeeze was alleged. In 18 of the settled cases, the State regulatory authority, according to Solomon Brother (see n. 34, supra), allowed at least some CWIP in rate base.

[36] *Georgia Power Company*, Docket No. ER85-659.

[37] Forward looking ratios would be based on projections or estimates which look beyond the test year. This practice may better reflect a customer's anticipated relative use of the facility for which CWIP is requested.

avoided or substantially mitigated. The Commission seeks comments concerning:

15. What type of showing, if any, the customer should be required to make before the utility would be required to allocate CWIP based on forward looking allocation ratios. The Commission at this time believes that before the utility should be required to use forward looking ratios, there should be a probability, rather than a mere possibility, that a customer's construction program will result in reductions in future service affecting the need for the facilities for which CWIP is requested.

Forward looking ratios must be based on projected data. A requirement that utilities use forward looking allocation ratios might create additional burdens on rate case participants. Also, the accuracy of such data might be suspect, particularly the farther into future the utility must project. The Commission seeks comments concerning:

16. Would such a requirement be burdensome to rate case participants and, if so, can the extent of such burden be quantified?

17. If forward looking allocations are required by the Commission in cases involving the probability of double whammy, how far forward should the allocation ratios cover? How far ahead can the Commission expect reasonable accuracy in such projections?

The Commission believes that a better understanding concerning how utilities and their wholesale customers view a utility's "obligation to serve" [38] under the Federal Power Act may be of assistance in deciding how to deal with allegations of double whammy resulting from proposed rates which include CWIP:

18. Should a wholesale customer be permitted to waive any right to future service from its supplying utility and thereby avoid paying CWIP in rates, and, if so, how procedurally should such a waiver be accomplished?

19. How does a utility's obligation to serve differ, if any, when the customer is a full requirements customer; a partial requirements customer; a coordination customer?

20. Does a utility's legal or practical obligation to serve impede competition in the electric utility industry? If so, how is competition impeded?

V. Administrative Findings and Effective Date

The Commission is, by this order, adopting a final rule prior to providing notice and obtaining written comment, as required generally by the Administrative Procedure Act, 5 U.S.C. 553 (b) and (c) (1982), for any rulemaking proceeding.[39] The Commission is invoking exceptions to this requirement for very special reasons relating to the limited nature of this rulemaking. This proceeding is designed to establish general rules that (1) outline what amount of construction work in progress the Commission will consider for inclusion in any public utility's rate base, and (2) specify the information that a utility must file in support of its application for CWIP in rate base. However, the rule adopted here is intended to be in effect for an interim period, while the Commission studies the issues relating to certain potential anticompetitive effects of the rule that formed the basis for the court's remand in the *Mid-Tex* decision. The Commission is initiating a public comment process to consider the issues presented by the court and outlined in this preamble. Second, the fundamental approach to including CWIP in rate base has been investigated by the Commission in an extensive prior proceeding. The *Mid-Tex* court recognized, in substantial measure, not only the legitimacy of the Commission's objectives but the support that it had for its methods of accomplishing those objectives. To a considerable degree, therefore, the interim rule is already supported by a broad and substantial record. Third, the Commission is making a special effort in new § 35.26(g) to minimize or eliminate any possibility of price squeeze or double whammy—the focal concerns of the *Mid-Tex* court—while the interim rule is in effect. Finally, the Commission believes that a binding rule is required to ensure rational administration of the CWIP applications in electric rate cases while it addresses itself to the court's concerns. Recognizing that it has other alternatives such as refusal to consider CWIP in rate base for the interim or consideration of CWIP on an ad hoc adjudicatory basis, the Commission prefers an interim rule that allows utilities to apply for CWIP in rates subject to specific limitations and in accordance with detailed filing requirements. Such limitations represent a concrete advantage both from the perspective of the utility and its customers.

For the above reasons, the Commission finds good cause to issue this rule without additional prior notice and comment. Pending and imminent rate applications will present the CWIP issue for Commission consideration, in suspension and final rate orders as well as in the initial decisions of administrative law judges, well before the Commission can complete the public procedures and subsequent analysis desired by the court. The public interest is best served in this instance by the promulgation of a clear generic CWIP policy that will be administered in the interim consistent with the court's concerns about the potential anticompetitive effects of including CWIP in wholesale rates. It would therefore be impracticable, in light of pending cases, and contrary to the public interest in having a clear and identifiable CWIP rule, to delay readoption of any generic rule or policy until completion of all notice and comment procedures. 5 U.S.C. 553(b)(1982).

In addition, the Commission finds good cause to make this rule effective immediately, without a 30 day delay that is generally required to allow those directly affected to adjust to a new regulation. 5 U.S.C. 553(d) (1982). In this instance, a Commission CWIP approach similar to that adopted in this order has been administered in wholesale electric rate cases for nearly three years, following an extensive notice and comment rulemaking procedure. To provide clear guidance for CWIP-related rate cases that will continue to be filed, the Commission therefore believes that the public interest is further served in reestablishing its generic CWIP policies as soon as possible. The information collection requirements are subject to review and approval under the Paperwork Reduction Act, however.

VI. Paperwork Reduction Act

The information collection provisions in this Interim Rule and Request for Comment have been submitted to the Office of Management and Budget (OMB) for its approval under the Paperwork Reduction Act [40] and OMB's

---

[38] In Order No. 298, the Commission touched briefly on the question of a utility's obligation to serve. *See* 48 FR 24,232, III FERC Statutes and Regulations (Regulations Preambles) ¶ 30,455 at 30,530, n.51

[39] With the exception of the anticompetitive procedures in § 35.26(g), the interim rule represents the same general approach, and will therefore have similar effects, as the rule adopted by Order No. 298. The Commission is therefore adopting its Order No. 298 certification under the Regulatory Flexibility Act, 5 U.S.C. 601–612, that the rule will not have a significant economic impact on a substantial number of small entities. *See* 48 FR 24,350, III FERC Statutes and Regulations (Regulations Preambles) ¶ 30,455 at 30,529–30,530. This determination was upheld by the *Mid-Tex* court. 773 F.2d at 343.

[40] 44 U.S.C. 3501–3520 (1982).

regulations.[41] Once OMB approves the information collection provisions in 18 CFR Part 35, it will assign to them one or more control numbers. The Commission will in turn publish notice that it has received OMB approval. Interested persons can obtain information on the information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 (Attention: Ellen Brown (202) 357–8272). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, D.C. 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

VII. Public Comment Procedures

Interested parties are invited to submit written comments on the interim rule to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Comments should refer to Docket No. RM86–6–000, on the outside of the envelope and on all documents submitted to the Commission. To ensure proper consideration of their comments, it is essential that persons submitting comments identify specifically the question they are addressing.

As noted, the Commission is incorporating by reference into this docket the record in the underlying Docket No. RM81–38. The Commission also incorporates by reference the record in the Docket No. RM85–17 Notice of Inquiry proceedings,[42] particularly those comments concerning price squeeze and competition in the electric utility industry.[43] Any party may reference comments or portions of comments in Docket No. RM81–38, as well as in Docket No. RM85–17, to the extent deemed necessary. However, the Commission will require that persons referring to comments filed in Docket No. RM81–38 or Docket No. RM85–17 also file copies of the relevant portions of those comments in this docket in order to facilitate the Commission's review.

When persons submitting comments urge an approach different from the interim rule, a specific alternative provision with appropriate legal or empirical support should be submitted. Fourteen copies should be submitted with the original.

To facilitate the Commission's analysis, the Commission urges commenters to provide a 3–5 page executive summary of their positions on the issues raised. Additionally, commenters should double space their comments, provide a concise description identifying themselves, use the same numbering system as this preamble when answering questions, and indicate by "N/A" when they have not answered a question. Each answer should start at the beginning of a new page.

All comment received by the Commission by May 5, 1986, will be considered prior to the promulgation of a final rule. Reply comments received by the Commission by June 4, 1986, will be considered prior to the promulgation of a final rule. Reply comments should be so identified and conform to all requirements applicable to initial written comments. Copies of the written comments may be obtained from the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C., 20426. Comments are available for public inspection during business hours at the same location. Copies of comments will be available for purchase.

Filing of rate schedules.

VIII. Commission Order

In consideration of the foregoing, the Commission, effective immediately:

A. Readopts § 35.13(h)(7), (h)(13), (h)(38), as they currently appear in Part 35, Chapter I, Title 18, Code of Federal Regulations; and

B. Amends Part 35, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

By the Commission.
Kenneth F. Plumb,
Secretary.

PART 35—FILING OF RATE SCHEDULES

1. In Part 35, the authority citation continue to read as follows:

Authority: Federal Power Act, 16 U.S.C. 791–828c; Department of Energy Organization Act, 42 U.S.C. 7101–7352; Executive Order No. 12009,, 3 C.F.R. 142 (1978).

2. Section 35.26 is revised to read as follows:

§ 35.26 Construction work in progress.

(a) Applicability. This section applies to any rate sechedule filed under this part by any public utility as defined in subsection 201(e) of the Federal Power Act.

(b) *Definitions.* for purposes of this section

(1) "Construction work in progress" or "CWIP" means any expenditure for public utility plant in process of construction that is properly included in Accounts 107 (construction work in progress) and 120.1 (nuclear fuel in process of refinement, conversion, enrichment, and fabrication) of Part 101 of this chapter, the Uniform system of Accounts Prescribed for Public Utilities and Licensees Subject to the Provisions of the Federal Power Act (Major and Nonmajor).

(2) "Pollution control facility" means an identifiable structure or portions of a structure that is designed to reduce the amount of pollution produced by the power plant, but does not include any facility that reduces pollution by substituting a different method of generation or that generates the additional power necessitated by the operation of a pollution control facility.

(3) "Fuel conversion facility" means any addition to public utility plant that enables a natural gas-burning plant to convert to the use of other fuels, or that enables an oil-burning plant to convert to the use of other fuels, other than natural gas. Such facilities include those that alter internal plant workings, such as oil or coal burners, soot blowers, bottom ash removal systems and concomitant air pollution control facilities, and any facility needed for receiving and storing the fuel to which the plant is being converted, which facility would not be necessary if the plant continued to burn gas or oil.

(4) "Double whammy" means a situation which may arise, when a wholesale electric rate customer embarks upon or participates in a construction program of its own to supply itself with all or a portion of its future power needs, thereby reducing its future dependence on the CWIP of the rate applicant, but is simultaneously forced to pay to the CWIP rate applicant the CWIP portion of the wholesale rates that reflects existing levels of service or a different anticipated service level.

(c) *General rule.* For purposes of any initial rate schedule or any rate schedule change filed under § 35.12 or § 35.13 of this part, a public utility may include in its rate base any costs of construction work in progress (CWIP), including allowance for funds used during construction (AFUDC), as provided in this section.

(1) *Pollution control facilities.* (i) Any CWIP for pollution control facilities allocable to electric power sales for resale may be included in the rate base of the public utility. (ii) In determining whether a facility is a pollution control facility for purpose of this section, the Commission will consider:

(A) Whether such facility is the type facility described in the Internal Revenue Service laws, 26 U.S.C. 169(d)(1), as follows: "a new identifiable treatment facility which is used. . . to abate or control water or atmospheric pollution or contamination by removing, altering, disposing, storing, or preventing the creation or emmission of pollutions, contaminants, wastes or heat";

(B) Whether such facility has been certified by a local, state, or federal agency as being in conformity with, or required by, a program of pollution control;

(C) Whether such facility is the type facility described in the schedule of "Environmental Protection Facilities," sections 4(A) through 4(D), page 428, FERC Form No. 1, Anual Report of Electric Utilities, Licensees and Other (Major and Nonmajor) (Revised 12–85); and

(D) Other evidence showing that such facilities are for pollution control.

(2) *Fuel conversion facilities.* Any CWIP for fuel conversion facilites allocable to electric power sales for resale may be included in the rate base of public utility.

(3) *Other CWIP.* Not more than 50 percent of any CWIP allocable to electric power sales for resale not othewise included in rate base under paragraphs (c)(1) and (2) of this section, may be included in the rate base of the public utility.

(d) *Effective date.* If a public utility proposes in its filed rates to include CWIP in rate base under this section, that portion of the rate related to CWIP is collectable at the time the general rate becomes effective pursuant to Commission order, whether or not

subject to refund, except as provided in paragraph (g) below.

(e) *Discontinuance of AFUDC.* On the date that any proposed rate that includes CWIP in rate base becomes effective, the public utility must discontinue the capitalization of any AFUDC related to those amounts of CWIP in rate base.

(f) *Accounting Procedures.* At the time that a public utility files to include CWIP in rate base pursuant to this section, it must propose accounting procedures in that rate schedule filing that:

(1) Ensure that wholesale customers will not be charged for both capitalized AFUDC and corresponding amounts of CWIP proposed to be included in rate base; and

(2) Ensure that wholesale customers will not be charged for any corresponding AFUDC capitalized as a result of different accounting or ratemaking treatments accorded CWIP by state or local regulatory authorities.

(g) *Anticompetitive Procedures*

(1) If a utility requests CWIP pursuant to § 35.26(c)(3) and, on the basis of past experience or advance communication should reasonably anticipate that one or more of its wholesale customers may raise price squeeze or double whammy objections as a direct result of such CWIP, the utility must address these matters in its filing and suggest measures to mitigate such objections.

(2) If an intervenor in its initial pleading alleges that a price squeeze will occur as a direct result of the utility's request for CWIP pursuant to § 35.26(c)(3), and makes a concrete, substantial showing that it is likely to incur imminent, irreparable harm if such CWIP is allowed, the Commission may consider preliminary relief at the suspension stage of the case pursuant to paragraph (5) of this section.

(3) If an intervenor in its initial pleading alleges that a double whammy will occur as a direct result of the utility's request for CWIP pursuant to § 35.26(c)(3), and makes a concrete, substantial showing that it is likely to incur imminent, irreparable harm if such CWIP is allowed, the Commission may consider preliminary relief at the suspension stage of the case pursuant to paragraph (5) of this section.

(4) In order to request CWIP pursuant to § 35.26(c)(3), a utility must, in addition to any other requirements, also provide a positive demonstration that the wholesale customers' demands were a significant factor in the utility's decision to build the facilities for which such CWIP is requested or other justification for assessing the particular share of CWIP to such customers.

(5) Where an intervenor meets the requirements of paragraphs (g)(2) or (g)(3) of this section, the Commission, depending on the type of showing made including the likelihood, immediacy, and severity of any anticompetitive harm, may:

(i) Suspend the entire rate increases or the CWIP portion for up to five months;

(ii) Allow such CWIP only prospectively from the issuance of a final order on rehearing; or

(iii) Take such other action as is proper under the circumstances.

BILLING CODE 6717-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Parts 141 and 152

[T.D. 86–56]

Entry of Merchandise Imported From Countries Imposing Export Restrictions

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Policy.

SUMMARY: In recent years, importers of merchandise from countries which impose minimum price requirements to obtain quota or permission to export have been importing such merchandise using documents procured from the government of the country of origin by means of fraud or false statements. The documents in question are usually "visaed invoices" (an invoice stamped with or otherwise recording export approval by an appropriate authority of the government of the country of origin), where the export approval was based on false (inflated or deflated) merchandise values supplied by the exporter and set forth on the invoice. The acceptance of these documents by Customs is inconsistent with the requirement, under the law and regulations, that the invoice set forth the purchase price of the merchandise, and is precluded by the regulations, which call for the rejection of any documents which appear, or are known, to be erroneous. Customs will adhere to the law and regulations.

EFFECTIVE DATE: The policy will become effective with respect to all merchandise entered or withdrawn from warehouse for consumption on or after May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Bruce Shulman, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC. 20229 (202–566–2938).

---

[41] 5 CFR 1320.14 (1985).

[42] Docket No. RM85–17–000 (Phase I and Phase II), *Regulation of Electricity Sales-for-Resale and Transmission Service,* 50 FR 23445 (1985), and 50 FR 27604 (1985).

[43] Docket No. RM85–17 is a more comprehensive examination of how the Commission's policies promote, or impede, efficiencies in electricity markets. Here, the intended focus is much more narrow. In particular, the Commission is concerned with the effects of its *CWIP* policies on competition at the wholesale and retail levels, how these policies should be affected by the objectives of other regulatory agencies, and any credible attempts to quantify the relative positive effects of CWIP versus the potential anticompetitive consequences. The Commission does not believe that the Notice of Inquiry in any way limits the Commission's policy review of competition in this rulemaking or that this proceeding will limit in any way the Commission's review in that inquiry. Rather, the two processes, each of which has distinctive advantages as vehicles for reviewing the Commission's role in fostering competition in the electric industry, are essentially complementary.

VOL 51 ISS 44 MR 6 1986 UMI

SUPPLEMENTARY INFORMATION

Background

In recent years, certain importers of merchandise from countries which impose export restrictions on such merchandise (an export quota, for example) have gained export approval from the government of the country of origin by means which result in the presentation to Customs, upon the entry of the merchandise into the U.S., of documents—usually "visaed invoices"—which contain false statements. A "visaed invoice" is an invoice which is stamped with or otherwise signifies the export approval of the appropriate government authority in the country of origin but, in the situations in question, such approval is premised on false (inflated or deflated) merchandise values set forth in the invoice by the exporter.

For example, the exporter and the U.S. importer may agree on a unit price of $10 for merchandise which the government of the country of origin will not approve for export to the U.S. at a unit price of less than $20. To obtain export approval, therefore, the exporter prepares an invoice setting forth a unit price of $20 for the merchandise; the appropriate authority of the government of the country or origin, based on the invoice information, stamps the invoice or otherwise signifies its approval for the export of the merchandise to the U.S. This document is required to be presented to Customs upon the entry of the merchandise into the U.S. and becomes a part of the entry package.

In many instances, the importer—for duty purposes—will allege the existence of a lower selling price than that recorded on the invoice, offering other evidence of the actual selling price, including: (1) A second invoice prepared by the exporter showing the actual selling price, and evidence of payment by the importer of the latter price; (2) evidence of receipt of a refund from the exporter in an amount of the difference between the invoice price and the actual agreed-upon selling price; or (3) evidence that the "overpayment" to the exporter per the inflated invoice price has been used to create an artificially low priice for other goods shipped to the importer (other merchandise not subject to the same export restrictions). Although many importers have revealed the actual purchase details to Customs (in order to avoid any overayment of duty, to avoid a possible penalty assessment for presenting Customs with a document known to contain false information, or for other reasons), others may not have done so—electing instead to pay the additional duty and to accept the risk of penalties in an effort to facilitate the processing of the entry by Customs.

Section 484(a), Tariff Act of 1930, as amended (19 U.S.C. 1484(a)), requires that importers file with Customs documentation which, among other things, allows Customs "to assess properly the duties on the merchandise, [and] collect accurate statistics with respect to the merchandise * * *." Clearly, an invoice which sets forth a false purchase price does not satisfy this requirement. Equally clearly, such an invoice fails the requirement imposed by 19 U.S.C. 1481(a)(5), that each invoice of imported merchandise set forth "[t]he purchase price of each item * * *." These requirements are confirmed in the corresponding implementing regulations (*e.g.*, §§ 141.81, 141,83 and 141.86, Customs Regulations, 19 CFR 141.81, 141,83, and 141.86). Sections 141.61(e)(4) and 141.64, Customs Regulations (19 CFR 141.61(e)(4) and 141.64), provide that Customs shall not accept entry and entry summary documentation which clearly appears, or is known by Customs, to be erroneous.

Action

On or after the effective date of this document, any differences or inconsistencies in the information contained in documents presented to Customs in connection with the importation of merchandise shall be considered as an indication that one or more of such documents contains false or erroneous information. In such circumstances, the entry documentation will not be accepted by Customs but will instead be returned to the importer for correction.

In situations where the visaed invoice or document presented to Customs (and necessary for the entry of the merchandise) contains erroneous value or price information, such invoice or document can only be corrected by the presentation to Customs of a new, corrected invoice or document stamped with the visa of the government of the country of origin. Customs will not accept pro forma invoices in any case involving apparent differences in price or value information in the documents required to be submitted to Customs and which involve the production of a document which is required to contain a foreign country's visa.

Customs will fully investigate any suspected attempts to circumvent the foregoing policy, including unusual resales and the submission of other entry documentation corroborating the value or price information set forth in a visa document and otherwise suspected to be false. In appropriate circumstances, Customs will initiate actions under the civil and criminal penalty statutes it administers, including but not limited to 19 U.S.C. 1592, 18 U.S.C. 542, and 18 U.S.C. 1001.

Previous Customs Rulings

To the extent that any ruling previously issued by Customs, including those discussing whether a transaction value exists in situations similar to those described above, may have indicated that entry documentation containing inconsistencies or differences in price or value information would be accepted by Customs (either because the ruling failed to address the acceptability of such documentation or otherwise), those rulings are hereby amended and modified to conform with the policy hereinabove set forth.

Dated: February 20, 1986.

William von Raab,

Commissioner of Customs.

Francis A. Keating, II,

Assistant Secretary of the Treasury.

[FR Doc. 86-4910 Filed 3-5-86; 8:45 am]

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Change of Sponsor

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect the change of sponsor of two new animal drug applications (NADA's) from Vitamin Premixers of Omaha (V.P.O., Inc.) to SmithKline Animal Health Products, Division of SmithKline Beckman Corp.

EFFECTIVE DATE: March 6, 1986.

FOR FURTHER INFORMATION CONTACT: David L. Gordon, Center for Veterinary Medicine (HFV-238), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6243.

SUPPLEMENTARY INFORMATION: SmithKline Animal Health Products, Division of SmithKline Beckman Corp., 1600 Paoli Pike, P.O. Box 2650, West Chester, PA 19380, has informed FDA that it has acquired ownership of two new NADA's from Vitamin Premixers of Omaha (V.P.O., Inc.) (NADA 98-431, tylosin; and NADA 100-127, tylosin/

sulfamethazine). V.P.O., Inc. has confirmed the sale. This change of sponsor does not involve any changes in manufacturing facilities, equipment, procedures, or production personnel. The regulations providing for use of the premixes are amended to reflect the change of sponsor.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343-351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

§ 558.625 [Amended]

2. In § 558.625 *Tylosin* in paragraph (b)(25) by removing the sponsor number "043743" and inserting in its place "000007".

§ 558.630 [Amended]

3. In § 558.630 *Tylosin and sulfamethazine* in paragraph (b)(3) by removing the sponsor number "043743" and adding in numerical sequence "000007".

Dated: February 26, 1986.

Marvin A. Norcross,

Acting Associate Director for New Animal Drug Evaluation.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 938

Pennsylvania Permanent Regulatory Program; Correction

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule; correction.

SUMMARY: This document corrects letter designations of two subchapters of the Pennsylvania permanent program regulations printed in the **Federal Register** notice published February 19, 1986, which announced the approval of a program amendment to the State of Pennsylvania's permanent regulatory program (51 FR 5997).

The corrections pertain to 30 CFR 938.15(j) which codified the approval of an amendment to the Pennsylvania code of regulations.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Biggi, Director, Harrisburg Field Office, Office of Surface Mining, 101 South 2nd Street, Suite L-4, Harrisburg, Pennsylvania 17101.

Dated: February 27, 1986.

Brent Wahlquist,

Assistant Director, Program Operations.

PART 938—PENNSYLVANIA

1. The authority citation for Part 938 continues to read as follows:

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. 30 CFR 938.15(j) is correctly revised as follows:

§ 938.15 Approval of regulatory program amendments.

* * * * *

(j) The following amendment submitted to OSMRE on September 5, 1985 is approved effective February 19, 1986: Act 158 of 1984; Subchapter F of Chapter 87 and Subchapter G of Chapter 88 of the Pennsylvania code of regulations; letters from the Pennsylvania Deputy General Counsel and the First Deputy Attorney General to Rebecca W. Hanmer, Director, Office of Water Enforcement Permits, U.S. EPA, dated July 8, 1985, and August 19, 1985, respectively.

[FR Doc. 86-4855 Filed 3-5-86; 8:45 am]

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 80

[CGD 84-091]

International Regulations for Preventing Collisions at Sea; 1972 COLREGS Demarcation Lines

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is authorized to establish identifiable lines to delineate waters upon which International Regulations for Preventing Collisions at Sea, 1972 (COLREGS) apply and waters upon which Inland Navigation Rules apply. Regulations establishing these lines were promulgated July 11, 1977. Since the establishment of these lines, geographic and marking changes have outdated descriptions contained in the regulations. The rulemaking will update all the 1972 COLREGS Demarcation Lines. The intent of this final rule is to provide accurate and current location descriptions and identification of these lines as shown on nautical charts.

EFFECTIVE DATE: April 7, 1986.

FOR FURTHER INFORMATION CONTACT: CDR Charles K. Bell, (202) 245-0106.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking was published in the **Federal Register** on September 19, 1985 (50 FR 38013), and interested parties were given until November 4, 1985, to comment. Seven comments to the proposal were received. All seven comments further updated the Demarcation Lines by identifying seven additional locations where the lines had been altered due to reference objects being destroyed or relocated. The Coast Guard has incorporated all the changes suggested by the comments. The additional changes are 33 CFR 80.135(b), 33 CFR 80.305(i), 33 CFR 80.320(a), 33 CFR 80.735(c), 33 CFR 80.830(h), 33 CFR 80.845(a), and 33 CFR 80.1160.

Drafting information: The principal persons involved in drafting this rulemaking are LCDR Charles K. Bell, Project Manager, Office of Navigation, and LT Sandra Sylvester, Office of the Chief Counsel.

Regulatory Evaluation

This final rule is considered to be non-major under Executive Order 12291 and non-significant under the DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this final rule has been found to be so minimal that further evaluation is unnecessary. This rule merely updates the 1972 COLREG Demarcation Lines. Since the impact is expected to be minimal, the Coast Guard certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 80

Navigation, Navigable waters.

For the reasons stated above, the Coast Guard is amending Title 33 CFR Part 80 to read as set forth below.

PART 80—COLREGS DEMARCATION LINES

1. The authority citation for Part 80 is revised to read as follows:

Authority: 14 U.S.C. 2; 33 U.S.C. 151(a); 49 CFR 1.46(b).

2. In § 80.115, paragraph (b) is revised to read as follows:

BEST COPY AVAILABLE

VOL 51
ISS 44
MR 6
1986
UMI

§ 80.115 Portland Head, ME to Cape Ann, MA.

* * * * *

(b) A line drawn from the southernmost tower on Gerrish Island charted in approximate position latitude 43°04.0′ N. longitude 70°41.2′ W. to Whaleback Light; thence to Jaffrey Point Light 2A; thence to the northeasternmost extremity of Frost Point.

* * * * *

3. In § 80.135, paragraph (b) is revised to read as follows:

§ 80.135 Hull, MA to Race Point, MA.

* * * * *

(b) A line drawn from Canal Breakwater Light 4 south to the shoreline.

4. In § 80.145, paragraph (c) is revised to read as follows:

§ 80.145 Race Point, MA to Watch Hill, RI.

* * * * *

(c) A line drawn from Sakonnet Breakwater Light 2 tangent to the southernmost part of Sachuest Point charted in approximate position latitude 41°28.5′ N. longitude 71°14.8′ W.

* * * * *

5. In § 80.305, paragraphs (h) and (i) are revised to read as follows:

§ 80.305 Watch Hill, RI to Montauk Point, NY.

* * * * *

(h) A line drawn from Threemile Harbor West Breakwater Light to Threemile Harbor East Breakwater Light.

(i) A line drawn from Montauk West Jetty Light 1 to Montauk East Jetty Light 2.

6. In § 80.310, paragraph (a) is revised to read as follows:

§ 80.310 Montauk Point, NY to Atlantic Beach, NY.

(a) A line drawn from the Shinnecock Inlet East Breakwater Light to Shinnecock Inlet West Breakwater Light 1.

* * * * *

7. In § 80.320, paragraphs (a), (b), and (c) are revised to read as follows:

§ 80.320 Sandy Hook, NJ to Cape May, NJ.

(a) A line drawn from Shark River Inlet North Breakwater Light 2 to Shark River Inlet South Breakwater Light 1.

(b) A line drawn from Manasquan Inlet North Breakwater Light 4 to Manasquan Inlet South Breakwater Light 3.

(c) A line drawn from Barnegat Inlet North Breakwater Light 4A to the seaward extremity of the submerged Barnegat Inlet South Breakwater; thence along the submerged breakwater to the shoreline.

* * * * *

8. In § 80.505, paragraphs (a) and (b) are revised to read as follows:

§ 80.505 Cape Henlopen, DE to Cape Charles, VA.

(a) A line drawn from the seaward extremity of Indian River Inlet North Jetty to Indian River Inlet South Jetty Light.

(b) A line drawn from Ocean City Inlet Light 6, 225° true across Ocean City Inlet to the submerged south breakwater.

* * * * *

9. In § 80.520, paragraph (a) is revised to read as follows:

§ 80.520 Cape Hatteras, NC to Cape Lookout, NC.

(a) A line drawn from Hatteras Inlet Lookout Tower 255° true to the eastern end of Ocracoke Island.

* * * * *

10. In § 80.525, paragraphs (d) and (f) are revised to read as follows:

§ 80.525 Cape Lookout, NC to Cape Fear, NC.

* * * * *

(d) A line drawn from the southeasternmost extremity on the southwest side of New Rives Inlet at latitude 34°31.5′ N. longitude 77°20.6′ W. to the seaward tangent of the shoreline on the northeast side on New River Inlet.

* * * * *

(f) A line drawn from the seaward extremity of the jetty on the northeast side of Masonboro Inlet to the seaward extremity of the jetty on the southeast side of the Inlet.

* * * * *

11. In § 80.712, paragraphs (a) and (f) are revised to read as follows:

§ 80.712 Morris Island, SC to Hilton Head Island, SC.

(a) A line drawn from the easternmost tip of Folley Island to the abandoned lighthouse tower on the northside of Lighthouse Inlet; thence west to the shoreline of Morris Island.

* * * * *

(f) A line drawn from the westernmost extremity of Bull Point on Capers Island to Port Royal Sound Channel Range Rear Light, latitude 32°13.7′ N. longitude 80°36.0′ W.; thence 258° true to the easternmost extremity of Hilton Head at latitude 32°13.0′ N. longitude 80°40.1′ W.

12. In § 80.727, paragraphs (d) and (g) are revised to read as follows:

§ 80.727 Cape Canaveral, FL to Miami Beach, FL.

* * * * *

(d) A north-south line (longitude 80°09.7′ W.) drawn across St. Lucie Inlet.

* * * * *

(g) A line drawn across the seaward extremity of the Boynton Inlet Jetties.

* * * * *

13. In § 80.735, paragraphs (a) and (c) are revised to read as follows:

§ 80.735 Miami, FL to Long Key, FL.

(a) A line drawn from the southernmost extremity of Fisher Island 212° true to the point latitude 25°45.2′ N. longitude 80°08.6′ W. on Virginia Key.

* * * * *

(c) A line drawn from Cape Florida Light to Biscayne Channel Light 8; thence to the northernmost extremity on Soldier Key.

* * * * *

14. Section 80.740 is revised to read as follows:

§ 80.740 Long Key, FL to Cape Sable, FL.

A line drawn from the radar dome charted on Long Key at approximate position latitude 24°48.8′ N longitude 80°49.6′ W. to Long Key Light 1; thence to Arsenic Bank Light 1; thence to Arsenic Bank Light 2; thence to Sprigger Bank Light 5; thence to Schooner Bank Light 6; thence to Oxfoot Bank Light 10; thence to East Cape Light 2; thence through East Cape Daybeacon 1A to the shoreline at East Cape.

15. In § 80.745, paragraph (a) is revised to read as follows:

§ 80.745 Cape Sable, FL to Cape Romano, FL.

(a) A line drawn following the general trend of the mainland, highwater shoreline from Cape Sable at East Cape to Little Shark River Light 1; thence to westernmost extremity of Shark Point; thence following the general trend of the mainland, highwater shoreline crossing the entrances of Harney River, Broad Creek, Broad River, Rodgers Rives First Bay, Chatham River, Huston River, to the shoreline at coordinate latitude 25°41.8′ N. longitude 81°17.9′ W.

* * * * *

16. In § 80.748, paragraph (d) is revised to read as follows:

§ 80.748 Cape Romano, FL to Sanibel Island, FL.

* * * * *

(d) A line from the seaward extremity of Gordon Pass South Jetty 014° true to the shoreline at approximate coordinate latitude 26°05.7′ N. longitude 81°48.1′ W.

* * * * *

17. In § 80.750, paragraph (k) is revised to read as follows:

§ 80.750 Sanibel Island, FL to St. Petersburg, FL.

* * * * *

(k) A line drawn from the northernmost extremity of Mullet Key across Bunces Pass and South Channel to Pass-a-Grille Channel Light 8; thence to Pass-a-Grille Channel Daybeacon 9; thence to the southwesternmost extremity of Long Key.

18. In § 80.753, paragraph (d) is revised to read as follows:

§ 80.753 St. Petersburg, FL to the Anclote, FL.

* * * * *

(d) A line drawn from the northernmost extremity of Honeymoon Island to Anclote Anchorage South Entrance Light 7; thence a straight line through Anclote River Cut B Range Rear Light to the shoreline.

19. In § 80.757, paragraphs (d) and (h) are revised to read as follows:

§ 80.757 Suncoast Keys, FL to Horseshoe Point, FL.

* * * * *

(d) A north-south line drawn through the Cross Florida Barge Canal Daybeacon 48 across the canal.

* * * * *

(h) A north-south line drawn through Suwannee River Wadley Pass Channel Daybeacons 30 and 31 across the Suwannee River.

20. In § 80.805, paragraph (c) is revised to read as follows:

§ 80.805 Rock Island, FL to Cape San Blas, FL.

* * * * *

(c) A line drawn from St. Mark's (Range Rear) Light to St. Mark's Channel Light 11; thence to the southernmost extremity of Live Oak Point; thence in a straight line through Shell Point Light to the southernmost extremity of Ochlockonee Point; thence to Bald Point along longitude 84°20.5′ W.

* * * * *

21. In § 80.810, paragraphs (a), (b) and (g) are revised to read as follows:

§ 80.810 Cape San Blas, FL to Perdido Bay, FL.

(a) A line drawn from St. Joseph Bay Entrance Range A Rear Light through St. Joseph Bay Entrance Range B Front Light to St. Joseph Point.

(b) A line drawn across the mouth of Salt Creek as an extension of the general trend of the shoreline to continue across the inlet to St. Andrews sound in the middle of Crooked Island.

* * * * *

(g) An east-west line drawn from Fort McRee Leading Light across the Pensacola Bay Entrance along latitude 30°19.5′ N.

* * * * *

22. In § 80.815, paragraph (b) is revised to read as follows:

§ 80.815 Mobile Bay, AL to the Chandeleur Island, LA.

* * * * *

(b) A line drawn from Mobile Point Light to Dauphin Island Channel Light No. 1 to the eastern corner of Fort Gaines at Pelican Point.

* * * * *

23. In § 80.825, paragraphs (b) and (c) are revised to read as follows:

§ 80.825 Mississippi Passes, LA.

* * * * *

(b) A line drawn from coordinate latitide 29°21.5′ N. longitude 89°11.7′ W. following the general trend of the seaward, highwater shoreline in a southeasterly direction to coordinate latitude 29°15.3′ N. longitude 89°06.5′ W.; thence to coordinate latitude 29°13.3′ N. longitude 89°01.7′ W. located on the northwet bank of North Pass.

(c) A line drawn from coordinate latitude 29°13.0′ N. longitude 89°01.3′ W., to coordinate latitude 29°12.7′ N. longitude 89°00.9′ W.; thence to coordiante latitude 29°10.6′ N. longitude 88°59.8′ W.; thence to coordinate latitude 29°03.5′ N. longitude 89°03.7′ W.; thence to Mississippi River South PAss East Jetty Light 4.

* * * * *

24. In § 80.830, paragraphs (c), (e) and (h) are revised to read as follows:

§ 80.830 Mississippi Passes, LA to Point Au Fer, LA.

* * * * *

(c) An east-west line drawn from the westernmost extremity of Grand Terre Islands in the direction of 194° true to the Grand Isle Fishing Jetty Light.

* * * * *

(e) A line drawn from the westernmost extremity of the Timbalier Island to the easternmost extremity of Isles Dernieres.

* * * * *

(h) A line drawn on an axis of 103° true through Taylors Bayou Entrance Light 2 across the entrances to Jack Stout Bayou, Taylors Bayou, Pelican Pass, and Bayou de West.

25. In § 80.835, paragraphs (a) through (f) are revised to read as follows:

§ 80.835 Point Au Fer, LA to Calcasieu Pass, LA.

(a) A line drawn from Point Au Fer to Atchafalaya Channel Light 34, to Point Au Fer Reef Light 33; thence to Atchafalaya Bay Pipeline Light D latitude 29°25.0′ N. longitude 91°31.7′ W.; thence to Atchafalaya Bay Light 1 latitude 29°25.3′ N. longitude 91°35.8′ W.; thence to South Point.

(b) Lines following the general trend of the highwater shoreline drawn across the bayou and canal inlets from the Gulf of Mexico between South Point and Calcasieu Pass except as otherwise described in this section.

(c) A line drawn on an axis of 140° true through Southwest Pass Vermillion Bay Light 4 across Southwest Pass.

(d) A line drawn across the seaward extremity of the Freshwater Bayou Canal Entrance Jetties.

(e) A line drawn from Mermentau Channel East Jetty Light 6 to Mermentau Channel West Jetty Light 7.

(f) A line drawn from the radio tower charted in approximate position latitude 29°45.7′ N. longitude 93°06.3′ W. 115° true across Mermentau Pass.

* * * * *

26. In § 80.845, paragraph (a) is revised to read as follows:

§ 80.845 Galveston, TX to Freeport, TX.

(a) A line drawn from Galveston North Jetty Light 6A to Galveston South Jetty Light 5A.

* * * * *

27. In § 80.850, paragraph (c) is revised to read as follows:

§ 80.850 Brazos River, TX to the Rio Grande, TX.

* * * * *

(c) A line drawn from the seaward tangent of Matagorda Peninsula at Decros Point to Matagorda Light.

* * * * *

28. Section § 80.1110 is revised to read as follows:

§ 80.1110 San Diego Harbor, CA.

A line drawn from Zuniga Jetty Light "V" to Zunige Jetty Light "Z"; thence to Point Loma Light.

27. In § 80.1135, paragraph (a) is revised to read as follows:

§ 80.1135 San Pedro Bay—Anaheim Bay, CA.

(a) A line drawn across the seaward extremities of the Anaheim Bay Entrance Jetties; thence to Long Beach Breakwater East End Light 1.

* * * * *

28. Section 80.1160 is revised to read as follows:

§ 80.1160 Ventura Marina, CA.

A line drawn from Ventura Marina South Jetty Light 6 to Ventura Marina Breakwater South Light 3; thence to Ventura Marina North Jetty Light 7.

VOL
51
ISS
44
MR
6
1986
UMI

29. Section 80.1226 is revised to read as follows:

§ 80.1226 Santa Cruz Harbor, CA.

A line drawn from the seaward extremity of the Santa Cruz Harbor East Breakwater to Santa Cruz Harbor West Breakwater Light.

30. Section 80.1230 is revised to read as follows:

§ 80.1230 Pillar Point Harbor, CA.

A line drawn from Pillar Point Harbor Light 6 to Pillar Point Harbor Entrance Light.

31. Section 80.1275 is revised to read as follows:

§ 80.1275 Crescent City Harbor, CA.

A line drawn from Crescent City Entrance Light to the southeasternmost extremity of Whaler Island.

32. Section 80.1305 is revised to read as follows:

§ 80.1305 Chetco River, OR.

A line drawn across the seaward extremities of the Chetco River Entrance Jetties.

33. Section 80.1310 is revised to read as follows:

§ 80.1310 Rogue River, OR.

A line drawn across the seaward extremities of the Rogue River Entrance Jetties.

34. Section 80.1315 is revised to read as follows:

§ 80.1315 Coquille River, OR.

A line drawn across the seaward extremities of the Coquille River Entrance Jetties.

35. Section 80.1320 is revised to read as follows:

§ 80.1320 Coos Bay, OR.

A line drawn across the seaward extremities of the Coos Bay Entrance Jetties.

36. Section 80.1325 is revised to read as follows:

§ 80.1325 Umpqua River, OR.

A line drawn across the seaward extremities of the Umpqua River Entrance Jetties.

37. Section 80.1330 is revised to read as follows:

§ 80.1330 Siuslaw River, OR.

A line drawn across the seaward extremities of the Siuslaw River Entrance Jetties.

38. Section 80.1340 is revised to read as follows:

§ 80.1340 Yaquina Bay, OR.

A line drawn across the seaward extremities of the Yaquina Bay Entrance Jetties.

39. Section 80.1355 is revised to read as follows:

§ 80.1355 Tillamook Bay, OR.

A line drawn across the seaward extremities of the Tillamook Bay Entrance Jetties.

40. Section 80.1375 is revised to read as follows:

§ 80.1375 Grays Harbor, WA.

A line drawn across the seaward extremities (above water) of the Grays Harbor Entrance Jetties.

41. Section 80.1460 is revised to read as follows:

§ 80.1460 Kahului Harbor, Maui, HI.

A line drawn from Kahului Harbor Entrance Breakwater Light 1 to Kahului Harbor Entrance Breakwater Light 2.

Dated: March 3, 1986.

T.J. Wojnar,

Rear Admiral, U.S. Coast Guard, Office of Navigation.

BILLING CODE 4910-14-M

---

33 CFR Part 117

[CGD8-85-18]

Drawbridge Operation Regulations; Bayou LaBatre, AL

AGENCY: U.S. Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the City of Bayou LaBatre and the Alabama Highway Department (AHD), the Coast Guard is changing the regulation governing the operation of the lift span bridge on St. Hwy. 188 over Bayou LaBatre, mile 2.3 at Bayou LaBatre, Mobile County, Alabama, by permitting the draw to remain closed from 8 p.m. to 4 a.m. daily, and from 7:00–8:00 a.m. and 2:15–3:30 p.m. from September 15 through June 15. The bridge will open on signal outside these hours. Presently, the draw is closed from 7:30–8:30 a.m. and 3–4:30 p.m. Monday through Friday except Federal holidays, throughout the year. This change is being made because there have been no openings for navigation between 8 p.m. and 4 a.m. since 1955, and because there is no need to close the draw on weekdays while area schools are not in session. This action will relieve the bridge owner of the burden of having a person available at the bridge during the closure periods, and still provide for the reasonable needs of navigation.

EFFECTIVE DATE: This regulation becomes effective on April 7, 1986.

FOR FURTHER INFORMATION CONTACT: Perry Haynes, Chief, Bridge Administration Branch, telephone (504) 589-2965.

SUPPLEMENTARY INFORMATION: On November 21, 1985 the Coast Guard published a proposed rule (50 FR 48099) concerning this amendment. The Commander, Eighth Coast Guard District, also published the proposal as a public notice dated 3 December 1985. In each notice interested persons were given until 6 January 1986 to submit comments.

Drafting Information

The drafters of this regulation are Perry Haynes, project officer, and Lieutenant Commander James Vallone, project attorney.

Discussion of Comments

Three letters were received in response to the public notice. Two offered no objections to the proposal. The third, from a small shipbuilding and repair facility located upstream of the bridge, suggested alternative bridge closure periods to permit its employees uninterrupted use of the bridge. In a subsequent meeting with the applicants, shipyard representatives stated acceptance of the proposed closure periods.

Economic Assessment and Certification

This regulation is considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this regulation has been found to be so minimal that a full regulatory evaluation is unnecessary. The basis for this conclusion is that the regulation merely revises the rush hour bridge closure periods to accommodate the revised school bus schedule and permits the bridge to remain closed to navigation during nighttime hours when there have been no bridge openings for navigation since 1955. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Regulation

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; and 49 CFR 1.46(c)(5) and 33 CFR 1.05-1(g).

2. Section 117.103 is revised to read as follows:

§ 117.103 Bayou LaBatre.

The draw of the S188 bridge, mile 2.3 at Bayou LaBatre, shall open on signal; except that, the draw need not be opened from 8 p.m. to 4 a.m., and from September 15 through June 15 from 7:00 to 8:00 a.m. and 2:15 to 3:30 p.m. Monday through Friday except holidays.

Dated: February 21, 1986.

Clyde T. Lusk, Jr.,

Rear Admiral, U.S. Coast Guard, Commander Eighth Coast Guard District.

BILLING CODE 4910-14-M

VETERANS ADMINISTRATION

38 CFR Part 36

Decrease in Maximum Permissible Interest Rates on Guaranteed Manufactured Home Loans, Home and Condominium Loans, and Home Improvement Loans

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The VA (Veterans Administration) is decreasing the maximum interest rates on guaranteed manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans. In addition, the maximum interest rates applicable to fixed payment and graduated payment home and condominium loans, and to home improvement and energy conservation loans are also decreased. These decreases in interest rates are possible because of recent improvements in the availability of funds in various credit markets. The decrease in the interest rates will allow eligible veterans to obtain loans at a lower monthly cost.

EFFECTIVE DATE: March 3, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. George D. Moerman, Loan Guaranty Service (264), Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420 (202-389-3042).

SUPPLEMENTARY INFORMATION: The Administrator is required by section 1819(f), title 38, United States Code, to establish maximum interest rates for manufactured home loans guaranteed by the VA as he finds the manufactured home loan capital markets demand. Recent market indicators—including the prime rate, the general decrease in interest rates charged on conventional manufactured home loans, and the decrease of other short-term and long-term interest rates—have shown that the manufactured home capital markets have improved. It is now possible to decrease the interest rates on manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans while still assuring an adequate supply of funds from lenders and investors to make these types of VA loans.

The Administrator is also required by section 1803(c), title 38, United States Code, to establish maximum interest rates for home and condominium loans including graduated payment mortgage loans, and loans for home improvement purposes. Market indicators similarly favor reductions in the maximum interest rates for these types of loans. These lower interest rates should assist more veterans in the purchase of homes and condominiums or to obtain improvement loans because of the decrease in the monthly loan payments for principal and interest.

Regulatory Flexibility Act/Executive Order 12291

For the reasons discussed in the May 7, 1981 **Federal Register**, (46 FR 25443), it has previously been determined that final regulations of this type which change the maximum interest rates for loans guaranteed, insured, or made pursuant to chapter 37 of title 38, United States Code, are not subject to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601-612.

These regulatory amendments have also been reviewed under the provisions of Executive Order 12291. The VA finds that they are not "major rules" as defined in that Order. The existing process of informal consultation among representatives within the Executive Office of the President, OMB, the VA and the Department of Housing and Urban Development has been determined to be adequate to satisfy the intent of this Executive Order for this category of regulations. This alternative consultation process permits timely rate adjustments with minimal risk of premature disclosure. In summary, this consultation process will fulfill the intent of the Executive Order while still permitting compliance with statutory responsibilities for timely rate adjustments and a stable flow of mortgage credit at rates consistent with the market.

These final regulations come within exceptions to the general VA policy of prior publication of proposed rules as contained in 38 CFR 1.12. The publication of notice of a regulatory change in the VA maximum interest rates for VA guaranteed, insured or direct loans would deny veterans the benefit of lower interest rates pending the final rule publication date which would necessarily be more than 30 days after publication in proposed form. Accordingly, it has been determined that publication of proposed regulations prior to publication of final regulations is impracticable, unnecessary, and contrary to the public interest.

(Catalog of Federal Domestic Assistance Program numbers, 64.113, 64.114, and 64.119)

These regulations are adopted under authority granted to the Administrator by sections 210(c), 1803(c)(1), 1811(d)(1) and 1819 (f) and (g) of title 38, United States Code.

These decreases are accomplished by amending §§ 36.4212(a) (1), (2), and (3), and 36.4311 (a), (b), and (c) and 36.4503(a), title 38, Code of Federal Regulations.

List of Subjects in 38 CFR Part 36

Condominiums, Handicapped, Housing, Loan programs—housing and community development, Manufactured Homes, and Veterans.

Approved: February 28, 1986.

Everett Alvarez, Jr.,

Acting Administrator.

PART 36—LOAN GUARANTY

The Veterans Administration is amending 38 CFR Part 36 as follows:

1. In § 36.4212, paragraph (a) is revised as follows:

§ 36.4212 Interest rates and late charges.

(a) The interest rate charged the borrower on a loan guaranteed or insured pursuant to 38 U.S.C. 1819 may not exceed the following maxima except on loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration prior to the respective effective date. (38 U.S.C. 1819(f))

(1) Effective March 3, 1986, 12 percent simple interest per annum for a loan which finances the purchase of a manufactured home unit only.

(2) Effective March 3, 1986, 11¼ percent simple interest per annum for a loan which finances the purchase of a lot only and the cost of necessary site preparation, if any.

(3) Effective March 3, 1986, 11½ percent simple interest per annum for a loan which will finance the

VOL 51 ISS 44 MR 6 1986 UMI

simultaneous acquisition of a manufactured home and a lot and/or the site preparation necessary to make a lot acceptable as the site for the manufactured home.

* * * * *

2. In § 36.4311, paragraphs (a), (b), and (c) are revised as follows:

§ 36.4311 Interest rates.

(a) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the VA which specify an interest rate in excess of 9½ per centum per annum, effective March 3, 1986, the interest rate on any home or condominium loan, other than a graduated payment mortgage loan, guaranteed or insured wholly or in part on or after such date may not exceed 9½ per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

(b) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the VA which specify an interest rate in excess of 9¾ per centum per annum, effective March 3, 1986, the interest rate on any graduated payment mortgage loan guaranteed or insured wholly or in part on or after such date may not exceed 9¾ per centum per annum. (38 U.S.C. 1803(c)(1))

(c) Effective March 3, 1986, the interest rate on any loan solely for energy conservation improvements or other alterations, improvements or repairs, which is guaranteed or insured wholly or in part on or after such date may not exceed 11 per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

* * * * *

3. In § 36.4503, paragraph (a) is revised as follows:

§ 36.4503 Amount and amortization.

(a) The original principal amount of any loan made on or after October 1, 1980, shall not exceed an amount which bears the same ratio to $33,000 as the amount of the guaranty to which the veteran is entitled under 38 U.S.C. 1810 at the time the loan is made bears to $27,500. This limitation shall not preclude the making of advances, otherwise proper, subsequent to the making of the loan pursuant to the provisions of § 36.4511. Except as to home improvement loans, loans made by the VA shall bear interest at the rate of 9½ percent per annum. Loans solely for the purpose of energy conservation improvements or other alterations, improvements, or repairs shall bear interest at the rate of 11 percent per annum. (38 U.S.C. 1811 (d)(1) and (2)(A))

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 65

[Docket No. 9-85-31, FRL-2972-3]

Air Quality Implementation Plan: Delayed Compliance Order: Weiser Lock, Huntington Beach, CA

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: EPA hereby issues an administrative order to Weiser Lock. The Order requires the company to bring volatile organic compounds emissions from its metal parts coating lines in Huntington Beach, California into compliance with the South Coast Air Quality Management District's Rule 1107(6)(B), part of the Federally approved California State Implementation Plan (SIP). The SIP requires final compliance with Rule 1107(6)(B) by January 1, 1985. Because the company is unable to comply with these regulations at this time, the Order establishes an expeditious schedule requiring final compliance by May 1, 1986. Source compliance with the Order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act for violation of the SIP regulations covered by the Order. The proposed Order was published in the **Federal Register** on November 7, 1985. The proposed Order was agreed to and signed by the source, and was signed by the Administrator of EPA.

EFFECTIVE DATE: March 6, 1986.

FOR FURTHER INFORMATION CONTACT: Abra Bennett, Compliance Section, Air Management Division, U.S. EPA, 215 Fremont Street, San Francisco, California 94105 at (415) 974-8057.

SUPPLEMENTARY INFORMATION: Weiser Lock operates eight metal parts coating lines in Huntington Beach, California. The Order addresses volatile organic compounds (VOC) emissions from the coating lines at this facility, which are subject to the South Coast Air Quality Management District's (SCAQMD) Rule 1107, which is part of the Federally approved California SIP. Rule 1107 limits the VOC emissions from manufactured metal parts and products coatings. Rule 1107(6) specifies the date by which Weiser Lock must be in compliance with the Rule, January 1, 1985. The Order requires final compliance with Rule 1107 by September 1, 1986 by conversion to the use of complying liquid coatings or powder coatings, or by November 1, 1986 by means of the installation of an add-on control device. Weiser Lock is to continue to evaluate its compliance options until December 31, 1985, at which time it will decide whether it will be able to convert to the use of complying coatings by September 1, 1986, or must purchase an add-on control device consisting of either a thermal or catalytic incinerator or carbon adsorption system and reach final compliance by November 1, 1986. The source has consented to the terms of this Order.

The proposed Order satisfies the applicable requirements of section 113(d) of the Clean Air Act (the Act). This order being issued, source compliance with its terms will preclude further EPA enforcement action under section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcemrnt against the source under the citizen suit provisions of the Act (section 304) is similarly precluded. However, Weiser Lock has been notified that its failure to achieve final compliance by the date specified in the Order may result in a requirement to pay a noncompliance penalty under section 120 of the Act.

During a 30 day comment period following the publication of the proposed Order in the **Federal Register** on November 7, 1985, no comments were received, nor were there any requests for a public hearing on the matter.

BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 298

Vessel Obligation Guarantees; Vessel Requirements; United States Construction

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Final rule.

SUMMARY: The Maritime Administration (MARAD) is issuing this final rule under statutory authority in Title XI of the Merchant Marine Act, 1936, as amended (Act). This rule effects a change in policy concerning the so-called "Buy American" requirement. MARAD now imposes this requirement through its regulations for obtaining financial assistance in the form of Government guarantees of debt instruments (obligations). Shipowners issue these obligations to finance the construction of U.S.-flag vessels in U.S. shipyards. By amending its regulation, MARAD will allow owners of new U.S.-flag commercial ships to purchase vessels containing less costly and/or higher quality foreign-manufactured materials and components so that these ships can be more competitive with foreign flag carriers and more efficient in domestic trade operation.

DATE: This rule is effective April 7, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Norman O. Hammer, Acting Director, Office of Naval Architecture and Engineering, (202) 426-5733, or Mr. John M. Hotaling, Staff Project Engineer, (202) 426-5727. The mailing address for both is room 2103, Maritime Administration, Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590.

SUPPLEMENTARY INFORMATION:

Background

Title XI of the Act (46 U.S.C. § 1271-1279) provides authority for MARAD to give financial assistance to shipowners who are U.S. citizens and who construct vessels in U.S. shipyards and document them under U.S. laws. This financial assistance is in the form of a full faith and credit guarantee by the Government of each obligation that the shipowner undertakes to finance the construction of one or more vessels. If the shipowner defaults on the payment of principal or interest on these obligations at any time, the Government guarantees payment, in full, of the unpaid principal and interest. The existence of the guarantees generally allows owners of eligible vessels to obtain favorable interest rates on the obligations, that are secured by the vessels, for a period of up to 25 years. Under the Act, obligations may not exceed an aggregate of 87½ percent of the cost of these vessels, although the actual limit that MARAD will approve is 75 percent of the cost.

Buy American laws, policies and regulations that are implemented by government agencies were developed with the intent of protecting segments of the U.S. economy from excessive foreign competition, enabling domestic industries to be self-sustaining and ensuring an industrial base that is adequate for defense mobilization purposes. While there is no Buy American provision in Title XI of the Act, it has been MARAD's longstanding policy that one of the conditions imposed on shipowners for receipt of Title XI guarantees is compliance with a Buy American requirement. That requirement is modeled on a provision in the Act for the award of construction-differential subsidy (CDS), a program the MARAD has administered. This policy has been effected through a Title XI program regulation at 46 CFR 298.11. It provides, in part, that any vessel built with Title XI guarantees must be constructed, reconstructed or reconditioned entirely in a U.S. shipyard and, "where practicable, only from articles, materials and supplies of the growth, production or manufacture of the United States."

MARAD verifies compliance with this regulation through examination of vessel specifications, on-site inspections of the vessel and information received from interested parties, e.g., competing United States manufacturers of marine equipment and supplies. If a shipowner elects to use foreign materials or components, the cost of these items is excluded from the actual cost figure that is used as a basis for determining the maximum amount of the guarantees, unless the Secretary approves a waiver. A waiver may be based only on a finding either that the materials or articles are not available for purchase in the United States, or that use of domestically produced material or articles would cause an unreasonable delay in the ship's construction (46 CFR 298.11(a)). MARAD experience suggests that less than 10 percent of all directly purchased materials that are now used in vessels financed with Title XI guarantees are of foreign origin.

In recent years, the 100 percent Buy American requirement has caused problems for shipbuilders. It has become increasingly onerous to comply with this requirement, in part because the domestic marine supplier industry is shrinking. The reduced number of commercial vessels that are built in the United States has, in some instances, not provided a market of sufficient size to make it profitable for some domestic companies to engage in the development and manufacture of various types of marine equipment (e.g., slow-speed marine diesel engines, lifeboat engines). The result has been reduced competition, higher costs, and long delivery delays.

In some other instances, American manufacturers that traditionally geared their products to domestic markets, in which shipbuilding is only a minor part, have been unable or unwilling to produce products with the quality of foreign-built equipment, and shipbuilders have suffered a competitive penalty. Some items manufactured by domestic marine equipment companies are technically inferior to the less expensive, more sophisticated marine equipment developed by other shipbuilding nations of the world. For instance, some foreign companies produce superior ship navigation communications, and propulsion systems.

Further, sometimes an American marine equipment manufacturer becomes the sole source for a product required to have 100 percent domestic content, e.g., some medium-speed diesel engines, anchors and chains, radar, and controllable pitch propellers. Moreover, decreasing market demand for some domestic items tends to perpetuate these monopolies as long as 100 percent domestic content is required, and precludes the development of a competitive marketplace.

In summary, MARAD has concluded that the continuation of the present 100 percent Buy American regulation, which unduly inhibits the use of international marine products, would appear to be harmful to the U.S. shipbuilding industry. A less restrictive material purchasing regulation is desirable for U.S.-flag ship purchasers with Title XI guarantees as well as for domestic shipbuilders. The result will be a move toward producing more efficient, higher quality ships at a reduced cost of construction. The Title XI ships can be more competitive with foreign flag vessels in serving the foreign trades and more efficient in domestic trade operations, resulting in lower freight rates that would be reflected in the cost of both domestic and foreign goods to the U.S. consumer. Lower shipyard costs and prices can offer a chance for domestic shipyards to increase sales.

Notice of Proposed Rulemaking (NPRM)

In a NPRM published in the **Federal Register** on March 21, 1985 (50 FR 11398), MARAD proposed to relax and Buy American requirements under the Title XI program by adopting one of four alternatives. MARAD initiated this rulemaking with the intention of benefitting U.S. shipowners and shipbuilders by providing an incentive to build more efficient ships in U.S. shipyards, with the highest quality materials and state-of-the-art components, at a significantly reduced cost.

VOL 51
ISS 44
MR 6
1986
UMI

The four alternatives presented in the NPRM were:

(1) Require that each item of equipment be assembled in the United States.

(2) Allow shipyards to use foreign materials and components, not to exceed 50 percent of the total cost of the materials, and also allow United States marine equipment manufacturers to include foreign content in domestically produced equipment, not to exceed 50 percent of the cost of the materials in that equipment.

(3) Allow shipyards to use foreign materials and components, not to exceed 75 percent of the total cost of the materials, and allow United States marine equipment manufacturers to include foreign content in domestically produced equipment, not to exceed 75 percent of the cost of the materials in that equipment.

(4) Eliminate the Buy American requirements.

In the NPRM preamble's discussion of the alternatives, MARAD rejected Alternative 1 because it would be the most difficult to administer and unnecessarily costly, and isolation and assignment of the assembly process to domestic companies would be insufficient and costly.

The discussion in the NPRM of the economic impact of these alternatives contained estimates of annual savings to shipowners and shipbuilders from the adoption of any one of the other three alternatives. The estimated savings would range from about $22 to about $33 million, dependent on the alternative selected. There could be a negative impact on the domestic marine component supplier industry ranging from an estimate of up to $66 to $150 million, dependent on which alternative was selected. However, MARAD believes that, for various business reasons, the level of foreign material purchases is not likely to exceed 40 percent of material cost, irrespective of the choice of alternatives. These estimates are based on Title XI vessel orders at the fiscal 1984 level of $331 million.

Summary of Comments

MARAD received comments from 16 interested persons. Some of the comments were forwarded by members of Congress, to whom they had been directed. Six commenters opposed any relaxation of the Title XI Buy American requirements. Five favored a relaxation that would allow up to 50 percent foreign material and componentry. Five commenters argued for the total elimination of Buy American requirements.

Comments Opposing Any Relaxation of the 100 Percent

The comments opposing any relaxation of MARAD's existing requirements were submitted by: equipment suppliers; an individual shipowner that has participated in the Title XI program; and an association representing shipyards that build and repair barges for the domestic water carrier industry, vessels for the offshore service industry, towing and fishing vessels. A summary of these comments and MARAD's responses are as follows:

- A commenter argued that relaxation of the 100 percent Buy American requirement is contrary to the policy set forth in the Act to ensure an adequate domestic industrial base for defense mobilization purposes.

The Act declares a policy to foster the development and encourage the maintenance of a "merchant marine" that will be adequate to serve the nation's needs in the conduct of foreign and domestic commerce, that is capable of serving as a naval and military auxiliary in time of war or national emergency and that is supplemented by an adequate shipyard base. An initiative by MARAD that will encourage the construction of new vessels in U.S. shipyards, with state-of-the-art technology and at significantly lower cost, is certainly consistent with the commercial aspect of the policy in the Act and with ensuring an adequate domestic industrial base for defense mobilization purposes.

- Another argued that since shipbuilding involves more than the assembly of components, to truly have a shipbuilding base, the United States must retain the domestic capability to supply materials and essential equipment.

MARAD disagrees with the contention that to have a shipbuilding base, a domestic capability to supply all materials and essential equipment is required. MARAD anticipates that these items will be available to the shipyards through domestic companies, foreign subsidiaries and affiliates of domestic companies.

- Several commenters asserted that the Government should not guarantee loans that provide benefits to foreign manufacturing companies.

MARAD is convinced that expanding the market for Title XI vessel equipment to include foreign sources of supply would principally benefit U.S. shipowners and shipbuilders (and ultimately consumers) because they would be able to purchase products that are either lower in cost or of higher quality, or that possess both advantages.

- Another commenter stated that, even if there were no U.S. suppliers, there, nevertheless, would be the prospect of a sole source foreign supplier with the ability to control pricing.

MARAD believes that a sole source supplier problem is far less of a prospect where the market includes foreign companies. MARAD is hopeful that this rule, by expanding the supplier base for equipment eligible for Title XI guarantees, will foster competition and generate new Title XI shipbuilding activity.

- Several commenters argued that, while the purpose of opening our markets to foreign competition is to keep American industry competitive, it is impossible to be competitive when the foreign competition is receiving direct and indirect assistance from their governments and while the U.S. maritime industry suppliers receive no such assistance. Morever, they commented that since there are items of vessel equipment produced in the U.S. that are technically competitive with any available in the world, a price advantage would be the only reason for purchasing such items foreign.

MARAD recognizes that some foreign governments provide assistance to various industries that enhances their advantage in competing with domestic manufacturers in the U.S. market. It also agrees that price alone may dictate the foreign purchase of some vessel equipment items that are of no better quality than those of domestic origin. MARAD believes that it also has a responsibility to assist and promote the U.S. merchant marine. It believes that it will benefit the merchant marine by removing ship construction restrictions that discourage competitive pricing and quality. Moreover, it is the policy of this Administration to approach trade issues through negotiation, rather than with legislation and regulations that may help segments of U.S. industry, but hurt the general economy. Increased competition will result in better quality domestic and foreign goods. It will encourage market place choices that are based on relative cost and quality, regardless of the origin of the product.

- A commenter also alleged that relaxation of the Buy American policy would "shrink the skilled manufacturing labor base" and "reduce the U.S. labor content (American jobs)" in the supplier industry, instead of creating the additional jobs in the domestic shipbuilding sector that MARAD predicts will result from increased orders.

MARAD recognizes that this rule could (but is not expected to) result in the loss of domestic supplier industry jobs, and estimates that resulting increased shipyard and competitive activity, in general, will create additional (but fewer) jobs in the shipbuilding sector. This net loss of jobs must be viewed in light of an expected reduction in domestic shipbuilding costs of as much $33 million.

- A commenter criticized MARAD's proposal to bring its Buy American regulation "into line" with the Navy's Buy American requirements for military vessels and the Coast Guard's for coastwise (Jones Act) trade documentation, since the commenter believes those requirements do not concern the guarantee of loans for commercial ventures.

MARAD disagrees with this contention. First, it believes that its action to harmonize its rule with others will benefit shipowners in their compliance with a variety of similarly applicable shipping regulations. Further, MARAD believes that the Federal government is entitled to impose or remove conditions on the provision of financial assistance, whether it involves the total payment for Navy vessels or obligation guarantees for Title XI commercial vessels. Furthermore, many of the coastwise trade vessels referred to by the commenter are Title XI commercial vessels.

- Another commenter stated that any relaxation of the Buy American requirement would penalize shipowners who made commitments prior to this rulemaking. It argued that, in the past, it has built ships for the domestic trade with Title XI obligation guarantees and it elected to use foreign materials that were not subject to a waiver. Therefore, the cost of those foreign materials was not includable in the actual cost used as the basis for determining the maximum amount of guarantees. The commenter further contended that owners should be allowed to use foreign materials, but should not be allowed to use Title XI benefits to do so.

MARAD believes that the commenter's description of its prior purchases of better quality foreign materials, without benefit of guarantees, supports the agency's rationale in revising the requirements. The purchase of foreign goods should not be denied to shipowners when they may be superior in quality or lower in cost than domestic items. Moreover, if a shipowner is unable to lower costs through foreign purchases due to Title XI restrictions, healthy competition will not develop. Again, MARAD intends to finance the construction of U.S. ships built with the highest quality, lowest cost equipment available in the international market. That is MARAD's primary purpose in revising its rule.

That commenter also submitted a cost analysis that reflected an even greater cost saving under three of the regulatory alternatives than that estimated by MARAD in its Preliminary Regulatory Impact Analysis (14.4% v. 8.5% for 50% foreign, 16.8% v. 9% for 75% foreign and 17.5% v. 10% for no Buy American requirements). However, the commenter rejected MARAD's conclusion that adoption of any of the alternatives to a 100 percent Buy American requirement will produce higher quality ships at lower cost.

MARAD's initial expectation of reduced ship prices was based upon its general experience with purchases of materials under the CDS program. For a major vessel type (e.g. oceangoing tanker), MARAD assumed that between 71 and 76 percent of the required material would be procured foreign if shipowners and builders were permtted to freely purchase from any source. There are certain materials for which there appears to be little or no savings available through foreign procurement. In those cases, American companies would be viable resources. On an overall basis, MARAD assumed foreign material prices to be about 70 percent of U.S. cost and allowed 10 percent of the foreign price as an additional cost for import duties and extra ocean freight.

By allowing for ocean freight costs, MARAD was more conservative in its consideration of potential savings to be achieved from anticipated foreign purchases. Therefore, the Preliminary Regulatory Impact Analysis for the NPRM reached a different conclusion than did the commenter. After isolating the elements that MARAD factored into the foreign cost and comparing it to the commenter's estimated costs, e.g., "0.77 for 0.65", a lower savings of only 9.15 percent is computed instead of 14.4 percent for materials that are 75 percent foreign in origin. A savings of 10.95 percent is computed instead of 16.8 percent for materials that are 94 percent foregn in origin.

MARAD attempted to analyze the percentage of foreign components presently being procured under Title XI construction and discounted the savings generated from that portion of the material. Its review of a number of Title XI projects suggested that presently less than 10 percent of all direct purchase materials presently come from foreign sources. It further concluded that it would be unlikely that allowing guarantees for foreign material would reduce ship prices by much more than 10 percent.

- Another commenter compared MARAD's proposal to Coast Guard's NPRM allowing government-subsidized foreign laboratories to carry out preapproval testing and inspection of lifesaving equipment. It claimed that both would benefit foreign manufacturers while harming domestic suppliers.

As stated in the NPRM, this rule could have some adverse effects on the ability of some domestic businesses to compete with foreign businesses in the United States marine equipment market. However, MARAD believes a less restrictive rule is desirable for U.S.-flag ship purchasers with Title XI guarantees, as well as for domestic shipbuilders. The result will be a move toward producing more efficient, higher quality ships at a reduced cost of construction.

Comments on the 50 and 75 Percent Alternatives

Five commenters favored the alternative that would allow up to 50 percent foreign material content on Title XI vessels. Two of these, representing shipbuilding interests, cited the need for an adequate defense mobilization base. However, they stated a willingness to accept this alternative, or a modification thereof, as a compromise, rather than see the total demise of the Buy American requirement. Summaries of these comments, with MARAD's responses, follow:

- One commenter claimed that Coast Guard's recent rulemaking to eliminate the 50 percent domestic component requirement for vessels documented for the coastwise trade "was a unilateral move made without a thorough evaluation of its impact, and should not be taken as precedence."

The Coast Guard observed the notice and public comment requirements of the Administrative Procedure Act (5 U.S.C. 553) in promulgating its rule. The subject Coast Guard rule, which eliminated the requirement that at least 50 percent of the cost of all machinery and components of a vessel, excluding an integral part of the hull or superstructure, be procured in the United States for the vessel to be considered "built in the United States" and, therefore, qualified for coastwise trade documentation (49 FR 4944; February 9, 1984). MARAD affirms the belief that it will benefit shipowners and shipbuilders in regulatory compliance if agencies strive to achieve some

VOL
51
ISS
44
MR
6
1986
UMI

uniformity in the rules that affect their industry.

- One commenter asserted that, in the interests of national security, 100 percent of marine equipment should remain of U.S. origin but that U.S. marine equipment be allowed to include foreign content of up to 50 percent in domestically produced equipment. A second commenter also supported the 50 percent option on the ground that "at least the American businesses have a 50/50 chance of survival in an already highly competitive environment." This commenter criticized the 75 percent option on the grounds that, if foreign competition is allowed at the rate of 25 percent over the 50 percent option, small supplier businesses possibly could be crippled or lost. Under the first commenter's recommendation, shipowners would not be allowed to use foreign equipment covered by the guarantees, even pursuant to a waiver. That commenter acknowledged, however, that "American firms must become more competitive in terms of both price and quality and this is occurring in procurements of equipment of naval ships."

A requirement that 100 percent of marine equipment be of U.S. origin, with allowable foreign content of up to 50 percent, would result in items that are foreign manufactured, yet sent for assembly in the United States. As we stated in the NPRM, MARAD has concluded that this would make "domestic" products available that are comparable to the foreign-made products, but at an artificially and unreasonably high cost.

One of the other three commenters favoring the 50 percent alternative states that it accepts the eventual logical extension of the 50 percent requirement to total elimination of the Buy American requirement, i.e., a two-stage relaxation of Buy American. It stated that:

> "Our membership supports a conservative first-step approach during which time effects can be carefully monitored. If, after a period of experience, it can be observed that the benefits are approximately as projected in the Notice of Proposed Rulemaking and that the domestic losses were accurately predicted, consideration could be given to a further relaxation of the Buy American Requirement."

MARAD does not believe that a delay in implementation will assist the domestic marine equipment industry to become more competitive with foreign suppliers. A delay would perpetuate the problems of high cost and inferior quality for ship purchasers while only postponing the inevitable for domestic suppliers that cannot compete in an unregulated market. Presently, there exist viable American manufacturers that gear their products to domestic maritime markets, produce quality products and operate in highly competitive markets (e.g. pumps, oil rig gear, motors, refrigeration equipment, satellite navigation gear). These manufacturers continue to exist even with the downturn in domestic shipping. MARAD believes that this already competitive group is fully capable of operating without delays or adjustments in the effective date of a final rule.

With respect to the comment opposing waivers for foreign equipment covered by guarantees, MARAD has granted waivers only after making regulatorily required findings, based on a careful review of all relevant facts. Adopting this recommendation would diminish the benefit of allowing up to 50 percent foreign material content by imposing further restrictions on procurement under the Title XI program that would add to shipbuilding costs.

- One commenter urged retention of the existing requirement that 100 percent of the hull construction steel be acquired from U.S. steel mills when that steel is reasonably available.

MARAD does not believe that there is sufficient justification to support the commenter's position that there be a requirement for use of 100 percent domestic steel. The requirement to fabricate and assemble the steel hull and superstructure in a U.S. shipyard will remain a requirement, but the source of the basic steel will be open to full competition.

- Another commenter urged that elimination of the Buy American requirement should be prospective, i.e., applicable only to guarantees issued after this amendment becomes effective. The commenter also urged a delay in implementation of any rule. Two reasons were cited: (1) To give the domestic marine equipment industry fair warning and time to become more competitive with foreign suppliers; and (2) to eliminate a "windfall" gain, in the form of a competitive advantage, for owners of those vessels under construction at the time of the rulemaking with guarantees that were issued prior to the effective date of the regulation.

As stated before, we do not believe that a delay or phase-in of a relaxation rule will assist suppliers in competing or result in the benefits that should accrue to Title XI shipowners. In response to the comment concerning "windfall gain," we recognize that retroactive application might bestow an unanticipated benefit on those that have already received guarantees, since it would reduce their capital costs, both equity contribution and debt service on their total borrowings. MARAD agrees with the recommendation and, therefore, this rulemaking will have prospective application only, i.e., to letters of commitment issued after the effective date of this rule—30 days after the publication date. However, MARAD is providing for prospective application, primarily to avoid administrative complexities.

Comments Supporting Total Elimination

The five commenters supporting total elimination of Buy American requirements under the Title XI program include an association representing subsidized operators of U.S.-flag vessels, a domestic supplier of marine systems, a naval architecture and marine engineering firm, a law firm representing a foreign manufacturer of marine equipment, and a nonsubsidized U.S.-flag operator.

The association stated that complete elimination of restrictive procurement requirements will increase the quantity and lower the cost of U.S.-built ships, benefit ship operators and eventually benefit shippers and consumers. It argued that "vigorous competition has traditionally resulted in the best use of available resources and the greatest technological advancement. The restriction of competition has generally led to inefficiency and, eventually decay." It stated that lack of competition makes it difficult to negotiate reasonable delivery time with a vendor, and reasonable delivery time by suppliers is essential to efficient ship construction. While it acknowledged that there is some merit to the argument for maintaining domestic marine equipment manufacturing capability for national security reasons, that commenter noted that the U.S. Navy has a 50 percent domestic procurement requirement, and the U.S. Coast Guard has none. It concluded with the assessment that "ultimately, increased competition by equipment manufacturers could permit shipbuilders to construct modern, efficient ships at a reasonable cost and in a reasonable amount of time with state-of-the-art technology."

The domestic marine equipment supplier stated that the maritime construction industry can best be benefitted by a total elimination of prohibitions on the purchase of foreign components, so long as the hull and superstructure are fabricated in the United States and the vessel is assembled in the United States. The naval architecture and marine engineering firm agreed with the Coast Guard's statement, in its final rule eliminating a Buy American test for coastwise trade documentation, that the laws were intended to protect the U.S. shipbuilding industry and not those industries that supply the shipbuilders. It believes that MARAD's estimate that, under this alternative, 40 percent of the total material purchase would be foreign could be correct initially. However, it believes that total would increase steadily to at least 75 percent as the shipyards and owners become familiar with the foreign products, "unless the domestic industries gear up to compete. In this case there would be a double benefit."

The foreign manufacturer of marine equipment stated that, where Title XI guarantees have been a crucial factor for building U.S.-flag vessels, the 100 percent Buy American requirement for equipment and materials has resulted in these vessels having either inferior or less technologically advanced features than similar foreign-flag vessels. Where comparable domestic origin items are available, they are substantially more expensive. That commenter stated that elimination of Buy American requirements would not only give U.S. shipowners the same flexibility as their foreign competition in selecting vessel equipment available on the international market, but would benefit domestic shipyards. The inability of the shipyards to offer the best and most cost efficient equipment, machinery and components available for Title XI vessels is creating a further burden on an already depressed industry. Improved procurement flexibility for the shipyards should improve their productivity and efficiency and possibly lead to lower prices, shorter construction times, and more technologically advanced ships.

With respect to the other alternatives offered by MARAD in the NPRM, that commenter agrees that a requirement that foreign source equipment be assembled by domestic firms would be unacceptably difficult and costly to administer and lead to inefficient and artificial manufacturing and production schemes. With respect to Alternatives 2 and 3 (50 percent and 75 percent allowance of foreign materials and equipment, respectively), that commenter believes that setting a maximum percentage of allowable foreign content, in terms of cost, poses a number of administrative problems and promotes the use of "creative accounting and questionable cost allocation decisions." That commenter cited Coast Guard's experience, prior to its 1984 rulemaking, in applying a 50 percent rule to determine whether a vessel was "U.S.-built" for documentation purposes in the coastwise trade. It alleged that, from 1982, when the Coast Guard adopted its longstanding 50 percent guideline by regulation, until 1984, when it eliminated that provision, the regulation had generated so much confusion and so many differing interpretations that it was rarely enforced. The commenter predicts that adoption of a 50 percent or 75 percent foreign content limit for vessels built with Title XI guarantees would be similarly difficult to enforce and could not be effective without substantial administrative cost. That commenter concurs with MARAD's assessment that the level of foreign material and component purchase is not likely to exceed 40 percent of vessel cost under any of the alternatives proposed.

The nonsubsidized operator commented that eliminating Buy American requirements would most significantly assist the U.S. shipbuilding industry in becoming more cost competitive. It recommended that MARAD expand this proposal to its regulations governing the Capital Construction Fund (CCF) (46 CFR Part 390).

The main thrust of the arguments advanced by the commenters supporting total elimination of the Buy American requirement is that such action offers one major step toward the construction, by U.S. shipbuilders, of commercial vessels with state-of-the-art technology at a significant reduction in cost. MARAD agrees that the increased competition among marine equipment manufacturers and suppliers would greatly expand the choice of vessel equipment, accelerate deliveries to the U.S. shipyards, and shorten vessel construction times. The existing Buy American requirement for Title XI vessels has deterred some U.S. shipowners from obtaining the best equipment, either because the cost of superior foreign equipment would not be allowable in determining the maximum amount of guarantees, or because the cost of obtaining comparable equipment of domestic manufacture would be prohibitive.

In addition, MARAD concurs with the comment that there would be administrative problems in determining whether the vessel meets the allowable foreign content requirement under either alternative 2 or 3 and acknowledges that the Coast Guard's formal adoption of its 50 percent "rule of thumb" proved troublesome. MARAD would encounter the same "creative accounting and questionable cost allocation decision" problems.

In response to the recommendation concerning the CCF, MARAD cannot support application or extension of the Buy American proposal to the CCF, as that is a matter beyond the scope of this final rule.

Final Rule Decision

In reviewing the public comments on what was perceived as a very critical issue for the U.S. maritime industry, MARAD was impressed by the consensus that most segments of the domestic marine equipment industry cannot produce state-of-the-art shipboard equipment for delivery to U.S. shipyards at a price competitive with foreign manufacturers. Those commenters that would retain the existing Buy American policy, or adopt either the 50 or 75 percent alternative, or a modification of those alternatives, rely mainly on the national security justification and charges of unfair foreign competition in the form of direct and indirect foreign government assistance. Yet, none of these commenters has offered convincing arguments to support the contention either: (1) That the defense mobilization base will be significantly eroded by MARAD's total elimination of a Buy American requirement; or (2) that the domestic marine supplier industry can technically compete with foreign manufacturers "across the board."

Those commenters favoring the total elimination of a Title XI Buy American requirement have persuasively argued that the one strong element in significant improvement in domestic shipbuilding activity is vigorous competition among domestic and foreign marine equipment manufacturers for the Title XI vessel equipment market. It would promote the policy of the Act to foster the development and encourage the maintenance of an adequate merchant marine. MARAD believes that eliminating Title XI Buy American requirements now, rather than postponing this inevitable policy change, will provide an immediate incentive to build more efficient Title XI ships for operation in the domestic trade and more competitive ships for the foreign trade.

Since elimination of the Buy American requirement in a Federal guarantee program will generate shipments of foreign materials and equipment, MARAD will amend its Title XI agreements, consistent with its regulation at 46 CFR 381.7, with respect to the required carriage of at least 50 percent of the freight revenue and tonnage of cargo generated in privately owned U.S.-flag commercial vessels.

Applicable Laws and Regulations

This final rule has been evaluated under Executive Order 12291, "Federal Regulation," dated February 17, 1981, and the Department of Transportation's Regulatory Policy and Procedures dated February 26, 1979 (DOT Order 2100.5). It is considered to be a major rule since it could (but is not expected to) have a maximum annual effect on the economy of $100 million or more and have significant adverse effects on the ability of some domestic businesses in the United States marine equipment market. This estimate is based on the amount of Title XI financing guarantees for vessel construction which have totaled several hundred million dollars annually. In fiscal 1984, which was used as the base year for calculating the economic impact of the alternatives considered, the total construction cost for all vessels constructed with Title XI financing was $331 million. Approximately one-half of that figure represented purchases of ship construction components and materials. The rule's principal benefits would be to enhance the competitive posture of domestic shipbuilders and ship operators and reduce the paperwork burden on vessel owners. It is also considered to be a significant rule, since it is costly and involves an area in which there is significant public and Departmental interest.

A Final Regulatory Impact Analysis has been prepared by the Maritime Administration, which examines in more detail the existing Buy American regulations, the alternative selected and the rejected alternatives. It will be placed in the rulemaking docket created for this rule and will be available for review in Room 7300, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590.

The great majority of applicants for Title XI financing guarantees—shipbuilders and many of the domestic marine equipment manufacturers—have revenues or employment in excess of the existing Small Business Administration criteria for small businesses (13 CFR 121.3). Moreover, the primary suppliers of marine equipment, components or materials in the maritime industry are not small businesses. However, if small businesses are affected by this rule, MARAD believes that any effects will be minimal. Accordingly, the Maritime Administrator certifies, under the Regulatory Flexibility Act of 1980 (Pub. L. 96–3543), that this rule will not, exert a significant economic impact on a substantial number of small entities.

This rule contains no new or expanded requirements for the collection of information within the scope of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Environmental Impact

MARAD has previously evaluated the environmental impact of ship operations and ship construction, conversion, repair, and scrapping activities contracted under its maritime aids programs.

The environmental impact created by the additional ship construction and ship operation that would result from relaxing the Buy American restrictions is substantially the same as that considered by MARAD in the earlier environmental impact statements. Any additional ship construction or ship operation would be small in proportion to general shipyard industry activity and would not require the expansion of any existing shipbuilding facilities. Neither will it require the diversion of any significant raw materials or the development of new raw material sources. The elimination of the present Buy American restrictions will have a negligible effect on the environment.

List of Subjects in 46 CFR Part 298

Banks, Banking, Loan programs-Transportation, Mortgage, Mortgage insurance, Maritime carriers, and Uniform System of Accounts.

In consideration of the foregoing, the Maritime Administration adopts, as a final rule, amendments to 46 CFR Part 298 as follows:

1. The citation of authority for Part 298 is revised to reads as follows:

Authority: Secs, 204(b) and 1109, Merchant Marine Act, 1936, as amended (46 U.S.C. 1114(b), 1279(b); 49 CFR 1.66).

2. Amend § 298.11 by revising paragraph (a) to read as follows:

§ 298.11 Vessel requirements.

(a) *United States Construction.* A vessel financed by obligation guarantees for which a Letter Commitment is issued on or after April 7, 1986 is considered to be of United States construction if:

(1) It is built entirely in a shipyard or shipyards of the United States within the meaning of section 505 of the Act;

(2) All components of the hull and superstructure are fabricated in the United States; and

(3) The vessel is assembled entirely in the United States.

§ 298.21 [Amended]

3. Amend § 298.21 by removing existing paragraph (c)(12) and redesignating paragraphs (c)(13) and (c)(14) as paragraphs (c)(12) and (c)(13).

Dated: February 28, 1986.

Murray A. Bloom,

Assistant Secretary, Maritime Administration.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 83–514; RM–4431; RM–4561]

FM Broadcast Station in Susanville, CA and Reno, NV; Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein grants a petition for partial reconsideration filed by AMERICOM, licensee of Station KHTX(FM) (Channel 279), Carnelian Bay, California, by imposing an additional site restriction on Channel 225 at Reno, Nevada to permit KHTX to improve its facilities.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation/for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Memorandum Opinion and Order (Proceeding Terminated)

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Susanville, California and *Reno, Nevada*), MM Docket No. 83–514, RM–4431 and 4561.

Adopted: January 31, 1986.
Released: February 27, 1986.

By the Chief, Policy and Rules Division.

1. Before the Commission is a petition for partial reconsideration of the *Report and Order* herein, 50 FR 24643, published June 12, 1985, filed by AMERICOM (formerly the December Group) ("petitioner"), licensee of Station KHTX(FM) (Channel 279), Carnelian Bay, California. No oppositions to the petition were received.

2. Petitioner seeks partial reconsideration of the Commission's action allotting Class C Channel 225 to Reno, Nevada with a site restriction 17.4 kilometers (10.8 miles) northeast of the community. Petitioner requests that an additional 8 kilometer restriction be placed on Channel 225 to permit it to improve its facilities from Class B to Class C1 status at its present site.

3. Petitioner is authorized to operate Station KHTX as a Class C station in Zone I to serve Carnelian Bay. However, due to terrain obstacles, it was granted a waiver of the Class C facility requirements of Section 73.206(b) of the Commission's Rules, thus permitting it to operate as a Class B station with its transmitter in the State of Nevada. Petitioner advises that it desires to improve its facilities in order to provide a wider coverage signal to residents of the area. However, it notes that due to the topography of the area, it is unable to move its transmitter to accommodate an increase in power to attain Class C1 status. Moreover, petitioner adds that although it may now operate as a Class C1 in Zone II without the necessity of a waiver, the distance between its present transmitter site and the Channel 225 allotment to Reno is 40 kilometers, whereas a minimum distance separation of 48 kilometers is required in this instance to avoid Intermediate Frequency (IF) interference. Unless the requested additional site restriction is imposed on Channel 225 at Reno, its proposal would contravene 73.207(b) of the Commission's Rules.

4. In consideration of the above, and absent any formal objections, we believe petitioner's proposal is justified and is in accord with the Commission's policy to encourage broadcast licensees to improve their facilities. See, *Modification of FM and TV Station Licenses,* 98 F.C.C. 2d 916 (1984). We do not view petitioner's proposal as an upgrade since Channel 279 can be used as either a Class B or C classification depending upon the location of the transmitter. As such, petitioner may file an application to increase its facilities as a Class C1 station.

5. In view of the above, the current applicants for Channel 225 at Reno, Nevada will be mailed a copy of this *Order* to apprise them of our action herein.[1]

6. Accordingly, it is ordered, That the petition for partial reconsideration filed by AMERICOM is granted and the *Report and Order* herein is modified to the extent a site restriction on Channel 225 at Reno of 24.3 kilometers (15.1 miles) northeast of the community is imposed.

7. It is further ordered, That the Secretary of the Commission shall send a copy of this *Order* by certified mail, return receipt requested, to the applicants for Channel 225 at Reno, Nevada, as follows:

Cynthia Escajeda Cart, 704 Douglas Avenue, Prescott, AZ 86301, (850711MY)
Reno 93–FM Broadcasters, 5530 Highline Court, Sun Valley, NV 89433 (850711OE)

47 CFR Part 97

[PR Docket No. 85–168; RM–4880; FCC 86–84]

Amendment of the Amateur Rules To Permit the Transmission of Emission F2A in the 29.5–29.7 MHz Repeater Subband

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the Amateur service rules by permitting amateur stations to transmit emission F2A in the 10-meter repeater subband. The rule is necessary since that emission mode is not presently authorized for that subband. The effect of the rule is to allow amateur stations in repeater operation to transmit emission F2A when identifying the station.

EFFECTIVE DATE: April 23, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR INFORMATION CONTACT: Maurice J. DePont, Private Radio Bureau, Washington, DC 20554, (202) 632–4964.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 97

Amateur radio, Radio, Repeaters.

Report and Order

In the matter of amendment of § 97.61 (a) of the Amateur Radio Service Rules to permit emission F2A in the 29.5–29.7 MHz repeater subband, PR Docket No. 85–168, RM–4880.

Adopted: February 19, 1986.
Released: February 28, 1986.

By the Commission.

1. On May 23, 1985, the Commission adopted a Notice of Proposed Rule Making (50 FR 24548, June 11, 1985) to permit the transmission of emission F2A (telegraphy for aural reception) in the 10-meter repeater subband (29.5–29.7 MHz). Two comments were filed in this proceeding. Both supported the proposal.

2. The commenters, Robert A. Scupp and the American Radio Relay League, Inc. (ARRL), observe that since emission F2A is the primary emission mode used to identify amateur emission F3E repeaters by telegraphy, it should be available in the 10-meter repeater subband.

3. In its comments, the ARRL suggests that the emission designator G2A (phase-modulated telegraphy) also be shown in the table in Section 97.61 as available for the 10-meter repeater subband. This is unnecessary since the Third Report and Order concerning emission designators[1] permits both phase-modulated and frequency-modulated emission under the prefix F.

4. In our Notice of Proposed Rule Making, we specifically solicited information concerning the adverse effects on amateur communications of allowing the transmission of emission

---

[1] A staff analysis has determined that the transmitter sites proposed by the tendered applications for Channel 225 at Reno comply with the new site restriction imposed herein.

[1] Paragraph 16, Third Report and Order, General Docket No. 80–739; FCC 84–510; 49 FR 48694, December 24, 1984.

VOL 51
ISS 44
MR 6
1986
UMI

F2A in the 10-meter repeater subband. No such information was received. We conclude that there will be no negative impact.

5. Mr. Scupp and ARRL state that 29.5–29.7 MHz is the only amateur repeater subband not authorized for emission F2A. Actually, emission F2A is not currently listed in § 97.61(a) for any repeater subbands. To correct this, we have editorially amended § 97.61(a) to show emission F2A in the amateur bands 50.1–54.0, 144.1–148.0, 220–225, 420–450, 902–928, 1215–1300, 2300–2310 and 2390–2450 MHz. Also, the emission designator F2A is added for all of the line entries under Gigahertz in the table in that section. Frequency-modulated and phase-modulated telegraphy are already authorized. They were previously listed in those bands under the prior emission designator F2. The emission deignator F2A [8] was inadvertently omitted from those bands when the emission designators were converted to the new system. [9]

6. In view of the foregoing, we adopt the rules in our Notice of Proposed Rule Making with modifications discussed herein.

7. It is ordered, That Part 97 is amended as set forth in the Appendix hereto. This action is taken pursuant to the authority contained in sections 4(i) and 303 (e) and (r) of the Communications Act of 1934, as amended.

8. It is further ordered, That these rule amendments shall become effective, April 23, 1986.

9. It is further ordered, That the Secretary shall cause a copy of this Report and Order to be published in the **Federal Register**.

10. It is further ordered, That this proceeding is terminated.

11. Information in this matter may be obtained by contacting Maurice J. DePont, (202) 632–4964, Private Radio Bureau, Federal Communications Commission, Washington, DC 20554.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 97—[AMENDED]

Part 97 of Chapter I of Title 47 of the Code of Federal Regulations is amended, as follows:

1. The authority citation for Part 97 continues to read, as follows:

Authority: 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303.

2. The table in § 97.61(a) is revised by adding two line entries after 28000–28300, as follows:

§ 97.61 Authorized emissions.

(a) *kilohertz:*

Frequency band (kHz)	Emissions	Limitations (see paragraph (d))
*	*	*
28300–29500	A1A, A3E, F3E, G3E, A3C, F3C, A3F, F3F, H3E, J3E, R3E	
29500–29700	A1A, A3E, F2A, F3E, G3E, A3C, F3C, A3F, F3F, H3E, J3E, R3E	
*	*	*

3. Section 97.61(b) is revised to read, as follows:

§ 97.61 Authorized emissions.

* * * * *

(b) *50–144.1 MHz:*

Frequency band (MHz)	Emissions
50.0–50.1	A1A.
50.1–51.0	A1A, A2A, A2B, A3E, A3C, A3F, F1B, F2A, F2B, F3E, G3E, F3C, F3F, H3E, J3E, R3E.
51.0–54.0	NoN, A1A. A2A, A2B, A3E, A3C, A3F, F1B, F2A, F2B, F3E, G3E, F3C F3F, H3E, J3E, R3E.
144.0–144.1	A1A

* * * * *

4. Section 97.61(c) is amended by adding two new sentences at the end thereof, as follows:

§ 97.61 Authorized emissions.

* * * * *

(c) *Above 144.1 MHz:* * * *

Emission F2A may also be used in the following frequency subbands: 144.1–148.0, 220–225, 420–450, 902–928, 1215-1300, 2300–2310 and 2390–2450 MHz. Emission F2A may also be used on all Gigahertz frequencies.

* * * * *

Proposed Rules

Federal Register
Vol. 51, No. 44
Thursday, March 6, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 591

Cost-of-Living Allowance and Post Differential; Nonforeign Areas

AGENCY: Office of Personnel Management.

ACTION: Proposed rulemaking; notice of further extension of public comment period.

SUMMARY: OPM is extending the public comment period for responding to the proposed regulations covering the nonforeign area cost-of-living allowance and the post differential. The proposed regulations were published at 50 FR 42531 on October 21, 1985. The original expiration date of the comment period was December 20, 1985, and was extended to February 21, 1986 (50 FR 53330). One commenter has requested extension of the comment period until March 31, 1986, to provide additional opportunity for analysis and comment. The public comment period is now extended to March 31, 1986. A request was also made to hold hearings in the allowance areas. In view of the five-month comment period now provided, the request to hold hearings is denied.

DATES: Comments are now due on or before March 3, 1986.

ADDRESS: Send or deliver written comments to U.S. Office of Personnel Management, Compensation Group, Allowances and Special Rates Division, Room 3353, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Barry E. Shapiro, (202) 632–7471.

U.S. Office of Personnel Management.

Constance Horner,

Director.

[FR Doc. 86–4831 Filed 3–5–86; 8:45 am]

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 1

Freedom of Information Act Implementing Regulations

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Agriculture proposes to amend its regulations (7 CFR Part 1, Subpart A) implementing the Freedom of Information Act (FOIA). The Department also proposes to amend Appendix A of the regulations which pertains to the assessment of fees under the Act.

DATE: Written comments must be received by the contact person listed below on or before April 7, 1986.

ADDRESS: Submit comments to Department of Agriculture, Office of Governmental and Public Affairs, Office of Information, Special Programs Division, Room 536–A, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Milton Sloane, U.S. Department of Agriculture, Office of Governmental and Public Affairs, Office of Information, Special Programs Division, Washington, D.C. 20250; (202) 447–8164.

SUPPLEMENTARY INFORMATION: It is proposed to amend 7 CFR Part 1, Subpart A to: list the primary agency in USDA for admininstering the Freedom of Information Act; specify the individuals responsible for acting on FOIA requests and appeals to the Office of the Secretary and the Office of Governmental and Public Affairs; outline the procedure for forwarding FOIA requests to USDA's central processing unit; announce new § 1.8 to reflect guidance on handling data submitted by private businesses; and to update Appendix A (the fee schedule) to reflect the higher costs for providing certain materials and services under the Act.

This rule does not constitute a "major rule" within the meaning of Executive Order No. 12291 (Improving Government Regulations). Nor will these regulations cause a significant economic impact or other substantial effect on small entities. Therefore, the requirements of the Regulatory Flexibility Act, 5 U.S.C. 605(b), do not apply.

List of subjects in 7 CFR Part 1

Freedom of Information.

It is proposed to revise 7 CFR Part 1, Subpart A to read as follows:

PART 1—ADMINISTRATIVE REGULATIONS

Subpart A—Official Records

Sec.
1.1 Purpose and scope.
1.2 Policy.
1.3 Agency implementing regulations.
1.4 Implementing regulations for the Office of the Secretary.
1.5 Public access to certain materials.
1.6 Requests for records.
1.7 Agency response to requests for records.
1.8 Handling information from a private business.
1.9 Date of receipt of requests or appeals.
1.10 Appeals.
1.11 Extension of administrative deadlines.
1.12 Failure to meet admininstrative deadlines.
1.13 Fee schedule.
1.14 Exemptions and discretionary release.
1.15 Annual report.
1.16 Compilation of new records.
1.17 Authentication.
1.18 Compulsory process.
1.19 Records in formal adjudication proceedings.
Appendix A—Fee Schedule

Subpart A—Official Records

Authority: 5 U.S.C. 301 and 552. Appendix A also issued under 7 U.S.C. 2244; 31 U.S.C. 9701, and 7 CFR 2.75 (a)(6)(xiii).

§ 1.1 Purpose and scope.

This subpart establishes policy, procedures, requirements, and responsibilities for administration and coordination of the Freedom of Information Act (FOIA), 5 U.S.C. 552, pursuant to which official records may be obtained by any person. It also provides rules pertaining to the disclosure of records pursuant to compulsory process. This subpart also serves as the implementing regulations (referred to in § 1.3, "Agency implementing regulations") for the Office of the Secretary (the immediate offices of the Secretary, Deputy Secretary, Under Secretaries and Assistant Secretaries) and for the Office of Governmental and Public Affairs. The Office of Governmental and Public Affairs has the primary administrative

VOL

1986
UMI

responsibility for the FOIA in the Department of Agriculture (USDA). The term "agency" or "agencies" is used throughout this subpart to include both USDA program agencies and staff offices.

§ 1.2 Policy.

(a) Agencies of USDA shall comply with the time limits set forth in the FOIA for responding to and processing requests and appeals for agency documents, unless there are exceptional circumstances within the meaning of 5 U.S.C. (a)(6)(B). An agency shall notify a requester whenever it is unable to respond to or process a request or appeal within the time limits established by the FOIA.

(b) All agencies of the Department shall comply with the fee schedule provided as Appendix A of this regulation, with regard to the charging of fees for providing copies of documents and related services to requesters.

§ 1.3 Agency implementing regulations.

(a) Each agency of the Department shall promulgate regulations setting forth the following:

(1) The location and hours of operation of the agency office or offices where members of the public may gain access to those materials required by § 1.5 to be made available for public inspection and copying.

(2) Information regarding the publication and distribution (by sale or otherwise) of indexes and supplements thereto which are maintained in accordance with the requirements of 5 U.S.C. 552(a)(2) and § 1.5(b).

(b) The title(s) and mailing address(es) of the official(s) of the agency who is/are authorized to receive requests for records submitted in accordance with § 1.6(a), and to make determinations regarding whether to grant or deny such requests. Authority to make such determinations includes authority to:

(1) Extend the 10-day administrative deadline for reply pursuant to § 1.11;

(2) Make discretionary releases pursuant to § 1.14(b); and

(3) Make determinations regarding the charging of fees pursuant to Appendix A of this subpart.

(c) The title and mailing address of the official of the agency who is authorized to receive appeals from denials of requests for records submitted in accordance with § 1.6(e) and to make determinations regarding whether to grant or deny such appeals. Authority to determine appeals includes authority to:

(1) Extend the 20-day administrative deadline for reply pursuant to § 1.11 (to the extent the maximum extension authorized by § 1.11(c) was not used with regard to the initial request);

(2) Make discretionary releases pursuant to § 1.14(b); and

(3) Make determinations regarding the charging of fees pursuant to Appendix A of this subpart.

(d) Other information which would be of concern to a person wishing to request records from that agency in accordance with this subpart.

§ 1.4 Implementing regulations for the Office of the Secretary.

For the Office of the Secretary and for the Office of Governmental and Public Affairs, the information required by § 1.3 is as follows:

(a) Records available for public inspection and copying may be obtained in Room 547–A, Administration Building, USDA, Washington, D.C. 20250 during the hours of 8:45 a.m. to 5:15 p.m.

(b) Any indexes and supplements which are maintained in accordance with the requirements of 5 U.S.C. 552(a)(2) and § 1.5(b) will also be available in Room 547–A, Administration Building, USDA, Washington, D.C. 20250 during the hours of 8:45 a.m. to 5:15 p.m.

(c) The person authorized to receive FOIA requests and to determine whether to grant or deny such requests is the Director of Information, Office of Governmental and Public Affairs, USDA, Washington, D.C. 20250.

(d) The official authorized to receive appeals from denials of FOIA requests and to determine whether to grant or deny such appeals is the Deputy Assistant Secretary for Governmental and Public Affairs, USDA, Washington, D.C. 20250.

§ 1.5 Public access to certain materials.

(a) In accordance with 5 U.S.C. 552(a)(2) each agency within the Department will make the following materials available for public inspection and copying (unless they are promptly published and copies offered for sale):

(1) Final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases;

(2) Those statements of policy and interpretation which have been adopted by the agency and are not published in the **Federal Register**; and

(3) Administrative staff manuals and instructions to staff that affect a member of the public.

(b) Each agency of the Department shall also maintain and make available current indexes providing identifying information regarding any matter issued, adopted or promulgated after July 4, 1967, and required by paragraph (a) of this section to be made available or published. Each agency shall publish and make available for distribution, copies of such indexes and supplements thereto at least quarterly, unless it determines by Notice published in the **Federal Register** that publication would be unnecessary and impracticable. After issuance of such Notice, the agency shall provide copies of any index upon request at a cost not to exceed the direct cost of duplication.

§ 1.6 Request for records.

(a) Any person who wishes to inspect or obtain copies of any record of any agency of the Department shall submit a request in writing and address the request to the official designated in regulations promulgated by the agency. The requester may in his or her petition ask for a waiver if there is likely to be a charge for the requested information. To inspect or obtain copies of records of the Office of the Secretary or the Office of Governmental and Public Affairs, requesters should submit their requests to the Director of Information, Office of Governmental and Public Affairs, U.S. Department of Agriculture, Washington, D.C. 20250. All such requests for records shall be deemed to have been made pursuant to the Freedom of Information Act, regardless of whether that Act is specifically mentioned. To facilitate processing of a request, the phrase "FOIA REQUEST" should be placed in capital letters on the front of the envelope.

(b) A request must reasonably describe the records to enable agency personnel to locate them with reasonable effort. Where possible, a requester should supply specific information regarding dates, titles, etc. which may help identify the records. If the request relates to a matter pending in litigation, the court and its location should be identified.

(c) If an agency determines that a request does not reasonably describe the records, it shall inform the requester of this fact and extend the requester an opportunity to clarify the request or to confer promptly with knowledgeable agency personnel to attempt to identify the records he or she is seeking. The "date of receipt" in such instances, for purposes of § 1.9(a), shall be the date of receipt of the amended or clarified request.

(d) Nothing in this subpart shall be interpreted to preclude an agency from honoring an oral request for information, but, if the requester is dissatisfied with the response, the agency official involved shall advise the requester to

submit a written request in accordance with paragraph (a) of this section. The "date of receipt" of such a request for purposes of § 1.9(a), shall be the date of receipt of the written request. For recordkeeping purposes, an agency responding to an oral request for information may ask the requester to also submit his or her request in writing.

(e) If a request for records made under this subpart is denied, the person making the request shall have the right to appeal the denial. This appeal must be in writing and addressed to the offical designated in regulations promulgated by the agency which denied the request. To facilitate processing of an appeal, the phrase "FOIA APPEAL" should be placed in capital letters on the front of the envelope.

(f) Requests that are nonagency-specific, i.e., are not addressed to a specific agency in USDA, or which pertain to more than one USDA agency or which are sent to the wrong agency of USDA, should be forwarded to the Department's central processing unit for FOIA in the Office of Governmental and Public Affairs, Office of Information, Special Programs Division, U.S. Department of Agriculture, Washington, D.C. 20250.

(g) The central processing unit will determine which agency or agencies should process the request, and, where necessary, refer the request to the appropriate agency (agencies). The unit will also notify the requester of the referral and of the name of each agency to which the request has been referred.

(h) Each agency shall develop and maintain a record of all written and oral requests and appeals received in that agency, which shall include in addition to any other information the name and address of the requester, brief summary of the information requested, an indication of whether the request or appeal was denied or partially denied, the exemption(s) for making any denials, and the amount of fees associated with the request or appeal.

§1.7 Agency response to requests for records.

(a) 5 U.S.C. 552(a)(6)(A)(i) provides that each agency of the Department to which a request for records or a fee waiver is submitted in accordance with § 1.6(a) shall inform the requester of its determination concerning that request within 10 days of its date of receipt (exception Saturdays, Sundays, and legal public holidays), plus any extension authorized under § 1.11. If the agency determines to grant the request, it shall inform the requester of any conditions surrounding the granting of the request (e.g., payment of fees) and the appropriate date upon which compliance will be effected. If it grants only a portion of the request, it shall treat the portion not granted as a denial. If the agency determines to deny the request in part or in whole, it shall immediately inform the requester of that decision and of the following:

(1) The reasons for the denial;

(2) The name and title or position of each person responsible for denial of the request;

(3) The requester's right to appeal such denial and the title and address of the official to whom such appeal is to be addressed; and

(4) The requirement that such appeal be made within 45 days of the date of the denial.

(b) If the reason for not fulfilling a request is that the records requested are in the custody of another agency outside USDA, the agency shall inform the requester of this fact and shall forward the request to that agency or Department for processing in accordance with its regulations. If the agency shall notify the requester of that fact.

(c) 5 U.S.C. 552(a)(6)(A)(ii) provides that each agency in the Department to which appeal of a denial is submitted in accordance with § 1.6(e) shall inform the requester of its determination concerning that appeal within 20 days (excepting Saturdays, Sundays, and legal public holidays), plus any extension authorized by § 1.11, of its date of receipt. If the agency determines to grant the appeal it shall inform the requester of any conditions surrounding the granting of the request (e.g., payment of fees) and the approximate date upon which compliance will be effected. If it grants only a portion of the appeal, it shall treat the portion not granted as a denial. If it determines to deny the appeal either in part or in whole, it shall inform the requester of that decision and of the following:

(1) The reasons for denial;

(2) The name and title or position of each person responsible for denial of the appeal; and

(3) The right to judicial review of the denial in accordance with 5 U.S.C. 552(a)(4).

(d) If in compliance with the request, a charge is to be made in accordance with Appendix A of this subpart, the agency's response shall inform the requester of the amount and basis for the charge. It may, in accordance with Appendix A of this subpart, require payment of the entire fee, or a portion thereof, before it provides the requested records. In instances where a requester refuses to remit payment in advance, an agency may likewise refuse to process the request with written notice to that effect forwarded to the requester. The "date of receipt" of a request for which advance payment has been required shall be the date that payment is received.

(e) In the event compliance with the request involves inspection of records by the requester rather than the forwarding of copies, the agency response shall include the name, mailing address, and telephone number of the person to be contacted to arrange a mutually convenient time for such inspection.

(f) In the event the records requested contain some portions which are exempt from mandatory disclosure and others which are not, the official responding to the request shall insure that all nonexempt portions are disclosed, and that all exempt portions are identified according to the nature of information contained and the specific exemption or exemptions which are applicable.

§1.8 Handling information from a private business.

(a) The USDA is responsible for making the final determination with regard to the disclosure or nondisclosure of information submitted by a business. When in the course of responding to an FOIA request, an agency cannot determine readily whether the information is business information obtained from a person that is privileged and confidential, it is the policy of USDA to obtain and consider the views of the submitter of the information, and to provide the submitter an opportunity to object to any decision to disclose the information. Whenever a request is received in USDA for information which has been submitted by a business, all agencies of the Department should:

(1) Provide the business information submitter with prompt notification of a request for that information (unless it is readily determined by the agency that the information requested should not be disclosed, or on the other hand, that the information is not exempt by law from disclosure).

(2) Notify the requester of the need to inform the submitter of a request for submitted business information.

(3) Afford business information submitters time in which to object to the disclosure of any specified portion of the information. The submitter must explain fully all grounds upon which disclosure is opposed. For example, if the submitter maintains that disclosure is likely to cause substantial harm to its competitive position, the submitter must explain item-by-item why disclosure would cause such harm. Information

VOL 51 ISS 44 MR 6 1986 UMI

provided by a business submitter pursuant to this paragraph may itself be subject to disclosure under FOIA.

(4) Provide business information submitters with notice of any determination to disclose such records prior to the disclosure date, in order that the matter may be considered for possible judicial intervention.

(5) Notify business information submitters promptly of all instances in which FOIA requesters bring suit seeking to compel disclosure of submitted information.

§1.9 Date of receipt of requests or appeals.

(a) The date of receipt of a request or appeal, which contains the phrase FOIA REQUEST or FOIA APPEAL and is addressed in accordance with applicable agency regulations, shall be the date it is received in the office responsible for the administrative processing of FOIA requests or appeals.

(b) The date of receipt of a request or appeal which is hand-delivered to the address specified in agency regulations shall be the date of such hand delivery.

(c) The date of receipt of a request or appeal which does not comply with paragraphs (a) or (b) of this section shall be the date it is received by the official designated in agency regulations to make the applicable determination.

§1.10 Appeals.

(a) Each agency shall provide for review of appeals by an official different from the official or officials designated to make initial denials.

(b) Each agency, upon a determination that it wishes to deny an appeal, shall send a copy of the records requested and of all correspondence relating to the request to the Assistant General Counsel, Research and Operations Division, Office of the General Counsel. When the volume of records is so large as to make sending a copy impracticable, the agency shall enclose an informative summary of those records. The agency shall not deny an appeal until it receives concurrence from the Assistant General Counsel.

(c) The Assistant General Counsel shall promptly review the matter (including necessary consultation with the Department of Justice and coordination with the Office of Governmental and Public Affairs) and render all necessary assistance to enable the agency to respond to the appeal within the administrative deadline or any extension thereof.

§1.11 Extension of administrative deadlines.

(a) In unusual circumstances as specified in this section either of the administrative deadlines prescribed in §1.7 may be extended by an authorized agency official. Written notice of the extension shall be sent to the requester within the applicable deadline, setting forth the reasons for such extension and the date a determination is expected to be dispatched. In no event shall the extension exceed a total of 10 working days.

(b) As used in this section, "unusual circumstances" shall be limited to the following:

(1) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(2) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; and

(3) The need for consultation, which shall be conducted with all practicable speed, with another Department or agency having a substantial interest in the determination of the request or among two or more components of the agency having substantial subject-matter interest therein. (Note: consultation regarding policy or legal issues between an agency and the Office of the General Counsel, Office of Governmental and Public Affairs, or the Department of Justice is not a basis for extension under this section.)

(c) The 10-day extension authorized by this section may be divided between the initial and appellate reviews, but in no event shall the total extension exceed 10 working days.

(d) Nothing in this section shall preclude the agency and the requester from agreeing to an extension of time. Any such agreement shall be confirmed in writing and shall specify clearly the total time agreed upon.

§ 1.12 Failure to meet administrative deadlines.

In the event an agency fails to meet either of the administrative deadlines set forth in § 1.7, plus any extension authorized by § 1.11, it shall notify the requester, state the reasons for the delay, and the date by which it expects to dispatch a determination. Although the requester may be deemed to have exhausted his or her administrative remedies under 5 U.S.C. 522(a)(6)(C), the agency shall continue processing the request as expeditiously as possible and dispatch the determination when it is reached in the same manner and form as if it had been reached within the applicable deadline.

§ 1.13 Fee schedule.

Pursuant to authority delegated in § 2.75 of this title, the Director, Office of Finance and Management, has issued regulations, following notice and public comment, setting forth a uniform schedule of fees applicable to all agencies of the Department regarding requests for records under this subpart. (See Appendix A of this subpart.) Any amendments thereto will be made by the Director pursuant to notice and opportunity for comment. Said regulations provide reasonable standard charges for document search and duplication and provide for recovery of only the direct costs of such duplication. The regulations provide that documents may be furnished without charge or at a reduced charge where the agency determines that waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the general public.

§ 1.14 Exemptions and discretionary release.

(a) All agency records, except those specifically exempted from mandatory disclosure by one or more provisions of 5 U.S.C. 552(b), shall be made promptly available to any person submitting a request under this subpart.

(b) Except where disclosure is specifically prohibited by Executive Order, statute, or applicable regulations, an agency may release records exempt from mandatory disclosure under 5 U.S.C. 552(b) whenever it determines that such disclosure would be in the public interest.

§ 1.15 Annual report.

(a) Each agency of the Department shall compile the following information for each calendar year:

(1) The number of determinations made by such agency not to comply with initial requests for records made to it under § 1.6(a), and the reasons for each such determination;

(2) The number of appeals made by persons under § 1.7(d), the result of such appeals, and the reason for the action upon each appeal that results in a denial of information;

(3) The name and title or position of each person responsible for the denial of records requested under this subpart and the number of instances of participation for each;

(4) The results of each proceeding conducted pursuant to 5 U.S.C. 552(a)(4)(F), including a report of the disciplinary action taken against the officer or employee who was primarily responsible for improperly withholding records or an explanation of why disciplinary action was not taken;

(5) A copy of every rule made by the agency regarding this subpart;

(6) The total amount of fees collected by the agency for making records available under this subpart; and

(7) Such other information as indicates efforts to administer fully this subpart.

(b) Each agency shall compile the information required by paragraph (a) of this section for the preceding calendar year into a report and submit this report to the Director of Information, Office of Governmental and Public Affairs, by February 1 of each year.

(c) The Director of Information shall combine the reports from the various agencies within USDA into a Departmental report, and shall arrange for submission of this report to the President of the Senate and the Speaker of the House of Representatives by March 1 of each year in accordance with 5 U.S.C. 552(d).

§ 1.16 Compilation of new records.

Nothing in 5 U.S.C. 552 or this subpart requires that any agency compile a new record in order to fulfill a request for records. Such compilation may be undertaken voluntarily if the agency determines this action to be in the public interest.

§ 1.17 Authentication.

When a request is received for an authenticated copy of a document which the agency determines to make available to the requesting party, the agency shall cause a correct copy to be prepared and sent to the Office of the General Counsel which shall certify the same and cause the seal of the Department to be affixed, except that the Hearing Clerk may authenticate copies of documents in the records of the Hearing Clerk.

§ 1.18 Compulsory process.

(a) (1) In any case where it is sought by subpoena, order, or other compulsory process (hereinafter in this section referred to as a "demand") to require the production or disclosure of any record or material which is exempt from disclosure under 5 U.S.C. 552(b) or information related thereto acquired by an employee of this Department in the performance of his or her official duties, the matter shall be referred to an official authorized by agency regulations to make releases pursuant to § 1.14(b). For the Office of the Secretary and for the Office of Governmental and Public Affairs, this official is the Deputy Assistant Secretary for Governmental and Public Affairs.

(2) Such official may authorize release. However, if such official determines that it would be improper to comply with the demand, the official shall refer it to the agency head. The agency head may authorize release; however, if the agency head concurs with the initial conclusion, the matter shall be referred to the Secretary through the General Counsel for final determination.

(3) If the Secretary determines that the records, material, or information should not be produced, or if no final determination has been made, the employee shall be notified not to produce or disclose the records. The employee who appears in answer to the demand shall respectfully decline to produce or disclose the records, material, or information demanded on the ground that the disclosure is prohibited by this section. The employee shall provide the court or other authority with a copy of this subpart and a copy (when available) of the Secretary's determination, and shall respectfully request the court or other authority to withdraw or stay the demand.

(b) (1) Whenever a demand of the type described in paragraph (a) of this section is made upon an employee of this Department not authorized to make releases pursuant to § 1.14(b), by a court or other authority while he/she is appearing before, or is otherwise in the presence of the court or other authority, the employee, or other appropriate Government official or attorney acting on behalf of the employee, shall (i) immediately inform the court or other authority that this section prohibits the employee from producing or disclosing the information or material demanded and (ii) offer to refer the demand for the prompt consideration of authorized officials, providing the court or other authority a copy of this subpart and respectfully requesting that the demand be stayed pending his/her receipt of appropriate instructions concerning the demand.

(2) If the employee is authorized to make a release pursuant to § 1.14(b), but determines that such release would be improper, the employee shall offer to refer the demand for the prompt consideration of the agency head and/or Secretary and shall otherwise comply with paragraph (b)(1)(ii) of this section.

(c) If the court or other authority declines to stay the effect of the demand in response to a request made in accordance with paragraphs (a) or (b) of this section pending the receipt by the employee of instructions or directions, or if the court or other authority rules adversely on any assertion made in conformity with the provisions of this subpart, the employee upon whom the demand has been made may tender the records, material, or information demanded with a request they be held in camera until an appeal can be taken from the adverse ruling.

§ 1.19 Records in formal adjudication proceedings.

Records in formal adjudication proceedings are on file in the Hearing Clerk's office, Office of Information Resources Management, U.S. Department of Agriculture, Washington, D.C. 20250, and shall be made available to the public.

Appendix A—Fee Schedule

Sec. 1 *General.* This schedule sets forth fees to be charged for providing copies of records, including photographic reproductions, microfilm, maps and mosaics, and related services. The fees set forth in this schedule are applicable to all agencies of the Department of Agriculture.

Sec. 2. *Facilities.* Records and related services are available at the locations specified by the agencies in their statements of procedures to facilitate public inspection and copying of their records. Any material offered for sale by the Government Printing Office should be purchased from that source. Departmental agencies will not stock such material for public sale. Agencies do not stock copies of forms and publications or maintain records at any facility which does not require these materials in its operations.

Sec. 3. *Fees for materials and services.* All agencies of the Department shall comply with the fees set forth herein. Any changes or additions to this fee schedule shall be made by amendment to or revision of this schedule.

Sec. 4. *Fees for records and related services.*

a. The fee for photocopies of pages 8½"×14" or smaller shall be $0.10 for the first copy and $0.10 for each additional copy of the same page.

b. The fee for photocopies larger than 8½"×14" shall be $0.25 per linear foot of the longest side of the copy.

c. Manual searches will be charged for at the rate of $8.00 per hour for clerical time and $14.60 per hour for supervisory or professional time. Charges will be computed to the nearest quarter hour required for the search. A search may involve both clerical and supervisory or professional time.

d. Other direct costs incurred will be assessed the requester at the actual cost to the Government, e.g., where records are required to be shipped from one office to another by commercial carrier in order to timely answer the request, the actual freight charges will be assessed the requester.

e. Computer services will be charged for at the rates established in the Users Manual or Handbook published by the computer center at which the work will be performed, except that where commercial time-sharing computer sources are the required search

VOL 51 ISS 44 MR 6 1986 UMI

media, the contract rate charged by the commercial source to the Government will be charged. A listing follows showing where those rates are published and the office from which copies may be obtained or at which the rates may be examined.

Fort Collins Computer Center Users Manual: Fort Collins Computer Center, U.S. Department of Agriculture, 3825 East Mulberry Street (P.O. Box 1206), Fort Collins, Colo. 80521.

New Orleans Computer Center Users Manual: New Orleans Computer Center, U.S. Department of Agriculture, 13800 Old Gentilly Road, Building 350, New Orleans, La. 70129.

Kansas City Computer Center Users Manual: Kansas City Computer Center, U.S. Department of Agriculture, 8930 Ward Paryway (P.O. Box 205), Kansas City, Mo. 64141.

Washington Computer Center Users Handbook: Washington Computer Center, U.S. Department of Agriculture, Room S–100, South Building, 12th Street and Independence Avenue SW., Washington, D.C. 20250.

St. Louis Computer Center. Charges for the St. Louis Computer Center will be based on actual expenses incurred in performing the search. Address is: St. Louis Computer Center, U.S. Department of Agriculture, 1520 Market Street, St. Louis, Mo. 63103.

f. The fees do not include, and no charge shall be made for, (a) time spent examining records to detemrine whether an exemption can and should be asserted, (b) time spent deleting exempt matter being withheld from records to be furnished, (c) time spent in resolving legal or policy issues, or (d) time spent in monitoring a requester's inspection of agency records.

g. The fee for Certifications shall be $2.00 each; Authentications under Department Seal (including aerial photographs), $5.00 each.

h. Except as provided in Section 9 below, for services not subject to the Freedom of Information Act and not covered by (g) above, agencies may set their own fees in accordance with appicable law.

i. The fees specified in paragraphs a through f of this Section apply to all requests for services under the Freedom of Information Act, as amended (5 U.S.C. 552), unless no fee is to be charged, or the agency has determined to waive or reduce those fees pursuant to Section 5. No higher fees nor charges in addition to those provided for in this schedule may be charged a party requesting search or duplication services under the Freedom of Information Act.

j. The fees specified in paragraphs g and h of this Section and in Sections 9 through 15 of this schedule apply to requests for services other than those subject to the Freedom of Information Act. The authority for establishment of these fees is at 31 U.S.C. 9701 (formerly 31 U.S.C. 483a) and other applicable laws.

Sec. 5. *Circumstances governing exceptions to the charging of fees for records and related services.* (For photographic reproductions, see Sec. 11 of this Appendix.)

a. *Waiver of fees for records and related services.* Fees may be waived in whole or in part under the following conditions:

(1) Where individual collections are $25.00 or less;

(2) Where the furnishing of the service without charge is an appropriate courtesy to a foreign country or international organization, or comparable fees are set on a reciprocal basis with a foreign country or an international organization;

(3) Where the recipient is engaged in a nonprofit activity designed for the public safety, health, or welfare;

(4) Where the agency determines that payment of the full fee by a State, local government, or nonprofit group would not be in the interest of the program involved;

(5) When the furnishing of records and related services is determined by the agency to be in the public interest as primarily benefitting the general public.

(6) In determining whether a fee waiver is appropriate for purposes of paragraph (a)(5) of this Section, an agency should consider the following factors:

(i) Whether there is a genuine public interest in the subject matter of the documents for which a fee waiver or reduction is sought;

(ii) The value to the public of the records themselves;

(iii) Whether the requested information is already available in the public domain;

(iv) The requester's specific qualifications, nature of research, and the purposes for which the requested materials will be used (the identity of a requester is usually not a proper factor to consider in granting or denying access, but should be considered in acting on a request for a fee waiver);

(v) The amount of personal benefit expected to accrue to the requester as the result of disclosure, compared with any discernible public benefit (FOIA fee waiver or reduction is appropriate only where the benefit to the general public is primary).

(7) An agency may, at its discretion, waive or reduce fees associated with a request for disclosure regardless of whether a waiver or reduction has been requested if the agency determines that disclosure will primarily benefit the general public.

b. *Fees not to be charged for records and related services.* Documents shall be furnished without charge under the following conditions:

(1) When filling requests from other Departments or Government agencies for official use, provided quantities requested are reasonable in number;

(2) When members of the public provide their own copying equipment, in which case no copying fee will be charged (although search fees may still be assessed);

(3) When any notices, decisions, orders, or other materials are required by law to be served on a party in any proceedings or matter before any Department agency.

c. Where both paragraphs a and b above apply to a matter, paragraph b shall be controlling.

Sec. 6. *Limitations of copies.*

a. Agencies may restrict numbers of photocopies and directives furnished the public to one copy of each page. Copies of forms provided the public shall also be held to the minimum practical. Persons requiring any large quantities should be encouraged to take single copies to commercial sources for further appropriate reproduction.

b. Single or multiple copies of transcripts, provided the Department under a reporting service contract, may be obtained from the contractor at a cost not to exceed the cost per page charged to the Department for extra copies. The contractor may add a postage charge when mailing orders to the public but no other charge may be added.

Sec. 7 *Search services.*

a. Search services are services of agency personnel—clerical, supervisory, or professional salary level—used in trying to find the records sought by the requester. They include time spent examining records for the purpose of finding records which are within the scope of the request. They also include services to transport personnel to places of record storage, or records to the location of personnel for the purpose of the search, if such services are reasonably necessary.

b. Because of the nature of the Department's business and records, the normal location of a record in a file or other facility will not be considered a search. This would be the same as quickly locating a piece of material for purposes of answering a letter or telephone inquiry, and is based on the Department's obligation to respond to requests furnishing a reasonably specific description of the record.

Sec. 8. *Payments of fees and charges.*

a. Payments will be collected to the fullest extent possible in advance or at the time the requested materials are furnished.

b. Payment shall be made by check, draft, or money order payable to the Treasury of the United States, but small amounts may be paid in cash, particularly where services are performed in response to a visit to a Department office.

c. Where the estimated fees to be charged exceed $50.00, a deposit of 50 percent of the estimated amount shall be collected from the requester before any of the requested materials are reproduced.

d. Where a request for records indicates the necessity of an extensive search that could result in a high search cost, the requester should be notified of that fact and of the possibility of an unproductive search. The notification should offer the requester the opportunity to confer with agency personnel to reform the request to meet the needs at a lower fee. When an extensive search still appears necessary, unless the agency determines that the request is in the public interest in accordance with Section 5a(5), it shall inform the requester that no search will be undertaken until an agreement to pay applicable fees is received, including a deposit of 50 percent of the estimated fee where appropriate.

Sec. 9. *Photographic reproduction, microfilm, mosaic and maps.* Reproduction of such aerial or other photographic microfilm, mosaic and maps as have been obtained in connection with the authorized work of the Department may be sold at the estimated cost of furnishing such reproductions as prescribed in this schedule.

Sec. 10. *Agencies which furnish photographic reproductions.*

---

a. *Aerial photographic reproductions.* The following agencies of the Department furnish aerial photographic reproductions:

Agricultural Stabilization and Conservation Service (ASCS), APFO, USDA–ASCS, 2222 West 2300 South, P.O. Box 30010, Salt Lake City, Utah 84125.

Soil Conservation Service (SCS) USDA, Cartographic Division, Washington, D.C. 20250, or Cartographic Facility in nearest SCS Technical Service Center.

b. *Other photographic reproductions.* Other types of photographic reproductions may be obtained from the following agencies of the Department:

Agricultural Stabilization and Conservation Service (ASCS) (Address above).

Forest Service (FS), USDA, P.O. Box 2417, Washington, D.C. 20013, or nearest Forest Service Regional Office.

Office of Governmental and Public Affairs, USDA, Photography Division, Room 4425 South Building, Washington, D.C. 20250.

Soil Conservation Service, USDA, Information Division, Audio Visual Branch, Washington, D.C. 20250.

National Agricultural Library, USDA, Office of the Deputy Director, Technical Information Systems, Room 200, NAL Building, Beltsville, Md. 20705.

Sec. 11. *Circumstances under which photographic reproductions may be provided free.* Reproductions may be furnished free at the discretion of the agency, if it determines this action to be in the public interest, to:

a. Press, radio, television, and newsreel representatives for dissemination to the general public.

b. Agencies of State and local governments carrying on a function related to that of the Department when it will help to accomplish an objective of the Department.

c. Cooperators and others furthering agricultural programs. Generally, only one print of each photograph should be provided free.

Sec. 12. *Loans.* Aerial photographic film negatives or reproductions may not be loaned outside the Federal Government.

Sec. 13. *Sales of positive prints under government contracts.* The annual contract for furnishing single and double frames slide film negatives and positive prints to agencies of the Department, County Extension Agents, and other cooperating with the Department, carries a stipulation that the successful bidder must agree to furnish slide film positive prints to such persons, organizations, and associations as may be authorized by the Department to purchase them.

Sec. 14. *Procedure for handling orders.* In order to expedite handling, all orders should contain adequate identifying information. Agencies furnishing aerial photographic reproductions require that all such orders identify the photographs. Each agency has its own procedure and order forms.

Sec. 15. *Reproduction prices.* The prices for reproductions listed here are for the most generally requested items.

a. National Agricultural Library. The following prices are applicable to National Agricultural Library items only: Reproduction of electrostatic, microfilm, and microfiche copy—$3.00 for the first 10 pages or fraction thereof, and $2.00 for each additional 10 pages or faction thereof. Dupliction of NAL-owned microfilm—$10.00 per reel. Duplication of NAL-owned microfiche—$3.00 for the first fiche, and $0.50 for each additional fiche. Magnetic tape containing bibliographic files—$45 per reel. Charges for manual and automated data base searches for bibliographic or other research information will be made in accordance with Section 4, subsections c–e of this fee schedule. The contract rate charged by the commercial source to the National Agricultural Library for computer services is available at the National Agricultural Library, Room 111, Information Access Division, USDA, Beltsville, Maryland 20705 (301–344–3834).

b. General photographic reproductions. Minimum charge $1 per order. All sizes are approximate. An extra charge may be necessary for excessive laboratory time caused by any special instructions from the purchaser.

Class of work and unit	Price
1. Black and white copy negatives and film positives:	
4 by 5 (each)	$4.20
5 by 7 (each)	4.50
8 by 10 (each)	5.40
11 by 14 (each)	8.40
2. Black and white enlargements:	
Up to 8 by 10 (each)	3.30
11 by 14 (each)	4.80
Over 11 by 14 (per square foot)	4.20
3. Reductions (from any size negative)	4.20
4. Slides: Black and white (from copy negative):	
2 by 2 cardboard mounted (each)	3.00
3¼ by 3¼ (each)	4.20
Original color (from flat copy) (each)	2.25
Duplicate color (2 by 2 cardboard mounted) (each)	.35
(Duplicate color slides are slides copied from 35mm color slides only.) Slides made from black and white material, or from transparencies larger or smaller than 35mm, will be charged at the same rates shown for black and white and original color slides	
5. Color transparencies (4 by 5) (each)	8.00
6. Color prints	(1)
7. Current USDA slide sets in stock:	
1 to 50 frames	14.50
51 to 60 frames	16.50
61 to 75 frames	18.50
76 to 95 frames	21.50
96 to 105 frames	23.00
106 to 130 frames	26.50
(Prices include printed narrative guide.)	
The following can be purchased for the corresponding slide sets above: Cassettes	3.00
8. Milk sedimentation standards (5 by 7 black and white photograph) (each)	1.25
9. Seeds and seedlings (any size (each)	2.40

(1) By quotation.

c. Aerial photographic reproductions. There is no minimum charge on aerial photography orders. The prices for various types of aerial photographic reproductions are set forth below. Size measurements refer to the approximate size in inches of the paper required to produce the print.

1. Black-and-white contact prints.

Size	Price each
10 x 10 Paper	$3
10 x 10 Diapositive (film)	6
10 x 10 Copy Negative	4

2. Aerial Photo Index Sheets.

Size	Price each
20 x 24 RC (Resin coated base) Paper	$5
24 x 36 Oxlid	4
Microfilm (Photo indexes):	
Aperture Cards	1
Microfiche	2

3. Black-and-white enlargements (projection prints).

Size	Price each	
	RC paper	Film positive transparency
12 × 12	$6	$12
17 × 17	8	14
24 × 24	12	20
36 × 36	25	35

4. Reproductions from color negatives.

Size	Price each	
	RC color paper	Color film positive transparency
10 × 10 contact	$5	15
12 × 12 enlargement	20	
20 × 20 enlargement	25	
24 × 24 enlargement	30	
36 × 36 enlargement	45	

5. Reproductions from color positive transparencies (natural color or color infrared).

Size	Price each	
	White opaque base color print film	Color film positive transparency
10 × 10 contact	$6	$12
12 × 12 enlargement	25	
20 × 20 enlargement	30	
24 × 24 enlargement	35	
36 × 36 enlargement	60	

6. Special need. For special needs not covered above, persons desiring aerial photographic reproductions should contact the agencies listed in section 10a or the Departmental aerial photography coordinator, Aerial Photography Field Office, USDA–ASCS, 2222 West 2300 South, P.O. Box 30010, Salt Lake City, Utah 84125.

d. Audio and videotape reproductions. For reproductions of audio or videotapes, requesters must supply their own recording tape, and will be assessed a fee of $20.00 an hour for copying work requested. There is a one-hour minimum charge. Payment is required at the time videotapes or audiotapes are accepted by the requester.

Dated: March 3, 1986.

Frank W. Naylor, Jr.,

Acting Secretary of Agriculture.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 61

Branch Technical Position Statement on Licensing of Alternative Methods of Disposal for Low-Level Radioactive Waste

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft branch technical position statement; requests for comments.

SUMMARY: This draft branch technical position statement proposes to answer licensing questions regarding the land disposal of low-level radioactive waste (LLW) and improve and simplify the licensing process. This statement would provide answers to certain questions that have arisen regarding the applicability of 10 CFR Part 61 to near-surface disposal of waste, using methods that incorporate engineered barriers or structures, and other alternatives to conventional shallow land burial disposal practices. Also, there have been general requests for regulatory guidance on alternative disposal methods. The specific alternative methods of interest to the requesters, however, are undetermined, as is the type and extent of desired guidance. This statement identifies a recently published NRC contractor report which addresses the applicability of 10 CFR Part 61 to a range of generic disposal concepts and which provides guidance that the staff intends to use for these concepts. To ensure prompt and meaningful regulatory guidance during the development of new disposal capacity for LLW, NRC staff encourages early and continuing interactions between the NRC and other entities involved in efforts to develop or regulate new LLW disposal sites. Finally, this notice solicits the States and other interested persons to identify any additional alternative disposal methods that they may be considering, so that they can be included in NRC actions to fulfill the requirements of section 8(a) of Pub. L. 99–240, the Low-Level Radioactive Waste Policy Amendments Act of 1985.

DATES: The comment period expires May 5, 1986.

ADDRESSES: Send written comments to the Director, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of all comments received by the NRC may be examined at the NRC Public Document Room, 1717 H Street, NW, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Dr. R. John Starmer, Low-Level Waste and Uranium Recovery Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone (202) 427–4170.

SUPPLEMENTARY INFORMATION: This statement would provide technical guidance for licening and regulation of alternative methods for near-surface land disposal of LLW. The statement describes general design concepts for several alternative disposal methods and discusses related licensing considerations. For the purpose of this statement, alternative disposal methods are defined as disposal facility designs or disposal concepts which incorporate engineered barriers or structures, or otherwise differ from the past and present methods of near-surface land disposal of LLW by shallow land burial.

With the enactment of the Low-Level Radioactive Waste Policy Amendments Act of 1985 (Pub. L. 99–240), on January 15, 1986, the NRC is required, in consultation with the States and other interested persons, to identify methods for the disposal of low-level radioactive waste other than shallow land burial, and establish and publish technical guidance regarding licensing of facilities that use such methods. These actions are to be completed by January 1987. Further, the Act requires that by January 1988, the NRC, again in consultation with the States and other interested persons, identify and publish all relevant technical information regarding such alternative disposal methods that must be provided to the Commission in order to pursue such methods. For the NRC to meet these statutory requirements in a timely manner, it must immediately hear from the States and other interested parties as to what additional alternatives should be identified, as licensing guidance must be developed and published over very short time frames. Alternatives identified after the comment period will be noted, but licensing guidance for them not be available within the statutory time frames.

Draft Branch Technical Position Statement on Licensing of Alternative Methods of Disposal for Low-Level Radioactive Waste

A. Introduction

This technical position statement on alternative methods of land disposal of low-level radioactive waste (LLW) is provided in response to the question of whether disposal methods employing engineered structures and barriers can be licensed under the existing requirements in 10 CFR Part 61, "Licensing Requirements for Land Disposal of Radioactive Waste". The answer to the question is, "yes". This technical position statement is further prompted by the receipt of general requests for guidance on alternative disposal methods. These requests, however, have been indefinite regarding the disposal methods of specific interest, and the extent and type of regulatory guidance desired. The NRC staff has met with a number of different State and Regional Compact officials over the past six months to discuss regulatory guidance needed for the development of new disposal sites. Such discussions will continue and we hope they will begin to focus more sharply on specific technical questions as States and Regional Compacts reach decisions on choice of disposal method. A major purpose of this technical position statement is to provide guidance in response to requests received to date and to help ensure that States and Compacts are able to make timely decisions. The specific information contained in this technical position is intended to:

- Clarify the scope of disposal methods included within the meaning of the term "near-surface disposal";
- Define the characteristics of alternative land disposal concepts considered to be within the framework of the existing regulatory requirements in 10 CFR Part 61;
- Provide general guidance regarding the varous components of the disposal system for alternative near-surface land disposal concepts which may present problems in light of the performance objectives of 10 CFR Part 61;
- Encourage early and continuing interactions between potential license applicants, the LLW disposal service industry, States, other government agencies, and the NRC regarding efforts to develop and regulate new disposal capacity for LLW;
- Encourage design engineers, vendors, and prospective license applicants to submit detailed technical information on proposed disposal methods as far in advance of license application as possible; and
- Encourage focus on the fewest possible approaches to ensure standardization and resultant ability to use limited NRC resources most effectively.

The NRC staff will apply existing licensing criteria, performance objectives, and most of the technical requirements of 10 CFR Part 61 to proposed alternative disposal methods employing engineered structures and barriers. The NRC staff believes it will be possible to complete reviews of disposal alternatives with an expectation of fully resolving the licensing questions that may arise in the review process provided that an adequate pre-licensing dialogue is established.

B. Background Considerations

As a part of its work in developing 10 CFR Part 61 and its supporting environmental impact statement, NRC conducted a study of alternative low-level waste disposal methods. This was intended to help ensure that all viable disposal methods were considered and that the initial issuance of the regulation and subsequent amendments would be based on the disposal methods most likely to be used. The results of studies and public comments in response to the Advance Notice of Proposed Rulemaking for Part 61 led NRC to concentrate its efforts to develop regulations on land disposal methods.

Land disposal methods readily divide into two categories: Those that take place near the earth's surface and those that involve deeper disposal. Near-surface disposal encompasses the full range of technology that can be applied to low-level waste disposal near the earth's surface; that is, shallow land burial, deeper burial at depths up to 30 meters, and the use of engineered structures, barriers, and other concepts, some of which may be partially above the surface.

Specific requirements for deeper land disposal methods such as mined cavities, either natural or man-made, were not considered in the initial rulemaking effort. This technology involves considerations for siting and facility design, operations, and closure which are sufficiently different from those for near-surface disposal, that certain technical requirements in Subpart D of 10 CFR Part 61 do not apply. Such methods were left to be addressed in action on a specific application, subsequent guidance, and rulemaking effort, if rulemaking is warranted. It was also recognized that other disposal methods such as hydrofracture and deep-well injection have been used (e.g., by the Department of Energy in Oak Ridge, Tennessee). These two alternatives were not specifically addressed in the initial Part 61 rulemaking effort since they are suited to a very narrow range of waste types and require specific geologic and hydrogeologic conditions. Consequently, they also were left to be addressed at a later time, if necessary. Mined cavity, hydrofracture, or deep-well injection disposal methods, could, however, be sited and licensed on a facility-specific basis under existing regulatory provisions in Part 61.

C. Position

1. Regulatory Framework

The regulatory framework established in 10 CFR Part 61 covers all phases of waste disposal from site selection through facility design, licensing, operations, closure, and post-closure stabilization, to the end of the period of active institutional control. This framework of regulations establishes the procedures, criteria, terms, and conditions forming the basis upon which the NRC will issue and renew licenses for the land disposal of LLW.

Subparts of the rule covering general provisions and procedural licensing aspects, as well as those subparts covering performance objectives, financial assurances, State and Tribal participation, and records, reports, tests and inspections apply to all methods of land disposal of LLW, both near-surface and at greater depths. The technical requirements in Subpart D are specified only for near-surface disposal methods with reserved sections for other than near-surface. As discussed in Section 5, the NRC staff believes that, except for the potential need to develop site specific alternative waste form and classification requirements, the technical requirements in Subpart D should apply to alternative methods of near-surface disposal using engineered barriers or structures. These alternative methods include, for example, disposal by emplacement in below-ground engineered vaults, partially above-ground engineered vaults, earth-mounded engineered bunkers, lined shafts or boreholes, caissons or pipes, and concrete-walled trenches.

2. Evaluation of Alternative Disposal Methods

This technical position is guided by the background of knowledge and experience reflected in the rulemaking which culminated in the issuance of 10 CFR Part 61. Both draft and final environmental impact statements for the rule address alternative disposal methods. Alternative disposal facility design and operating practices were also among the subjects covered in the background studies and information considered in the rulemaking.

Since the publication of Part 61 in December 1982, the staff has continued to evaluate alternative disposal methods. A NRC contractor report prepared by the U.S. Army Corps of Engineers, entitled "Alternative Methods for Disposal of Low-Level Radioactive Wastes" (NUREG/CR-3774)[1] was published in five volumes:

- Volume 1, "Description of Methods and Assessment of Criteria," published April 1984, examined the applicability of 10 CFR Part 61 requirements—siting, design, operations and closure, and monitoring—to five generic design concepts for alternative disposal methods. The five design concepts are below-ground vaults, above-ground vaults, earth-mounded concrete bunkers, mined cavities, and augered holes.
- Volumes 2–5 published October 1985, provide a more detailed assessment of the applicability of existing criteria for near-surface disposal (Subpart D, 10 CFR Part 61) to four of the five alternative disposal methods covered in Volume 1. The four methods covered in the reports were below-ground vaults, above-ground vaults, earth-mounded concrete bunkers, and shaft disposal. (Note that mined cavity disposal is being evaluated but the work is incomplete at the present time.)

The authors concluded that the siting and site design, operations, closure, and monitoring criteria of Subpart D, 10 CFR Part 61, should apply to the four alternative disposal methods. The staff agrees with those conclusions, differing with the contractor's report on only a few minor interpretive points of the regulation. The findings of these reports and clarification of the ways the criteria should be interpreted will be incorporated into future regulatory guidance. This guidance will be issued based on consideration of any specific disposal alternatives that may be received for review, and analysis of particular design features of the generic disposal concepts that have already been studied. Staff expects to issue the guidance as modifications to a standard format and content guide being prepared for shallow land burial applications under Part 61.

The NRC basis for selecting the conceptual designs for first study by the Army Corps of Engineers was that each method appears to be under practical consideration by other countries, U.S. agencies, or States. One of these concepts, mined cavities, does not

[1] Copies of NUREG/CR-3774 may be purchased through the U.S. Government Printing Office by calling (202) 275–2060 or by writing to the U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies may also be purchased from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161. Copies are available for inspection and/or copying for a fee in the NRC Public Document Room, 1717 H Street, NW, Washington, DC 20555.

VOL 51 ISS 44 MR 6 1986 UMI

appear to be under serious domestic consideration at this time. Further, as noted earlier, mined cavity disposal represents a significant departure from the experience; data and knowledge base used in formulating the requirements for Part 61. The NRC staff is currently evaluating the recommendations made by the Corps of Engineers regarding technical requirements for mined cavity disposal prior to publication of a separate volume of NUREG/CR–3774 on that disposal alternative.

While NRC has studied design concepts for alternative disposal methods, NRC cannot complete detailed design work or developmental research on new concepts or specific designs for facilities that would have the effect of establishing or developing their commercial potential. These activities are developmental rather than regulatory in nature and should be supported by the entities responsible for establishing new waste disposal capacity or, on the Federal level, by the Department of Energy.

3. General Guidance

Section 9 of the Low-Level Radioactive Waste Policy Amendments Act of 1985 requires that, to the extent practicable, NRC complete all activities associated with the review and processing of any license application within 15 months of receipt of the application. The NRC is moving ahead to provide information which will help to ensure the timely review of low-level waste disposal facility license applications. However, the NRC staff will also evaluate innovative disposal designs that might later be reflected in a license application. To promote timely regulatory decisions, designers, vendors, and prospective license applicants are encouraged to submit detailed technical information on proposed disposal facility designs in advance of formal license application. This will permit NRC staff to evaluate fundamental safety and performance aspects and provide pre-licensing guidance. However, such information should only be submitted when the designs are a part of a specific application being prepared, represent work sponsored by a potential applicant, or are based on some other type of commitment by a potential licensee. Advance review, and where feasible, approval of designs and related technical information can reduce considerably the time needed for license application review.

Designs for alternative disposal methods should reflect both the benefits of significant research and development work, and the experience gained from waste disposal operations in the United States and other countries. It is anticipated that alternative disposal methods may offer an enhanced margin of protection for the public and the environment. If the alternative design is coupled with innovative operations (e.g., automated handling and emplacement) or more conservative waste forms, content, or packaging, it may also offer an enhanced margin of protection for workers. Tradeoffs on worker exposure, operations, and waste form should be factored into designing as indicated in Section 4 which follows. The NRC particularly encourages design innovations which increase safety and reliability and which generally are supported by a proven technology or one which can be demonstrated by a satisfactory technology development program.

Early review of facility design can be requested on an individual applicant basis. However, the NRC believes that there are advantages to standardized approaches to waste disposal. Standard disposal design features can benefit public and environmental protection by concentrating the resources of waste management engineers and vendors on particular approaches, and by stimulating standardized programs of construction practice and quality assurance. The use of standardized approaches and design concepts can also facilitate more effective and efficient licensing and inspection processes. To this end, staff plans to give higher priority and focus resources on those approaches which are of greatest interest to States. Therefore, the NRC staff strongly encourages industry and the States to pursue standardization in developing alternative waste disposal methods. Procedures for reviewing standard designs could be patterned after the procedures for reviewing standard designs for reactors in Appendix 0 to 10 CFR Part 50.

The public should note that pre-application requests for NRC review that also request approval by NCR involve fees. There are two ways for NRC to give approval. Both involve fees under 10 CFR Part 170. Requests that are suitable and submitted as Topical Reports involve a $20,000 fee. If the request is not suitable and not submitted as a Topical Report, Part 170 requires full cost recovery as a Special Project (see 10 CFR 170.31, Item 12). Also see 10 CFR 170.11(b) which allows the Commission to consider exemptions from the fee requirements when consistent with law and the public interest.

The NRC intends, commensurate with its statutory responsibilities, to improve and simplify the licensing process and provide stability and predictability in the regulation of new LLW disposal facilities. To help accomplish this objective, the NRC staff encourages the earliest possible interaction between potential license applicants, the waste disposal service industry, States, other government agencies, and the NRC. This should also serve to provide all interested parties, including the public, with timely and objective assessments of the public and environmental protection aspects of proposed alternative waste disposal methods.

4. Descriptions of Alternative Disposal Concepts

Each of the design concepts described below has either been evaluated as a waste disposal alternative to shallow land burial or is currently being used or considered for that purpose in other countries. Descriptions of these design concepts are included here to help define the range of design characteristics considered to be within the framework of the existing regulatory requirements of 10 CFR Part 61. The concepts are described in more detail in NUREG/CR–3774.

a. *Below-ground Vaults.* The term below-ground vault refers to any enclosed engineered structure built totally below the surface of the earth and used for the disposal of low-level radioactive waste. No portion of the structure would protrude above the natural surface grade. A below-ground vault could be fabricated from the engineering materials discussed below for above-ground vaults. The vault could be built with engineered walls and roof; the floor could be natural soil or rock, treated soil or rock, or engineered materials. The vault, as an integrated structure, also has the characteristic of limited access to its interior space, such as a doorway or portal or hatch opening. Operational access to the vault from the surface may be in the form of an excavated ramp, which is built and then covered over at closure. During operations, however, the vault may have more extensive access, depending on its design. See Volume 2 of NUREG/CR–3774 for a more complete description of variations in conceptual design and operation of below-ground vaults.

b. *Above-ground Vaults.* An above-ground vault disposal unit is an engineered structure or building with floor, walls, roof, and limited access openings on a foundation near the ground surface. At least some portion of the structure would be above the final

post-closure surface grade. The vault is built from engineered structural materials. Fabrication could be of masonry blocks, fabricated metal shapes, reinforced cast-in-place or sprayed concrete, pre-cast concrete, or plastic or fluid media molded into various solid shells. All of these materials have been used to construct vaults. There are no existing regulatory constraints on material selection or shape of the vault as long as it can be demonstrated by the license applicant that the performance objectives of 10 CFR Part 61 can be achieved. See Volume 3 of NUREG/CR–3774 for a more complete description of variation in conceptual design and operation of above-ground vaults.

c. *Earth-mounded Concrete Bunkers.* The design of earth-mounded concrete bunkers may include features of trenches, below-ground vaults, and earth mounds. This disposal method may also rely on mandatory requirements on waste form or site operation, such as specialized packaging and encapsulation. The basic design of an earth-mounded concrete bunker currently used in France segregates wastes according to level of radioactivity. Wastes with higher levels of radioactivity are embedded in concrete below ground. Waste packages with lower levels of radioactivity are emplaced above ground at natural grade in earthen mounds (tumuli). Thus, an earth-mounded concrete bunker may involve both above-ground and below-ground construction, and may include waste encapsulation and backfilling with both concrete and earth. See Volume 4 of NUREG/CR–3774 for a more complete description of variations in conceptual design and operation of earth-mounded concrete bunkers.

d. *Shaft Disposal.* The term shaft disposal refers to a near-surface disposal alternative in which wastes would be disposed of in shafts or boreholes augered, bored, or sunk by conventional construction methods. The shafts could be lined or unlined and be of various sizes. Lining could be of concrete, metal, or other suitable structural material. See Volume 5 of NUREG/CR–3774 for a more complete description of variations in conceptual design, use, and operations of shaft disposal.

If specific disposal facility designs are brought to the NRC for evaluation, the NRC will provide pre-licensing guidance to help ensure that key issues will be identified and resolved prior to licensing and that NRC's regulatory requirements are incorporated into the applicant's program. However, until such time as detailed technical information on designs are submitted, the NRC staff believes that regulatory guidance must be sufficiently general to avoid placing unnecessary constraints on the development of new design concepts. The nature of any new NRC regulatory requirements will be based on the extent to which an individual proposed disposal design is shown to conform to the existing technical requirements of Part 61 or is compatible with meeting the performance objectives set out in Part 61 when combined with other components of the disposal system.

The following general guidance is provided for features and characteristics of various alternative disposal concepts which may present problems in demonstrating compliance with the 10 CFR Part 61 performance objectives. Requirements to reassess and potentially modify other components of the disposal system are also discussed. This guidance is intended to assist waste disposal engineers, license applicants, and States in identifying a preferred waste disposal design.

5. Design Considerations

Land disposal facilities must be sited, designed, operated, closed, and controlled after closure to achieve the performance objectives set forth in Subpart C of Part 61. The combination of performance objectives and technical requirements establish a systems approach to waste disposal. The components of the "system" include the site and its characteristics, the facility and disposal unit design, the waste, facility operations and closure, intruder barriers, and institutional controls. Environmental monitoring is used to assess the system's performance. Reliance is not placed on any one component of the system. Rather, all interact in achieving the performance objectives. Design of the facility and disposal units plays an important role in the performance of the waste disposal system.

a. *Stiting.* The disposal site suitability requirements of § 61.50 are minimum common sense requirements and apply to siting of all near-surface alternative disposal methods. The first critical step, as with any disposal facility, is to select a site where natural conditions favor disposal.

Engineered structures and barriers should not be viewed as a planned substitute for a suitable site. Rather, in conjunction with other disposal system components, the engineered features should offer enhanced confidence in protection for the public and environment.

Thus, States are encouraged to proceed expeditiously with their disposal siting programs while NRC develops supplemental standard format and content guidance for alternative methods.

b. *Design of Disposal Units.* The disposal site design requirements of § 61.51 are sufficiently flexible to apply to alternative disposal methods which fall within the four concepts described in section 4 of this statement. Although little experience concerning waste disposal in engineered structures is available, the technology exists to construct buildings and stuctures that will last for centuries. There are structures in use today that were built hundreds and even thousands of years ago. However, procedures are not well developed for obtaining assurance that structures will be left alone or will survive intact over the period required to safely isolate emplaced wastes from the human environment after the loss of institutional controls. Designs which actively rely on engineering should be evaluated for deterrence of intrusion and also the consequences of intrusion and failure of the structure sooner than expected.

Waste retrievability is not required or prohibited by 10 CFR Part 61. If waste retrievability is proposed as a design feature, several important factors should be considered. Retrievability should not compromise or otherwise lessen the ability of the combined features to meet the performance objectives of Part 61. The designer should be sure that retrievability measures do not result in increased problems in protecting the inadvertent intruder. If the retrievability concept requires action by the custodial agency during the active institutional control period to assure long-term performance (e.g., grouting around packages), funding and institutional commitments for the action should be included.

c. *Waste Classification.* The ability to dispose of all Class A, B, and C LLW, as currently specified in Subpart D of Part 61, may have to be reassessed for the specific concept finally developed. Existing concentration limits for Class A, B, and C are based on associated waste form and other components of the system to determine critical pathways. Certain disposal methods and associated operations may not accommodate all classes of LLW or parts of one or more classes. An alternative waste classification system may be proposed by the applicant because of the types of waste generated within the region served by the proposed facility, the specific design of

VOL 51
ISS 44
MR 6
1986
UMI

disposal units, or other factors. The applicant may propose a waste classification system different from that described in § 61.55, provided the system is compatible with the performance objectives of Part 61 and the concentrations of radionuclides in the system proposed do not exceed the values specified in § 61.55 for Class C waste. Alternatives to current waste classification requirements can be considered under the flexibility in § 61.58. However, alternative waste classes have the potential to confuse waste generators. Staff believes that using other options such as more restrictive waste forms or packaging or alternative emplacement methods would minimize waste generator confusion.

d. *Intruder Barriers.* Part 61 requires Class C waste to be disposed of in such a manner that the top of the waste is a minimum of five meters below the top surface of the cover over the waste or that intruder barriers are included that are designed to protect against an inadvertent intrusion for at least 500 years (§ 61.42, § 61.52). Alternative disposal methods coupled with alternative waste classification systems should provide a level of protection for the inadvertent intruder equivalent to the existing requirements.

e. *Waste Characteristics:* The minimum requirements on waste characteristics specified in § 61.56(a) will apply for alternative disposal methods. The applicant may use the flexibility on stability requirements in 10 CFR 61.56(b)(1) if waste stability is to be provided by the engineered structure in which the waste is emplaced. However, proposed designs may need more stringent minimum waste forms or packaging to protect workers or design features to accommodate planned operations (e.g., weight or size limits). Supplemental requirements should be reasonable enough so that generators and processors can be relied on to comply with the requirements. Alternatives to current waste characteristics requirements can be considered under § 61.58.

f. *Facility Operations and Closure:* The requirements for facility operations and closure in § 61.52 will be applied to the alternative disposal methods described in this statement. The specific application of the individual requirements may vary with a particular alternative disposal design. Worker exposure and safe operations should obviously be a factor in developing designs. Volumes 2 through 5 of NUREG/CR-3774 contain a more complete explanation and discussion of individual requirements of § 61.52 and their application than is included in this position.

g. *Environmental Monitoring:* The requirements for monitoring specified in § 61.53 will apply for alternative disposal methods. The specific parameters to be monitored and the measurements and observations to be made may vary significantly between below-ground and above-ground disposal units and, for above-ground units, between earth covered and uncovered units. Provisions for monitoring should be included in design considerations.

h. *Institutional Requirements.* The land ownership and institutional control requirements of § 61.59 will apply to alternative disposal methods. Existing requirements related to active institutional controls may have to be modified by license to accommodate some engineered structure disposal concepts, such as those built above ground without cover. For example, the wastes may be more readily available for exposure, so additional controls and a more comprehensive program to exclude the public from the site during the active institutional control period may be necessary. Part 61 provides that active institutional controls cannot be relied on for more than 100 years. Part 61 does not prohibit longer periods of active controls. However, longer periods should only provide additional assurances and should not be necessary to assure long-term performance.

6. Summary

The NRC staff should be informed as early as possible of new design concepts under development by the industry or under consideration by States and Compacts that do not represent a variation on the four concepts in Volumes 2 through 5 of NUREG/CR-3774. New disposal concepts may involve technical issues that should be identified and resolved in order to assure timely regulatory actions on license applications. NRC resources are limited and their use must be planned and focused on real needs. Recent legislation also requires that licensing guidance on alternatives be prepared and published by January 1987. Also, if design questions on specific proposals raise serious problems in meeting the requirements of 10 CFR Part 61, the most cost-effective decision on the part of the applicant may be to eliminate a particular alternative or design feature from further consideration. Early consultation with the appropriate licensing authority will aid timely decisions.

Prospective applicants should understand that they are responsible for all research, data, and technical evaluations necessary to support a specific license application. NRC conducts research only to provide the technical bases for rulemaking and regulatory decisions, to support licensing and inspection activities, to assess the feasibility and effectiveness of safety features and to increase our understanding of phenomena for which analytical methods are needed to carry out regulatory responsibilities.

D. Questions

A number of basic issues have been identified by NRC staff in the course of its evalution of alternative disposal methods. The staff requests comments from States and all other interested parties on these questions as well as any other aspect of this proposed technical position.

1. Are there any alternative disposal methods under serious consideration that do not represent a variation or combination of the four concepts evaluated in Volumes 2 through 5 of NUREG/CR-3774?

2. With the publication and endorsement of NUREG/CR-3774 and plans for modified guidance on the content of applications for alternative methods, what additional specific regulatory guidance is needed regarding alternative disposal methods?

3. To concentrate the resources of designers, engineers, and vendors on particular approaches, and permit a more effective and efficient licensing process, should NRC's regulatory program include active solicitation and review of a reference design concept? The staff could review and approve a submitted generic design for most (or a major portion) of a near-surface land disposal facility outside the context of a application for a site-specific license. (An approval design may be referenced in later applications.) If so, what aspects of a disposal facility design are amenable to standardization?

4. To promote a more effective and efficient licensing process, should NRC's regulatory approach include early pre-application review of site suitability issues relating to the development of a low-level radioactive waste disposal facility separately from and prior to the application for a license to construct and operate such a facility? Such early review and documentation of staff findings could be patterned after the procedures for reactor construction permits in Appendix Q to 10 CFR Part 50. If so, what provisions in Appendix Q should be included or deleted?

Dated at Silver Spring, Maryland, this 26th day of February, 1986.

For the Nuclear Regulatory Commission.

Robert E. Browning,
Director, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 424

Retail Food Store Advertising and Marketing Practices

AGENCY: Federal Trade Commission.

ACTION: Notice of Postponement of Scheduled Public Hearing.

SUMMARY: The Federal Trade Commission has postponed until April 1, 1986, the public hearing on the Proposed Amendment of the Retail Food Store Advertising and Marketing Practices Trade Regulation Rule. The time for filing statements of testimony and exhibits by witnesses has not been extended.

DATE: The public hearing will commence at 9:30 a.m., April 1, 1986.

ADDRESS: The public hearing will be held in Room 532 of the Federal Trade Commission Building, Pennsylvania Avenue and Sixth Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Henry B. Cabell, Presiding Officer, Federal Trade Commission, Washington, DC 20580, 202-523-3564 of Jill Goodrich-Mahoney, Attorney, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580, 202-523-5998.

SUPPLEMENTARY INFORMATION: By **Federal Register** Notice of October 24, 1985 (50 FR 43224) the Commission published the proposed amendment of the rule, announced the date for commencement of the hearing and set a deadline for filing statements of testimony by prospective witnesses and exhibits. The hearing was scheduled to commence on March 17, 1986. Prepared statements of testimony by witnesses and exhibits were to be filed on or before February 14, 1986.

The Presiding Officer has granted the motion of the Commission staff for a delay in the commencement of the hearing, and has postponed the commencement date of the hearing until April 1, 1986. The Presiding Officer has not extended the deadline for filing prepared statements of testimony and exhibits by witnesses.

Issued: February 28, 1986.

Henry B. Cabell,
Presiding Officer.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 202, 203, 206, 207, 210, 212, 241, and 250

Royalty Management; Product Valuation Regulations and Related Topics

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Addition to advance notice of proposed rulemaking and request for comments.

SUMMARY: The Minerals Management Service (MMS) hereby gives notice that it is supplementing its February 5, 1986, **Federal Register** Notice announcing an advance notice of proposed rulemaking. Two alternative product valuation methods are proposed for oil and gas and associated products.

DATES: Comments must be received on or before April 7, 1986. A public meeting will be held on March 18 and 19, 1986, from 8:30 a.m. to 4:00 p.m.

ADDRESSES: Comments should be mailed to Minerals Management Service, Royalty Management Program, Office of External Affairs, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 660, Denver, Colorado 80225, Attention: Vernon B. Ingraham. The public meeting will be held at the Denver Federal Center, Building 25, Room 1254, Lakewood, Colorado 80225.

FOR FURTHER INFORMATION CONTACT: Vernon B. Ingraham, telephone: (303) 231-3360, (FTS) 236-3360.

SUPPLEMENTARY INFORMATION:

I. Background

An advance notice of proposed rulemaking giving notice of the availability of draft valuation regulations for coal, oil, gas and associated products, gas processing allowances, and transportation allowances was published in the **Federal Register** on February 5, 1986 (51 FR 4507). The background information in that notice applies also to this notice.

II. Draft Regulations

The draft regulations for each of the products being made available for review and comment (i.e. coal, oil, and gas) incorporate a procedure for valuing products disposed of under non-arm's-length-contract and no-contract situations that requires an intensive, up-front MMS approval process. However, future resources available to MMS may be inadequate to support the active MMS role required in the draft proposed regulations. Therefore, MMS specifically requests comments for each of the regulations regarding alternatives that may require fewer resources for both the lessee and MMS. In this regard, MMS has identified a few specific alternatives, but other alternative suggestions are requested.

In valuing oil, posted prices are a well-recognized valuation standard, and posted price bulletins cover almost all producing areas. MMS has proposed to use these posted prices as the primary valuation criteria. Under the draft regulations, MMS would review all transactions that do not occur under an arm's-length contract. This review would be based primarily upon information submitted to MMS by the lessee, and then MMS would specify a value, which in all probability would be based upon prices posted for the producing area. As an alternative, MMS would like comments on whether the regulations could require the lessee to compute royalties based on a price which is no more than 5 percent less than the highest price posted applicable to the producing area, adjusted for gravity. This would eliminate both the need for lessees to submit information and for MMS to review all that information before establishing a royalty value in non-arm's-length and no-contract situations. The lessee's valuation still would be subject to later audit by MMS.

For valuing gas, one alternative to the draft regulations would retain the basic approach of the draft proposed regulations, but up-front MMS approval would not be required for non-arm's-length-contract and no-contract situations. The lessee would be responsible for determining whether its non-arm's-length contract is equivalent to non-arm's-length contracts or, failing that, for determining which of the prioritized valuation criteria should be used. Thus, rather than requiring the lessee to propose a value, submit that proposal to MMS with supporting documentation, and then await MMS approval, this alternative would allow the lessee, in the first instance, to apply the prioritized criteria which would be set forth in the rules. Of course, the lessee's value would be subject to later audit to ensure its reasonableness. While this approach would reduce MMS's involvement in establishing value, comments are requested on

VOL 51
ISS 44
MR 6
1986
UMI

whether it would provide the level of certainly to the lessee that MMS desires in the regulations. One purpose of the regulations is to eliminate, to the extent practicable, the situation which currently exists whereby lessees are uncertain as to what the royalty value of a product will be until MMS conducts an audit.

A second alternative for valuing gas in non-arm's-length-contract and no-contract situations would be to have the regulations prescribe, by geographical area, a minimum value for royalty purposes. This minimum value would change periodically based upon an index which would also be prescribed by the regulations. The index would be designed to reflect changing market conditions, and thus cause the minimum value to rise or fall with the market. For example, assume minimum value for NGPA section 102 gas for January 1986 is determined after the notice and opportunity for comment to be $2.10 per MMBtu for the Gulf of Mexico OCS. The index is prescribed to be the average projected base price reported to FERC for the Gulf of Mexico OCS under all Purchased Gas Adjustment (PGA) filings in effect for the current month divided by the average projected base price reported to FERC under all PGA filings in effect for January 1986. If the average projected base price reported to FERC for January 1986 was $2.00 per MMBtu, and for June 1986 it was $1.75 per MMBtu, the minimum value upon which royalties could be based for June 1986 Gulf of Mexico OCS production would be $1.84 per MMBtu.

PGA filings are required to be filed by all interstate pipeline companies that purchase gas for resale and these filings are publicly available. One concern with this alternative is that the PGA filing information may not represent the total gas sales from an area because it does not include intrastate gas sales, direct producer sales, etc. In the worst case, there may be no PGA filing information available, such as for the State of California where no gas produced is sold into the interstate market. The advantage of this alternative is that lessees would be able to determine with some certainty what their royalty obligation would be. For MMS, the audit burden would be decreased significantly because auditors would be required to determine only if the lessee paid either gross proceeds or the minimum value, whichever is greater.

MMS's objective is to have clear and concise valuation regulations which result in proper, reasonable values for royalty purposes. Our goal is to avoid a process that is burdensome on either the lessee or lessor. Therefore, comments are requested on the draft rules, the alternatives outlined in this notice, and any other suggestions lessees or others may have for inclusion in proposed regulations.

III. Availability of Draft Regulations

Interested persons may obtain a copy of the draft regulations upon request from the MMS at the address above in **ADDRESSES**.

The format of the public meeting will be the same as that specified in the preamble section of the draft regulations. The oil and gas draft regulations will be covered on March 18, the coal draft regulations will be covered in the morning session on March 19, and the gas processing and transportation allowance draft regulations will be covered in the afternoon session on March 19.

Dated: March 2, 1986.

William D. Bettenberg,

Director, Minerals Management Service.

BILLING CODE 4310-MR-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD3-85-81]

Special Anchorage Area; Hudson River, Tarrytown, NY

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is considering a proposal to establish a special anchorage area in the Hudson River southwest of Tarrytown, New York and northeast of the Tappan Zee Bridge. This proposal is being considered because there is a reported shortage of dock space for recreational vessels in the lower Hudson River. The proposed special anchorage would help alleviate the shortage of space by providing a mooring area for approximately 45 small vessels.

DATE: Comments must be received on or before April 21, 1986.

ADDRESSES: Comments should be mailed to Commander, Coast Guard Group New York, Bldg. 109, Governors Island, New York, NY 10004. The comments and other materials referenced in this notice will be available for inspection and copying at the Vessel Movement Office, Bldg. 109, Governors Island, New York. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant Junior Grade T.S. Kuhaneck, Vessel Movement Officer, Commander, Coast Guard Group New York, at (212) 668-7933.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD3-85-81) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped, self-addressed postcard or envelope is enclosed.

The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are LTJG T.S. Kuhaneck, Project Officer, Coast Guard Group New York, and Mrs. M.A. Arisman, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Proposed Regulations

The area proposed for designation as a special anchorage lies in an area southwest of Tarrytown, New York, and northeast of the Tappan Zee Bridge. This is an area of heavy recreational boating concentration but one lacking in available dock area. The proposed special anchorage would increase the area available for recreational boaters to anchor in this section of the Hudson River. This rule would allow anchoring of small boats (vessels under 65 feet in length) without requiring them to display anchor lights or sound fog signals. The area is well away from the navigable channel and is located where general navigation will not endanger or be endangered by unlighted vessels. It is projected that approximately 45 small vessels will use this designated area. The area would be open to the general public with access available at the Washington Irving Boat Club. The boat club has launching equipment, a paved launching ramp, and fueling and parking facilities. This regulation is issued pursuant to 33 U.S.C. 2030, 2035, and 2070 as set out in the authority citation for all of Part 110.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. Establishment of this proposed Special Anchorage Area will not require dredging or result in increased cost to any segment of the public. In fact, it may attract additional recreational boaters to the area which would have a favorable economic impact in commercial facilities providing services to these boaters.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Lists of Subjects in 33 CFR Part 110

Anchorage grounds.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 110 of Title 33, Code of Federal Regulations as follows:

1. The authority citation for Part 110 is revised to read as follows:

Authority: 33 U.S.C. 471, 2030, 2035 and 2071; 49 CFR 1.46 and 33 CFR 1.05-1(g). Sec. 110.1a also issued under 33 U.S.C. 1223 and 1231.

2. In § 110.60, paragraphs (p-1) and (p-2) are redesignated (p-2) and (p-3), respectively, and a new paragraph (p-1) is added to read as follows:

§ 110.60. Port of New York and vicinity.

* * * * *

(p-1) *Hudson River, at Tarrytown, NY.* Beginning at a point on the shoreline at latitude 41°04'20" N., longitude 73°52'04" W.; thence due west to a point at latitude 41°04'20" N., longitude 73°52'12" W.; thence due south to a point at latitude 41°04'13" N., longitude 73°52'12" W.; thence due east to a point on the shoreline at latitude 41°04'13" N., longitude 73°52'00" W., thence along the shoreline to the point of beginning.

* * * * *

Dated: February 24, 1986.

P.A. Yost,

Vice Admiral, U.S. Coast Guard, Commander, Third Coast Guard District.

[FR Doc. 86-4915 Filed 3-5-86; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 117

[CGD 12-86-01]

Drawbridge Operation Regulations; Sacramento River, CA

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the California Department of Transportation the Coast Guard is considering a change to the regulations governing the Butte City bridge across the Sacramento River, mile 169.7, at Butte City, California to provide that the draw need not open. This proposal is being made because no requests have been made to open the draw since the bridge was completed in 1949. This action should relieve the bridge owner of the burden of maintaining the machinery and of having a person available to open the draw, and should still provide for the reasonable needs of navigation. The Coast Guard also proposes to delete the 1972 requirement that the draws above Chico Landing be returned to operable condition within six months after notification by the District Commander.

DATE: Comments must be received on or before April 21, 1986.

ADDRESSES: Comments should be mailed to Commander (oan), Twelfth Coast Guard District, Building 51-3, Government Island, Alameda, CA 94501-5100. The comments and other materials referenced in this notice will be available for inspection and copying in the Bridge Section at the above address. Normal office hours are between 6:30 a.m. and 3:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Rose E. Guerra, Assistant Chief, Bridge Section, Aide to Navigation Branch (telephone: (415) 437-3514.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Twelfth Coast Guard District will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Rose E. Guerra, project officer, and Lieutenant Commander Peter K. Mitchell, project attorney.

Discussion of Proposed Regulations

The Butte City drawbridge has not had any requests for an opening since it was completed in 1949. The bridge owner has made test openings every few years to make sure the operating mechanism was in working order. The fender system has been a maintenance problem due to debris carried by seasonal runoff. The closest downstream bridge is at Colusa, mile 143.5. This is a removable span bridge which is not required to open. The closest upstream bridge is at Ordbend, mile 185.0, and is a fixed bridge. Both bridges provide less vertical clearance than the Butte City bridge in the closed position.

The Hamilton City bridge, mile 203.5, and the Tehama railroad bridge, mile 232.5, are the only two remaining drawbridges above Chico Landing. The Hamilton City bridge is currently being replaced with a fixed bridge. The Tehama railroad bridge is immediately upstream of an adjacent fixed highway bridge. The bridge has not been opened since 1934. Therefore the regulation requiring the bridge(s) to be returned to service within six months of notice by the District Commander is no longer necessary.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulations and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. Since there has not been any requests for openings since the bridge was constructed it will not have any impact on navigation.

Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic

VOL 51
ISS 44
MR 6
1986
UMI

impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

AUTHORITY: 33 U.S.C. 499; 49 CFR 1.46 and 33 CFR 1.05–1(g).

2. Section § 117.189 (b) and (c) are revised to read as follows:

§ 117.189 Sacramento River

* * * * *

(b) The draws of the California Department of Transportation bridges, mile 90.1 at Knights Landing, and mile 135.5 at Meridian, shall open on signal if at least 12 hours notice is given to the California Department of Transportation at Marysville.

(c) The draws of the bridges above Meridan need not be opened for the passage of vessels.

* * * * *

Dated: February 20, 1986.

John D. Costello,

Vice Admiral, U.S. Coast Guard, Commander, Twelfth Coast Guard District.

[FR Doc. 86–4914 Filed 3–5–86; 8:45 am]

BILLING CODE 4910–14–M

---

33 CFR Part 166

[CGD 85–082]

Shipping Safety Fairways; Gulf of Mexico

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: This notice proposes to establish a shipping safety fairway in the vicinity of Heald Bank in the approach to Galveston, Texas. This shipping safety fairway is intended to increase navigation safety by providing a corridor free from fixed offshore structures. This proposal is necessary to permit deep draft vessels to navigate safely around the area off Heald Bank Shoals in the approach to Galveston, Texas. This proposal would also implement the results of the port access route study as reported in the **Federal Register** on March 11, 1985 (50 FR 9682).

DATE: Comments must be received on or before May 5, 1986.

ADDRESS: Comments should be submitted to Commandant (G–CMC/21) (CGD 85–082), U.S. Coast Guard, Washington, D.C. 20593. Comments may be delivered to and will be available for inspection and copying at the Marine Safety Council, room 2110 between the hours of 8 a.m. and 4 p.m. Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Lieutenant (j.g.) Daphne Reese, Project Manager, Office of Navigation (G–NSR–3), room 1606, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC 20593, (202) 245–0108.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include his or her name and address, identify this notice as CGD 85–082, and give the reasons for the comment. Persons desiring acknowledgment that their comment has been received should enclose a stamped self-addressed postcard or evelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held at a time and place to be set in a subsequent notice if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will be beneficial to this rulemaking.

Drafting Information

The principal persons involved in drafting this rulemaking are: Lieutenant (j.g.) Daphne Reese, Project Manager, Office of Navigation,and Lieutenant Sandra Sylvester, Project Attorney, Office of Chief Counsel.

Discussion of Proposed Regulations.

In 1978, the Ports and Waterways Safety Act (PWSA) was amended to authorize the Coast Guard to establish shipping safety fairways (33 U.S.C. 1223). Prior to this amendment, fairways were established by the U.S. Army Corps of Engineers (COE). Although the Coast Guard now designates the fairways, the authority to issue permits for structures remains with the COE.

A shipping safety fairway is an area or corridor of a waterway in which no fixed structures are permitted. In accordance with the PWSA, the right of navigation is paramount over other uses in these areas. A fixed structure in a fairway would be considered an obstruction to navigation and the COE will therefore not issue a permit for the construction of a structure therein. The fairways exist to ensure that an obstruction free corridor is available to navigation during development and production of offshore resources. Although the proposed fairways will be indicated on navigation charts, the use of fairways by vessels is voluntary.

The authority to create a fairway may be exercised by the Coast Guard only after a study of potential traffic density and use conflicts has been conducted to determine the need for designated safe access routes for vessels proceeding to and from United States ports. The results of a port access route study could cause restrictions on the manner in which specific offshore areas are leased after the date of the study notice. The study for this rulemaking was initiated by a notice in the **Federal Register** on March 19, 1984 (49 FR 10127, corrected on April 12, 1984 at 49 FR 14538) and on July 10, 1984 (49 FR 28074). The Eight Coast Guard District performed the study to determine the need for safe access in the approach to Galveston because of a problem with shoals in the vicinity of Heald Bank. This problem was brought to the Coast Guard's attention by the Houston/Galveston Navigation Safety Advisory Committee in 1983. Presently, there are four fairway segments leading into Galveston. The northwest-southeast leg of the Galveston Entrance Fairway (33 CFR 166.200(d)(10)) is the most direct route for the majority of traffic using the Houston/Galveston port complex. Within this fairway is a section of shallow water in the vicinity of Heald Bank (approximately 34 ft.). The Advisory Committee recommended that the Coast Guard designate a secondary fairway through deeper water. The Eighth District's study results concurred with this recommendation.

Study results were published in the **Federal Register** on March 11, 1985 (50 FR 9682). The study recommended a new fairway be established to permit deep draft vessels to navigate safely around the area of Heald Bank shoals in the approach to Galveston. The present rulemaking is intended to implement the Heald Bank deep draft fairway recommendation. The study also recommended the existing fairway system in the approach to the Louisiana Offshore Oil Port (LOOP) remain as it

was originally established, and the existing LOOP fairway system be incorporated into Part 166 of Title 33, Code of Federal Regulations, to consolidate all fairways in a single part. A final rule was published on July 1, 1985 (50 FR 26989) to incorporate the LOOP fairway system into 33 CFR 166.200(d)(52).

Heald Bank Cutoff Safety Fairway

A new shipping safety fairway is proposed around the area of Heald Bank Shoals in the approch to Galveston. The proposed fairway would connect the Northwest-Southeast leg of the Galveston Entrance Fairway with the North-South leg of the fairway. It would be approximately two miles wide, 125 miles long, approximately 40 miles offshore, and would run generally east-west. It would affect one tenth of one tract (High Island Area A–45) leased *after* the notice of study (49 FR 10127) was published, under the stipulation that development of the tract be in accordance with future fairway restrictions. The new fairway will provide a corridor free from fixed structures for deep draft vessel traffic in the approach to Galveston.

Regulatory Evaluation

This proposed rulemaking will not have adverse energy or environmental impact. On the contrary, the risk of environmental damage will decrease if the rule is implemented because deep draft vessels will have an established access route where structures will not be permitted, allowing for safer maritime navigation. The Coast Guard is directed by the PWSA to anticipate development on the Outer Continental Shelf (OCS) and to reconcile the potential conflict with navigation by establishing routing measures in frequently used corridors.

The proposed fairway was designed to have the least adverse impact upon future tracts and present leaseholders. As indicated above, there is one tract in the proposed fairway which was leased after the study was opened. The proposed fairway may interfere with direct exploration and production of oil in the portion of the leased tract within the designated area. However, it is impossible to determine what offshore resources, if any, would be inaccessible if the proposed fairway is established.

In cirumstances where the Coast Guard is convinced that fixed structures must be placed in an area designated as a fairway, to gain access to significant quantities of oil or gas, and that navigation safety would not be jeopardized by a modification of that fairway, a request for adjustment would be given the appropriate consideration in accordance with the PWSA and rulemaking procedures. In most cases, a fairway modification will require a PWSA port access study before rulemaking can be commenced.

This proposed regulation is considered to be non-major under Executive Order 12291 and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). There are no costs associated with the proposed fairway which can be identified and calculated at this time. This designation will contribute to navigation safety without significantly interfering with development of the OCS. The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. Since the impact of this proposal has been found to be so minimal, the Coast Guard certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 166

Anchorage grounds, Marine safety, Navigation (water), Waterways, Shipping safety fairways.

In consideration of the foregoing, the Coast Guard proposes to amend Part 166 of Title 33 Code of Federal Regulations as follows:

PART 166—SHIPPING SAFETY FAIRWAYS

1. The authority citation for Part 166 continues to read as follows:

Authority: 33 U.S.C. 1223; 49 CFR 1.46(n)(4).

2. Section 166.200 is amended by adding a new paragraph (d)(53) to read as follows:

§ 166.200 Shipping safety fairways and anchorage areas, Gulf of Mexico.

* * * * *

(d) * * *

(53) Heald Bank Cutoff Safety Fairway. The area enclosed by rhumb lines joining points at:

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW–FRL–2975–1]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA) today is proposing to exclude the solid wastes generated at eight facilities from the list of hazardous wastes contained in 40 CFR 261.31 and § 261.32. This action responds to delisting petitions submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 265, 124, 270, and 271 of Title 40 of the Code of Federal Regualtions, and 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific basis" from the hazardous waste list. The effect of this action, if promulgated, would be to exclude certain wastes generated at particular facilities from listing as hazardous wastes under 40 CFR Part 261.

The Agency has previously evaluated three of the petitions which are discussed in today's notice. Based on our review at that time, two of the petitioners were granted a temporary exclusion, while the third petitioner was granted an informal exclusion. Due to changes to the delisting criteria required by the Hazardous and Solid Waste Amendments of 1984, however, these petitions and the other five petitions for which we propose to grant an exclusion have been evaluated both for the factors for which the wastes were originally listed, as well as other factors and toxicants reasonably expected to be present in these wastes.

DATES: EPA will accept public comments on these proposed exclusions until April 7, 1986. Any person may request a hearing on these proposed exclusions by filing a request with Eileen B. Claussen whose address appears below, by March 21, 1986. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send two copies of your comments to EPA. One copy should be sent to the Docket Clerk, Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M Street SW.,

Washington, D.C. 20460. A second copy should be sent to Jim Kent, Delisting Section, Waste Identification Branch, CAD/OSW (WH–562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Identify your comments at the top with this statement: "Section 3001—Delisting Petition; Proposed Exclusions Beginning with Chamberlain-Featherlite, Inc.; March 6, 1986."

Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste (WH–562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

The public docket for these proposed exclusions is located in Room S–212, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424–9346, or at (202) 382–3000. For technical information, contact Lori DeRose, Office of Solid Waste (WH–562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 382–5096.

SUPPLEMENTARY INFORMATION:

Background

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit any of the characteristics of hazardous waste identified in Subpart C of Part 261 (*i.e.*, ignitability, corrosivity, reactivity, and extraction procedure [EP] toxicity) or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To be excluded, petitioners must show that a waste generated at their facility does not meet any of the criteria under which the waste was listed. (See 40 CFR 260.22(a) and the background documents for the listed wastes.) In addition, the Hazardous and Solid Waste Amendments of 1984 (HSWA) require the Agency to consider factors (including additional constituents) other than those for which the wastes was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that his waste does not exhibit any of the hazardous waste characteristics, as well as present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. (See 40 CFR 260.22(a); Section 222 of the Hazardous and solid Waste Amendments of 1984, 42 U.S.C. 6921(f); and the background documents for the listed wastes.) Although wastes which are "delisted" (*i.e.*, excluded) have been evaluated to determine whether or not they exhibit any of the characteristics of a hazardous waste, generators remain obligated to determine whether their waste remains non-hazardous based on the hazardous waste characteristics.

In addition to waste listed as hazardous in 40 CFR 261.31 and 261.32, residues from the treatment, storage, or disposal of listed hazardous wastes also are eligible for exclusion and remain hazardous wastes until excluded. (See 40 CFR 261.3(c) and (d)(2).) Again, the substantive standard for "delisting" is: (1) that the waste not meet any of the criteria for which it was listed originally; and (2) that the waste is not hazardous after considering factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Where the waste is derived from one or more listed hazardous wastes, the demonstration may be made with respect to each constituent of the waste mixture as a whole. (See 40 CFR 260.22(b).) Generators of these excluded treatment, storage, or disposal residues remain obligated to determine whether these residues exhibit any of the hazardous waste characteristics on a periodic basis.

Approach Used To Evaluate Delisting Petitions

The Agency first will evaluate the petition to determine whether the waste (for which the petition was submitted) is non-hazardous based on the criteria for which the waste was originally listed. If the Agency believes that the waste is still hazardous (based on the original listing criteria), it will propose to deny the petition. If, however, the Agency agrees with the petitioner that the waste is non-hazardous with respect to the criteria for which the waste was listed, it then will evaluate the waste with respect to other factors or criteria, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous.

The Agency is using a hierarchical approach in evaluating petitions for the other factors or contaminants (*i.e.*, those listed in Appendix VIII of Part 261). This approach may, in some cases, eliminate the need for additional testing. The petitioner can choose to submit a raw materials list and process descriptions. The Agency will evaluate this information to determine whether any Appendix VIII hazardous constituents are used or formed in the manufacturing and treatment process and are likely to be present in the waste at significant levels. If so, the Agency then will request that the petitioner perform additional analytical testing. If the petitioner disagrees, he may present arguments on why the toxicants would not be present in the waste, or, if present, why they would pose no toxicological hazard. The reasoning may include descriptions of closed or segregated systems, or mass balance arguments relating volumes of raw materials used to the rate of waste generation. If the Agency finds that the arguments presented by the petitioner are not sufficient to eliminate the reasonable likelihood of the toxicant's presence in the waste, the petition would be tentatively denied on the basis of insufficient information. The petitioner then may choose the submit the additional analytical data on representative samples of the waste during the public comment period.

Rather than submitting a raw materials list, petitioners may test their waste for any additional toxic constituents that may be present and submit this data to the Agency. In this case, the petitioner should submit an explanation of why any constituents from Appendix VIII of Part 261, for which no testing was done, would not be persent in the waste or, if present, why they would not pose a toxicological hazard.

In making a delisting determination, the Agency evaluates each petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). Specifically, the Agency considers whether the waste is acutely toxic, as well as the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and bioaccumulate, their persistence in the environment once released from the waste, plausible types of management of the waste, and the quantities of the waste generated. In this regard, the Agency has developed an analytical approach to the evaluation of wastes that are landfilled and land treated. See 50 FR 7882 (February 26, 1985), 50 FR 48886 (November 27, 1985), and 50 FR 48943 (November 27, 1985). The overall approach, which includes a ground-water transport model, is used to predict reasonable worst-case contaminant levels in ground water in nearby receptor wells (*i.e.*, the model estimates the ability of an aquifer to dilute the toxicant from a specific volume of waste). The land treatment model also has an air component and predicts the concentration of specific toxicants at some distance downwind of the facility. The compliance point concentration determined by the model then is compared directly to a level of regulatory concern. If the value at the compliance point predicted by the model is less than the level of regulatory concern, then the waste could be considered non-hazardous and a candidate for delisting. If the value at the compliance point is above this level, however, then the waste probably still will be considered hazardous, and not excluded from Subtitle C control.[1]

This approach evaluates the petitioned wastes by assuming reasonable worst-case land disposal scenarios. This approach has resulted in the development of a sliding regulatory scale which suggests that a large volume of waste exhibiting a particular extract level would be considered hazardous, while a smaller volume of the same waste could be considered non-hazardous.[2] The Agency believes this to be a reasonable outcome since a larger quantity of the waste (and the toxicants in the waste) might not be diluted sufficiently to result in compliance point concentrations that are less than the level of regulatory concern. The selected approach predicts that the larger the waste volume, the higher the level of toxicants at the compliance point. The mathematical relationship (with respect to ground water) yields at least a six-fold dilution of the toxicant concentration initially entering the aquifer (*i.e.*, any waste exhibiting extract levels equal to or less than six times a level of regulatory concern will generate a toxicant concentration at the receptor well equal to or less than that same level). Depending on the volume of waste, an additional five-fold dilution may be imparted, resulting in a total dilution of up to thirty-two times.

The Agency is using this approach as one factor in determining the potential impact of the unregulated disposal of petitioned waste on human health and the environment. The Agency has used this approach in evaluating each of the wastes proposed for exclusion in today's publication. As a result of this evaluation, the Agency is proposing to grant the petitions discussed in this notice.

It should be noted that EPA has not verified the submitted test data before proposing to grant these exclusions. The sworn affidavits submitted with each petition bind the petitioners to present truthful and accurate results. In addition, the Agency has initiated a spot sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions before final exclusions will be granted.

Finally, before the Hazardous and Solid Waste Amendments of 1984, the Agency granted temporary exclusions without first requesting public comment. The Amendments specifically require the Agency to provide notice and an opportunity for comment before granting an exclusion. All of the exclusions proposed today will not become effective unless and until made final. A notice of final exclusion will not be published until all public comments (including those at requested hearings, if any) are addressed.

Petitioners

The proposed exclusions published today involve the following petitioners:

Chamberlain-Featherlite, Inc., Hot Springs, Arkansas;
Falconer Glass Industries, Inc., Falconer, New York;
Lake City Army Ammunition Plant, Independence, Missouri;
Loxcreen Company, Inc., Hayti, Missouri;
Olin Corporation, Augusta, Georgia;
SR of Tennessee, Ripley, Tennessee;
Tennessee Electroplating, Ripley, Tennessee;
Valley City Steel Company, Valley City, Ohio.

I. Chamberlain-Featherlite, Inc

A. Petition for Exclusion

Chamberlain-Featherlite, Inc. (Chamberlain), located in Hot Springs Arkansas, is involved in the manufacture of aluminum storm doors. Chamberlain has petitioned the Agency to exclude its treated sludge presently listed as EPA Hazardous Waste No. F019—Wastewater treatment sludges from the chemical conversion coating of aluminum. The listed constituents of concern for EPA Hazardous Waste No. F019 are hexavalent chromium and cyanide. Chamberlian has petitioned to exclude its waste because it does not meet the criteria for which it is listed.[3]

Chamberlain's conversion coating process is a pretreatment process that applies a corrosion-resistant film to the metal surface before painting. Chamberlain claims that its wastewater treatment process generates a non-hazardous waste because the constitutents for which the waste was listed are not present in the waste or, if present, are in essentially an immobile form. Chamberlain further claims that this waste is not hazardous for any reason.

Chamberlain has submitted a detailed description of its manufacturing and wastewater treatment processes, including: schematic diagrams; total constituent analyses for total chromium and cyanide; EP toxicity test results for total chromium; distilled water leach test results for cyanide; and reactivity test results with respect to cyanide and sulfide content. Chamberlain also submitted total constituent-analyses and EP toxicity test results for arsenic, barium, cadmium, lead, mercury, nickel, selenium, and silver and test results for total oil and grease. Chamberlain further submitted a list of raw materials used in their manufacturing process. The Agency requested this information, as noted above, to determine if hazardous constituents, other than those for which the waste was originally listed, are present in the waste at levels of regulatory concern.

---

[1] The Agency recently proposed a similar approach, including a ground-water transport model, as part of the land disposal restrictions rule (see 51 *FR* 1602, January 14, 1986). The Agency, however, has not yet received or evaluated the comments on this proposal. If this approach is promulgated, the Agency will consider revising the delisting analysis at that time.

[2] Other factors may result in the denial of a petition, such as actual ground-water monitoring data or spot check verification data.

[3] Chamberlain originally submitted their petition of July 5, 1983. On November 8, 1984, the Hazardous and Soild Waste Amendments of 1984 were enacted. In part, the Act requires the Agency to consider factors (including additional constituents) other than those for which the waste was listed if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be a hazardous waste. (See Section 222 of the Amendments, 42 U.S.C. § 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Chamberlain. This additional information was submitted on May 10, 1984, and June 11 and September 17, 1985.

UMI

Chamberlain manufactures aluminum storm doors. Their manufacturing process includes metal cutting, extrusion forming, cleaning with caustic baths, etching, and conversion coating with chromates to prepare the metal surface for painting. Chamberlain claims that the painting process is completely separate and that paint wastes do not contaminate the conversion coating wastes. Chamberlain also claims that cyanide is not used in the manufacturing process.

The chrome wastes generated from the 5-parts washer (conversion coating process) are collected in a sump and fed through a sulfonator where sulfuric acid and sulfur dioxide are added to reduce hexavalent chromium to trivalent chromium. This waste then flows to a neutralizing tank where it is combined with the alkaline rinse wastewater. The pH is adjusted with a lime slurry, and the waste flows into a bag filter vessel (BMD filter) where the waste achieves a 10–18% solids content. The sludges removed by the filtration are accumulated for dewatering in a holding tank and fed to the filter press on a batch basis. The effluent is recycled through the wastewater treatment system.

Four daily grab samples were collected from the filter press over a two-week period in August, 1985.[4] Samples were also collected from the filter press in May, 1985, and analyzed for lead using the EP toxicity test. Chamberlain claims that the samples collected are representative of any variation of the listed and non-listed constitutent concentrations in its wastestream, since the conversion coating pretreatment process does not vary. Chamberlain further claims that the use of raw materials does not vary over time. Consequently, they believe that the samples collected and analyzed fully characterize their waste.

The total constituent and EP toxicity analyses of the chemical conversion coating waste, generated from the filter press for the listed constituents, revealed the maximum concentrations reported in Table 1.

TABLE 1.—MAXIMUM CONCENTRATIONS (FILTER PRESS)

	Total constituent analysis (mg/kg)	EP leachate analysis (mg/l)
CN [1]	<1.0	<0.02 [2]
Cr (total)	23300	0.13

[1] Hexavalent chromium is listed as the constituent of concern for this waste; however, the concentration of total chromium is low enough to make determination of hexavalent chromium unnecessary.

[2] From distilled water leach test. Distilled water is used rather than the normal acidic EP extraction medium to avoid the destruction of cyanide during the extraction procedure.

The total constituent and EP toxicity analyses of the filter press waste for the non-listed constituents revealed the maximum concentrations reported in Table 2.

TABLE 2.—MAXIMUM CONCENTRATIONS (FILTER PRESS)

	Total constituent analysis (mg/kg)	EP leachate analysis (mg/l)
As	<5.0	<0.5
Ba	1540	18.6
Pb	4.75	<0.04
Hg	<0.02	<0.002
Se	<5.0	<0.2
Ag	<0.5	<0.03
Cd	<0.1	<0.01
Ni	15.8	0.40

The maximum total oil and grease value reported for the filter press sludge was .1 percent. Chamberlain also analyzed their sludge, for sulfide and cyanide content, with respect to reactivity. Maximum concentrations of sulfide and total cyanide were less than 5 ppm and less than 1.25 ppm, respectively. Chamberlain also submitted a list of raw materials used in the chemical conversion coating process. This list indicated that no Appendix VIII hazardous constituents, other than those tested for, are used in the process, and that formation of any of these constituents is highly unlikely. Chamberlain also provided test data indicating that the sludge is not ignitable or corrosive. Chamberlain claims to generate a maximum of 111 tons per year of filter press waste from this process.

B. Agency Analysis and Action

Chamberlain has demonstrated that the treatment sludge generated from its filter press is non-hazardous. The Agency believes that the samples collected were non-biased and adequately represent any variations that may occur in the waste petitioned for exclusion. Due to the nature and consistency of the manufacturing operations involved (*i.e.*, the facility is not a job shop and production does not vary seasonally), the Agency believes that the samples are representative of the waste generated by Chamberlain.

The Agency has evaluated the mobility of the constituents from Chamberlain's waste using a vertical and horizontal spread (VHS) model.[5] The Agency's evaluation of the 111 tons of filter press sludge generated annually and the corresponding maximum extract levels, using the VHS model for the listed constituents, predicted levels at the compliance point which are less than the applicable level of regulatory concern, as seen in Table 3.[6] (Where concentrations were below the detection limits, the detection limit was used in the VHS model calculations).

TABLE 3.—VHS MODEL: COMPLIANCE POINT CONCENTRATIONS (PPM)

	Cr(total)	CN
Filter press regulatory	0.004	0.0006
Standard	0.05	0.2

The filter press sludge exhibited chromium levels (at the receptor well) below the National Interim Primary Drinking Water Standard, and cyanide levels below the U.S. Public Health Services' suggested drinking water standard.[7] Total cyanide levels in the waste are also below the air threshold limit set by the American Conference of Governmental Industrial Hygienists.[8] These constituents, therefore, are not of regulatory concern.

The Agency has also concluded, through the use of the VHS land-fill model, that no other hazardous inorganic constituents are present in the filter press waste at levels of regulatory concern (*i.e.*, none are above any regulatory standard at the compliance point, see Table 4). In addition, we also

---

[4] Chamberlain's demonstration was initially based on samples taken before the filter press was installed; four samples were collected over a two-month period from the "blowdown" wastestream, which was generated from the BMD filter and piped to the surface impoundment. Five core samples were collected from the impoundment in March 1983. In March 1984, the surface impoundment was closed as a hazardous waste facility, and the filter press installed.

[5] See 50 FR 7882, Appendix I, February 26, 1985, for a detailed explanation of the development of the VHS model for use in the delisting program. See also the final version of the VHS model, 50 FR 48896, Appendix, November 27, 1985.

[6] The maximum EP value reported was used in the VHS model calculations because the sample size was small (4 samples were collected from the filter press for all of the EP toxic metals, except Pb). Ten samples were collected and analyzed during two different sampling periods for this parameter due to high concentrations found in the "blowdown" waste before installation of the filter press. The elevated lead concentrations were due to a billet masking compound which contained 70% lead. Chamberlain discontinued use of this compound in April 1985; the maximum lead level found in subsequent analyses of the waste was 4.5 ppm.

[7] Drinking Water Standards, U.S. Public Health Service, Publication 956, 1962 (0.2 ppm).

[8] See American Conference of Governmental Hygienists: *Documentation of the Threshold Limit Values for Substances in Workroom Air*, Third Edition, 1971, Cincinnati, Ohio.

find that no hazardous organic constituents are present in the waste; the Agency reviewed the list or raw materials used by Chamberlain in their manufacturing process (*i.e.*, they do not use any organic hazardous constituents).

TABLE 4.—COMPLIANCE POINT CONCENTRATIONS (PPM)

	As	Ba	Pb	Hg	Se	Ag	Cd	Ni
Filter press regulatory	.015	.58	.001	<.0001	.008	<.001	<.001	.012
Standard	.05	1.0	.05	.002	.01	.05	.01	.35

The Agency believes that based upon the constituents and factors evaluated, Chamberlain's wastewater treatment sludge is non-hazardous and should be excluded from hazardous waste control. The Agency, therefore, proposes to grant an exclusion to Chamberlain-Featherlite, Inc., located in Hot Springs, Arkansas, for its dewatered chemical conversion coating wastes, as described in its petition.

II. Falconer Glass Industries Inc.

A. Petition for Exclusion

Falconer Glass Industries, Inc. (Falconer), located in Falconer, New York, manufactures mirrors and mirror products. Falconer has petitioned the Agency to exclude its wastewater treatment sludge, presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical-etching and milling of aluminmum. Falconer has petitioned to exclude its waste because it does not meet the criteria for which is is listed.[9]

The listed constituents of concern for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed). Falconer claims that its wastewater treatment process generates non-hazardous sludges from the filter press and magnetic drum separator, because the constituents of concern, although present in the wastes, are in essentially an immobile form. Falconer further claims that these wastes are not hazardous for any other reason.

Falconer has submitted a detailed description of its electroplating and wastewater treatment processes, including: a schematic diagram; total constituent analyses and EP toxicity test results of the sludges for cadmium, total chromium, and nickel; and total constituent analyses and distilled water leach test results for cyanide. Falconer also submitted total constituent analyses and EP toxicity test results for arsenic, barium, lead, mercury, selenium, and silver; and results of oil and grease analyses on representative waste samples. Falconer further submitted a list of raw materials used in the manufacturing process. The Agency requested this information, as noted above, to determine if hazardous constituents, other than those for which the wastes were originally listed, are present in the waste at levels of regulatory concern.

Falconer manufactures mirrors and mirror products. The manufacturing process includes: glass cleaning and pretreatment; electrochemical silver deposition; galvanic copper plating; silver and copper film removal; and regeneration of ion exchange resin beds. Falconer claims that cadmium, nickel, chromium, and cyanide are not used in any of its processes.

Falconer's waste treatment system consists of two interconnected processes. Process I receives most of the waste iron generated from the galvanic copper plating process and uses a magnetic drum separator to remove the iron from the waste. The wastewater from the drum separator joins the regeneration wastes from the ion exchange resin beds (process II) where they are neutralized with sulfuric acid or sodium hydroxide, treated with an anionic polymer for flocculation, clarified, and pumped to a filter press where the sludge forms cakes of up to 40 percent solids.

Four grab samples were collected from both the filter press and from the magnetic drum separator (iron waste) over a two week period in July, 1985.[10] The petitioner claims that the manufacturing processes used at the facility are uniform and that the use of raw materials does not vary over time. Falconer claims, therefore, that the samples collected are representative of any variation of the listed and unlisted constituent concentrations in the wastes.

The total constituent and EP toxicity analyses of the final filter cake and separator wastes for the listed constituents revealed the maximum concentrations reported in Table 1.[11]

TABLE 1.—MAXIMUM CONCENTRATIONS

	Filter press waste		Separator waste	
	Total constituent analysis (mg/kg)	EP leachate analysis (mg/l)	Total constituent analysis (mg/kg)	EP leachate analysis (mg/l)
Cd	0.16	<0.10	0.17	0.290
Cr (total)[1]	7.51	<0.50	33.2	<0.50
Ni	26	<0.50	202	<0.50
CN	<2	[2] <0.033	<2	[2] <0.02

[1] Hexavalent chromium is listed as the constituent of concern for these wastes; however, the concentration of total chromium is low enough to make a determination of hexavalent chromium unnecessary.

[2] From distilled water leach test.

The total constituent and EP toxicity analyses for the non-listed metals for the filter press and separator wastes are reported in Table 2.

---

[9] Falconer originally submitted their petition on February 7, 1983. On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Act requires the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See Section 222 of the Amendments, 42 U.S.C § 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Falconer. This information was submitted by Falconer on October 10, 1984, and May 13, and October 1, 1985.

[10] In the original submittal, Falconer collected grab samples, for seven days, from the filter press and composited them into a single sample (Process II). Falconer also submitted results from five past EP toxicity analyses on the filter press waste taken in July and October, 1981, and March, June, and August of 1982. Process I waste treatment (iron waste) previously involved a gravity settling tank and an evaporation pit. In their original petition, Falconer collected seven samples from the settling pit and composited them into a single sample. The magnetic drum separator was installed in 1984.

[11] Concentrations of nickel and chromium were found in Falconer's wastes even though these constituents are not used in either the manufacturing or wastewater treatment processes. The presence of these compounds is most likely a result of the stainless steel tanks, pumps, and conveyor belt ends, as well as the stainless steel magnetic drum separator, that are used at the facility. Although nickel and chromium are present in the wastes, the results from the EP toxicity test demonstrate that they are immobilized in the wastes.

VOL 51 ISS 44 MR 6 1986 UMI

The maximum total oil and grease values reported for the filter press and separator wastes were 0.004 and 0.003 percent, respectively. Falconer also submitted a list of raw materials used in their process. This list indicated that no Appendix VIII hazardous constituents, other than those tested for, are used in their process and that formation of any of these constituents is highly unlikely. Falconer claims to generate a maximum of 93 and 103 tons per year, respectively, of filter press and separator sludges.

B. Agency Analysis and Action

Falconer has demonstrated that the treatment sludges generated from its filter press and magnetic drum separator are non-hazardous. The Agency believes that the total of four grab samples and one weekly composite from the filter press, and the four grab samples from the separator, as well as the samples collected in 1981 and 1982, were non-biased. The Agency also believes that the samples adequately reflect any variations that may occur in the wastes petitioned for exclusion due to the nature and consistency of the operations performed by Falconer (*i.e.*, the facility is not a job shop and production does not vary seasonally). The Agency, therefore, believes that the samples are representative of the wastes generated by Falconer.

The Agency has evaluated the mobility of the constituents from Falconer's waste using a vertical and horizontal spread (VSH) model.[12] The Agency's evaluation of the 93 and 103 tons, respectively, of filter press and magnetic drum separator wastes generated annually and the corresponding maximum extract levels, using the VHS model, has generated the compliance point concentrations for the listed constituents exhibited in Table 3.[13] (Where concentrations were below detection limits, the detection limit value was used in the VHS model calculations.)

TABLE 3.—VHS MODEL: COMPLIANCE POINT CONCENTRATIONS (PPM)

	Cd	Cr	CN	Ni
Filter Press Sludge	0.003	0.015	0.001	0.015
Separator Sludge	0.0092	0.015	<0.001	0.015
Regulatory Standards				
	0.01	0.05	0.2	0.35

The filter press sludge and the iron waste generated from the magnetic drum separator exhibited cadmium and chromium levels (at the receptor point) below the National Interim Primary Drinking Water Standards, nickel levels below the interim health-based standard[14] and cyanide levels below the U.S. Public Health Services' suggested drinking water standard.[15] Total cyanide levels in the waste are also below the air threshold limit of 10 ppm set by the American Conference of Governmental Industrial Hygienists.[16] These constituents, therefore, are not of regulatory concern.

TABLE 4.—VHS MODEL: COMPLIANCE POINT CONCENTRATIONS (PPM)

	AS	Ba	Pb	Hg	Se	Ag
Filter Press Sludge	0.015	0.10	0.015	<0.0001	0.003	0.015
Separator Sludge	0.015	0.06	0.015	<0.0001	0.003	0.015
Regulatory Standard						
	0.05	1	0.05	0.002	0.01	0.05

Furthermore, the Agency has also concluded, through use of the VHS model, tht no other hazardous inorganic constituents are present in the petitioned waste at levels of regulatory concern (*i.e.*, none are above any regulatory standard at the compliance point, see Table 4). In addition, no hazardous organic constituents are present in the waste; the Agency reviewed the raw materials list submitted by Falconer, which demonstrates that no organic hazardous constituents are used in their manufacturing process.

The Agency believes, based upon the constituents and factors evaluated, that Falconer's waste is non-hazardous, and as such should be excluded from hazardous waste control. The Agency, therefore, proposes to grant an exclusion to Falconer Glass Industries Inc., located in Falconer, New York, for its electroplating wastes, as described in its petition.

III. Lake City Army Ammunition Plant

A. Petition for Exclusion

Lake City Army Ammunition Plant (Lake City), located in Independence, Missouri, is involved in the manufacure of small arms ammunition and related items. Lake City has petitioned the Agency to grant a one time exclusion for their wastewater treatment sludge, which is contained in an on-site landfill. (Lake City's petition only addresses the waste already in the landfill; waste is no longer being put into this on-site landfill.) This waste is presently listed as EPA Hazardous Waste No. K046—Wastewater treatment sludges from the manufacturing, formulation, and loading of lead-based initiating compounds. The listed constituent of concern for EPA Hazardous Waste No. K046 is lead. Lake City's petition to exclude their waste is based upon their demonstration that the hazardous constituents contained in the sludge are present only in essentially immobile forms.[17]

At Lake City, clean-up water from blending and charging operations is treated to destroy the reactivity of residual explosive materials and then directed to the on-site industrial waste treatment facility. Prior to introduction into the treatment facility, the killed clean-up water stream is combined with non-hazardous waste streams and constitutes approximately 1% of the total stream to the facility. This treatment facility uses a flotation unit in a pH-controlled condition to remove oils and greases. (The oily waste from this unit was not addressed in Lake City's petition and is not, therefore, included in this proposed exclusion.) Heavy metals also are removed by using lime to increase the pH and precipitate metal hydroxides. The precipitate is

---

[12] See footnote 5.

[13] The maximum EP value was used in the VHS model to determine constituent concentrations at the compliance-point due to the small sample population.

[14] In previous notices, the Agency has used 632 ppb as the regulatory standard for nickel. Pending the completion of current EPA studies on the health effects of nickel, the Agency is using 350 ppb for the purpose of evaluating delisting petitions. The basis for this standard and its intended use are explained at 50 *FR* 20239–20240, May 15, 1985.

[15] See footnote 7.

[16] See footnote 8.

[17] Lake City originally submitted their petition on May 18, 1982. In response to Agency requests, supplementary information was supplied on July 15, 1982 and on January 17, March 10, and June 7, 1983. On November 8, 1984, Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additonal constituents) other than those for which the waste was listed if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See Section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or similar regulatory changes, the Agency requested information from petitioners which addresses these additional factors. Lake City supplied this information on May 1 and December 6, 1984, and on February 1, September 6, and October 18, 1985.

flocculated with alum and allowed to settle in holding ponds. The resultant lime-metal hydroxide sludge is allowed to partially dry in one of two settling lagoons and then removed to an on-site landill. The lime-metal hydroxide sludge in that landfill is the subject of Lake City's petition.

In support of their petition, Lake City submitted analytical data to characterize the sludge in its as-disposed conditon. Lake City also provided process descriptions, lists of raw materials, and material safety data sheets, in order to identify any hazardous constituents which could be present in the sludge, as well as ground-water monitoring data from the vicinity of the landfill.

Samples used to characterize the sludge were collected from both the on-site landfill and the east settling lagoon. (The sludge sampled while in the east lagoon was subsequently removed to the landfill and is included in this proposed exclusion.) The landfill was sampled by collecting five full-depth cores from each quadrant of the cell which receives the sludge. These cores were composited to produce one sample from each quadrant. The landfill was sampled in this manner in June 1983 and on February 23 and August 7, 1984. The June 1983 samples were analyzed for the EP leachate concentrations for EP toxic metals; the February 23, 1984 samples were analyzed for specific organic compounds; and the August 7, 1984 samples were analyzed for the EP leachate concentration of lead.

The sludge contained in the east lagoon was sampled by collecting five full-depth cores from each quadrant of the lagoon. These cores were composited to produce one sample from each quadrant. The lagoon was sampled in this manner on February 23 and August 8, 1984; on September 13 and 19, 1985; and on October 4, 1985. The February 23, 1984 samples were analyzed for specific organic compounds; the August 8, 1984 and September 13, 1985 samples were analyzed for the EP leachate concentration of lead; and the September 19 and October 4, 1985 samples were analyzed for the constituent and leachate concentrations of all EP toxic metals, nickel, and cyanide, as well as the constituent concentration of sulfide.

The results of EP leachate test for lead ranged from <0.25 mg/l to 0.43 mg/l for the eight samples from the landfill (average=0.32 mg/l) and from 0.04 mg/l to 1.53 mg/l for the 16 samples from the lagoon (average=0.28 mg/l).[18] Constituent analysis for the lead content of the sludge indicated a range of concentrations from 458 mg/kg to 1470 mg/kg for samples from the lagoon (average=952.5 mg/kg).[19]

In order to demonstrate that other metals are either not present or present only in essentially immobile forms, Lake City performed leachate tests for the remaining EP toxic metals and nickel. The results of these tests, as well as the results of constituents analysis of the sludge from the east lagoon, are presented in Table 1.

MAXIMUM CONCENTRATION

Toxicant	Landfill	East lagoon	
	EP leachate (mg/l)	EP leachate (mg/l)	Consistent (mg/kg)
As	0.063	<0.25	<1.0
BA	3.5	<5.0	105
Cd	0.07	<0.05	<1
Cr	0.04	<0.25	48
Hg	0.0023	<0.01	0.044
Se	<0.006	<0.05	<1
Ag	0.03	<0.25	<1
Ni	[1]	<0.25	22

[1] Since nickel was not expected to be present in significant quantities, the sludge was not initially analyzed for nickel.

Based upon the processes and raw materials used at Lake City, several hazardous organic compounds could be expected to be present in the sludge. In order to demonstrate that these compounds are present only in environmentally insignificant quantities, the sludges in both the landfill and the east lagoon were tested. The compounds and their maximum concentrations are presented in Table 2.

TABLE 2.—MAXIMUM CONCENTRATIONS

Compound	Landfill (mg/kg)	East lagoon (mg/kg)
1,1,1-Trichloroethane	<0.01	<0.01
Methylene chloride	<0.01	<0.06
Toluene	<0.01	<0.01
Resourcinol	<0.15	<0.15

Lake City also analyzed their sludge for sulfide and cyanide content. These tests were performed on sludge from the east lagoon. Maximum concentrations of sulfide and total cyanide were 6.1 mg/kg and 0.062 mg/kg, respectively. In addition, the sludge was tested for leachable cyanide using a distilled water extraction procedure. The maximum cyanide concentration in the extract was 0.006 mg/l.

B. Agency Analysis and Action

Lake City has demonstrated that the sludge contained in their on-site landfill is non-hazardous (this includes the sludge that was sampled while in the east lagoon and later placed in the landfill). The Agency believes that the random samples collected by Lake City are non-biased and adequately characterize that sludge. The collection of full-depth cores from each quadrant of both the landfill and the lagoon takes into account any vertical or horizontal stratification that may have occurred as the landfill cell or the lagoon was being filled. The samples are believed, therefore, to be representative of Lake City's waste.

The Agency has evaluated the mobility of toxicants from Lake City's sludge by using the vertical and horizontal spread (VHS) model.[20] For lead, this evaluation, using the estimated volume of waste in Lake City's landfill (15,000 yd^3) and the average of the EP leachate analyses (0.29 mg/l)[21], resulted in a predicted maximum compliance point concentration of 0.047 mg/l. This concentration is less than the National Interim Drinking Water Standard of 0.05 mg/l. The presence of lead at the reported level is, therefore, not of regulatory concern.

For the other inorganic toxicants, the VHS model predicted the maximum compliance point concentrations

---

[18] One of Lake City's earlier submissions indicated higher leachate concentrations of lead. (EP leachate tests performed on samples collected from the settling lagoons in June 1982 indicated lead concentrations that range from 0.50 mg/l to 1.70 mg/l). Lake City asserts that these results were artificially high due to analytical error or interferences. Lake City also states that, while they believed the June 1982 results to be erroneously high, the samples were not re-analyzed since they believed the values were less than the acceptable upper limit for delisting. Lake City further notes that this particular lot of sludge was removed to the landfill prior to the August 1984 landfill sampling, in which the lead leachate concentrations ranged from 0.25 mg/l to 0.35 mg/l.

[19] Constituent analysis for metals was only performed on the samples from the lagoon. While the Agency would typically require constituent analysis of the landfilled sludge as well, it was concluded that there was no reason to expect the sludge in the landfill to differ significantly from the sludge in the lagoon. The Agency did not, therefore, require Lake City to re-sample and analyze the landfilled sludge for the constituent concentration of metals.

[20] See footnote 5.

[21] Due to the large number of samples that Lake City collected and analyzed for the EP leachate concentration of lead (24), the Agency believes that the average concentration should be used in the VHS model. The Agency solicits comments on the use of average concentrations to evaluate a static lot of waste when a large number of samples (each a composite of several full-depth cores) has been analyzed.

VOL 51 ISS 44 MR 6 1986 UMI

presented in Table 3.[22] Table 3 also presents, for each toxicant, the regulatory standard to which the compliance point concentration is compared.

TABLE 3.—PREDICTED COMPLIANCE-POINT CONCENTRATION

Toxicant	Maximum compliance point concentration (mg/l)	Regulatory standard (mg/l)
As	0.04	0.05
Ba	<0.81	1.0
Cd	<0.006	0.01
Cr	<0.04	0.05
Hg	<0.0016	0.002
Se	<0.008	0.01
Ag	<0.04	0.05
Ni	<0.04	0.35
CN	0.001	0.2

As indicated in Table 3, the maximum predicted concentrations of the EP toxic metals are all less than the National Interim Primary Drinking Water Standards. Also, the predicted nickel and cyanide concentrations are less than the Agency's interim nickel standard [23] and the U.S. Health Services suggested drinking water standard,[24] respectively. The presence of these toxicants at the reported levels is, therefore, not of regulatory concern.

The organic compounds listed in Table 2 were evaluated by first estimating their leachate concentrations, and then predicting their compliance point concentrations with the VHS model.[25] This procedure resulted in the compliance point concentrations presented in Table 4. Table 4 also presents, for each organic compound, the regulatory standard to which the predicted concentration is compared:

TABLE 4.—PREDICTED COMPLIANCE-POINT CONCENTRATION

Compound	Predicted leachate concentration (mg/l)	Predicted compliance-point concentration (mg/l)	Regulatory standard (mg/l)[1]
1,1,1-Trichloroethane	$<3.21\times10^{-4}$	$<5.10\times10^{-6}$	1
Methylene chloride	$<2.57\times10^{-3}$	$<4.15\times10^{-5}$	0.08
Toluene	$<1.16\times10^{-4}$	$<1.87\times10^{-6}$	10
Resorcinol	$<1.5\times10^{-1}$	$<2.42\times10^{-3}$	[2] 2

[1] An explanation of the derivation of these regulatory standards is available in the public docket.

[2] This value is derived from the TLV described in *Documentation of Threshold Limit Values*, 4th edition, American Conference of Governmental Industrial Hygienists, Cincinnati, Ohio (1980). The value is calculated as 0.23 mg/kg/day×70 kg2 l/day.

As indicated in Table 4, the maximum predicted compliance point concentrations of those organic compounds are each less than the compound's regulatory standard. The presence of these compounds at the preported levels is, therefore, not of regulatory concern. Also, the Agency's evaluation of the processes and raw materials used at Lake City indicates that no other hazardous organic compounds would be expected to be present in the sludge.

The sludge's sulfide and cyanide content (6.1 mg/kg, and 0.062 mg/kg, respectively) is low enough so as to preclude the generation-of hazardous levels of toxic gases. [26] (The capability of a sulfide- or cyanide-bearing waste to generate hazardous levels of toxic gases, vapors, or fumes is a property of the reactivity characteristic.) Accordingly, this waste is not of regulatory concern through an air contamination route.

Based upon the constituents and factors evaluated, the Agency believes that Lake City has demonstrated that the sludge contained in their landfill (including the sludge that was sampled while in the lagoon and subsequently removed to the landfill) is non-hazardous and that, as such, it should be excluded from hazardous waste control. The Agency proposes, therefore, to grant an exclusion to Lake City Army Ammunition Plant, located in Independence, Missouri, for their wastewater treatment sludge from the manufacturing, formulation, and loading of lead-based initiating compounds that is currently contained in their on-site landfill. This is a one time only exclusion for the waste in the on-site landfill.

IV. Loxcreen Company, Incorporated

A. Petition for Exclusion

The Loxcreen Company, Inc. (Loxcreen), located in Hayti, Missouri, is involved in the manufacturing of extruded aluminum parts and decorative trim. Loxcreen has petitioned the Agency to exclude its wastewater treatment sludges, presently listed as EPA Hazardous Waste No. F019—Wastewater treatment sludges from the chemical conversion coating of aluminum. Loxcreen has petitioned to exclude its waste because it does not meet the criteria for which it was listed. The listed constituents of concern for these wastes are hexavalent chromium and cyanide (complexed). Loxcreen claims that its wastewater treatment system produces a sludge that is non-hazardous because the constituents of concern are present in essentially an immobile form.

Based upon the Agency's review of their petition, Loxcreen was granted an informal exclusion for the F019 filter press cake on March 11, 1982. [27] Our basis for granting the exclusion was the low migration potential of the constituents of concern. The Agency conditioned the informal exclusion, however, by requiring that the waste either be covered as a daily practice or that Loxcreen test each batch of waste to determine the level of cyanide in the waste. If the cyanide in the waste exceeded 10 ppm, the waste had to be covered as a daily practice. This decision was based on a concern that some of the complexed cyanide in the waste might be converted to free cyanide by sunlight. This condition was incorporated into the informal exclusion to prevent the possible photo-decompostion of total cyanide to free cyanide in the waste.

Since that time, the Hazardous and Solid Waste Amendments of 1984 have been enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was originally listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) As a result, the Agency has re-evaluated Loxcreen's petition: (1) to determine whether the waste should be excluded based on the original listing criteria, and (2) to evaluate the waste for factors

---

[22] For each toxicant, the leachate concentrations used in this evaluation was the greater of the two values reported in Table 1. While the use of average values also might have been appropriate, the more conservative approach of using the maximum values (and the fact that the compliance point concentrations are below the regulatory standards) illustrates that the presence of those toxicants at the reported levels is not of regulatory concern.

[23] See footnote 14.

[24] See footnote 7.

[25] The predicted leachate concentration is based upon an algorithm which incorporates each compound's solubility and constituent concentration in the waste. (For details of this calculation, see 50 FR 48943, November 27, 1985.) This predicted leachate concentration is then used in the VHS model to estimate the dilution that would occur due to dispersion in an underlying aquifer (See footnote 6). While the predicted compliance point concentration may be further reduced due to degradation processes (*e.g.*, hydrolysis, biodegradation), these processes were not considered. This is because the predicted leachate concentrations are sufficiently low that the levels in the waste are not of concern, without consideration of these effects.

[26] A copy of these calculations is available in the public docket for this notice.

[27] On March 11, 1982, a memorandum was sent from the Acting Deputy Associate Enforcement Counsel to the Regions indicating, among other things, that the Office of Solid Waste had made a preliminary determination to grant the delisting petition submitted by Loxcreen for the F019 wastes generated at their Hayti, Missouri plant. The memo suggested that the Regions use discretion when dealing with this waste until our decision was published in the **Federal Register**.

(other than those for which the waste was listed) to determine whether the waste is non-hazardous. Today's notice is the Agency's re-evaluation of this petition.

Loxcreen has submitted a detailed description and a schematic diagram of its production processes; total constituent analyses and EP toxicity test results of the sludge for total chromium and hexavalent chromium; total constituent analyses and distilled water leach test results for total cyanide; total oil and grease analyses; and total constituent analyses for free cyanide and sulfides. Loxcreen also submitted total constituent and EP toxicity analyses for arsenic, barium, cadmium, lead, nickel, silver, mercury, and selenium. Furthermore, Loxcreen submitted a list of raw materials used in the manufacturing process. The Agency requested this information, as noted above, to determine if hazardous constituents other than those for which the waste was originally listed are present in the waste at levels of regulatory concern.

In Loxcreen's process, extruded pieces are received into an anodizing process, which uses an electrolytic bath of sulfuric acid in combination with alkaline rinses, hot and cold water rinses, and caustic etching baths. The pieces are then sent to the paint preparation chromating line, which uses hot alkaline cleaning and degreasing sprays, a water rinse, bond coating, neutralization, and a final clear water rinse. Wastes from the caustic cleaning of extrusion dies and from daily boiler blowdown are also influent to the wastestream. Loxcreen claims that no cyanides are used in the manufacturing process. Loxcreen's waste treatment system combines pH adjustment; reduction of hexavalent chromium to trivalent with sodium bisulfite; polymer addition; flocculation; and press filtration.

Ten grab samples were taken after dewatering from random locations on the filter press, and composited to form single daily samples. Samples were collected in this way (during September 15–22, 1981, December 18, 1981, January 14–28, 1985, and May 8–10, 1985) and resulted in a minimum of four analyses for each EP toxic metal and nickel. Loxcreen claims that the raw materials, production processes, and treatment process do not vary over time. Loxcreen, claims, therefore, that the samples collected are representative of any variation of the listed and non-listed constituent concentrations of the waste.

The total constituent analyses and EP leachate analyses for the listed constituents in the sampled sludge yielded the maximum concentrations shown in Table 1.

TABLE 1.—FILTER PRESS SLUDGE

	Maximum total concentration (ppm)	Maximum EP concentration (mg/l)
Chromium (total)	11,000.0	0.12
Chromium (hex)[1]	<0.07	<0.004
Cyanide (total)	35.0	[2]<0.01

NOTES—[1] Difference in detection limits is due to separate analysis (*i.e.*, September 1981 and January 1985).

[2] Distilled water used in EP test.

The EP toxicity and total constituent analyses for the non-listed metals revealed the maximum concentrations reported in Table 2.

TABLE 2.—FILTER PRESS SLUDGE

	Maximum total concentration (ppm)	Maximum EP concentration (mg/l)
Arsenic	0.54	<0.002
Barium	<0.03	<0.03
Cadmium	3.36	0.44
Lead	35.1	<0.05
Nickel	317.1	2.11
Silver	<0.1	<0.01
Mercury	0.166	<0.001
Selenium	<0.002	<0.002

Total oil and grease values were reported at a maximum of 0.08%. Loxcreen has also submitted a list of raw materials which indicates that no Appendix VIII hazardous constituents, other than those tested for, are used in the process and that formation of any of these constituents is not likely. The maximum amount of sludge produced by Loxcreen from its filter press is 240 tons per year.

B. Agency Analysis and Action

Loxcreen has demonstrated that the wastewater treatment system in use at its Hayti, Missouri facility generates a non-hazardous sludge. The Agency believes that the composite samples taken from the filter press over a four year interval are non-biased and adequately represent any variability which may occur in the petitioned waste stream. The Agency is satisfied that the daily compositing done by Loxcreen does not conceal concentration variations. The major factor which may vary constituent concentrations is the use of different raw materials, due to changes in the product being manufactured. Variation in raw materials can be expected when a facility performs as a job shop or has seasonal variations or production. Since this facility does not perform as a job shop and has no seasonal product variations, the Agency believes that Loxcreen's claim that the manufacturing and treatment processes are uniform and consistent has been substantiated.

The Agency has evaluated the mobility of the constituents from Loxcreen's waste by using a vertical and horizontal spread (VHS) model.[28] The Agency's evaluation of Loxcreen's 240 tons of filtered sludge and the maximum EP leachate levels for the listed constituents using the VHS model has generated the compliance point concentrations exhibited in Table 3.

TABLE 3.—VHS MODEL—CALCULATED COMPLIANCE POINT CONCENTRATION

	Compliance point concentration (ppm)	Regulatory standard (ppm)
Cr (total)	0.004	0.25
CN⁻ (total)	0.0003	0.20

Using the VHS model, the Agency's evaluation of levels for the non-listed constituents generated the compliance point concentrations shown in Table 4.

TABLE 4.—VHS MODEL—CALCULATED COMPLIANCE POINT CONCENTRATION

Se	<0.00006	0.01
Hg	<0.00003	0.002

The filtered sludge exhibited arsenic, barium, chromium, lead, silver, mercury, and selenium levels (at the compliance point) at, or below, the National Interim Primary Drinking Water Standards, nickel levels below the Agency's interim standard,[29] and cyanide levels below the U.S. Public Health Services suggested standard.[30] The predicted maximum well concentration for cadmium (0.014 mg/l) exceeds the NIPDWS value of 0.01 mg/l. This prediction is based upon the highest reported cadmium leachate value. This value also exceeds the 95% confidence interval calculated for the cadmium data. Testing of three additional samples for cadmium (for a total of seven data points) indicated that the elevated value is probably an outlier. If the upper limit of the 95% confidence interval is used as the EP leachate value in the VHS calculations, the model predicts a maximum well concentration

---

[28] See footnote 5.

[29] See footnote 14.

[30] See footnote 7.

VOL 51 ISS 44 MR 6 1986 UMI

of 0.0061 mg/l. Since use of the maximum leachate value results in a concentration approximately equal to the NIPDWS, and the statistical evaluation results in a predicted concentration below the NIPDWS, the Agency concludes that cadmium levels in the waste are not of regulatory concern. Accordingly, none of the toxic heavy metals are present in the waste at levels of regulatory concern.

The free cyanide level documented in the petition (<0.5 ppm) is not expected to create a health hazard. The maximum total cyanide level reported in Table 1, in spite of the fact that cyanide is not used in the manufacturing process, can be attributed to the immersion cleaning of extrusion dies with a nitriting solution. This process has since been discontinued. Cyanide concentrations in the waste thus are not expected to be of regulatory concern.

The Agency has also reviewed the chemical components used in each raw material, as supplied by raw materials lists and material safety data sheets, in Loxcreen's conversion coating operation. The Agency has concluded from this review that no other Appendix VIII toxicants are present in the petitioned waste.

The Agency believes that this waste is non-hazardous and, as such, should be excluded from the hazardous waste management system. The Agency, therefore, proposes to grant an exclusion to Loxcreen Company, Incorporated, located in Hayti, Missouri, for its wastewater treatment sludge, as described in its petition.

V. Olin Corporation

A. Petition for Exclusion

The Olin Corporation (Olin) is involved in the production of chlorine and caustic soda at its facility in Augusta, Georgia. Olin has petitioned the Agency to exclude the water-washed brine muds generated by Olin's mercury cell chlorine process. These muds are listed as EPA Hazardous Waste No. K071—Brine purification muds from the mercury cell process in chlorine production, where separately prepurified brine is not used. Olin has requested the Agency to exclude these muds because they do not meet the criteria for which they are listed.[31] [32]

The listed constituent for EPA Hazardous Waste No. K071 is mercury. Olin claims that its brine treatment and dewatering unit produces a calcium sulfate brine mud that is non-hazardous with respect to leachable mercury because the constituent of concern is present at low concentrations and is immobile. Olin further claims that the muds are not hazardous for any other reason.

Olin has submitted detailed descriptions of its production and treatment processes, including a schematic diagram; EP toxicity data for mercury; EP toxicity data for the other EP toxic metals and nickel; total constituent analyses for all the EP toxic metals; total oil and grease analyses; and test results for total cyanide. Olin also submitted a list of raw materials used in its manufacturing processes, as well as a contingency plan including daily sampling and testing of the waste prior to disposal. Much of this information was requested to determine if hazardous constituents, other than those for which the waste was listed, were present in the waste at levels of regulatory concern.

Olin uses a closed-loop mercury cell chlorine process, in which sodium chloride brine is brought to near saturation, purified and acidified, then pumped to a series of mercury cathode cells. In the cells, electrolysis of the brine produces chlorine, which is taken off as a gas and liquified, and sodium, which is processed with water to form caustic soda (sodium hydroxide). The brine exits the cells and is returned to be re-saturated and re-used in the process. Mercury is slowly lost from the cathode cells through this process, carried away by the brine, and deposited in the brine muds when brine purfication takes place.

The brine purification system involves the use of a baffle crystallizer to remove calcium sulfate ($CaSO_4$) solids from the brine. The accumulated solids are pumped to a horizontal vacuum filter for dewatering, while the recovered brine is returned to the crystallizer. At the vacuum filter, the $CaSO_4$ solids are spray washed with water to remove mercury. The mercury-laden washwater is processed to recover the mercury before the effluent is disposed of at an NPDES-permitted outfall. The solids are collected in a dumpster and landfilled.

Grab samples of washed brine mud filter cake were taken from the filter press over a two-month period while using a range of washing rates in the filtration process. This was done to determine which washing rate was the most effective in producing a non-hazardous waste. Olin claims that demonstration brine mud samples which were washed with at least 1.2 gallons of water per minute (all other variables held constant) exhibit uniformly lower EP leachate concentrations of mercury than either unwashed muds or muds washed with smaller volumes of water. Olin will, as the result of this testing, operate their treatment system using a wash rate of at least 1.2 gallons per minute (gpm) in order to maintain a lbs water/lbs waste ratio of approximately one, while maintaining a uniform process rate (filter belt speed) of 15 feet per minute and a sludge thickness of 0.25 inches on the vacuum filter. Olin also claims that the raw materials used in the production processes do not vary.

Maximum total constituent and EP toxicity values for the listed constituent are presented in Table 1.

TABLE 1.—MAXIMUM TOTAL CONSTITUENT AND EP TOXICITY VALUES

	Total (mg/kg)	EP (mg/l)
Mercury	2.80	0.012

Maximum total constitutent and EP toxicity data values for the non-listed toxic metal constituents are given in Table 2.

TABLE 2.—MAXIMUM TOTAL CONSTITUENT AND EP TOXICITY VALUES

	Total (mg/kg)	EP toxicity (mg/l)
Arsenic	<0.1	<0.1
Barium	0.3	0.21
Cadmium	0.04	0.04
Chromium	0.04	0.04
Lead	0.1	0.1
Selenium	<0.5	[2] <0.00005
Silver	0.04	0.02
Nickel	[1]	0.13

[1] Since the EP leachate levels for nickel are low, additional testing for total nickel was not required.

[2] Indicates differing detection limits due to different analytical techniques.

No oil and grease was detected in the waste. Olin claims that no cyanides are used in their processes, and total cyanide levels are correspondingly low (0.013 mg/kg). No samples demonstrated reactivity, corrosivity, or ignitability. Olin also provided material safety data sheets for the materials used in their process. This data indicated that no Appendix VIII hazardous constituents, other than those tested for, are used in the process and that formation of these constituents is highly unlikely. Olin claims to generate a maximum of 700 tons of brine muds per year.

B. Agency Analysis and Action

Olin has demonstrated to the Agency that non-hazardous brine muds are generated by the treatment process. The Agency believes that the 15 EP leachate analyses and six total constituent analyses (18 EP analyses for mercury) performed on brine mud samples washed with >1.2 gallons of water per minute have adequately characterized any variations that may occur. The Agency is satisfied that the grab samples taken by Olin have not concealed variations in concentrations. The samples presented in support of the petition are representative of the brine muds generated by Olin.

The Agency has evaluated the mobility of the inorganic constituents from Olin's waste using the VHS ground water model.[33] The Agency's evaluation of Olin's maximum generation rate of 700 tons per year and the maximum EP extract levels has produced the compliance point concentrations shown in Table 3. The maximum EP values were used in the model calculations because maximum values are more indicative of a worst case situation within an on-line treatment system, and will more accurately address the Agency's concerns about the inherent variability of the waste.

TABLE 3.—VHS MODEL: PREDICTED CONCENTRATIONS AT COMPLIANCE POINT (PPM)

	VHS model	Regulatory standard
As	<0.0045	0.05
Ba	0.009	1.0
Cd	0.0018	0.01
Cr (total)	0.00018	0.05
Pb	0.0045	0.05
Hg	0.0005	0.002
Se	<0.000002	0.01
Ag	0.0009	0.05
Ni	0.0059	0.35

The muds exhibited arsenic, barium, cadmium, total chromium, lead, mercury, selenium, and silver levels (at the compliance point) below their respective National Interim Primary Drinking Water Standards, and nickel levels below the Agency's interim delisting criterion.[34] In addition, cyanide is not of concern due to the low total cyanide levels present in the waste (0.013 mg/kg), which does not exceed the Agency's regulatory standard.[35] These constituents are therefore not of regulatory concern.

The Agency has also concluded that no organic constituents are present in the waste based upon a review of the raw materials used in the process that potentially can enter the wastewater treatment system. It was determined from these sheets that no other Appendix VIII hazardous constituents are influent to Olin's waste treatment processes, and that formation of any of these constituents is unlikely.

The Agency believes that the treatment process employed by Olin, when used in conjunction with a washing rate equal to or greater than 1.2 gpm, generates a non-hazardous waste. Due to the severe neurotoxic effects associated with exposure to low concentrations of mercury, the Agency is concerned about the potential for significant amounts of mercury to be present in the waste. The Agency's experience with the inherent variability in the mercury content of chlor-alkali brine muds is such that it is believed that the exclusion should require continuous batch testing for mercury using the EP toxicity test prior to disposal. Each batch of Olin's waste must be tested, however, to assure that the waste exhibits mercury extract levels below 0.02 mg/l.[36] The Agency will review the data collected over an initial six-month period of treatment. If the data indicate that the mercury extract levels are characteristically low, the Agency may propose to amend the exclusion to require less frequent testing. Subject to this condition, the Agency proposes to grant an exclusion to Olin Corporation for the washed chlor-alkali brine purification muds produced by the calcium sulfate crystallizer at their Augusta, Georgia facility.

VI. SR of Tennessee

A. Petition for Exclusion

SR of Tennessee, (SR), located in Ripley, Tennessee, is involved in copper, nickel, and chromium electroplating of plastic parts (such as grilles and headlight bezels) for the automotive industry. SR has petitioned the Agency to exclude its treated sludge, presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum. SR has petitioned to exclude its currently generated filter press sludge as well as the electroplating sludges previously disposed of in an on-site surface impoundment which has been closed and capped, because it does not meet the criteria for which it was listed.[37]

The listed constituents of concern for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel and cyanide (complexed). SR claims that its wastewater treatment process generates a non-hazardous sludge, because cadmium and cyanide are not used in the process. In addition, chromium and nickel, although present in the waste, are in essentially an immobile form. SR further claims that this waste is not hazardous for any other reason.

Based on our review of their petition, SR was granted a temporary exclusion for its filter press sludge on November 22, 1982 (see 47 FR 52668). At that time, the petitioner's request pertained only to the filter press sludge that they generated after that date, since they did not realize that the impounded waste was also defined as listed F006 waste. Thus, the waste in their impoundment is still subject to Subtitle C control. Our basis for granting the exclusion for the filter press sludge was the low migration potential of chromium and nickel, and the absence of cadmium and cyanide in the waste. Since that time, the Hazardous and Solid Waste Amendments of 1984 were enacted.[38]

---

[31] Olin originally submitted a petition in April 1982, based on bench-scale studies, to delist the brine muds. A second petition was forwarded to EPA in April 1985 after completion of Olin's new, full-scale operating unit in August 1984; the initial petition was withdrawn. Additional information was requested from Olin, which was submitted to EPA on September 5, 1985.

[32] Ground water contamination from the on-site disposal of untreated brine muds has been documented at this facility. The State of Georgia's environmental department has issued a compliance order to Olin regarding its groundwater contamination problems. This proposed exclusion, however, applies only to treated calcium sulfate brine purification muds currently generated at Olin's new treatment facility. These currently generated wastes are not responsible for producing the high concentrations of mercury presently found in the ground water at this site, and are not expected to produce ground water contaminant concentrations above the regulatory standard. The exclusion does not apply to any other wastes which have been generated, stored, or disposed on-site at the Augusta site.

[33] See footnote 5.

[34] See footnote 14.

[35] See footnote 7.

[36] Olin incorporated this testing requirement in the contingency plan filed in their petition. Wastes not meeting the imposed mercury extract limit of 0.02 ppm will be re-treated or disposed as hazardous by Olin.

[37] SR originally submitted their petition on October 14, 1981. On November 8, 1984, the Hazardous and Solid Waste Amendments of 1984 were enacted. In part, the Act requires the Agency to consider factors (including additional constituents) other than those for which the waste was listed if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous waste. (See Section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from SR. This additional information was submitted on May 17, September 26, and October 7, 1985.

[38] See footnote 37.

1986
UMI

As a result, the Agency has reevaluated SR's petition to determine whether the temporary exclusion should be made final. This evaluation was based on the original listing criteria as well as other factors.

SR submitted a detailed description of its electroplating and wastewater treatment processes, including: schematic diagrams; total constituent analyses for cadmium, chromium, and nickel; analyses for total, free, and reactive cyanide; and EP toxicity test results for cadmium, total chromium, and nickel. SR also submitted total constituent analyses and EP toxicity test results for arsenic, barium, lead, mercury, selenium, and silver; and total oil and grease analyses on representative waste samples. SR also submitted a list of raw materials used in the manufacturing process. The Agency requested this information, as indicated above, to determine if hazardous constituents, other than those for which the waste was listed, are present in the waste at levels of regulatory concern.

SR's manufacturing process includes ABS® plastic injection molding, chrome etching, electroless nickel plating, and copper, nickel, and chromium plating. SR's waste treatment system involves chromium reduction, metals precipitation, neutralization, and vacuum filtration. In previous years, the petitioner used an on-site impoundment to contain sludge during times of filter press break down. The impoundment which has been inactive since 1982, is now dry, closed, and covered.

SR divided the impoundment into quadrants and collected six random complete depth core samples in each quadrant. The samples from each quadrant were then combined to form four composite samples. This procedure was repeated on a second day, creating eight composite samples which were then analyzed. SR claims that these samples were representative since their manufacturing process was uniform and the use of raw materials did not vary substantially over time. The petitioner further claimed that the random full core samples were representative of any vertical and horizontal stratification that could have occurred in the impoundment.

With respect to the filter press sludge, nineteen composite samples were collected at random times from the vacuum filter over a four-week period. Grab samples from three discrete areas of the filter press were collected and combined to form one composite sample on each sampling date. SR claims that the samples collected are represenative of any variation of the listed and non-listed constituent concentrations in the waste. SR further claims that although the facility could be considered a job shop, the manufacturing processes used at the facility are uniform and the use of raw materials does not vary substantially over time. In addition, the petitioner claims that the sampling period was long enough to cover any scheduled changes in the product line and, therefore, all raw materials used in the process are represented by the samples collected.

The total constituent analyses of the filter press sludge and the lagooned sludge for the listed constituents revealed the maximum concentrations reported in Table 1. Leachate analyses for these same constituents revealed the maximum concentrations reported in Table 2.

TABLE 1.—MAXIMUM TOTAL CONSTITUENT ANALYSES (PPM)

	Cd	Cr (total)	Ni	CN (total)
Vacuum filter sludge	0.2	300	408	<0.2
Lagooned sludge	0.2	297	381	<0.2

TABLE 2.—MAXIMUM LEACHATE CONCENTRATION (PPM)

	Cd	Cr (total)	Ni	CN (total) (distilled-water)
Vacuum filter sludge	0.01	0.22	0.98	<0.02
Lagooned sludge	0.03	0.31	0.63	<0.02

The total constituent and EP toxicity analyses for the non-listed metals revealed the maximum concentrations reported in Tables 3 and 4, respectively.

TABLE 3.—MAXIMUM TOTAL CONSTITUENT ANALYSES (PPM)

	As	Ba	Pb	Hg	Se	Ag
Vacuum filter sludge	<0.1	4.	2.7	<0.01	<0.1	<0.1
Lagooned sludge	<0.1	6.	2.2	<0.01	<0.1	<0.1

TABLE 4.—MAXIMUM LEACHATE CONCENTRATION (PPM)

	As	Ba	Pb	Hg	Se	Ag
Vacuum filter sludge	<0.01	4.0	0.17	<0.01	<0.01	<0.01
Lagooned sludge	<0.01	2.0	0.14	<0.001	<0.01	<0.01

The maximum total oil and grease content reported was 800 ppm. Ground water monitoring data submitted from a single downgradient well indicated that nickel, chromium, and cadmium were not detectable at detection limits of 0.005, 0.005, and 0.001 ppm, respectively. SR also submitted a list of raw materials used in the process. This list indicated that no other Appendix VIII hazardous constituents were used in the process and that formation of any of these constituents is highly unlikely. SR claims that it generates a maximum of 3300 tons of waste annually from its filter press and that 8750 tons of dry sludge are contained in the closed impoundment.

B. Agency Analysis and Action

SR has demonstrated that the waste treatment sludge generated from its filter press and that contained in its closed on-site impoundment are non-hazardous. The Agency believes that the nineteen composite samples collected from the filter press and the eight composite core samples collected from the impoundment were non-biased and adequately represent any variations which may occur in the waste petitioned for exclusion.

The key factor which could vary toxicant concentrations in this waste would be the use of different raw materials, due to changes in the product line being manufactured. Variation in the raw materials can be expected either when the facility performs as a job shop or when the product line changes on a seasonal basis. The Agency believes that the sampling period used by SR was long enough to cover any scheduled changes in the product line, since the petitioner has verified that all of the plating lines were in operation during the sampling period. The samples, therefore, are representative of the waste generated by SR.

The Agency's conclusion that the sampling adequately represents SR waste was confirmed by a comparison of the total constituent analyses of each sample. This analysis would have, but did not, detect any significant variation in the waste (*i.e.*, the standard deviation was low).

The Agency has evaluated the mobility of the listed constituents of concern from SR's waste using a vertical and horizontal spread (VHS) model.[39] The VHS model generated compliance point values using the 3300 tons per year generation rate and the maximum reported extract levels. The sludge content of 8750 tons and the mean extract levels were used [40] to calculate

---

[39] See footnote 5.

[40] SR's closed lagoon represents a fixed amount of waste which would leach as a unit. Since a large number of samples were collected (*i.e.*, 48 complete depth cores) which suitably represent the variation in the waste generated over a long period of time, the mean extract concentrations were used in the VHS calculation. The mean extract concentrations

Continued

compliance point values for the impoundment sludge. These compliance point concentrations are exhibited in Table 5.

TABLE 5.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATION (PPM)

	Cd	Cr	Ni	CN
Vacuum filter sludge	<0.001	0.03	0.16	<0.003
Lagooned sludge	0.003	0.03	0.09	0.03
	Regulatory Standard			
	0.01	0.05	0.35	0.20

The vacuum filter sludge and lagooned sludge all exhibited cadmium and chromium levels (at the compliance point) well below the National Interim Primary Drinking Water Standards; nickel levels below the Agency's interim standard; [41] and cyanide levels below the U.S. Public Health Service's suggested drinking water standard.[42] Total cyanide levels in the waste also are below the air threshold limit set by the American Conference of Governmental Industrial Hygienists.[43] These constitutents, therefore, are not of regulatory concern.

The Agency also concluded, through the use of the VHS model, that no other EP toxic metals are present in either the filter press sludge or the lagooned waste at levels of regulatory concern (*i.e.*, none are above any regulatory standard at the compliance point in the VHS model). The compliance point values generated from these extract levels are displayed in Table 6.

The Agency also reviewed SR's raw material lists, and material safety data sheets for each component in the raw materials lists. The Agency has concluded from this review that no other Appendix VIII hazardous constitutents are present in the petitioned waste.

TABLE 6.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS (PPM)

	As	Ba	Pb	Hg	Se	Ag
Vacuum filter sludge	<0.002	0.63	0.03	<0.0002	<0.002	<0.002
Lagooned sludge	0.002	0.22	0.02	<0.0002	<0.002	<0.002
	Health-Based Standards					
	0.05	1.0	0.05	0.002	0.01	0.05

The Agency believes that the treatment process used by SR generates a non-hazardous waste. The Agency, therefore, proposes to grant an exclusion to SR's facility located in Ripley, Tennessee for its filter press sludge and lagooned sludge, as described in its petition.

VII. Tennessee Electroplating

A. Petition for Exclusion

Tennessee Electroplating, located in Ripley, Tennessee, is involved in zinc diecasting and copper, nickel, and chromium electroplating of parts for ceiling fans, hood ornaments, and pay telephones. Tennessee Electroplating has petitioned the Agency to exclude its treated sludge, presently listed as EPA Hazardous Waste No. F0006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum. Tennessee Electroplating has petitioned to exclude its currently generated filter press sludge, as well as the electroplating sludges previously disposed of in an on-site surface impoundment which has been closed and capped, because they do not meet the criteria for which it was listed.[44]

---

used were 0.016, 0.18, 0.54, and 0.2 ppm, for cadmium, chromium, nickel and cyanide, respectively. The mean extract values for arsenic, barium, lead, mercury, selenium, and silver were <0.01, 1.38, 0.098, <0.001, <0.01, <0.01ppm, respectively.

[41] See footnote 14.

[42] See footnote 7.

[43] See footnote 8.

[44] Tennessee Electroplating originally submitted their petition on April 27, 1981. On November 8, 1984, the Hazardous and Solid Waste Amendments of 1984 were enacted. In part, the Act requires the Agency to consider factors (including additional constituents) other than those for which the waste was listed if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous waste. (See Section 222 of the Amendments, 42 U.S.C. § 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Tennessee Electroplating, this additional information was submitted on June 19 and August 20, 1981, and May 6, 1985.

VOL
51
ISS

1986
UMI

The listed constituents of concern for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed). Tennessee Electroplating claims that its wastewater treatment process generates a non-hazardous sludge, because cadmium is not used in the process. In addition, chromium, nickel, and cyanide, although present in the waste, are in essentially an immobile form. Tennessee Electroplating further claims that this waste is not hazardous for any other reason.

Based on our review of their petition, Tennessee Electroplating was granted a temporary exclusion for its filter press sludge on December 16, 1981 (see 46 FR 61281). At that time, the petitioner's request pertained only to the filter press sludge that they generated after that date since they did not realize that the impounded waste was also defined as listed F006 waste. Thus, the waste in their impoundment is still subject to Subtitle C control. Our basis for granting the exclusion was the low migration potential of chromium, nickel, and cyanide, and the absence of cadmium from the waste. Since that time, the Hazardous and Solid Waste Amendments of 1984 were enacted.[45] As a result, the Agency has reevaluated Tennessee Electroplating's petition to determine whether the temporary exclusion should be made final. This evaluation was based on the original listing criteria as well as other factors.

Tennessee Electroplating submitted a detailed description of its electroplating and wastewater treatment processes, including: schematic diagrams; total constituent analyses for cadmium, chromium, and nickel; analyses for total, free, and reactive cyanide; and EP toxicity test results for cadmium, total chromium, and nickel. Tennessee Electroplating also submitted total constituent analyses and EP toxicity test results for arsenic, barium, lead, mercury, selenium, and silver; and total oil and grease analyses on representative waste samples. Tennessee Electroplating also submitted a list of raw materials used in the manufacturing process.

The Agency requested this information, as indicated above, to determine if hazardous constituents, other than those for which the waste was listed, are present in the waste at levels of regulatory concern.

Tennessee Electroplating's manufacturing process includes a metal preparation system involving zinc diecasting metal cleaning, copper, nickel, and chromium plating, and glass cutting and grinding. Tennessee Electroplating's waste treatment system involves chromium reduction, metals precipitation, neutralization, and vacuum filtration. In previous years, the petitioner used an on-site impoundment to contain sludge during times of filter press break down. The impoundment which has been inactive since 1982, is now dry, closed, and covered.

Tennessee Electroplating divided the impoundment into quadrants and collected six random complete depth core samples in each quadrant. The samples from each quadrant were then combined to form four composite samples. This procedure was repeated on a second day, creating eight composite samples which were then analyzed. Tennessee Electroplating claims that these samples were representative since their manufacturing process was uniform and the use of raw materials did not vary substantially over time. The petitioner further claimed that the random full core samples were representative of any vertical and horizontal stratification that could have occurred in the impoundment.

With respect to the filter press sludge, twenty-five composite samples were collected at random times from the vacuum filter over a seven-week period. Grab samples from three discrete areas of the filter press were collected and combined to form one composite sample on each sampling date. Tennessee Electroplating claims that the samples collected are representative of any variation of the listed and non-listed constituent concentrations in the waste. Tennessee Electroplating further claims that although the facility could be considered a job shop, the manufacturing processes used at the facility are uniform and the use of raw materials does not vary substantially over time. In addition, the petitioner claims that the sampling period was long enough to cover any scheduled changes in the product line and, therefore, all raw materials used in the process are represented by the samples collected.

The total constitutent analyses of the filtered press sludge and the lagooned sludge for the listed constituents revealed the maximum concentrations reported in Table 1. Leachate analysis for these same constituents revealed the maximum concentrations reported in Table 2.

TABLE 1.—MAXIMUM TOTAL CONSTITUENTS ANALYSES (PPM)

	Cd	Cr (total	Ni	CN (total)	CN (free)
Vacuum filter sludge	0.2	260	298	<10	<0.1
Lagooned sludge	0.2	236	251	165	<0.1

TABLE 2.—MAXIMUM LEACHATE CONCENTRATION (PPM)

	Cd	Cr (total	Ni	CN (total) (distilled-water)
Vacuum filter sludge	0.03	0.82	0.78	<0.2
Lagooned sludge	0.2	0.4	0.86	0.15

The total constituent and EP toxicity analyses for the non-listed metals revealed the maximum concentrations reported in Tables 3 and 4, respectively.

TABLE 3.—MAXIMUM TOTAL CONSTITUENTS ANALYSES (PPM)

	AS	Ba	Pb	Hg	Se	Ag
Vacuum filter sludge	<0.1	<5.0	2.5	<0.01	<0.1	<0.1
Lagooned sludge	<0.1	<6.0	3.1	0.01	<0.1	<0.1

---

[45] See footnote 44.

TABLE 4.—MAXIMUM LEACHATE CONCENTRATION (PPM)

	As	Ba	Pb	Hg	Se	Ag
Vacuum filter sludge	<0.01	4.0	<0.29	<0.001	<0.01	<0.01
Lagooned sludge	<0.01	2.0	0.11	<0.001	<0.01	<0.01

The maximum total oil and grease content reported was 2400 ppm. Ground water monitoring data submitted from a single downgradient well indicated that nickel, chromium, and cadmium were not detectable at detection limits of 0.005, 0.005, and 0.001 ppm, respectively.

Tennessee Electroplating also ran tests for reactive and photodegradable cyanide on its lagooned sludge samples due to high levels of total cyanide present in this waste. The maximum concentration of reactive cyanide reported was 1.1 ppm. The maximum concentration of photodegradable cyanide reported was 0.03 ppm. Tennessee Electroplating also submitted a list of raw materials used in their process. This list indicated that no other Appendix VIII hazardous constituents were used in the process and that formation of any of these constituents is highly unlikely. Tennessee Electroplating claims that it generates a maximum of 840 tons of waste annually from its filter press and that 8300 tons of dry sludge are contained in the closed impoundment.

B. Agency Analysis and Action

Tennessee Electroplating has demonstrated that the waste treatment sludge generated from its filter press and that contained in its closed on-site impoundment is non-hazardous. The Agency believes that the twenty-five samples collected from the filter press and the eight composite core samples collected from the impoundment were non-biased and adequately represent any variations which may occur in the waste petitioned for exclusion.

The key factor which could vary toxicant concentrations in this waste would be the use of different raw materials, due to changes in the product line being manufactured. Variation in the raw materials can be expected either when the facility performs as a job shop or when the product line changes on a seasonal basis. The Agency believes that the sampling period used by Tennessee Electroplating was long enough to cover any scheduled changes in the product line, since the petitioner has verified that all of the plating lines were in operation during the sampling period. The samples, therefore, are representative of the waste generated by Tennessee Electroplating.

The Agency's conclusion that the sampling adequately represents Tennessee Electroplating's waste was confirmed by a comparison of the total constituent analyses of each sample. This analysis would have, but did not, detect any significant variation in the waste (*i.e.*, the standard deviation was low).

The Agency has evaluated the mobility of the listed constituents of concern from Tennessee Electroplating's waste using a vertical and horizontal spread (VHS) model.[46] The Agency's evaluation of the maximum 840 tons generated yearly and the maximum extract levels for the vacuum filter sludge are shown in Table 5. The Agency used the lagoon content of 8300 tons and the mean extract values.[47] to generate the compliance point levels, also shown in Table 5, for the lagooned sludge.

TABLE 5.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATION (PPM)

	Cd	Cr	Ni	CN
Vacuum filter sludge	<0.002	0.04	0.04	<0.01
Lagooned Sludge	0.003	0.03	0.06	0.02
	Regulatory Standard			
	0.01	0.05	0.35	0.20

The vacuum filter sludge and lagooned sludge all exhibited cadmium and chromium levels (at the compliance point) well below the National Interim Primary Drinking Water Standards; nickel levels below the Agency's interim standard,[48] and cyanide levels below the U.S. Public Health Service's suggested drinking water standard.[49] Total cyanide levels in the filter press sludge also are below the air threshold limit set by the American Conference of Governmental Industrial Hygienists (ACGIH).[50] Only that portion of total cyanide which is reported as reactive and photo-degradable can be considered available through an atmospheric exposure route. The reactive and photo-degradable cyanide levels in the impounded sludge are also below the air threshold limit set by the (ACGIH). These constituents, therefore, are not of regulatory concern.

The Agency also concluded, through the use of the VHS model, that no other EP toxic metals are present in either the filter press sludge or the lagooned waste at levels of regulatory concern (*i.e.*, none are above any regulatory standard at the compliance point in the VHS model). The compliance point values generated from these extract levels are displayed in Table 6.

The Agency also reviewed SR's raw materials lists, and material safety data sheets for each component in the raw materials lists. The Agency has concluded from this review that no other Appendix VIII hazardous constituents are present in the petitioned waste.

TABLE 6.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS (PPM)

	As	Ba	Pb	Hg	Se	Ag
Vacuum filter sludge	<0.0005	0.2	0.02	<0.00005	<0.0005	<0.0005
Lagooned sludge	0.002	0.22	0.01	<0.0002	<0.002	<0.0002
	Regulatory Standards					
	0.05	1.0	0.05	0.002	0.01	0.05

The Agency believes that the treatment process used by Tennessee Electroplating generates a non-hazardous waste. The Agency, therefore, proposes to grant an exclusion to Tennessee Electroplating's facility, located in Ripley, Tennessee, for its filter press sludge and lagooned sludge, as described in its petition.

VIII. Valley City Steel Company

A. Petition for Exclusion

The Valley City Steel Company (Valley City), located in Valley City, Ohio, is involved in pickling of plain carbon and high strength-low alloy (HSLA) steel sheets, strips, and plates.

---

[46] See footnote 5.

[47] Since the lagoon represents a cell of waste which would leach as a unit, the mean extract concentrations were used in the VHS calculation. The mean extract concentrations used were 0.016, 0.23, 0.53, and 0.11 ppm, for cadmium, chromium, nickel and cyanide, respectively. The mean extract values for arsenic, barium, lead, mercury, selenium, and silver were <0.01, 1.38, 0.08, <0.001, <0.01, <0.01 ppm, respectively.

[48] See footnote 14.

[49] See footnote 7.

[50] See footnote 8.

1986
UMI

Valley city has petitioned the Agency to exclude the metal oxide powder generated from the regeneration of spent pickle liquor from their pickling process. This oxide powder is classified as hazardous under 40 CFR § 261.3(c)(2) because it is derived from the treatment of spent pickle liquors listed as EPA Hazardous Waste No. K062—Spent pickle liquor from steel finishing operations. Valley City has petitioned to exclude their waste because it does not meet the criteria for which it was listed.[51]

The listed constituents of concern for this waste are hexavalent chromium and lead. Valley City claims that its pickle liquor regeneration process generates a non-hazardous waste because the constituents of concern are present at insignificant concentrations and in essentially an immobile form.

Valley City has submitted detailed descriptions of its steel pickling and wastewater treatment systems, including schematic diagrams; total constituent and EP toxicity analyses of the waste for all the EP toxic metals, hexavalent chromium, and nickel; total constituent analyses for cyanide, sulfide, and total oil and grease; and a distilled water leachate test for cyanide. Valley City also submitted material safety data sheets for the compounds used in their processes which have the potential to enter the wastestream. The Agency requested this information to determine if hazardous constituents other than those for which the waste was originally listed were present in the waste.

The acid pickling process at the Valley City facility involves the straightening of coiled steel, pickling in tandem hydrochloric acid (HCl) pickle tanks, washing in a series of fresh water rinses, and finishing the steel by either drying it, applying oil to prevent rust, or coating the steel with a lubricant to aid in future forming or sampling operations. There are approximately 400 gallons of waste pickle liquor generated per hour at the facility.

Treatment of the pickle liquor involves the use of a pickle liquor regeneration system. Spent acid (containing metallic chlorides) is collected during the daily operation of the pickling lines. The solution is filtered, then atomized in a gas-fired roasting furnace at temperatures up to 800 °C. Iron chloride particles gravitate downward in the furnace, away from the acid droplets and combustion products. The roasting of the iron chlorides produces iron oxides, which are continuously collected and removed to a storage bin, and HCl gas. The HCl gas is condensed by water sprays in an adsorption column, and the condensate is returned to the pickling line. The iron oxide is a high purity, 300-mesh powder with a density of 0.3–0.5 kg/l.

Samples of the dry oxide powder were collected from both the transport dumpster (composited samples) and the roasting furnace exit (grap samples taken during normal operation of the unit). Valley City claims that due to the blending of pickle liquors in the storage tank prior to treatment in the roaster, all samples of treated waste are uniform and non-biased in nature. They also claim that the raw materials and production operations at the facility will not vary over time, and that the waste samples are representative of the oxide recovered in normal operations.

The total constituents and EP toxicity analyses of the oxide powder for the listed constituents are reported in Table 1.

TABLE 1.—MAXIMUM TOTAL CONSTITUENT AND EP TOXICITY VALUE

	Total (mg/kg)	EP (mg/l)
Cr (total	40.	1.41
Cr (hex)	<0.2	([52])
Pb	2.5	0.28

[52] Hexavalent chromium is the listed constituent of concern for the waste, but since the amounts of total hexavalent chromium and extractable total chromium in the waste are so small, EP tests for hexavalent chromium were not required.

The total constituent and EP toxicity analyses of the oxide powder for the non-listed inorganic constituents are reported in Table 2.

TABLE 2.—MAXIMUM TOTAL CONSTITUENT AND EP TOXICITY VALUES

	Total (mg/kg)	EP (mg/l)
As	<0.25	<0.005
Ba	50.	2.5
Cd	<0.25	0.008
Hg	0.1	0.0013
Se	0.04	<0.01
Ag	1.	0.01
Ni	32.	0.32
CN (total)	3.4	<0.005
$S^=$	<9.	

Oil and grease content of the waste averaged 314 ppm. This concentration is largely attributable to oils and rust preventatives present from the repickling of previously processed steel; most of the organic content of the pickle liquor would be expected to be incinerated in the spray roaster. No additives, solvents, or cleaners are added to Valley City's pickling process. An inspection of the material safety data sheets provided by Valley City did not indicate the presence of any other Appendix VIII hazardous constituents in the waste, nor are they likely to be generated in the waste. Valley City claims that a maximum of 2600 tons of waste is generated annually from the pickle liquor regeneration process.

B. Agency Analysis and Action

Valley City has demonstrated that its waste treatment system produces a non-hazardous waste. The Agency believes that the grab samples taken from the roaster and composites taken from the dumpster were non-biased and adequately represent any variations which may occur in the wastestream petitioned for exclusion. Samples were taken in May 1984 and August-September 1985, and represent a time period sufficient to reflect any variability in the waste. The Agency believes that Valley City's claim of the uniformity of the waste has been substantiated.

The Agency has evaluated the mobility of the inorganic constituents from Valley City's waste by means of the VHS groundwater model.[53] The Agency's evaluation of the 2600 tons of oxides generated yearly and the maximum EP extract levels described for this waste using the VHS model has generated the compliance point concentrations shown in Table 2.

TABLE 2.—VHS MODEL: PREDICTED CONCENTRATIONS AT COMPLIANCE POINT

	VHS Model (ppm)	Regulatory standard (ppm)
As	<0.0006	0.05
Ba	0.326	1.00
Cd	0.001	0.01
Cr (total)	0.184	0.05
Pb	0.037	0.05
Hg	0.0002	0.002
Se	<0.0013	0.01
Ag	0.001	0.05
Ni	0.042	0.35
CN (total)	<0.0006	0.20

The predicted levels for all the EP toxic metals except chromium are below their respective National Interim Primary Drinking Water Standards (NIPDWS); nickel levels are below the Agency's interim delisting criterion;[54] and cyanide levels are below the U.S. Public Health Service's suggested drinking water standard.[55] The predicted maximum well concentration for total chromium (0.184 mg/l) exceeds the NIPDWS value of 0.05 mg/l.

This prediction is based upon the highest reported chromium leachate value. The value, however, exceeds the next highest value by a factor of five. Statistical evaluation of all the reported chromium leachate values indicates that this aberrant chromium value is 2.5 times greater than the upper limit of the 95% confidence interval for all the chromium data. The value in question was generated by a separate laboratory analysis performed prior to the testing done for the petition, and no quality control information concerning this early analysis is available. All subsequent analyses (performed by another laboratory) produced verifiably accurate data. Consequently, the Agency believes that the elevated chromium value is an outlier that may be due to laboratory error, and so this value will be disregarded. If the 95% confidence interval is re-calculated after discarding the outlier, and the upper limit of this interval is used as the leachate value in the VHS calculations, the resultant compliance point toxicant concentration (0.0196 ppm) does not exceed the NIPDWS for chromium.

These constituents are, therefore, not of regulatory concern. The Agency has also concluded that no hazardous organic constituents are present in the waste based upon a review of the raw materials used in the process and the potential for those organics to exist after going through the roaster.

Valley City has demonstrated to the Agency that the metal oxide powder residue produced from their spent pickle liquor regeneration process is non-hazardous. The Agency proposes to grant an exclusion to Valley City Steel Company, located in Valley City, Ohio, for this oxide powder, as described in the petition.

IX. Effective Date

The rule, if promulgated, will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here since this rule reduces, rather than increases, the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense which would be imposed on the petitioners by an effective date six months after promulgation and the fact that such a deadline is not necessary to achieve the purpose of section 3010, we believe that these rules should be effective immediately. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

X. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposal to grant exclusions is not major since its effect is to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction is achieved by excluding wastes generated at specific facilities from EPA's list of hazardous wastes, thereby enabling the facility to treat its waste as non-hazardous.

XI. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have an adverse economic impact on small entities since its effect will be to reduce the overall costs of EPA's hazardous waste regulations. Accordingly, I hereby certify that this proposed regulation will not have a significant economic impact on a substantial number of small entities.

This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous waste, Recycling.

Dated: February 19, 1986.

Marcia Williams,
Director, Office of Solid Waste.

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

For the reasons set out in the preamble, 40 CFR Part 261 is proposed to be amended as follows:

1. The authority citation for Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended [42 U.S.C. 6905, 6912(a), 6921, and 6922].

2. In Appendix IX, add the following wastestreams in alphabetical order to Table 1 as indicated:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDES FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
Chamberlain-Featherlite, Inc	Hot Springs, AR	Dewatered wastewater sludges (EPA Hazardous Waste No. F019) generated from chemical conversion coating of aluminum after [date of publication].
Falconer Glass Industries, Inc	Falconer, NY	Wastewater treatment sludges from filter press and magnetic drum separator (EPA Hazardous Waste No. F006) generated from their electroplating operations after [date of publication].
*	*	* * * *
Lake City Army Ammunition Plant	Independence, MO	Wastewater treatment sludge (EPA Hazardous Waste No. K046) generated from the manufacturing, formulation and loading of lead-based initiating compounds and contained in an on-site landfill on [date of publication]. This is a one time only exclusion for the waste contained in the on-site landfill.
Loxcreen Company, Inc	Hayti, MO	Wastewater treatment sludge (EPA Hazardous Waste No. F019) generated from chemical conversion coating of aluminum after [date of publication].
*	*	* * * *
Olin Corp	Augusta, GA	Brine purification muds (EPA Hazardous Waste No. K071) generated from the mercury cell process in chlorine production and produced in their brine treatment and dewatering unit after [date of publication]. There must be continuous batch testing for mercury using the EP toxicity test prior to disposal. Each batch of waste must exhibit mercury extract levels below 0.02 mg/l. This exclusion does not apply to a batch unless both of these conditions are met.

---

[51] Valley City originally submitted its petition on August 10, 1984. On November 8, 1984, the Hazardous and Solid Waste Amendments of 1984 were enacted. In part, the Act requires the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be a hazardous waste. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Valley City. This additional information was submitted by Valley City on August 9, and October 30, 1985.

Hazardous Waste Management System; Land Disposal Restrictions

Correction

In FR Doc. 86-618 beginning on page 1602 in the issue of Tuesday, January 14, 1986, make the following corrections:

1. On page 1602, third column, second paragraph, seventh line, "achieved" should read "achievable".

2. On page 1605, second column, first complete paragraph, third from last line and last line, "6934" should read "6924".

3. On page 1606, second column, first complete paragraph, seventh line, "disposal" should read "disposed".

4. On page 1621, third column, second complete paragraph, sixth line, "Wasts" should read "Wastes".

5. On page 1623, second column, first paragraph, seventh line from the bottom, insert "not" between "has" and "been".

6. On page 1625, second column, second complete paragraph, fifteenth line, "interaction" was misspelled.

7. On page 1627, second column, first complete paragraph, eleventh line, "donated" should read "denoted".

8. On page 1633, third column, in the table, in the first entry, "$\pm 10^{-9}$" should read "$>10^{-9}$"; in the second entry, "±500" should read ">500".

9. On page 1641, second column, twenty-first line, "264,228" should read "264.228".

10. On page 1642, second column, second complete paragraph, eleventh line, "absorption" should read "adsorption".

11. On page 1643, first column, second complete paragraph, twelfth line, "absorbed" should read "adsorbed".

12. On page 1644, second column, second paragraph, third line, insert a dash after the first parenthesis.

13. On page 1649, first column, twelfth line, "γ" should read "α_L". In the third column, ninth line, "long-uniform" should read "log-uniform". In the same column, first complete paragraph, second line, "ρb" should read "P_b".

13a. On page 1650, second column, in the fifth line beginning "density", "ρp" should read "Pp". In the seventeenth line of the first complete paragraph, "K" should read "K_s".

14. On page 1651, first column, in the equation, insert "[" after "exp".

15. On page 1654, first column, in paragraph (v), first line, remove the parenthesis before "of".

16. On page 1656, insert "WASTE SITE" at the top of the illustration.

17. On page 1663, first complete paragraph, sixth line, "Control" should read "Quality".

18. On page 1666, first column, in every place that "m_g" and "m_L" appear, insert a • above "m".

19. On page 1668, second column, in paragraph iii, ninth line, "absorbed" should read "adsorbed".

20. On page 1669, second column, in the paragraph below Equation (A27), fourth line, "$_F$F" should read "K_F".

In the third column, in the paragraph below Equation (A30), fifth line, "one" should read "once".

21. On page 1672, third column, in the first paragraph and in the equation immediately following, insert a "ˆ" above "C_s".

22. On page 1673, in the text between Equations (B22) and (B23), in the first column, "^{k}ha" should read "k_{HA}". In the second column, "k_{hn}" should read "k_{HN}" and "k_{hb}" should read "k_{HB}".

23. On page 1675, in the first column, in the first line, "•g" should read "$\dot{m}_g$"; in the third line, "$\bullet_L$" should read "$\dot{m}_L$"; in the fifth line, "•P" should read "$\dot{m}_R$"; in the fourteenth line, "stream pH" should read "stream p^{OH}"; and in the twenty-seventh line, "Q^R" should read "Q_R".

24. Also on page 1675, in the second column, in the nineteenth line, "ζ" should read "γg".

25. On page 1678, in the first column, in the second complete paragraph, in the eleventh line, "data" should read "date".

26. On page 1682, in the first column, in paragraph (D), in the ninth line, "nonliner" should read "nonlinear"; in the second column, in the first line, "one-hundredth" should read "one one-hundredth"; in the last line, "factor is" should read "factor in"; and in the third column, in the first complete paragraph, in the eighth line from the bottom of the paragraph, "The" should read "Ten".

27. On page 1684, in the second column, in the last line, "outliner" should read "outlier".

28. On page 1690, in the second column, in the seventh line from the bottom, "5.0+0.2" should read "5.0±0.2".

29. On page 1694, in the first column, in the fifth line from the top, "waste group" should read "waste or waste group".

30. On page 1696, in the second column, in the fourth line from the bottom, "today become" should read "today to become"; in the third column, in the last line, "data" should read "date".

31. On page 1698, in the first column, in the first paragraph under "7. Granting of Extension Approval", in the eleventh line, "the disposal" should read "the duration of the extension and the name and location of any land disposal".

32. On page 1708, in the first column, in the first complete paragraph, in the seventh line, "effect" should read "effort".

33. On page 1712, in the first column, in entry F005, in the first line, "following non-halogenated" should read "following spent non-halogenated"; in the second column, in the second complete paragraph, in the seventh line, "derived for" should read "derived from".

34. On page 1715, in the second column, in paragraph v, in the third line, "inducted" should read "induced".

35. On page 1721, in the second column, in the seventh line, "choromium (VI)" should read "chromium (VI)".

36. On page 1730, in the second column, in footnote 14, in the fourth line, "CDFs—and" should read "CDDs—and".

37. On page 1732, in Table 16, in the last entry, the last column should read "^{2}1 mg/l".

38. On page 1752, in the third column, in paragraph 7.10.2, in the second line, "100±°C" should read "100±20°C".

39. On page 1753, in the second column, in paragraph 7.15.3, in the third line, "may be" should read "may not be".

40. On page 1755, in Table 2, in the third column, move the third line up under the first line.

41. On page 1764, in the first column, in entry U031, "alcohol" was misspelled.

42. On page 1765, in the third column, in the table in § 268.42, in the twenty-ninth entry, "1,2,2-tyrifluoroethane" should read "1,2,2-trifluoroethane".

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

43 CFR Part 431

General Regulations for Power Generation, Operation, Maintenance, and Replacement at the Boulder Canyon Project, Arizona/Nevada

AGENCY: Bureau of Reclamation, Interior.

ACTION: Proposed rule.

SUMMARY: In accordance with the Boulder Canyon Project Act of 1928 (Project Act), the Boulder Canyon Project Adjustment Act of 1940 (Adjustment Act), and the Hoover Power Plant Act of 1984 (Hoover Power Plant Act), the Bureau of Reclamation (Reclamation) has developed these proposed General Regulations for Power Generation, Operation, Maintenance and Replacement at the Boulder Canyon Project (General Regulations) to define the procedures to be used by Reclamation in providing contractors and the Western Area Power Administration (Western) with cost and power generation data associated with operation of the Project. These proposed General Regulations will supersede those portions of the "General Regulatitions for Lease of Power," dated April 25, 1930, and the "General Regulaitons for Generation and Sale of Power in Accordance with the Boulder Canyon Project Adjustment Act," approved and promulgated on May 20, 1941 (1941 Generation Regulations), which are under the jurisdiction of the Secretary of the Interior and which will terminate on May 31, 1987.

DATES: Written comments concerning the proposed General Regulations must be received within 45 days of the date of this notice.

ADDRESS: Written comments concerning the General Regulations should be sent to: Mr. Edward Hallenbeck, Regional Director, Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005, (702) 293-8411.

FOR FURTHER INFORMATION CONTACT: Robert McCullough, Regional Supervisor of Power, Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005, (702) 293-8104.

SUPPLEMENTARY INFORMATION: The Project Act provides for the construction of works for the protection and development of the Colorado River Basin and for other purposes. Section 5 of the Project Act addresses the Secretary of the Interior's authority, under such regulations as the Secretary may prescribe, to contract for the generation and delivery of electrical energy upon charges that will provide sufficient revenue that will cover all expenses of operation, maintenance, and repayment of all amounts advanced from the Treasury with interest for the Boulder Canyon Project. Section 9 of the Adjustment Act provides for the operation, maintenance, and the making of replacements, however necessitated, of the Hoover Powerplant by the United States, either directly or through such agent or agents as the Secretary of the Interior may designate.

The Project Adjustment Act further defined the Secretary of the Interior's authority to promulgate the charges or the basis of computation thereof for electrical energy generated at Hoover Dam. In accordance with this authority, the Secretary of the Interior approved and promulgated the 1941 General Regulations. Those 1941 General Regulations provide the basis for computation of the charges for electrical energy generated at Hoover Dam through May 31, 1987.

The Department of Energy Organization Act of 1977 transferred the responsibility for the power marketing and transmission functions of the Boulder Canyon Project from Reclamation to the Western Area Power Administration (Western). The construction, power generation, operation, maintenance, and replacement responsibilities of the Project powerplant and appurtenant works remained with Reclamation. The power marketing function includes the responsibility for promulgating charges for the sale of power. General Regulations for the Charges for the Sale of Power from the Boulder Canyon Project will be the subject of a separate rulemaking by the Secretary of Energy, acting through the Administrator of Western under 10 CFR Part 904.

These proposed General Regulations, promulgated pursuant to section 8 of the Adjustment Act, are necessary and appropriate for the administration of the Project in accordance with the Project Act and the Adjustment Act, as amended.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested parties are invited to submit comments concerning these proposed General Regulations to the location identified in the address section of this notice. The final General Regulations will be published by the Secretary of the Interior, acting through the Commissioner of Reclamation, 90 days from the date of this publication. Reclamation will review and consider each comment prior to the publication in the **Federal Register** of the final General Regulations. Included also in that **Federal Register** publication will be responses to all major comments, criticisms, and alternatives offered during the comment period.

Executive Order 12291

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

Pursuant to the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality Regulations (CEQ) for implementing the procedural provisions of NEPA (40 CFR Parts 1500-1508), and the Department of the Interior Manual (516 DM 1-7), the Bureau of Reclamation will evaluate the potential environmental impacts associated with the proposed regulations for power generation, operation, maintenance, and replacement activities at the Boulder Canyon Project.

Based on a preliminary analysis, Reclamation anticipates preparing a categorical exclusion. The environmental compliance will be completed prior to final implementation of the regulations.

List of Subjects in 43 CFR Part 431

Electric power, Power generation.

It is proposed to amend 43 CFR by adding a new Part 431 to read as follows:

VOL
51
ISS

UMI

PART 431—GENERAL REGULATIONS FOR POWER GENERATION, OPERATION, MAINTENANCE, AND REPLACEMENT AT THE BOULDER CANYON PROJECT, ARIZONA/NEVADA

Sec.
431.1 Purpose.
431.2 Scope.
431.3 Definitions.
431.4 Power generation responsibilities.
431.5 Operation, maintenance, and replacement cost estimates.
431.6 Power generation estimates.
431.7 Administration and management of the Colorado River Dam Fund.
431.8 Disputes.
431.9 Future regulations.

Authority: Boulder Canyon Project Act of 1928 (43 U.S.C. 617 *et seq.*), Boulder Canyon Project Adjustment Act of 1940 (43 U.S.C. 618 *et seq.*), Colorado River Storage Project Act of 1956 (43 U.S.C. *et seq.*), Colorado River Basin Project Act of 1968 (43 U.S.C. 150 *et seq.*), and Hoover Power Plant Act of 1984 (98 Stat. 1333).

§ 431.1 Purpose.

(a) The Secretary of the Interior (Secretary), acting through the Commissioner of Reclamation, is authorized and directed to operate, maintain, and replace the facilities at the Boulder Canyon Project powerplant, and also to promulgate general regulations as the Secretary finds necessary and appropriate in accordance with the authorities in the Reclamation Act of 1902 (32 Stat. 388), and all acts amendatory thereof and supplementary thereto.

(b) In accordance with the Boulder Canyon Project Act of 1928 (43 U.S.C. 617 *et seq.*) as amended and supplemented (Project Act), the Boulder Canyon Project Adjustment Act of 1940 (43 U.S.C. 628 *et seq.*) as amended and supplemented (Adjustment Act), and the Hoover Power Plant Act of 1984 (98 Stat. 1333), Reclamation promulgates these General Regulations defining procedures to be used in providing contractors and Western with cost and power generation data associated with the operation of the Boulder Canyon Project. These General Regulations shall supersede those portions of the "General Regulations for Generation and Sale of Power in Accordance with the Boulder Canyon Project Adjustment Act" (1941 General Regulations), approved and promulgated on May 20, 1941, and the "General Regulations for Lease of Power," dated April 25, 1930, which are under the jurisdiction of the Secretary of the Interior and which will terminate on May 31, 1987.

§ 431.2 Scope.

These General Regulations shall be effective on June 1, 1987, and shall apply to Power Generation, Operation, Maintenance, and Replacement activitites at the Boulder Canyon Project after May 31, 1987. Those portions of the General Regulations for Generation and Sale of Power in Accordance with the Boulder Canyon Project Adjustment Act, dated May 20, 1941, and the "General Regulations for lease of Power," dated April 25, 1930, which are under the jurisdiction of the Secretary of the Interior, are repealed as of the effective date of these regulations.

§ 431.3 Definitions.

As used in this part:

(a) "Additions and betterments" means such additions and betterments constructed or acquired which enhance or improve the Project and do more than restore the Project to a former good operating condition.

(b) "Colorado River Dam Fund" or "Fund" means that special fund established by Section 2 of the Project Act for the purpose of carrying out the provisions of the Project Act.

(c) "Contractors" means those entities which have a fully executed contract with Western for the purchase of power from the Project.

(d) "Project" or "Boulder Canyon Project" means all works authorized by the Boulder Canyon Project Act, the Boulder Canyon Project Adjustment Act, and the Hoover Power Plant Act, to be constructed and owned by the United States, and any future authorized additions, but exclusive of the main canal and appurtenances mentioned therein, now known as the All-American Canal.

(e) "Replacements" means such replacements as determined by the United States to be necessary to keep the Project in good operating condition, but shall not include (except where used in conjunction with the word "emergency" or the words "however necessitated") replacements made necessary by any act of God, or of the public enemy, or by any major catastrophe.

(f) "Western" means the Western Area Power Administration, an agency of the Department of Energy.

§ 431.4 Power generation responsibilities.

(a) Power generation, and associated operation, maintenance, and replacement activities, however necessitated, shall be the responsibility of the United States Department of the Interior, Bureau of Reclamation (Reclamation).

(b) Subject to the statutory requirement that Hoover Dam and Lake Mead shall be used: first, for river regulation, improvement of navigation and flood control; second, for irrigation and domestic uses and satisfaction or perfected rights mentioned in Section 6 of the Project Act; and third, for power, and subject to water availability or water releases necessary for river system operations or forced or planned powerplant outages that affect powerplant capability, as determined by Reclamation, Reclamation will release water and make available generating capacity in such quantities, and at such times, as are necessary for the delivery of the capacity and energy to which contractors are entitled.

(c) Reclamation reserves the right to temporarily discontinue or reduce the delivery of water for the generation of electrical energy at any time for the purpose of maintenance, repairs, and/or replacements, and for investigations and inspections necessary thereto, provided, however, that Reclamation shall, except in case of emergency, give Western reasonable notice in advance of such temporary discontinuation or reduction, and that Reclamation shall make such inspections and perform such maintenance and repair work at such times and in such manner as to cause the least inconvenience possible to contractors and that Reclamation shall prosecute such work with diligence and without unnecessary delay, resume delivery of water so discontinued or reduced.

§ 431.5 Operation, maintenance, and replacement cost estimates.

Reclamation shall submit annually to Western, cost estimates for operation, maintenance, replacements, additions and betterments, interest, and amortization of the Project for the next 5 fiscal years. Such cost estimates shall identify major items included in the cost estimates. Thirty (30) days after the President's budget has been submitted to Congress, Reclamation shall submit such cost estimates to Western and shall also provide such cost estimates to contractors for review with an opportunity to present written views within 60 days. Reclamation responses to written views shall be provided within 60 days of receipt.

§ 431.6 Power generation estimates.

At least once each fiscal year, Reclamation shall provide to Western and to contractors, an integrated annual schedule showing estimated power generation and estimated maintenance outages for review, and shall provide an

opportunity to present written views within 60 days. Reclamation responses to written views shall be provided within 60 days of receipt. The estimated annual operation schedule of Hoover Powerplant shall be subject to necessary modifications, either higher or lower, to allow for changing powerplant maintenance schedules and/or generation rates, and for changing reservoir and river conditions, as well as for release requirements for flood control.

§ 431.7 Administration and management of the Colorado River Dam Fund.

(a) All receipts to the Project shall be deposited in the Fund along with power sales revenues deposited by Western and shall be available without further appropriation for:

(1) The cost of operation, maintenance, and replacement of all Project facilities, including emergency replacements necessary to insure continuous operations;

(2) Payment of interest on the unamortized balance of capital investment;

(3) Repayment of capital investments including amounts readvanced;

(4) Payments to the States of Arizona and Nevada as provided in section 2(c) of the Adjustment Act and section 403(c)(2) of the Colorado River Basin Project Act;

(5) Transfers to the Lower Colorado River Basin Development Fund as provided in section 403(c)(2) of the Colorado River Basin Project Act and section 102(c) of the Hoover Power Plant Act;

(6) Transfers from the Lower Colorado River Basin Development Fund to the Upper Colorado River Basin Fund as reimbursement for the monies expended heretofore from the Upper Colorado River Basin Fund to meet deficiencies in generation at Hoover Dam during the filling period of storage units of the Colorado River Storage Project in accordance with the provisions of sections 403(g) and 502 of the Colorado River Basin Project Act, such transfers to be effected at the rate of $1,532,854.44 per year during the period 1988 to 2005; and

(7) Any other purposes authorized by existing and future Federal law.

(b) The Fund shall be administered and managed in accordance with applicable Federal law and regulation, by the Secretary of the Interior acting through the Commissioner of Reclamation.

§ 431.8 Disputes.

(a) Any disputes or disagreements as to interpretation or performance of the provisions of these regulations under the responsibility of the Secretary of the Interior shall first be presented to and decided by the Secretary or the Secretary's designated representative, hereinafter called the Federal Representative. The decision of the Federal Representative shall be final and binding unless a written request for arbitration is received by the Federal Representative within 30 days of the date of receipt of the notice of decision, or the disputing party files a claim in a proper Federal District Court within 6 months of receipt of the notice of decision. The Federal Representative shall have 90 days from the date of receipt of the request for arbitration to respond in writing by either concurring in or denying the request. Failure by the Federal Representative to take any action within the 90 days shall be deemed a denial of the request for arbitration. In the event of a denial of a request for arbitration, the disputing party's remedy lies with the appropriate Federal District Count.

(b) When a timely request for arbitration is received and the Federal Representative concurs in writing with the request, the disputing party and the Federal Representative shall each, within 30 days, name one arbitrator to the panel of arbitrators which will decide the dispute. In the event there is more than one disputing party in addition to the Federal Representative, the disputing parties shall collectively name one arbitrator to the panel of arbitrators. In addition, the Federal Representative shall make a request in writing to the appropriate Federal District Court that a third arbitrator be named to the panel of arbitrators by the Chief Judge of the Federal District Court which would have exercised jurisdiction over the dispute but for the mutually agreed to arbitration process. The third arbitrator shall act as chairperson of the panel. The panel of arbitrators shall render a final decision within 60 days of the date of the naming of the third arbitrator. A decision by any two of the three arbitrators named to the panel shall be final and binding on all parties involved in the dispute. Pending a final decision by the panel arbitrators, the Federal Representative's prior decision shall be binding upon the parties.

§ 431.9 Future regulations.

Reclamation may from time to time promulgate such additional or amendatory regulations as deemed necessary for the administration of the Project in accordance with applicable law.

Dated: February 11, 1986.

Wayne Marchant,
Deputy Assistant Secretary—Water and Science.

BILLING CODE 4310-09-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-74; RM-5169]

FM Broadcast Station in De Witt, MI

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the allotment of FM Channel 243A to De Witt, Michigan, in response to a petition filed by William S. Gannon. This allotment could provide a first FM broadcast service for the community.

DATES: Comments must be filed on or before April 21, 1986, and reply comments on or before May 6, 1986.

ADDRESS: Federal Communication Commission, Washington, DC 20054.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (De Witt, Michigan); MM Docket No. 86-74, RM-5169.

Adopted: January 31, 1986.
Released: February 27, 1986.
By the Chief, Policy and Rules Division.

1. A petition for rule making has been filed by William S. Gannon ("petitioner"), seeking the allotment of FM Channel 243A to De Witt, Michigan, as that community's first broadcast service. Petitioner submitted information in support of the proposal and stated his intention to file an application for the channel.

VOL 51
ISS 44
MR 6
1986
UMI

2. Channel 243A can be allocated to De Witt, Michigan, in compliance with the minimum distance separation requirements of § 73.207 of the Commission's Rules provided an application (BMPH850911IE) filed by Station WHNN, Channel 241, Bay City, Michigan, to relocate its transmitter and increase its facilities to the Class C standards is approved by the Commission.[1] At present, the proposal for Channel 243A at De Witt would be short spaced to the 16 kilometer buffer zone of Station WHNN. However, if the application is approved to allow Station WHNN to operate as a full Class C facility, the buffer zone would be removed and Channel 243A could be allocated to De Witt.[2] Since De Witt is located within 320 kilometers (200 miles) of the common U.S.-Canadian border, Canadian concurrence is required.

PART 73—[AMENDED]

3. In view of the fact that the proposed allocation could provide a first FM broadcast service to De Witt, Michigan, the Commission believes it is appropriate to propose amending the FM Table of Allotments, § 73.202(b) of the Commission's Rules, with respect to the following community:

Community	Channel No.	
	Present	Proposed
De Witt, Mich.		243A

4. It is ordered, That the Secretary of the Commission shall send by certified mail, Return Receipt Requested, a copy of the *Notice* to the following: Mr. Steven J. Kuiper, 2049 Action Street, Grand Rapids, Michigan 49504 (851115MQ).

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before April 21, 1986, and reply comments on or before May 6, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: William S. Gannon, 4206 South Cedar Street, Lansing, Michigan 48910.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the persons(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

---

[1] One of the applications filed for Channel 243A at Portage, Michigan (851115MQ), is short spaced to the proposed allotment of Channel 243A at De Witt. The applicant will be served a copy of this *Notice of Proposed Rule Making.* See paragraph 4, *infra.*

[2] Should the application filed by WHNN not be granted and the buffer zone for Channel 241, Bay City, remain until March 1987, FM Channel 227A could be allotted to De Witt. A site restriction of 8.8 kilometers northwest of the community would be necessary for the allocation of Channel 227A at De Witt.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, DC.

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

48 CFR Parts 209 and 252

Department of Defense Federal Acquisition Regulation Supplement; Debarment and Suspension

AGENCY: Department of Defense (DOD).

ACTION: Proposed rule and request for comments.

SUMMARY: The Defense Acquisition Regulatory (DAR) Council is considering the promulgation of a new rule in the DOD FAR Supplement (DFARS), Parts 209 and 252, with respect to Debarment and Suspension. The purpose of the proposed rule is to provide the contracting officer with current information regarding the debarment or suspension status of offerors and ensure that subcontracts are not awarded to firms which have been debarred or suspended.

DATE: Comments on the proposed rule should be submitted in writing to the DAR Council at the address shown below no late than May 5, 1986, to be considered in formulation of the final rule. Please cite DAR Case 83–72 in all correspondence related to this matter.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, OASD(P)/DARS, c/o OASD(A&L), Room 3C841, The Pentagon, Washington, DC 20301–3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, (202) 697–7268.

SUPPLEMENTARY INFORMATION:

A. Background

Current provisions in the FAR and DFARS essentially state that, absent compelling circumstances, DOD Components will not solicit bids or proposals from, award contracts to, or renew existing contracts with firms who are debarred or suspended or are pending debarment action, and in addition, will not consent to nor approve subcontracts with such firms. Debarred or suspended contractors are excluded from conducting business with the DOD as agents or representatives or other contractors. Currently, DOD contracting officers rely upon the Consolidated List of Debarred, Suspended and Ineligible Contractors specified in FAR 9.403 in giving effect to the above provisions. However, on occasion, contracts inadvertently have been awarded to firms which were debarred or suspended at the time of award or were pending debarment action, because of the administrative delay involved in preparation and distribution of the Consolidated List to DOD contracting offices worldwide. The proposed rule would address and cure this problem by requiring, in other than small purchases under FAR Part 13, that offerors certify their eligibility for award at the time of submission of bids and proposals and obtain similer certifications from prospective subcontractors, thereby assisting contracting officers in making informed responsibility determinations. As drafted, the proposed rule extends the prohibition on contracting with debarred or suspended firms to the subcontract level, as the prohibition would apply to circumstances other than those in which formal Government consent or approval is required under the terms of a Government prime contract.

B. Regulatory Flexibility Act

The proposed rule is expected to impact only upon a small number of firms which, although debarred or suspended, seek to do business under DOD prime contracts as subcontractors. Because the number of debarred or suspended firms which are small entities is itself currently limited to approximately 1200 firms, and because present DOD prime contractor purchasing practices and prime contract provisions concerning Government consent and approval of subcontracts tend to exclude such firms from receiving subcontract awards to a large extent, it is believed that an insubstantial number of small entities will be affected. Comments are solicited in this regard.

C. Paperwork Reduction Act

The proposed rule requires certification of status and does not impose information collection requirements under the statute. Therefore, OMB approval under 44 U.S.C. 3501, et seq., is not required.

List of Subjects in 48 CFR Parts 209 and 252

Goverment procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulator Council.

Therefore, it is proposed that 48 CFR Parts 209 and 252 be amended as follows:

PART 209—CONTRACTOR QUALIFICATIONS

1. The authority citation for 48 CFR Part 209 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

2. Section 209.405–3 is added to read as follows:

209.405–3 Contract clause.

The contracting officer shall insert the clause at 52.209–7000, Representation Regarding Debarment and Suspension and Subcontracting with Debarred or Suspended Contractors, in all solicitations and contracts other than small purchases under FAR Part 13.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. The authority for Part 252 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

4. Section 252.209–7000 is added to read as follows:

252.209–7000 Representation regarding debarment and suspension and subcontracting with debarred or suspended contractors.

As prescribed in 209.405–3, insert the following clause:

Representation Regarding Debarment and Suspension and Subcontracting With Debarred or Suspended Contractors (1986 MAR)

(a) The Offeror (Contractor) represents and certifies (with its submission of this offer) that it ( ) is, ( ) is not (check one) suspended, debarred or ineligible from entering into contracts with the executive branch of the Federal Government, or in receipt of a notice of proposed debarment from any department or agency of the Department of Defense. This representation concerns a matter within the jurisdiction of a department or agency of the United States so that the making of a false, fictitious or fraudulent representation will render the maker subject to punishment under Title 18, United States Code, Section 1001.

(b) The Offeror (Contractor) certifies that (, if awarded a contract under this solicitation,)

VOL
51
ISS
44
MR
6
1986
UMI

it will knowingly enter into any subcontract exceeding $25,000 under the contract with a contractor that is suspended, debarred or ineligible from entering into contracts with the executive branch of the Federal Government, or in receipt of a notice or proposed debarment from any department or agency of the Department of Defense. The Contractor may rely on a representation by the subcontractor similar to that in paragaph (a), above, unless it has knowledge of a suspension, debarment, or eligibility of, or receipt of notice of proposed debarment by the subcontractor. If the Contractor does knowingly enter into a subcontract exceeding $25,000 with a contractor that is suspended, debarred, ineligible or in receipt of a notice of proposed debarment, the Contracting Officer may direct cancellation of the subcontract at no cost to the Government or terminate the prime contact for default.

(c) Prior to award of a contract under this solicitation, the Offeror shall provide immediate notice to the Contracting Officer in the event of being suspended, debarred or declared ineligible by any department or agency of the Federal Government, or upon receipt of a notice of proposed debarment from any department or agency of the Department of Defense.

(d) (If awarded a contact under this solicitation,) the Offeror (Contractor) shall, during the performance of the contract, provide immediate notice to the Contracting Officer in the event of being suspended, debarred or declared ineligible by any department or agency of the Federal Government, or upon receipt of a notice of proposed debarment from any department or agency of the Department of Defense.

(e) (If awarded a contact under this solicitation,) the Offeror (Contractor) shall include paragraphs (a) and (b), above, and this paragraph (e), modified and supplemented as necessary to reflect the relationship of the contracting parties, in all subcontracts exceeding $25,000 and shall include reference to the government contract number, contracting office, and Contracting Officer in such subcontracts.

(End of clause)

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1063

[Ex Parte No. MC-95; Sub-3]

Adequacy of Intercity Motor Common Carrier Passenger Service

AGENCY: Interstate Commerce Commission.

ACTION: Notice of discontinuance of rulemaking proceeding.

SUMMARY: This proceeding concerning adequacy of service, equipment, and facilities provided by motor passenger carriers operating over regular routes was reopened for further comments by decision served November 30, 1984. Notice of the action was published December 3, 1984, in the *ICC Register* and the **Federal Register** at 49 FR 47277. The supplemental comments that have been submitted have identified no reasons why any modifications to the existing regulations should be adopted. The Commission has concluded that the increasingly competitive environment fostered under the provisions of the Bus Regulatory Reform Act of 1982 makes it unnecessary to impose more stringent requirements upon the intercity bus industry.

DATES: This proceeding is discontinued, effective March 6, 1986.

FOR FURTHER INFORMATION CONTACT:

James L. Brown (202) 275-7898

or

Howell I. Sporn (202) 275-7691

SUPPLEMENTARY INFORMATION: Additional information is contained in the full Commission decision, which is available for public inspection at the Office of the Secretary, Room 2215, 12th Street and Constitution Ave., NW., Washington, DC 20423. Copies may be purchased from T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call (800) 424-5403, or (202) 289-4357 in the Washington, DC, Metropolitan area.

This decision will not significantly affect the quality of the human environment or the conservation of energy resources, nor will it have a significant effect on a substantial number of small authorities.

List of Subjects in 49 CFR Part 1063

Buses.

This decision is issued pursuant to 5 U.S.C. 553 and 559 and 49 U.S.C. 10102, 10321, 10703, 10762, 10730, 10922, 11145, and 11702.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

1986-Crop Honey Price Support Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of Proposed Determinations.

SUMMARY: The purpose of this notice is to propose a level of price support for the honey price support program for the 1986-crop and to propose additional program changes. These proposed determinations are made in accordance with the provisions of section 201(b) of the Agricultural Act of 1949, as amended by the Food Security Act of 1985. Written comments are invited from interested persons.

DATE: Comments must be received on or before March 24 in order to be assured of consideration.

ADDRESS: Mail comments to Dr. Howard C. Williams, Director, Commodity Analysis Division, USDA-ASCS, 3741 South Building, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Harry A. Sullivan, Agricultural Economist, Commodity Analysis Division, USDA-ASCS, Room 3741 South Building, P.O. Box 2415, Washington, D.C. 20013, (202) 447-6758. The Preliminary Regulatory Impact Analysis describing the options considered in developing these proposed deteminations and the impact of implementing each option is available from the above-named individual.

SUPPLEMENTARY INFORMATON: These proposed determinations have been reviewed under USDA procedures implementing Executive Order 12291 and Departmental Regulation 1512-1 and have been classified "not major." It has been determined that these proposed determinations will not result in: (1) An annual effect on the economy of $100 million or more: (2) major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal assistance program to which these proposed determinations apply are: Commodity Loans and Purchases; 10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice of proposed determinations since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

In order to implement a price support program for the 1986 crop of honey by April 1, 1986, the beginning of the marketing season, it is necessary to limit the public comment period to less than 30 days. Accordingly, comments must be received by March 24 in order to be assured of consideration.

Domestic production, imports, CCC and commercial stocks, and honey pledged as collateral for CCC price support loans are expected to result in a total supply of honey in the United States for 1986 of 550 million pounds.

Domestic honey production in 1986 is projected to be 196 million pounds from 4,350,000 colonies. This is 46 million pounds more than the estimated volume of honey produced during the 1985 crop year. Imports of honey in 1986 are projected to total 140 million pounds, about the same quantity imported in 1985. As of December 31, 1985, there were approximately 108.3 million pounds of honey remaining in CCC inventory while approximately 20 million pounds of honey remained in commercial stocks. Another 86 million pounds of honey were pledged as price support loan collateral under the honey program for the 1985 crop year. These figures may fluctuate due to domestic disappearance which, for the 1979 to 1981 crop years, averaged 247 million pounds per year. Disappearance, beginning with the 1981 crop year has been rising due to the added disposition of CCC inventories through noncommercial outlets.

The U.S. market price for honey in 1985 declined from, 49.5 cents per pound in 1984 to an estimated 45.5 cents per pound on a bulk, extracted, wholesale, unprocessed basis. The level of price support for the 1985 crop of honey was established at 60 percent of parity or 65.3 cents per pound. Thus, average market prices have lagged well behind the levels of price support, which have increased steadily to over 65 cents per pound in 1985.

Section 201(b) of the Agricultural Act of 1949 (the "1949 Act"), as amended by section 1041 of the Food Security Act of 1985, provides that the Secretary of Agriculture shall make available through loans, purchases, or other operations, price support to producers of 1986-crop honey at 64 cents per pound.

In accordance with section 403 of the 1949 Act, it is proposed that the loan rate for the 1986 crop of honey be adjusted to reflect floral source, color, class and grade, and other market differentials which are applicable to the marketing of honey.

Under the provisions of section 201(b) of the 1949 Act the Secretary may permit producers who have obtained price support loans with respect to the 1986-1990 crops of honey to repay such loans at a level that is the lesser of:

(a) The loan level determined for such crop; or

(b) Such level that the Secretary determines will:

(1) Minimize the number of loan forfeitures;

(2) Not result in excessive total stocks of honey;

(3) Reduce the costs incurred by the Federal Government in storing honey; and

(4) Maintain the competitiveness of honey in domestic and export markets.

Accordingly, the following determinations are proposed with respect to the 1986-crop:

Proposed Determinations

The 1986 program will be a price support loan program with a loan rate of 64 cents per pound as required by statute.

The 1986-crop honey loan rate will be adjusted to reflect floral source, color, class and grade, and other market

VOL
51
ISS
44
MR
6
1986
UMI

differentials under which honey is marketed.

Producers with price support loans for the 1986-crop honey will be permittted to repay such loans at the lesser of the loan level for such crop or at a level which the Secretary determines will minimize the number of loan forfeitures, not result in excessive total stocks of honey, reduce the costs incurred by the Federal Government in storing honey, and maintain the competitiveness of honey in domestic and export markets. At this present time, it is contemplated that a repayment level may be established in a range of 20 to 40 cents a pound, which roughly reflects the wide range of potential landed import prices for honey. A repayment level in this range would result in direct competition with imported honey whereby commercial sales of domestically produced honey would increase and total stocks of domestically produced honey would decrease. This increased competition would minimize the number of loan forfeitures and thus reduce the costs incurred by the Federal Government in storing honey. Repayment within this range would not only make domestically produced honey more competitive with foreign honey in domestic markets but would increase its competitiveness in foreign markets as well.

Consideration will be given to all views and recommendations that are received relating to the above determinations.

All comments will be available for public inspection in room 3741 of USDA's South Building during business hours (8:00 a.m. to 4:30 p.m.).

Signed at Washington, DC on: March 4, 1986.

Milton J. Hertz,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Forest Service

Mount St. Helens Scientific Advisory Board Meeting

The Mount St. Helens Scientific Advisory Board will meet at 9 a.m., April 15, 1986, at the Forest Supervisors Office, Gifford Pinchot National Forest, 500 West 12th Street, Vancouver, Washington 98660, to receive information on and discuss the following:

1. The final Comprehensive Management Plan.
2. Research access to Spirit Lake Basin.
3. Status of Monument Scientist position.
4. The National Volcanic Monument Science Panel.
5. Promoting research needs in the NVM.
6. Status of outlets at Coldwater and Castle Lakes.
7. Summer meeting and field trip.
8. Open discussion of topics of interest to the Advisory Board.

The meeting will be open to the public. Persons who wish to make a statement to the Board should notify Dr. Jack K. Winjum, Chairperson, c/o Gifford Pinchot National Forest, 500 West 12th Street, Vancouver, Washington 98660, 206-696-7570. Written statements may be filed with the Board before or after the meeting.

Dated: February 27, 1986.

James C. Space,

Acting Regional Forester.

BILLING CODE 3410-11-M

Soil Conservation Service

Bush River-Beaverdam Creek Watershed, South Carolina

AGENCY: Soil Conservation Service; USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR Part 1500), and the Soil Conservation Service Guidelines (7 CFR Part 650), the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Bush River-Beaverdam Creek Watershed, Newberry and Laurens Counties, South Carolina.

FOR FURTHER INFORMATION CONTACT: Mr. Billy Abercrombie, State Conservationist, Soil Conservation Service, 1835 Assembly Street, Room 950, Columbia, South Carolina 29201, telephone (803) 765-5681.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Billy Abercombie, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for erosion control on 7,410 acres of cropland in Newberry and Laurens Counties. The work will be accomplished through conservation plans and long-term contracts involving about 70 farms. The soil and water conservation districts will provide leadership for installing the project.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Billy Abercrombie.

No administrative action on implementation of the proposal will be taken until 30 days after date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials)

Dated: February 25, 1986.

Byron Thompson,

Asst. State Conservationist.

BILLING CODE 3410-16-M

Perry County Roadbanks Critical Area Treatment RC&D Measure, Ohio

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Perry County Roadbanks Critical Area Treatment RC&D Measure, Perry County, Ohio.

FOR FURTHER INFORMATION CONTACT: Harry W. Oneth, State Conservationist, Soil Conservation Service, Federal Building, 200 North High Street, Room 522, Columbus, Ohio 43215, telephone (614)-469-6962.

SUPPLEMENTARY INFORMATION: The environmental assessment of this

federally assisted action indicates that the projects will not cause significant local, regional, or national impact on the environment. As a result of these findings, Harry W. Oneth, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

This measure concerns a plan for the critical area treatment of 30 acres of bare and eroding banks, 2,000 feet of a severely eroding roadside ditch, and stabilization of one roadway slip. Planned works of improvement include seeding and mulching the bare and eroding areas, installation of design drains for surplus runoff, installation of a grade stabilization structure, installation of subsurface drains, and the rebuilding of the landslip areas.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Harry W. Oneth.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development Program—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials)

BILLING CODE 3410-16-M

Scioto County Road 32 Critical Area Treatment RC&D Measure, Ohio

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Scioto County Road 32 Critical Area Treatment RC&D Measure, Scioto County, Ohio.

FOR FURTHER INFORMATION CONTACT: Harry W. Oneth, State Conservationist, Soil Conservation Service, Federal Building, 200 North High Street, Room 522, Columbus, Ohio 43215, telephone: (614)-469-6962.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the projects will not cause significant local, regional, or national impact on the environment. As a result of these findings, Harry W. Oneth, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

This measure concerns a plan for the critical area treatment of landslips along Scioto County Road 32, also known as Bear Creek Rarden Road. Planned works of improvement include the installation of approximately 400 feet of subsurface drains to intercept seepage in the slip area and the installation of a road ditch to divert surface water away from the slip area. The slip area will be regraded and seeded.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Harry W. Oneth.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication.

BILLING CODE 3410-16-M

Springfield Township Road 22-50 Critical Area Treatment RC&D Measure, Ohio

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Springfield Township Road 22-50 Critical Area Treatment RC&D Measure, Williams County, Ohio.

FOR FURTHER INFORMATION CONTACT: Harry W. Oneth, State Conservationist, Soil Conservation Service, Federal Building, 200 North High Street, Room 522, Columbus, Ohio 43215, telephone: (614)-469-6962.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the projects will not cause significant local, regional, or national impact on the environment. As a result of these findings, Harry W. Oneth, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

This measure concerns a plan for the critical area treatment of a roadside slip approximately 400 feet long. The slip created a traffic safety hazard and erosion problem. Planned works of improvement include a 400 foot diversion to divert surface runoff away from the slip area and the installation of a subsurface drain to intercept seepage. After construction the area will be graded and seeded.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Harry W. Oneth.

BILLING CODE 3410-16-M

Tycoon Wildlife Area Public Water-Based Fish and Wildlife RC&D Measure, Ohio

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Tycoon Wildlife Area Public Water-Based Fish and Wildlife RC&D Measure, Gallia County, Ohio.

FOR FURTHER INFORMATION CONTACT: Harry W. Oneth, State Conservationist, Soil Conservation Service, Federal Building, 200 North High Street, Room 522, Columbus, Ohio 43215, telephone: (614)-469-6962.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the projects will not cause significant local, regional, or national impact on the environment. As a result of these findings, Harry W. Oneth, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

This measure concerns a plan for the restoration and improvement of the public water-based fish and wildlife habitat on 10 acres of land owned and operated by the Division of Wildlife, Ohio Department of Natural Resources. It will restore a washed out dike and wetland area. Planned works of improvement include the installation of a dike and water control structure to manage the water level behind the dike for the benefit of the wildlife.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basis data developed during the environmental assessment are on file and may be reviewed by contacting Harry W. Oneth.

BILLING CODE 3410-16-M

Tucson Plant Materials Center Land Exchange, AZ; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Tucson Plant Materials Center Land Exchange, Pima County, Arizona.

FOR FURTHER INFORMATION CONTACT: Verne M. Bathurst, State Conservationist, USDA Soil Conservation Service, 201 East Indianola, Suite 200, Phoenix, Arizona 85012, Telephone (602) 241-2247.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federal action indicates that the exchange will not cause significant local, regional or national impacts on the environment. As a result of these findings, Verne Bathurst, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this land exchange.

Tucson Plant Materials Center Land Exchange, AZ

Notice of a Finding of No Significant Impact

This activity concerns exchanging 27.77 acres (more or less) of agricultural land (surrounded by urban area) for 80 acres (more or less) in a rural agricultural area. The Government property will be transferred by quit claim deed. The property to be accepted by the Soil Conservation Service will be utilized as a new Plant Materials Center. This exchange was prompted by Section 4 of Executive Order 12348 as implemented by Subpart 101-47.8 of the Federal Property Management Regulations (FPMR). Based on the highest and best use analysis and land cost comparisons, the entire Tucson PMC property is not being put to

VOL
51
ISS
44
MR
6
1986
UMI

optimum use. The appraised value of the Tucson PMC is $98,127.00 per acre. Comparably improved, ready-to-farm agricultural land, outside of the urban sprawl, is available for $3,000.00 per acre.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available at the above address to fill single copy requests. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Verne Bathurst.

No administrative action on implementation of this land exchange will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901–Resource Conservation and Development, and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials)

Dated: February 27, 1986.

DEPARTMENT OF COMMERCE

International Trade Administration

Importers and Retailers' Textile Advisory Committee; Partially Closed Meeting

A meeting of the Importers and Retailers' Textile Advisory Committee will be held on April 8, 1986 at 10:30 a.m., Herbert C. Hoover Building, Room 6802, 14th Street and Constitution Avenue, NW., Washington, DC 20230. (The Committee was established by the Secretary of Commerce on August 13, 1963 to advise Department officials of the effects on import markets of cotton, wool, and man-made fiber textile and apparel agreements.)

General Session: 10:30 a.m. Review of import trends, international activities, report on conditions in the market, and other business.

Executive Session: 11:00 a.m. Discussion of matters properly classified under Executive Order 12356 (3 CFR Part (1982) and listed in 5 U.S.C. 552b(c) (1) and (9).

The general session will be open to the public with the limited number of seats available. A Notice of Determination to close meetings or portions of meetings to the public on the basis of 5 U.S.C. 553b (c)(1) and (c)(9) has been approved in accordance with the Federal Advisory Committee Act. A copy of the notice is available for public inspection and copying in the Central Facility Room 6628, U.S. Department of Commerce, (202) 377–3031.

For further information or copies of the minutes contact Helen L. LeGrande (202) 377–3737.

Dated: March 3, 1986.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Management-Labor Textile Advisory Committee; Partially Closed Meeting

A meeting of the Management-Labor Textile Advisory Committee will be held March 27, 1986 at 1:00 p.m., Herbert C. Hoover Building, Room 4830, 14th Street and Constitution Avenue, NW., Washington, DC. 20230. (The Committee was established by the Secretary of Commerce on October 18, 1961 to advise Department officials on problems and conditions in the textile and apparel industry.)

General Session: 1:00 a.m. Review of import trends, implementation of textile agreements, report on conditions in the domestic market, and other business.

Executive Session: 1:30 p.m. Discussion of matters properly classified under Executive Order 12356 (3 CFR Part (1982) and listed in 5 U.S.C. 552b(c) (1) and (9).

The general session will be open to the public with the limited number of seats available. A Notice of Determination to close meetings or portions of meetings to the public on the basis of 5 U.S.C. 553b (c)(1) and (c)(9) has been approved in accordance with the Federal Advisory Committee Act. A copy of the notice is available for public inspection and copying in the Central Facility Room 6628, U.S. Department of Commerce, (202) 377–3031.

For further information or copies of the minutes contact Helen L. LeGrande (202) 377–3737.

Dated: March 3, 1986.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

Applications for Duty-Free Entry of Scientific Instruments; Sam Houston State University et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No. 86–111. Applicant: Sam Houston State University, Huntsville, TX 77341. Instrument: Spectrophotometer, Model DA3.25 with Accessories. Manufacturer: Bomen Inc., Canada. Intended use: The instrument will be used to investigate the optical and electrical properties of semi-insulating gallium arsenide (GaAs), neutron transmutation doped (NTD) GaAs, high purity silicon and NTD silicon using infrared absorption spectroscopy, photothermal ionization spectroscopy and electron paramagnetic resonance techniques. Application received by Commissioner of Customs: February 4, 1986.

Docket No. 86–114. Applicant: Ohio State University, Research Foundation, 1314 Kinnear Road, Columbus, OH 43210. Instrument: Electron Microscope, Model EM 10CA. Manufacturer: Carl Zeiss, West Germany, Intended use: The instrument will be used for the following research interests:

(1) Ultrastructural studies of green algae.

(2) Studies of the mechanism of double fertilization in angiosperms.

(3) Structure-function relationships in stomata and in higher plant graviperception.

(4) Ultrastructural studies of fossil plants.

In addition, the instrument will be used to teach electron microscopy techniques to graduate and advanced undergraduate students. Application received by Commissioner of Customs: February 4, 1986.

Docket No. 86–116. Applicant: State University of New York, Stonybrook, NY 11794. Instrument: Electron Microscope, Model CM 12 with

Accessories. Manufacturer: N.V. Philips, The Netherlands. Intended use: The instrument is intended to be used for the study of metallic and ceramic materials and light metal hydrides. Particular emphasis will be on hcp metals, refractory metals and binary alloys. Experiments will consist of microscopic imaging and diffraction studies and *in situ* straining. In addition, the instrument will be used for teaching the following courses:

(1) ESM 302 Techniques in Materials Science

(2) ESM 605 Diffraction Techniques

(3) ESM 607 Imperfections in Crystals

(4) ESM 696 Problems in Materials Science

(5) ESM 599 and 699 Research in Materials Science. Application received by Commissioner of Customs: February 10, 1986.

Docket No. 86–117. Applicant: Medical College of Ohio, 3000 Arlington Avenue, C.S. 10008, Toledo, OH 43699. Instrument: Electron Microscope, Model CM 10 with Accessories. Manfuacturer: N.V. Philips, The Netherlands. Intended use: The instrument will be used for analysis of a wide range of vertebrate tissues involving both developing and mature forms. The primary biological tissues for study will be embryonic avian and mammalian heart, dog kidney, human bronchus and rodent pituitary gland, blood vessels and brain. Invertebrate studies will include the yeasts. The overall objectives of the experiments to be conducted are:

(1) A comparison of development in normal and experimental hearts;

(2) effects of renal necrosis induced by pharmacological agents;

(3) mechanics of bronchial and lung carcinogenesis;

(4) a description of alterations induced in the kidneys and blood vessels of hypertensive rats and

(5) the effect of mycococcal predation on cyanobacteria in planktonic communities. Application received by Commissioner of Customs: February 4, 1986.

Docket No. 86–121. Applicant: State University of New York, College of Optometry, 100 East 24th Street, New York, NY 10010. Instrument: CRT Display Unit and GRSYS-2 Microprocessor Grating Generator with Interface Hardware. Manufacturer: Joyce Electronics, Ltd., United Kingdom Intended use: The instrument will be used to study the human accommodation system (focussing mechanism of the eye). Experiments will be conducted with the hope of developing a better understanding of the stimuli that control the focus of the eye. Application received by Commissioner of Customs: February 7, 1986.

Docket No. 86–122. Applicant: Harvard University, Purchasing Department, 1350 Massachusetts Avenue, Cambridge, MA 02138. Instrument: Microscope Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use: Studies of the neuroanatomy of the mammalian brain to gain insights of the basic structure and function of the brain, in particular Alzheimer's disease and epilepsy. The instrument will also be used for training undergraduate, graduate and postdoctoral students. Application received by Commissioner of Customs: February 7, 1986.

Docket No. 86–124. Applicant: NOAA, National Marine Fisheries Service, 3209 Frederick Street, Pascagoula, MS 39567 Instrument: Towed Underwater Submerisble System. Manufacturer: Sea-I Research Ltd., Canada. Intended use: The instrument is intended to be used in a project initiated to delineate the latent resource stocks in the Gulf of Mexico. This project will involve investigation of the potential of large mesh midwater trawls and high opening botton trawls as sampling and harvesting gear for coastal pelagics in offshore waters. The two major problems which must be addressed to effectively evaluate the gear potential are: (1) identification of acoustic signals from the research vessel's fish-finding sonar and acoustic color sounders and (2) determination of the fishing configuration of the gear and the behavior of fish in response to the gear so gear can be modified to efficiently sample and harvest the fish. Application received by Commissioner of Customs: February 10, 1986.

Docket No. 84–35R. Applicant: Stanford University, Department of Radiology, Stanford, CA 94305. Instrument: Radiotherapy Treatment Planning Simulator. Manufacturer: Varian, United Kindgom. Original notice of this rsubmitted application was published in the **Federal Register** of January 13, 1984.

BILLING CODE 3510–DS–M

National Oceanic and Atmospheric Administration

Determination of Commercial Fishery Failure Due to a Resource Disaster Under the Authority of the Commercial Fisheries Research and Development Act of 1964

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

SUMMARY: The coastal waters of Alabama and Florida support many individuals and firms that are engaged in the harvesting, processing, distribution, and marketing of oysters to meet consumer needs. These oyster resources make an important contribution to the economy and economic wellbeing of these States. As a result of Hurricane Elena on September 1, 1985, Florida officials estimated that the annualized loss of production is $31.4 million in that State alone. Alabama officials likewise estimated that the oyster loss in that State from Hurricane Elena is over $48 million.

The extreme tidal activity, hurricane force winds, and heavy rainfall that occurred from Hurricane Elena killed approximately 70 percent of the oysters in Mobile Bay, Alabama, and approximately 80 percent of those in Apalachicola Bay, Florida. These two areas combined totalled 1,634 productive acres of oyster reefs. Natural rehabilitation and subsequent production of these areas would take many years due to heavy siltation and fouling of cultch material.

Past experiences and practices have shown that damaged oyster resources can be effectively and economically restored through planting of cultch materials.

Therefore, as the authorized representative of the Secretary of Commerce, I hereby determine that the damage caused by Hurricane Elena to the oyster resources of the States of Alabama and Florida constitutes a commercial fishery failure due to a resource disaster raising from natural causes within the meaning of subsection 779b of the Commercial Fisheries Research and Development Act of 1964, as amended (Pub. L. 88–309, subsection 4(b)). I hereby authorize the use of funds appropriated by Pub. L. 99–180 for the purposes of subsection 4(b) of Pub. L. 88–309, to restore and return to production the damaged oyster resources of the coastal areas of Alabama and Florida.

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Draft Environmental Impact Statement; Buffalo Bayou and Tributaries, Texas; Comprehensive Flood Damage Prevention Study

AGENCY: U.S. Army Corps of Engineers, DOD, Galveston District.

ACTION: Notice of Intent to Prepare a DEIS.

SUMMARY: 1. The proposed action to be addressed in the DEIS consists of a comprehensive plan for urban and suburban flood damage prevention throughout the Buffalo Bayou watershed in the Houston metropolitan area, Harris, and parts of Fort Bend and Waller Counties, Texas. The study area includes Buffalo Bayou Main Stem, major tributary drainage basins including Carpenters, Greens, Halls, Hunting, Brays and lower White Oak Bayous and several tributary basins about Addicks and Barker Flood Detention reservoirs. The proposed plan would provide for flood protection in the Houston area now subject to periodic stream flooding.

2. Alternatives to be considered in the DEIS for Buffalo Bayou and its several major tributaries include no action, various levels of channel modification and enlargement with and without erosion control measures, regional flood water retention facilities, diversion channels, and various combinations. Other plans to be investigated during the study include consideration of water supply storage feasibility as Addicks and Barker Reservoirs and recreational development on lands associated with proposed flood control improvements.

3. Coordination. a. The comprehensive study has been coordinated with Harris County Flood Control District, the local sponsor, and other local interests to assure that plans being considered are consistent with those planned by local government. The U.S. Fish and Wildlife Service has provided planning aid documents for study area drainage basins. Public meetings have been held in 1971, 1974, 1975 and 1982 in conjunction with interim studies on upper White Oak Bayou and Sims Bayou tributary basins; however, no public meetings have been held for the comprehensive study in recent years. A public meeting to present water resource problems in the watershed and results of formulation stage planning study is scheduled to be held in Houston, Texas in late 1986. Proposed plans for improvements on various bayous in the drainage basin are being developed in accordance with Corps of Engineers regulations considering the views expressed by the public and agencies of local, State and Federal governments.

b. Environmental considerations to be analyzed as a result of past coordination and participation include: (1) Limiting removal of vegetation on one or both sides of the bayous in proposed channel right-of-way areas to minimize disturbance of wildlife habitat and aesthetics, (2) minimizing impacts to populations of aquatic organisms in bayous from flood control improvements, (3) preserving or maintaining existing wetlands along bayous, (4) disposal of excavated material in areas where environmental damages would be minimal, (5) preserving and enhancing species of recognized importance that may occur in the area, (6) investigating environmentally oriented erosion control measures to control scouring of stream banks, and (7) considering development of recreational opportunities on project lands in recognition of documented metropolitan Houston parkland deficiences.

c. Further coordination and consultation will be continued with appropriate local, State and Federal agencies and interested organizations and individuals.

d. Environmental consultation and review of the project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, Council on Environmental Quality regulations (40 CFR Parts 1500-1508), and all other applicable laws, regulations and guidelines.

4. All previous and future input to studies for the feasibility study will be considered in the scoping process. A public meeting specifically to determine the scope of the DEIS will not be held.

5. The DEIS is scheduled to be available to the public in late 1986.

ADDRESS: Questions about the ongoing study and DEIS can be answered by Mr. C.R. Harbaugh, Chief, Environmental Resources Branch, Galveston District, Corps of Engineers, P.O. Box 1229, Galveston, Texas 77553–1229, (409) 766–3044.

Dated: February 26, 1986.

Gordon M. Clarke,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 86–4892 Filed 3–5–86; 8:45 am]

BILLING CODE 3710-92-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Consent Order; Texas Pacific Oil Company, Inc.

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Final action on proposed consent order.

SUMMARY: The Economic Regulatory Administration (ERA) has determined that a proposed Consent Order between the Department of Energy (DOE) and Texas Pacific Oil Company, Inc. (Texas Pacific) shall be made a final order of the DOE. The Consent Order resolves issues of compliance by Texas Pacific with the federal petroleum price and allocation regulations concerning the production and sale of crude oil for the period August 19, 1973 through Janaury 28, 1981. Texas Pacific will pay to DOE the sum of $1,300,000 within thirty (30) days of notification from DOE that the Consent Order has been adopted as a final order by the agency, and DOE will deposit these funds in a suitable account for appropriate disposition. The decision to make the Texas Pacific Consent Order final was made after a review of all written comments received.

FOR FURTHER INFORMATION CONTACT: Alan R. Fedman, Office of the Solicitor (RG–43), Economic Regulatory Administration, 1000 Independence Avenue SW., Washington, DC. 20585, (202) 252–2856.

SUPPLEMENTARY INFORMATION:

I. Introduction

II. Comments Received

III. Decision

I. Introduction

ERA previously issued a notice announcing a proposed consent order between DOE and Texas Pacific which would resolve matters relating to compliance by the firm with the federal petroleum price and allocation regulations for the period August 19, 1973 through January 28, 1981. (51 FR 426, January 6, 1986). The proposed consent order required Texas Pacific to pay $1,300,000 within thirty (30) days of the effective date of the Consent Order. The notice solicited written comments from the public relating to the terms and conditions of the settlement.

II. Comments Received

ERA received three comments, which addressed the question of the ultimate disposition of the funds to be paid by Texas Pacific pursuant to the settlement, but which did not question the basis of the settlement or the adequacy of the settlement amount. These comments were submitted by the Controller of the State of California, the Director of the Governor's Energy Office for the State of Florida and by the Attorneys General of the States of Arkansas, Delaware, Iowa, Louisiana, North Dakota, Rhode Island and West Virginia. These comments, although formulated differently and differing in the nature and amount of supporting analysis, are devoted exclusively to establishing the proposition that monies received under the Texas Pacific Consent Order that could not be paid to parties injured by alleged overcharges should be paid to State governments, and should not be deposited in the U.S. Treasury.

During the period covered by this Consent Order the violations allegedly committed by Texas Pacific related to the miscertification of crude oil. Such violations resulted in cost increases that were distributed among all refiners by the entitlements programs, and the refiners could then pass the overcharges on to others. *See United States* v. *Exxon Corp.*, ——F.2d ——, Slip op. at 110–112 (TECA, July 1, 1985) (Nos. 91 *et seq.*).

The DOE's Office of Hearings and Appeals in a report to the District Court for the District of Kansas in *In re: the Department of Energy Stripper Well Litigation*, MDL No. 378, determined that where alleged crude oil violations involve such crude oil miscertification, the resulting harm cannot be traced to specific customers. As explained by the DOE in an accompanying Statement of Restitutionary Policy:

> Essentially, OHA concluded that direct purchasers (as such) generally did not absorb the overcharges because they were reimbursed by the entitlements programs. [sic] Tracing of overcharges is impossible in view of the spreading effect of the entitlements program, the fungibility of refiner costs and the consequent inability of firms and OHA to determine which costs were passed through and which, if any, were retained, and the high proportion of cost passthrough, among other factors.
>
> OHA's finding that it is impossible to trace crude oil cost increases that were equalized by the entitlements program, . . . is consistent with the conclusions of the two district courts that have previously determined that the harm resulting from crude oil miscertifications cannot be traced. 50 FR 27400 (July 2, 1985).

DOE then examined the possible use of econometric modeling methods to estimate the extent to which overcharges were passed through at the various distribution levels within the industry. With regard to this indirect methodology, DOE concluded:

> It is too inexact in determining injury to particular classes of claimants and yields no conclusions concerning the injury to individuals within any class. The governmental costs in resources and, more importantly, societal costs in years of continued litigation prior to distribution are unacceptably high. *Id.* at 27402.

The comments on the Texas Pacific Consent Order appear to assume that DOE will distribute, or attempt to distribute, funds received under the Consent Order to parties injured by the firm's alleged overcharges. However, as discussed above, it is impossible to determine which persons were ultimately injured by crude oil miscertifications. Therefore, DOE will not attempt to make such a determination here, and the funds received from Texas Pacific pursuant to the Consent Order will not be the subject of a Subpart V petition and proceeding.

DOE's Statement of Policy also addressed the question of how to effect indirect restitution where refunds to individual injured claimants are not feasible. The policy statement provides that the ERA will retain the monies received in an escrow account for a reasonable time to allow Congress an opportunity to determine an appropriate disposition of the funds. If Congress does not enact legislation within a reasonable time, the DOE will transfer the funds to the general fund of the U.S. Treasury.

Because the terms of the settlement are consistent with the foregoing action, ERA has determined to make the Consent Order final.

III. Decision

Pursuant to 10 CFR 205.199J, the Consent Order between Texas Pacific and DOE shall become a final order of the DOE. Today DOE has issued notice to Texas Pacific of the agency's decision to make the Consent Order final, and the Consent Order shall become final upon delivery of that notice.

Issued in Washington, DC, on February 27, 1986.

Milton C. Lorenz,

Special Counsel, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. 86-06-NG]

Natural Gas Imports; Tennessee Gas Pipeline Co., a Division of Tenneco Inc.; Authorization To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of application for authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on January 15, 1986, of the application of Tennessee Gas Pipeline Company (Tennessee) for (1) extension of its authorization to import up to 75,000 Mcf of Canadian natural gas per day through October 31, 2000, to be purchased from ProGas Limited (ProGas) at the international border near Emerson, Manitoba; (2) approval of new pricing provisions establishing a two-part rate, a ratable take provision, and reducing Tennessee's take-or-pay obligation; and (3) authorization to import gas for the account of third parties.

The application was filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than April 7, 1986.

FOR FURTHER INFORMATION CONTACT:

Chuck Boehl, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6050

Michael T. Skinker, Natural Gas and Mineral Leasing, Office of General

VOL 51 ISS 44 MR 6 1986 UMI

Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6667

SUPPLEMENTARY INFORMATION: On April 24, 1981, DOE/ERA Opinion and Order No. 32 authorized Tennessee to import up to 75,000 Mcf per day from ProGas through October 31, 1987 (ERA Docket No. 79–15–NG). On April 16, 1984, Tennessee notified the ERA that it intended to seek an amendment to its ProGas contract to bring it into conformity with the policy guidelines issued by the DOE (49 FR 6684, February 22, 1984). Since that time it has reached agreement with ProGas on three amendments to their contract. The application describes the progressive amendments made to the contract to achieve the new contract for which Tennessee is requesting approval.

On November 1, 1984, according to Tennessee, the first amendment established an initial monthly demand charge of $15.21 (U.S.) per Mcf of daily contract quantity and a commodity charge of $2.68 (U.S.) per MMBtu, providing a 100 percent load factor price of $3.18 per MMBtu in substitution for the prior $4.94 per MMBtu border price. The minimum take-or-pay level was reduced from 75 percent to 60 and make-up provisions more favorable to Tennessee were provided. The amendment also provided for semi-annual pricing adjustments through semi-annual application of an index factor developed from the composite U.S. refiner acquisition cost of crude oil as published in the DOE Energy Information Administration's *Monthly Energy Review* for the relevant period. Through this adjustment procedure, the commodity charge was reduced on July 1, 1985, to $2.55 (U.S.) per MMBtu. In addition, the November 1, 1984, amendment provided opportunity for renegotiation of the pricing provisions.

A November 20, 1985, amendment made in response to declining natural gas prices, according to Tennessee, provided for the purchase of gas from November 20, 1985, until February 1, 1986, at a commodity rate of $2.00 (U.S.) per MMBtu. Tennessee was to purchase this gas from the date of approval by the Canadian National Energy Board (NEB)—November 19, 1985—at an annual daily volume of not less than 37,500 Mcf, or 50 percent of the daily contract volume authorized.

On November 25, 1985, Tennessee and ProGas reached another agreement as a result of their renegotiation. This agreement represents a new contract, supersedes all prior agreements, and is the arrangement for which Tennessee is requesting approval by this application. According to Tennessee, the new contract continues many of the elements of the original May 17, 1979, agreement although the pricing provisions were renegotiated.

According to Tennessee the new contract includes the two-part demand/commodity charge mentioned above. The monthly demand charge remains $15.21 per Mcf of daily contract quantity. This demand charge can be adjusted up or down to reflect transportation cost changes, but to the extent this is done, the commodity charge is decreased or increased to reflect the change. The commodity charge has been lowered to $2.00 (U.S.) per MMBtu and the contract terms provide for quarterly adjustment tied to changes in the average daily prices of No. 6 fuel oil and No. 2 heating oil, per spot cargoes, New York harbor. At full contract quantity, this results in the price on the date of application of $2.50 per Mcf. The price mechanism for the commodity charge can be renegotiated yearly and disputes are subject to binding arbitration.

In addition, Tennessee states that the contract provides that ProGas, from time to time, may offer certain volumes of the contract gas as "special purchase gas" for sale at a special commodity charge less than the commodity charge otherwise in effect under the agreement. Tennessee claims this portion of the agreement provides a mechanism for adjustment of prices to meet changing market conditions even more expeditiously than as provided by the quarterly adjustment provisions. The contract allows Tennessee to assign its rights and obligations with respect to the purchase, receipt and payment for any or all of this special purchase gas to third parties through spot sales. Sale of this special purchase gas would also serve to fulfill Tennessee's take-or-pay obligation of 60 percent under the new contract. There is also a ratable take provision based on all of Tennessee's long-term purchase if purchases from ProGas fall to 75 percent during the contract year. Tennessee requests authorization to import gas for the account of third parties, through October 31, 2000, the time period of the extension.

Tennessee's application also asks for an extension of the authorization to import gas after October 31, 1987, as presently authorized in DOE/ERA Opinion and Order No. 32. According to Tennessee, by the terms of its May 17, 1979, contract with ProGas, the initial daily contract quantity of 75,000 Mcf was to be in effect until October 31, 1979. However, because of waivers of certain rights by TransCanada Pipelines Limited (TransCanada), the 75,000 Mcf per day is now available to Tennessee through October 31, 1986. The November 25, 1985, agreement provides for annual stepdowns after October 31, 1986, of 20 percent in the daily contract quantity. These stepdowns will only occur, however, if TransCanada timely exercises its option to purchase certain quantities of gas from ProGas. If TransCanada waives its rights, the contract is ever-greened to provide for the sale of gas by ProGas to Tennessee until October 31, 2000. In the expectation that TransCanada will continue to waive its purchase rights, Tennessee requests that its authorization be amended to allow the import of up to 75,000 Mcf per day through October 31, 2000.

In support of its application, Tennessee asserts that the price adjustment and renegotiated provisions ensure that the price of gas under the contract will be responsive to the marketplace, and that all its contractual changes are consistent with the DOE's policy guidelines. Tennessee requests that the ERA find, pursuant to section 3 of the Natural Gas Act, that the import of natural gas under the terms of the new contract between Tennessee and ProGas, insofar as the agreement affects the prices to be paid and including the use of a two-part, demand-commodity pricing structure, with gas costs passed through on that basis, complies with the policy guidelines and is not inconsistent with the public interest.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of the import arrangement in the markets served in the primary consideration in determining whether it is in the public interest. Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant has asserted that the import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to this proceeding and to have written comments considered as a basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable.

The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076–A, RG–23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. They must be filed no later than 4:30 p.m., April 7, 1986.

The Administrator intends to develop a decisional record on the application through responses to the notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request for a oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision on the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based upon the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Tennessee's application is available for inspection and copying in the Natural Gas Division Docket Room, GA–076–A, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, February 24, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Issuance of Proposed Decision and Order; Period of February 10 Through February 21, 1986

During the period of February 10 through February 21, 1986, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

Dated: February 26, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Beard Oil and Supply Co., Mt. Pleasant, Michigan, KEE–0017.

Beard Oil and Supply Company filed an Application for Exception from the requirement that it file Form EIA–782B, the Resellers/Retailers' Monthly Petroleum Product Sales Report. The exception request, if granted, would permit Beard to be excused from the requirement that it file Form EIA–782B on a monthly basis. On February 18, 1986, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

[FR Doc. 86–4879 Filed 3–5–86; 8:45 am]

BILLING CODE 6450-01-M

Objection to Proposed Remedial Order; Period of February 3 Through February 21, 1986

During the period of February 3 through February 21, 1986, the notice of objection to proposed remedial order listed in the Appendix to this Notice was filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial order described in the Appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in this proceeding should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: February 26, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

O.K. Oil & Gas, Inc., Enid, Oklahoma, KRO–0240 crude oil

On February 18, 1986, O.K. Oil and Gas, Inc. (O.K.) and Jack D. Pointer, Jr. (Pointer), 800 S I–35, Suite 106, Oklahoma City, Oklahoma 73149, filed a Notice of Objection to a Proposed Remedial Order which the DOE Economic Regulatory Administration (ERA) issued to the firm on January 17, 1986. In the PRO, the ERA found that during the period June 1979 through December 1980, O.K. and Pointer charged prices in excess of ceiling prices in first sales of domestically produced crude oil in violation of 10 CFR § 212.79. According to the PRO the violation resulted in $261,495.64 of overcharges.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-758-DR]

California; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This a notice of the Presidential declaration of a major disaster for the State of California (FEMA-758-DR), dated February 21, 1986, and related determinations.

DATE: February 21, 1986.

FOR FURTHER INFORMATION CONTACT: Sewall H.E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3616.

Notice

Notice is hereby given that, in a letter of February 21, 1986, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288), as follows:

> I have determined that the damage in certain areas of the State of California resulting from severe storms, landslides, mudslides, and flooding, beginning on or about February 12, 1986, is of sufficient severity and magnitude to warrant a major-disaster declaration under Pub. L. 93-288. I therefore declare that such a major disaster exists in the State of California.
>
> In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.
>
> You are authorized to provide Individual Assistance in the affected areas. You also are authorized to provide Public Assistance in the affected areas, if necessary and requested, once an acceptable State commitment has been provided. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Pub. L. 93-288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated area.
>
> Pursuant to section 408(b) of Pub. L. 93-288, you are authorized to advance to the State its 25 percent share of the Individual and Family Grant program, to be repaid to the United States by the State when it is able to do so.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that, pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Mr. Tommie C. Hamner of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of California to have been affected adversely by this declared major disaster and are designated eligible as follows:

Lake, Marin, Napa, Sacramento, Santa Clara, Santa Cruz, Solano, Sonoma, and Yuba Counties for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Nevada; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Nevada (FEMA-759-DR), dated February 28, 1986, and related determinations.

DATED: February 28, 1986.

FOR FURTHER INFORMATION CONTACT: Sewall H.E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3616.

Notice

Notice is hereby given that, in a letter of February 28, 1986, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288), as follows:

> I have determined that the damage in certain areas of the State of Nevada resulting from severe storms and flooding, beginning on or about February 15, 1986, is of sufficient severity and magnitude to warrant a major-disaster declaration under Pub. L. 93-288. I therefore declare that such a major disaster exists in the State of Nevada.
>
> In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Pub. L. 93-288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated area.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that, pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Ms. Joan F. Hodgins of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Nevada to have been affected adversely by this declared major disaster and are designated eligible as follows:

Douglas, Lyon, Storey, and Washoe Counties and Carson City eligible for Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

BILLING CODE 6718-02-M

FEDERAL RESERVE SYSTEM

The Bank of New York Co., Inc., et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 28, 1986.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President), 33 Liberty Street, New York, New York 10045:

1. *The Bank of New York Company, Inc.*, New York, New York; to engage *de novo* through its subsidiaries, Capital Trust Company, Albany, New York, and Eastern Trust Company, Albany, New York, in performing functions or activities that may be performed by a trust company, pursuant to § 225.25(b)(3) of Regulation Y. These activities are to be conducted in the State of New York.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President), 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Mahaska Investment Company*, Oskaloosa, Iowa; to engage *de novo* directly in providing data processing services, pursuant to § 225.25(b)(7) of Regulation Y. Comments on this application must be received not later than March 24, 1986.

C. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President), 400 South Akard Street, Dallas, Texas 75222:

1. *FWNB Bancshares, Inc.*, Carrollton, Texas; to engage *de novo* through its subsidiary, FWNB Mortgage Services, Carrollton, Texas, in making, acquiring, and/or servicing loans of the type made by a mortgage company for itself or for the account of others, pursuant to § 225.25(b)(1) of Regulation Y. Comments on this application must be received not later than March 25, 1986.

Board of Governors of the Federal Reserve System, February 28, 1986.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Community Bankers' Corp., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than March 27, 1986.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President), 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Community Bankers' Corporation*, Marion Center, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of Marion Center National Bank, Marion Center, Pennsylvania.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President), 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Advance BanCorp, Inc.*, Chicago, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of South Chicago Savings Bank, Chicago, Illinois. Comments on this application must be received not later than March 28, 1986.

2. *First Interstate Corporation of Wisconsin*, Milwaukee, Wisconsin; to acquire 100 percent of the voting shares of Outagamie Bank Shares, Inc., Appleton, Wisconsin, thereby indirectly acquiring The Outagamie Bank, Appleton, Wisconsin. Comments on this application must be received not later than March 26, 1986.

3. *Outagamie Bankcorp, Inc.*, Sheboygan, Wisconsin; a wholly-owned subsidiary of First Interstate Corporation, to become a bank holding company by acquiring 100 percent of the voting shares of 100 percent of the voting shares of Outagamie Bank Shares, Inc., Appleton, Wisconsin, thereby indirectly acquiring The Outagamie Bank, Appleton, Wisconsin. Comments on this application must be received not later than March 26, 1986.

4. *Lincoln Financial Corporation*, Fort Wayne, Indiana; to acquire 100 percent of the voting shares of Akron Financial, Inc., Akron, Indiana, thereby indirectly acquiring Akron Exchange State Bank, Akron, Indiana.

C. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *CNB Bancshares, Inc.*, Evansville, Indiana; has applied to acquire The Posey County National Bank, Mount Vernon, Indiana and Peoples First Bancorp of Madisonville, Inc., Madisonville, Kentucky and thereby indirectly acquire Peoples Bank & Trust Company of Madisonville, Madisonville, Kentucky.

In a related application, *CNB Acquisition Company*, Evansville, Indiana, a proposed wholly-owned subsidiary of CNB Bancshares, Inc., Evansville, Indiana, has applied to become a bank holding company by merger with Peoples First Bancorp of Madisonville, Inc., Madisonville, Kentucky and thereby acquiring indirect control of Peoples Bank & Trust Company of Madisonville, Madisonville, Kentucky.

2. *Mega Bancshares, Inc.*, St. Ann, Missouri; to acquire at least 99.98 percent of the voting shares of Mega Bank of St. Charles County, St. Charles County, Missouri, a *de novo* bank.

D. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President), 400 South Akard Street, Dallas, Texas 75222:

1. *T N Bancshares, Inc.*, El Paso, Texas; to acquire 96.12 percent of the voting shares of Coronado Bancshares, Inc., El Paso, Texas, thereby indirectly acquiring Coronado Bank, El Paso, Texas.

Board of Governors of the Federal Reserve System, February 28, 1986.

William W. Wiles,

Secretary of the Board.

Date: April 4, 1986

Time: 9:00 a.m. to 10:30 a.m.

Place: Room 213, Appalachian Laboratory for Occupational Safety and Health, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505

Purpose: To review the project entitled "Alveolar Type II Cells: Effects of Silica."

Additional information and copies of the research protocol may be obtained from: Jean Rabovsky, Ph.D., or Jane Ma, Ph.D., Division of Respiratory Disease Studies, NIOSH, CDC, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505, Telephones: FTS: 923-4591, Commercial: (304) 291-4591

Effects of Benzo(A)Pyrene in Association With Occupational Related Particulates on the Interferon System

Date: April 4, 1986

Time: 10:30 a.m.–12 noon

Place: Room 213, Appalachian Laboratory for Occupational Safety and Health, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505

Purpose: To review the project entitled "Effects of Benzo(a)pyrene in Association with Occupational Related Particulates on the Interferon System."

Additional information and copies of the research protocol may be obtained from: Nicholas Hahon, Division of Respiratory Disease Studies, NIOSH, CDC, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505, Telephones: FTS: 923-4516, Commercial: (304) 291-4516.

Agricultural—Immunologic Disease Studies

Date: April 4, 1986

Time: 2:00 p.m.–3:30 p.m.

Place: Room 213, Appalachian Laboratory for Occupational Safety and Health, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505

BILLING CODE 4160–19–M

Grants and Cooperative Agreements: State Smoking Cessation During Pregnancy Demonstration and Research Project

The Centers for Disease Control (CDC) announces that competitive Cooperative Agreement applications are being accepted for a State Smoking Cessation During Pregnancy Demonstration and Research Project. The Catalog of Federal Domestic Assistance number is 13.283.

Program Objective

To (1) reduce the prevalance of smoking among pregnant women who use public prenatal clinic and WIC services and increase the birthweight of their babies; (2) demonstrate the effectiveness of a smoking cessation/maintenance intervention program to produce changes in smoking behavior; and (3) demonstrate the cost-effectiveness of the intervention as an integral part of prenatal care.

Type of Assistance

Awards resulting from this announcement will be Cooperative Agreements. One to three awards will be made.

1. Recipient Activities

a. Assess their targeted public health clinic population to determine why pregnant smokers continue to smoke and why and how patients who quit smoking did so prior to coming for prenatal care.

b. Determine the smoking cessation/maintenance package of interventions to be used and develop protocols for their use by patients and service providers.

c. Design a smoking cessation/maintenance demonstration project for implementation in public prenatal clinics and associated WIC programs to include:

(1) Measurable objectives for smoking cessation and reduction of low birthweight incidence.

(2) A research design that will allow for the evaluation of effectiveness of interventions.

(3) An inventory of public prenatal clinics and associated WIC programs including a description of the client population and size of the caseload.

(4) Selection of public prenatal clinics and associated WIC programs for inclusion in the demonstration project.

(5) Data collection methods, which may include linkage between prenatal, obstetric, and postpartum patient records and linkage to birth certificates or other sources of birthweight data.

(6) Appropriate biochemical test(s) for confirming smoking behavior of all or a sample of participants, including a pretest of quality control procedures in at least a sample of clinics.

(7) A tracking system to follow up women who use prenatal clinics and WIC services.

d. Develop and implement a plan for introducing smoking cessation into prenatal clinics and associated WIC programs, including:

(1) A training approach that builds staff support for smoking cessation/maintenance activities.

(2) A Practitioner's Guide to smoking cessation/maintenance in prenatal clinics and associated WIC programs.

e. Publish study results in appropriate medical and scientific publications.

2. CDC Activities

a. Collaborate in the design of the demonstration project and provide consultation regarding data collection instruments and procedures, data analysis of information gathered, and preparation of a final report.

b. Provide state-of-the-art information and consultation on smoking cessation interventions, biochemical testing, and the development and evaluation of protocols for their use.

c. Collaborate in the preparation of publications and dissemination of results.

Availability of Funds

It is expected that approximately $200,000 to $450,000 will be available in Fiscal year 1986 to fund one to three awards. The awards will range from approximately $50,000 to $250,000. The award(s) will be funded for a 12-month budget period. The project period will be for 2 years. The funding estimate outlined above may vary and is subject to change. Funds may not be used to pay for recurrent costs associated with service delivery.

Authority

This program is authorized under section 301 of the Public Health Service Act as amended. Regulations applicable to this program are in Title 42 of the Code of Federal Regulations, part 52, entitled "Grants for Research Projects."

Eligibility Requirements

Eligible applicants are the official health departments of any State, including the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

Applications

1. Copies—Place of Submission

The original and two copies of the application should be submitted on Form PHS 5161–1 (revised 3–79) on or before April 23, 1986: Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, Room 321, 255 East Paces Ferry Road, Atlanta, Georgia 30305.

Application forms should be available in the institution's business office or from the above address.

2. Deadlines

Applications shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date, or

b. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants should request a legibly-dated U.S. Postal Service postmark or obtain a legibly-dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

3. Late Applications

Applications which do not meet the criteria in either paragraph 2.a. or b. immediately above are considered late applications and will not be considered in the current competition and will be returned to the applicant.

4. Reviews

Applications are not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs, and are not subject to review under regulations (42 CFR Part 122, as amended, and Part 123) implementing the National Health Planning and Resources Development Act of 1974.

5. Content

Applications must include a narrative which details the following:

a. Executive Summary.

b. Background Related to State's Smoking Policies and Programs.

(1) Smoking policies and programs, including existing programs for pregnant women.

(2) Prenatal care.

(3) WIC programs.

c. Proposed Demonstration Project Objectives and Research Objectives.

d. Approach to the Development of the Package of Interventions.

e. Evaluation/Research Design and Methods.

f. Project Organization, Use of Staff, Delineation of Responsibilities.

g. Proposed Implementation Plan and Schedule.

h. Project Budget.

i. Staff Qualifications.

Review Criteria

Applications will be reviewed and evaluated based on the evidence submitted which specifically describes the applicant's ability to meet the following criteria:

1. Project Design

a. Evidence of the applicant's understanding of the objectives of the smoking cessation demonstration project.

b. Measurable behavioral and programmatic objectives as well as health outcomes and the means of evaluation that are identified and feasible.

c. A reasonable proposed schedule for accomplishing the activities of the Cooperative Agreement.

d. An approach to the development of the package of interventions that seems plausible and appropriate for the proposed setting and target population.

e. A feasible means of introducing smoking cessation into prenatal clinics and WIC programs based on State resources.

f. An estimate of the potential costs of sustaining smoking cessation/maintenance activities as an integral part of prenatal care and WIC programs.

g. A proposed budget which is consistent with the intended use of the CDC funds.

2. Capability

a. The experience of the proposed staff in conducting demonstration projects and other types of research, and, in particular, the qualifications of the proposed project coordinator.

b. The proportion of the project coordinator's time that the state is willing to make available to the project, preferably full time.

c. The risk reduction/health education and research expertise among the staff of the health departments and associated organizations (e.g., community, voluntary, university) that will be available to the project.

d. Nature of the information including smoking information currently collected as part of prenatal, WIC, obstetric, birth registration, and postpartum records; the ability of the state to link these records; and evidence of the use of this information by the State.

3. State Commitment

a. Prior and current nonsmoking activities and existing plans for new activities.

b. Ability and willingness to incorporate smoking cessation as an integral part of prenatal care, including the possibility of providing needed additional State/local funds or staff time.

c. Precedent for and commitment to providing prenatal care in smokefree client contact areas.

4. Potential for Public Health Impact

a. Evidence that the State has a relatively large number of low socioeconomic pregnant women, and provides publicly funded prenatal and WIC services to a substantial proportion of these women.

b. Evidence of the State health department's ability to field test effective improvements in patient education or risk reduction programs and to institute these changes throughout the State.

Information

Information on application procedures, copies of application forms, and other material may be obtained from Luther E. DeWeese, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, NE, Room 321, Atlanta, Georgia, 30305, or by calling (404) 262–6575 or FTS 236–6575.

Technical assistance may be obtained from Michael E. Dalmat, Dr.P.H., Pregnancy Epidemiology Branch, Division of Reproductive Health, Center for Health Promotion and Education, Centers for Disease Control, 1600 Clifton Road, NE, Atlanta, Georgia 30333, telephone (404) 329–1319, FTS: 236–1319.

Dated: February 28, 1986.

William E. Muldoon,

Director, Office of Program Support, Center for Disease Control.

BILLING CODE 4160–19–M

Food and Drug Administration

[Docket No. 85M–0065]

Blairex Laboratories, Inc.; Premarket Approval of Blairex ® Sterile Saline Solution

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Blairex Laboratories, Inc., Evansville, IN, for premarket approval, under the Medical Device Amendments of 1976, of the Blairex ® Sterile Saline Solution for use with soft (hydrophilic) contact lenses. The Blairex ® Sterile Saline Solution is indicated for use in the rinsing, heat disinfection and storage of soft (hydrophilic) contact lenses. After reviewing the recommendation of the Ophthalmic Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application.

DATE: Petitions for administrative review by April 7, 1986.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David M. Whipple, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7940.

SUPPLEMENTARY INFORMATION: On June 28, 1985, Blairex Laboratories, Inc., Evansville, IN 47730, submitted to CDRH an application for premarket approval of the Blairex ® Sterile Saline Solution. The device is indicated for use in the rinsing,

VOL 51 ISS 44 MR 6 1986 UMI

heat disinfection, and storage of soft (hydrophilic) contact lenses.

On October 17, 1985, the Ophthalmic Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On January 31, 1986, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ-460), address above.

The labeling of the Blairex® Sterile Saline Solution states that the solution is indicated for use in the rinsing, heat disinfection, and storage of soft (hydrophilic) contact lenses. Manufacturers of soft (hydrophilic) contact lenses that have been approved for marketing are advised that whenever CDRH publishes a notice in the **Federal Register** of approval of a new solution for use with an approved soft contact lens, the manufacturer of each lens shall correct its labeling to refer to the new solution at the next printing or at such other time as CFRH prescribes by letter to the applicant. Such labeling informs new users of soft contact lenses that they must avoid using certain products, such as solutions intended for use with hard contact lenses only. The restrictive labeling needs to be updated periodically, however, to comply with the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 et seq.), and regulations thereunder, and with the Federal Trade Commission Act (15 U.S.C. 41–58), as amended.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CFRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will published a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before April 7, 1986, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554–555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: February 27, 1986.

John C. Villforth,

Director, Center for Devices and Radiological Health.

[FR Doc. 86-4836 Filed 3-5-86; 8:45 am]

BILLING CODE 4160-01-M

Cardiovascular and Renal Drugs Advisory Committee; Amendment of Meeting Notice

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is amending an advisory committee meeting notice of the Cardiovascular and Renal Drugs Advisory Committee to reflect agenda changes. Notice of the meeting was published in the **Federal Register** of February 12, 1986 (51 FR 5262). The open committee discussion of the agenda is revised to read as follows:

Open committee discussion. The committee will discuss Bepridil (NDA's 19–001 and 19–002) Carter Wallace, McNeil, for use as an anti-anginal agent; Lidoflazine (Angex) (NDA 18–228) Janssen R & D, for use as an anti-anginal agent; Terazosin HC1 (Hytrin) (NDA 19–057) Abbott Laboratories, for use in hypertension; and Nimodipine (NDA 18–869) Miles Pharmaceuticals, for use in subarachnoid hemmorrhage.

Dated: February 28, 1986.

Adam J. Trujillo,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 86-4834 Filed 3-5-86; 8:45 am]

BILLING CODE 4160-01-M

Small Business Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming small business exchange meeting to be chaired by Joseph J. Faline, Director, New York Import District.

DATE: The meeting will be held 1 p.m. to 4:30 p.m., Thursday, March 27, 1986.

ADDRESS: The meeting will be held at the Adam Clayton Powell State Office Bldg., 2nd Floor Art Gallery 163 W. 125th St., New York, NY 10027.

FOR FURTHER INFORMATION CONTACT: George R. Walden, Food and Drug Administration, 20 Evergreen Place, East Orange, NJ 07018, 201-645-6466.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between small business and FDA officials. The meeting will provide a forum for the owners and managers of small businesses to express their concerns about FDA, encourage discussion about the effects of regulation and regulatory alternatives, convey knowledge about the agency's operations and procedures, and increase participation by small business persons in FDA's decisionmaking process.

Dated: February 28, 1986.

Adam J. Trujillo,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 86-4833 Filed 3-5-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 86N-0039]

Color Additives: D&C Red No. 8, 9, 19, and 37; D&C Orange No. 17; and FD&C Red No. 3; Report Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the final report of the Color Additive Scientific Review Panel

(the Panel) on D&C Red. No. 8, D&C Red No. 9, D&C Red No. 19, D&C Red No. 37, D&C Orange No. 17, and FD&C Red No. 3. FDA convened this panel of expert government scientists to evaluate the available data, views, and information on these color additives and to develop a sound assessment of the carcinogenic risk presented to the human population by their use. The Panel members were selected from FDA and other agencies in the Public Health Service. The Panel has completed its work, and it has formally submitted its final report to FDA. The final report is available to the public on request.

ADDRESS: A copy of the report is available for review at, and individual copies may be obtained from, the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. (Sending two self-addressed adhesive labels will assist the Branch in processing your requests.)

FOR FURTHER INFORMATION CONTACT: Paul D. Depore, Office of Regulatory Affairs (HFC-230), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2390.

SUPPLEMENTARY INFORMATION: The subject color additives are provisionally listed for coloring cosmetics (externally applied as well as ingested), drugs, and externally applied drugs (and, in the case of FD&C Red No. 3, lakes for food use), pending the submission and review of data on the safety of their use. FDA's evaluation of the petitions for permanent listing of these additives and other information raised questions that created doubts about whether a valid risk assessment could be performed on the basis of the chronic testing that has been done on these color additives (see 50 FR 26377, 26379; June 26, 1985). To address these questions, FDA convened the Panel. The Panel was charged to evaluate the available data, information, and views on FD&C Red No. 3, D&C Red Nos. 8, 9, 19, and 37, and D&C Orange No. 17 and to provide answers to the following questions:

(1) Can valid quantitative risk assessments be performed for these color additives?

(2) Does the available information support the data analyses and risk assessments that have been performed and are before the agency?

The agency's decision to establish the scientific peer review panel is consistent with the recommendations contained in several recent publications (see, e.g., (1) National Academy of Sciences, "Risk Assessment: Managing the Process," NAS Press, Washington, DC, 1983; (2) Office of Science and Technology Policy, "Chemical Carcinogens: A Review of the Science and Its Associated Principles," published in the **Federal Register** of March 14, 1985 (50 FR 10371); (3) Committee to Coordinate Environmental and Related Programs, "Risk Assessment and Risk Management of Toxic Substances, a Report to the Secretary, April, 1985").

The Panel has completed its work and has formally submitted its final report to FDA. The report summarizes the available data on the color additives and presents risk estimates for their current uses. FDA is making the report available to the public on request.

A copy of the report is available for review at, and individual copies of the report may be obtained from, the Dockets Management Branch (address above). Requests for copies should be identified with the docket number found in brackets in the heading of this document.

Dated: March 3, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

[FR Doc. 86-4956 Filed 3-4-86; 11:36 am]

BILLING CODE 4160-01-M

National Institutes of Health

Consensus Development Conference on the Integrated Approach to Pain Management; Meeting

Notice is hereby given of the NIH Consensus Development Conference of the "Integrated Approach to Management of Pain," sponsored by the Warren Grant Magnuson Clinical Center, the National Cancer Institute, the National Institute of Neurological and Communicative Disorders and Stroke, the National Institute of Dental Research, and the Office of Medical Applications of Research, NIH. The conference will be held May 19–21, 1986, in the Masur Auditorium of the Warrent Grant Magnuson Clinical Center (Building 10) at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

Health professionals and patients alike are concerned with the optimal approach to pain management. Contemporary perspectives on pain management combine pharmacological and nonpharmacological interventions, and are planned and implemented in a multidisciplinary effort. The conference will focus on such interventions and explore types of professional collaboration designed to provide significant benefit to patients.

The conference will bring together biomedical investigators, internists, surgeons, nurses, epidemiologists, and representatives of the public. Following two days of presentations by medical experts and discussions by the audience, a consensus panel, drawn from the medical and lay communities, will formulate a draft statement responding to the following key questions:

How should pain be assessed?

How should pharmacological agents be used in an integrated approach to pain management?

How should nonpharmacological interventions be used in an integrated approach to pain management?

What is the role of the nurse in the integrated approach to pain management?

What are the directions for future research in pain management?

Evidence relating to pain management will be presented by experts in the field and evaluated by a panel composed of scientists, medical professionals, nurses, clinical investigators, and public representatives. Presentations will include discussions of pharmacological agents as well as nonpharmacological interventions and how these approaches may be integrated. The information presented will be discussed by the panel and there will be opportunity for questions and comments from the audience.

On the third and final day of the conference, Consensus Panel Chairman, Dr. Laurel Copp, Dean, University of North Carolina School of Nursing, will read the draft consensus statement before the conference audience and invite comments and questions.

Information on the program may be obtained from Mr. Peter Murphy, Prospect Associates, 2115 East Jefferson Street, Suite 401, Rockville, Maryland 20852, (301) 468-6555.

Dated: Feb. 26, 1986.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Application for Permit

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Riverside County et al., Riverside, CA 92501-3656—PRT-698685

The applicant, Riverside County and nine cities therein, request a permit to take Coachella Valley Fringe-toed Lizards (*Uma inornata*), a species listed as threatened, incidental to certain development and conservation activities proposed to be conducted in the area pursuant to a multi-party agreement (Agreement) implementing the Coachella Valley Fringe-toed Lizard (CVFTL) Habitat Conservation Plan (HCP). The permit is being applied for in accordance with section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended and 50 CFR 17.22(b)(1).

A basic element of the application is the Agreement which legally binds all parties to carry out the elements of the HCP. In addition, the Agreement creates a funding mechanism that is able to support the research, enhancement, maintenance, management monitoring and other conservation and mitigation measures provided for in the HCP. Funding is to be provided through mitigation fees, assessments and other devices. The Agreement would establish a permanent institutional structure to insure uniform protection and conservation of the habitat throughout the area despite the division of the habitat by the overlapping jurisdictions and complex pattern of public and private ownership.

The HCP was developed to insure the long term conservation of the species by minimizing and mitigating the impacts development would have on the CVFTL by permanently preserving the species habitat through transfer of private lands to the public, providing funding in perpetuity through the limited development which would be allowed, improving existing habitat and reclaiming former habitat and researching and monitoring various aspects of the areas ecology.

Copies of this application, its supporting documents, Habitat Conservation Plan and implementing Agreement are on file at the following locations and are available for inspection by the public during normal business hours: Federal Wildlife Permit Office, 1000 North Glebe Road, Room 611, Arlington, VA 22201 (703/235–10903); U.S. Fish and Wildlife Service, Region 1, Office of Federal Assistance; Lloyd 500 Building, Suite 550, 500 N.E. Multnomah Street, Portland, Oregon 97232 (503/231–6184); U.S. Fish and Wildlife Service Sacramento Office of Endangered Species, 2800 Cottage Way, Room #1823, Sacramento, CA 95825 (916/484–4935) and Riverside County Planning Department, 4080 Lemon Street, 9th Floor, Riverside, CA 92501 (714/787–6181).

Interested persons may comment on this application within 30 days of the date of this publication by submitting written views, arguments, or data to the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: February 28, 1986.

Bob Kavetsky,

Acting Chief, Branch of Permits, Federal Wildlife Permit Office.

BILLING CODE 4310-55-M

Receipt of Application for Permit

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et. seq.*):

Applicant: Exotic Animals Tarzana, CA—PRT-704301

The applicant requests a permit to export and reimport a pair of leopards (*Panthera pardus*), one male tiger (*Panthera tigris*), and one male jaguar (*Panthera onca*), all captive-born, for the purpose of enhancement of propagation.

Applicant: Steven Beissinger, Smithsonian Institute, Washington, D.C.—PRT-704278

The applicant requests a permit to trap, band, and radio-tag adult snail kites (*Rostrhamus sociabilis*) to obtain behavioral data in an aquatic environment manipulated by man and to capture nestlings for obtaining growth data.

Applicant: Nichols/Hendrix-Post Corp., Key Largo, FL—PRT-691992

The applicant requests a permit for the incidental taking of Key Largo woodrats (*Neotoma floridana smalli*) and Key Largo cotton mice (*Peromyscus gossypinus allapaticola*) during the clearing on one acre of endangered species habitat, for the construction of a building and related site improvements.

Applicant: U.S. Fish & Wildlife Service, Regional Director, Region 4, Atlanta, GA—PRT-697819

The applicant requests a permit to amend their current permit to allow take of additional species of wildlife and plants for scientific purposes and the enhancement of propagation or survival in accordance with Recovery Plans, listing or other Service work for those species.

Applicant: National Zoological Park, Washington, D.C.—PRT-704377

The applicant requests a permit to receive an interstate shipment of one female Cuban crocodyle (*Crocodylus rhombifer*) for the enhancement of propagation of the species.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 611, 1000 North Glebe Road, Arlington, Virginia 22201, or by writing to the Director, U.S. Fish and Wildlife Service of the above address.

Interested person may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: February 28, 1986.

R.T. Kavetsky,

Acting Chief, Branch of Permits Federal Wildlife Permit Office.

BILLING CODE 4310-55-M

Bureau of Indian Affairs

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contracting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Department Desk Officer, Washington, DC 20503, telephone (202) 395–7340.

Title: Education Contracts Under Johnson-O'Malley Act, Application and Regulatory Requirements, CFR 273, Monitoring Requirements 62 BIAM 1.

Abstract: Eligible contractors must meet application, reporting and other regulatory requirements for educational program funding which is supplemental to other sources of funding. Contractors and Indian education committees develop education programs to meet the special and unique needs of eligible Indian students. The Bureau also monitors projects and provides technical assistance.

Bureau Form Numbers: 62116, 62117, 62118

Frequency: Annually

Description of Respondents: Tribes, tribal organizations, public school districts and state education departments.

Annual Responses: 1,236

Annual Burden Hours: 28,644

Bureau clearance officer: Cathie Martin, (202) 343–1676

Ross O. Swimmer,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

Realty Action; Recreation and Public Purposes Classification; Michigan

AGENCY: Bureau of Land Management, Interior.

ACTION: Land Classification for Recreation and Public Purposes, Cass County, Michigan, ES-32083.

SUMMARY: The following public island has been examined and found to be suitable for classification and sale under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869):

Michigan Meridian, Michigan

T. 6 S., R. 14 W., Tract 37 (a 1.90 acre island in Donnell Lake)

Penn Township has applied for this island. They plan to manage it for recreational purposes as Donnell Island Park.

The island is physically suited to the proposed use and is not of national significance. Since the island is valuable for a local governmental program, it is considered chiefly valuable for public purposes and therefore suitable for classification and sale under the Recreation and Public Purposes Act. This action is consistent with local and Federal government plans, programs and policies.

Any patent issued under this notice shall be subject to the provisions in 43 CFR 2741.8. In the event of noncompliance with the terms of the patent, title to the land shall revert to the United States.

The classification of the island will segregate it from all appropriation except as to applications under the mineral leasing laws and the Recreation and Public Purposes Act. Segregation will terminate upon issuance of a patent; or eighteen (18) months from the date of this notice; or upon publication of a notice of termination, whichever occurs first.

Comments

For a period of 45 days from the date of first publication of this notice, interested parties may submit comments to: District Manager, Milwaukee District Office, Bureau of Land Management, P.O. Box 631, Milwaukee, Wisconsin 53201-0631.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning this application is available for review at the Milwaukee District Office, Suite 225, 310 West Wisconsin Avenue, Milwaukee, Wisconsin 53203, or by calling Priscilla McLain at (414) 291–4427

Bert Rodgers,

District Manager.

BILLING CODE 4310-FN-M

Filing of Plats of Survey; Colorado

February 28, 1986.

The plat of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 a.m., February 28, 1986.

The plat representing a corrective survey of a portion of the subdivision of section 7, T. 46 N., R. 11 W., New Mexico Principal Meridian, Colorado, Group No. 715, was accepted February 12, 1986.

This survey was executed to meet certain administrative needs of the U.S. Forest Service.

The supplemental plat correcting erroneous acreage in previous lot 10 and now showing amended lottings and areas in N½SE¼ of section 35, T. 46 N., R. 11 E., New Mexico Principal Meridian, Colorado, was accepted February 13, 1986.

The supplemental plat showing a new lot and area in the S½S½ of section 18, T. 1 N., R. 71 W., Sixth Principal Meridian, Colorado, was accepted February 13, 1986.

The supplemental plat correcting an erroneous lot in the SW¼ of section 18, T. 42 N., R. 10 E., New Mexico Principal Meridian, Colorado, was accepted February 13, 1986.

These supplemental plats were prepared to meet certain administrative needs of this Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2020 Arapahoe Street, Denver, Colorado 80205.

Marlin G. Livermore,

Acting Chief Cadastral Surveyor for Colorado.

BILLING CODE 4310-84-M

[OR-39055]

Partial Termination of Proposed Withdrawal and Reservation of Lands; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Department of the Army has cancelled its application in part to withdraw certain public lands for the U.S. Army Central Oregon Test Facility. This action will open approximately 144.43 acres to surface entry and mining.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM, Oregon State

VOL 51 ISS 44 MR 6 1986 UMI

Office P.O. Box 2965, Portland, Oregon 97208 (Telephone: 503–231–6905).

SUPPLEMENTARY INFORMATION:

1. Notice of Department of the Army application OR 39985 for withdrawal and reservation of lands was published as FR Doc. 85–17597 on page 38240 of the issue of July 24, 1985. The purpose of the proposed withdrawal is to protect the Central Oregon Test Facility of the U.S. Army Electronics Research and Development Command involving two separate parcels located near Bend and Redmond in central Oregon. The applicant agency has cancelled the application insofar as it affects the following described land:

Willamette Meridian

T. 15 S., R. 14 E.,
Sec. 31 SE¼, except the westerly 273 feet.

The area described contains approximately 144.43 acres in Crook County, Oregon.

2. Pursuant to the regulations contained in 43 CFR 2320.2–1 (c) at 8:30 a.m. on April 14, 1986, the land be opened to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8:30 a.m. on April 14, 1986, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. Pursuant to the regulations contained in 43 CFR 2320.2–1 (c), at 8:30 a.m. on April 14, 1986, the land will be opened to location and entry under the United States mining laws, subject to valid existing rights. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: February 26, 1986.

B. LaVelle Black,

Chief, Branch of Lands & Minerals Operations.

[AA-50578; AA-6689-A]

Alaska Native Claims Selection; Belkofski Corp.

In accordance with Departmental regulation 43 CFR 2650.7(d.) notice is hereby given that the decision to issue conveyance (DIC) to Belkofski Corporation, notice of which was published in the Federal Register, 50 FR 231, on December 2, 1985, is modified by adding the provisions of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(c).

A notice of the modified DIC will be published once in the *Aleutian Eagle* and once a week, for four (4) consecutive weeks, in the *Anchorage Daily News*. Copies of the modified DIC may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest which is adversely affected by the decision shall have until April 7, 1986 to file an appeal on the issue in the modified DIC. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements in 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Except as modified, the decision, notice of which was given December 2, 1985, is final.

Helen Burleson,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

Minerals Management Service

Outer Continental Shelf; Development Operations Coordination

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Mobil Producing Texas & New Mexico Inc. has submitted a DOCD describing the activities it proposes to conduct on Leases OCS–G 2393 and 2757, Blocks A–573 and A–382, High Island Area, offshore Texas. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Freeport, Texas.

DATE: The subject DOCD was deemed submitted on February 25, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Managment Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838–0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979. (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: February 27, 1986.

J. Rogers Pearcy,

Acting Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to Clean Water Act

In accordance with Departmental policy, 28 CFR 50.7 notice is hereby given that on January 22, 1986, a proposed consent decree in *United States* v. *Wedtech Corp., et al.*, Civil Action No. 86 Civ. 0573 (PKL) was lodged with the United States District Court for the Southern District of New York. The proposed consent decree concerns the violations of the Clean Air Act at two facilities owned by defendant which either emitted or had the potential to emit volatile organic compounds (VOCs). The proposed consent decree requires defendant to pay the United States $28,000 as a civil penalty for past violations of the Clean Air Act with regard to these facilities. The consent decree also obliges the defendant to apply for a federally-enforceable permit from the New York State Department of Environmental Conservation, with conditions that will prevent the facility from becoming a major potential source of VOCs.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC, 20530, and should refer to *United States* v. *Wedtech Corp. et al.*, D.J. Ref. 90–5–2–844.

The proposed consent decree may be examined at the Office of the United States Attorney, Southern District of New York, One Saint Andrews Plaza, New York City, New York 10007 and at the Region II Office of the United States Environmental Protection Agency, Office of Regional Counsel, 26 Federal Plaza, New York City, New York 10278. Copies of the consent decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. If requesting a copy of the consent decree, please enclose a check in the amount of $1.10 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, U.S. Department of Justice, Land and Natural Resources Division.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations; Bi-Weekly Notice

Correction

In FR Doc. 86–4030 beginning on page 6818 in the issue of Wednesday, February 26, 1986, make the following correction: The entries for Florida Power Corporation et al. and GPU Nuclear Corporation beginning on page 6822 were incorrect and are correctly set forth below:

Florida Power Corporation, et al., Docket No. 50–302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of amendment request: January 16, 1986.

Description of amendment request: The proposed amendment would remove from the Technical Specifications (TSs) the tabular listing of hydraulic snubbers, as suggested by Generic Letter 84–13 dated May 3, 1984.

The licensee had previously requested (July 25, 1984) TS changes to the tabular listing of snubbers to add new snubbers and to revise the classification of several snubbers to "accessible" or "inaccessible" as applicable. That request was previously noticed (50 FR 47862), but has not yet been acted upon. In view of the licensee's request of January 16, 1986, which is the subject of this notice, the licensee has withdrawn that portion of its July 25, 1984 request dealing with snubbers, by letter dated January 24, 1986.

Basis for proposed no significant hazards consideration determination: Generic Letter 84–13, May 3, 1984, "Technical Specifications for Snubbers" concludes that the tabular listing of snubbers included in Technical Specifications may be deleted by any licensee submitting a license amendment.

The removal of the tabular listing of snubbers from the Technical Specifications is of an administrative nature and does not in itself affect plant design or operation, involve modifications to plant equipment, or make changes that would affect plant safety analyses. The Technical Specifications will continue to require the snubbers to be operable. Appropriate actions to be taken if the snubbers are inoperable will also remain in Technical Specifications. Additionally, the NRC staff has determined that inclusion of snubber listings in Technical Specifications is not necessary because any changes in snubber quantities, type or locations are controlled under the provisions of 10 CFR 50.59 as a change to the facility.

The proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because the removal of the snubber listing does not impact the existing snubber operability requirements.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change introduces no new mode of plant operation nor does it require physical modification to the plant.

3. Involve a significant reduction in the margin of safety because it does not involve changes in plant design or operation or affect plant safety analyses. The purpose of the change is to conform to the NRC guidance in Generic Letter 84–13. Any proposed changes to the snubbers would be subject to the provisions of 10 CFR 50.59 and, as a result, should any proposed change significantly reduce the margin of safety, an application for a license amendment would be submitted.

Based on the above, the Commission's staff proposes to determine that the application for amendment does not involve a significant hazards consideration.

Local Public Document Room location: Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida 32629.

Attorney for licensee: R.W. Neiser, Senior Vice President and General Counsel, Florida Power Corporation, P.O. Box 14042, St. Petersburg, Florida 33733.

NRC Project Director: John F. Stolz.

GPU Nuclear Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: December 10, 1982, and April 15, 1985, as

VOL 51
ISS 44
MR 6
1986
UMI

superseded by the submittal of November 13, 1985.

Description of amendment request: Request approval of changes to the Appendix A Technical Specifications (TS) pertaining to shock suppressors (snubbers). These changes are to Section 3.5 and 4.5, Containment, and to Section 6.10.2, Administrative Controls-Record Retention, and the Basis for these Sections in the TS.

The changes to TS Section 3.5A.8. revise the existing limiting conditions for operation on snubbers to (1) delete Table 3.5.1. which lists the safety-related snubbers by number and location and (2) revise the existing requirements on when snubbers have to be operable and the actions to be taken if snubbers are inoperable. The existing requirements are in terms of the snubbers themselves with the requirements being that, if a snubber is inoperable in all modes of operation except cold shutdown and refueling and cannot be made operable within 72 hours, an orderly shutdown of the plant shall be initiated and the reactor shall be in cold shutdown within 36 hours. The proposed requirements are in terms of the systems containing the safety-related snubbers. The new requirements would be that, if a snubber is inoperable and cannot be made operable within 72 hours, the system is declared inoperable and the appropriate action statement for that system in the TS is followed.

The changes to TS Section 4.5.Q would (1) revise the existing surveillance requirements on safety-related hydraulic snubbers to add surveillance requirements for mechanical snubbers, (2) revise the existing surveillance requirements for hydraulic snubbers and (3) add a requirement for a record to be kept of the service life of each snubber. The record would be maintained as required by proposed TS 6.10.2.1. The revision to the surveillance requirements would delete the distinction in the existing surveillance requirements between hydraulic snubbers whose seal material has been demonstrated by operating experience, lab testing or analysis to be compatible with the operating environment and hydraulic snubbers whose seal material has not been demonstrated to be compatible. In the proposed TS, all hydraulic snubbers meet the same acceptance criteria and are tested on the same schedule. The proposed TS include a specific Visual Inspection Acceptance Criteria, Hydraulic Snubbers Functional Test Acceptance Criteria and Mechanical Snubbers Functional Test Acceptance Criteria. The proposed frequency of visual inspection and functional tests of snubbers is similar to that existing for hydraulic snubbers with seal material demonstrated to be compatible with the operating environment. The proposed acceptance criteria for hydraulic snubbers is similar to the existing acceptance criteria for hydraulic snubbers. The proposed TS delete existing TS 4.5.Q.2 which states that the initial inspection shall be performed within 12 months from the date of issuance of these TS and it shall be assumed that the facility had been on a 12-month inspection schedule. This existing TS is not needed because this initial inspection has already been performed.

On December 10, 1982, in accordance with 10 CFR 50.59 and 50.90, the licensee submitted proposed changes to the TS pertaining to shock suppressors (48 FR 33080). These changes were to TS Section 3.5.A.8 and Bases, Section 4.5.Q and Bases, Section 6.10.2 and Table 3.5.1. The proposed changes were to incorporate revision 1 of the inservice inspection surveillance requirements for snubbers which were transmitted by the Commission to the licensee on March 23, 1981, and to revise Table 3.5.1 to add mechanical snubbers and to reword the table to conform to the then existing NRC Standard TS.

On May 3, 1984, the Commission issued Generic Letter (GL) 84–13, Technical Specifications for Snubbers. The licensee reviewed GL 84–13. It submitted by letter dated April 15, 1985, (1) the proposed changes in its request dated December 10, 1982, with one exception and (2) its proposed changes in response to GL 84–13 (50 FR 20980). (The one exception was that the licensee proposed in its letter dated December 10, 1982, to only revise Table 3.5.1. and in its letter dated April 15, 1985, the proposed action was to delete Table 3.5.1.)

After discussions wth NRC Region I in IE Inspection 85–27, the licensee has again revised its proposed TS change for snubbers. This revision is dated November 13, 1985, which supersedes its submittals of December 10, 1982, and April 15, 1985. This latest revision will bring the TS closer to the requirements in the staff's Boiling Water Reactor Standard Technical Specifications, NUREG–0123, (BWR–STS). The BWR–STS are based on the Standard Review Plans. For snubbers, it is appropriate for the TS to conform to the BWR–STS.

Basis for proposed no significant hazards consideration determination: The commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the example (vi) of amendments not likely to involve significant hazards considerations is a change which either may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

For TS Section 3.5.A.8 and Bases and Table 3.5.1, the licensee has requested approval to delete Table 3.5.1 which lists the safety-related snubbers in the plant and to reword the TS to conform to the BWR-STS. The Commission stated in GL 84–13 that a snubber listing within the TS was not necessary provided the TS are modified to specify which snubbers are required to be operable. The staff's acceptance criteria for snubbers is in Standard Review Plan (SRP) 3.9.3, ASME Code Class 1, 2, and 3 Components, Component Supports and Core Support Structures. The BWR-STS and GL 84–13 provide criteria in the SRP on inspection and testing of snubbers. Therefore, this proposed change is one which may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin but the results of this change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

For TS 4.5.Q and Bases, the licensee has requested approval to revise the existing surveillance requirements on hydraulic snubbers, add surveillance requirements on mechanical snubbers and delete the reference to Table 3.5.1. The revision to the existing surveillance requirements on snubbers is to reword the TS to conform to the BWR-STS. Therefore, this proposed change is a change which may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

Finally, the revision to TS 6.10.2 would add a requirement that the licensee maintain records of service lives of all safety-related snubbers. Because this is an additional control not currently in the TS, this change is encompassed by the Commission example (ii) of actions not likely to involve significant hazards consideration.

Because the proposed changes fall within examples (ii) or (vi), provided by the Commission in 48 FR 14870, of amendments that are not likely to involve significant hazards consideration, the staff proposes to determine that the requested action involve no significant hazards consideration.

Local Public Document Room location: Ocean County Library, 101 Washington Street, Toms, River, New Jersey 08753.

Attorney for licensee: G. F. Trowbridge, Esquire, Shaw, Pittman, Potts, and Trowbridge, 1800 M Street, NW. Washington, DC 20036.

NRC Project Director: John A. Zwolinski.

BILLING CODE [illegible]

[Docket Nos. 50–338 and 50–339]

Virginia Electric and Power Co., et al.; Consideration of Issuance of Amendment To Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses No. NPF–4 and No. NPF–7, issued to Virginia Electric and Power Company and Old Dominion Electric Cooperative (the licensee), for operation of the North Anna Power Station, Units No. 1 and No. 2 (NA–1&2) located in Louisa County, Virginia, in accordance with the licensee's application for amendment dated February 6, 1986.

The proposed changes would revise the NA–1&2 Technical Specifications (TS), Section 3/4.6.3, Table 3.6–1, Containment Isolation Valves. The proposed changes reflect the planned installation of new containment isolation valves in the letdown line of the Charging and Letdown System (CLS). The new valve will function as the inside containment isolation valve and is designed to meet the operating criteria of three (3) existing parallel isolation valves, an in-line relief valve and a remote manual valve. The existing valves will not be physically removed but will no longer serve as isolation valves and, thus, would be deleted from Table 3.6.1 which specifies Containment Isolation Valves. The new valves would be added to Table 3.6.1.

The Commission has made a proposed determination that the request for amendments involves no significant hazards consideration. Under the Commission's regulation in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability of consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed change as discussed above does not increase the probability of occurrence or the consequences of an accident of malfunction of equipment important-to-safety as previously evaluated in the NA–1&2 Final Safety Analysis Report (FSAR). The new valve to be installed for each unit is functionally equivalent to and designed consistent with the original design criteria for the containment isolation valves which are being replaced. The proposed change does not affect any existing accident analyses specified in the NA–1&2 FSAR.

Also, the change does not create a possibility for an accident or malfunction of a different type than any previously evaluated in the FSAR. The modification does not functionally change the operation of the Letdown System or change the containment isolation function, and thus, the proposed change does not affect any existing accident analyses.

And, finally, the change does not reduce the margin of safety as defined in the basis of any TS. The safety limits as defined in the Technical Specifications are not changed. Therefore, based on these considerations and the criteria given above, the Commission has made a proposed determination that the amendment request does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Rules and Records Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

By April 4, 1986, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to

VOL 51 ISS 44 MR 6 1986 UMI

present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendments and make them effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendments.

If a final determination is that the amendments involve a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendments until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendments before the expiration of the 30-day notice period, provided that its final determination is that the amendments involve no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Lester S. Rubenstein: (petitioner's name and telephone number), (date petition was mailed), (plant name), and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael W. Mauphin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated Febraury 6, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Dated at Bethesda, Maryland, this 27th day of February, 1986.

Lester S. Rubenstein,

Director, PWR Project Directorate #2, Division of PWR Licensing-A.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of section 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on March 13-15, 1986 in Room 1046, 1717 H Street, NW, Washington, DC. Notice of this meeting was published in the **Federal Register** on February 25, 1986.

Thursday, March 13, 1986

8:30 A.M.-8:45 A.M.: Reports of ACRS Chairman (Open)—The ACRS Chairman will report briefly regarding items of current interest to the Committee.

8:45 A.M.-11:00 A.M.: Quantitative Safety Goals (Open)—The members will hear and discuss the report of its subcommittee regarding the evaluation of the two-years trial period for use of quantitative safety goals as a regulatory requirement. Representatives of the NRC Staff and the nuclear industry will make presentations and participate in the discussion, as appropriate.

11:000 A.M.-1:00 P.M.: ACRS Effectiveness (Open)—The members will discuss proposed implementation of the recommendations of the Panel on ACRS Effectiveness.

2:00 P.M.-4:30 P.M.: Perry Nuclear Power Plant, Unit 1 (Open)—The members will hear and discuss the report of its subcommittee regarding the impact of the recent earthquake on the Perry Nuclear Plant, Unit 1. Representatives of the NRC Staff and the Licensee will make presentations and participate in the discussion to the degree considered appropriate.

4:30 P.M.-5:00 P.M.: Future ACRS Activities (Open)—The members will discuss anticipated ACRS subcommittee activities. Topics proposed for consideration by the full Committee will also be discussed.

5:00 P.M.-6:00 P.M.: Safety Considerations in Future Reactors (Open)—The members of the Committee will discuss proposed ACRS comments and recommendations regarding safety considerations in the design of future reactors.

6:00 P.M.-6:30 P.M.: Discuss Topics for Meeting with NRC Commissioners (Open)—The members will discuss topics schedules for discussion with the NRC Commissioners, including the scope and procedures for conduct of ACRS activities; requirements for the GESSAR II standardized nuclear plant and safety considerations in future nuclear plants; and comments regarding the need/desirability for a federal facility to train nuclear power plant operators.

Friday, March 4, 1986

8:30 A.M.-9:45 A.M.: Quantitative Safety Goals (Open)—The members will continue discussion of the proposed ACRS report to the NRC regarding evaluation and implementation of quantitative safety goals in the regulation of nuclear facilities.

10:00 A.M.-11:30 A.M.: Meeting with NRC Commissioners (Open)—The members of the Committee will meet with members of the Commission to discuss items noted above.

11:45 A.M.-1:30 P.M. and 2:30 P.M.-3:00 P.M.: Integrity of Primary Coolant Systems (Open)—The members will hear and discuss reports from its subcommittee, representatives of the NRC Staff, and the nuclear industry, as appropriate, regarding proposed changes in NRC regulations on primary system design and inspection, and on pressurized thermal shock of reactor pressure vessels.

3:15 P.M.-5:15 P.M.: Severe Accident Policy (Open)—The members will discuss the proposed NRC implementation plan for the NRC severe accident policy regarding nuclear power plants. Members of the NRC and nuclear industry will participate, as appropriate.

5:15 P.M.-7:00 P.M.: Advanced Reactor Designs (Open/Closed)—The members will hear and discuss the reports of its subcommittee, representatives of the NRC Staff, and the Department of Energy regarding proposed advanced reactor designs for both gas cooled and liquid metal cooled nuclear plants.

Portions of this session will be closed as required to discuss Proprietary Information applicable to this matter.

Saturday, March 15, 1986

8:30 A.M.-12:30 P.M.: Preparation of ACRS Reports (Open/Closed)—The members will discuss proposed reports to the NRC regarding items discussed during this and previous ACRS meetings, including proposed Committee reports on the evaluation and implementation of proposed quantitative safety goals, proposed changes in NRC policies and regulations regarding reactor pressure vessel pressurized thermal shock, and safety considerations in future reactors.

Portions of this session will be closed as necessary to discuss Proprietary Information applicable to the facilities being discussed.

1:30 P.M.-3:00 P.M.: ACRS Subcommittee Activities (Open/Closed)—The members will hear and discuss reports of recent and anticipated ACRS subcommittee activities in designated areas, including the nomination of candidates proposed for appointment to the ACRS, licensing requirements for the storage of spent reactor fuel in independent storage facilities, and resolution of unresolved generic issue A-46, Seismic Qualification of Equipment in Operating Nuclear Power Plants.

Portions of this session will be closed as required to discuss information of a personal nature, the disclosure of which would represent a clearly unwarranty invasion of personal privacy.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 2, 1985 (50 FR 191). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, R.F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with Subsection 10(d) Pub. L. 92-463 that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information [5 U.S.C. 552b(c)(4)] applicable to the matters being discussed and information the release of which would represent a clearly unwarranted invasion of personal privacy [5 U.S.C. 552b(c)(6)].

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634-3265), between 8:15 A.M. and 5:00 P.M.

Dated: March 3, 1986.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

POSTAL RATE COMMISSION

[Docket No. SS86-1]

Preferred Rate Study; Schedule of Hearings on Nonprofit Mail

March 3, 1986.

Notice is hereby given that following an opening hearing on March 12, 1986, at the Commission's Washington, D.C., headquarters, 1333 H Street, N. W., to obtain views and comments on federally subsidized mail, pursuant to Notice dated January 24, 1986 (51 FR 3867-3969), hearings will be held in:

Atlanta, Georgia: March 18, 1986, 9:00 a.m., L.D. Strom Auditorium, Lower Plaza, Richard B. Russell Federal Building, 75 Spring Street, SW.;

Denver, Colorado: March 18, 1986, 9:30 a.m., Denver Museum of Natural History, West Auditorium, City Park, 2001 Colorado Boulevard;

Los Angeles, California: March 24, 1986, 9:00 a.m., Veterans Administration Medical Center, West Los Angeles, Building 211, Brentwood Theatre, Wilshire & Sawtelle Boulevards;

Dallas, Texas: March 25, 1986, 9:00 a.m., Central Library, Ground Floor, Central Dallas Public Library, 1515 Young Street;

New York, New York: March 27, 1986, 9:30 a.m., Court of International Trade, Ceremonial Court Room, 2nd Floor, 1 Federal Plaza, Lafayette and Duane Streets;

Chicago, Illinois: April 2, 1986, 9:30 a.m., Everett McKinley Dirksen Building, Room 2525, 219 South Dearborn Street;

Minneapolis, Minnesota: April 2, 1986, 10:00 a.m., Hennepin County Government Center, Auditorium—A Level, 300 South 6th Street.

Persons interested in submitting a written statement for the record, or in presenting a five minute oral statement as well as written testimony, should promptly write the Office of the Secretary, Postal Rate Commission, 1333 H Street, NW., Suite 300, Washington, DC 20268, or call (202) 789-6840, for further details. The Commission will attempt to accommodate, on a first come first served basis, those wishing to testify at a specific time, if requests are received at least seven days before the hearing in which they would like to participate. Written statements will be accepted through April 21, 1986.

Cyril J. Pittack,

Assistant Secretary.

BILLING CODE 7715-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-14962; 812-6204]

Allied Capital Corp., et al.; Application for Order Authorizing Joint Transactions

February 27, 1986.

Notice is hereby given that Allied Capital Corporation, 1625 Eye Street, NW., Washington, DC 20006, a registered closed-end management investment company ("Allied Capital"); Allied Investment Corporation and Allied Financial Corporation (together with Allied Capital, "Allied"), both registered closed-end management investment companies and wholly-owned subsidiaries of Allied Capital which are licensed as small business investment companies under the Small Business Investment Act of 1958 (together, "SBIC Subsidiaries"); Allied Advisory, Inc. ("Advisory") a wholly-owned subsidiary of Allied Capital; Allied Management Partners, a limited partnership of which Advisory is the general partner ("Management"); and Allied Venture Partnership ("Venture"), a limited partnership of which Management is the general partner, and certain limited partners ("Venture Partners") of Venture (collectively, "Applicants"), have filed an application on September 20, 1985, for an order of the Commission, pursuant to sections 6(c) and 17(d) of the Investment Company Act of 1940 ("Act") and Rule 17d-1 thereunder, to permit certain co-investments with affiliates. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are

BEST COPY AVAILABLE

VOL 51
ISS 44
MR 6
1986
UMI

summarized below, and to the Act and the Rules thereunder for the complete text of the applicable provisions.

Applicants state that Allied Capital, originally organized in 1958 as a SBIC, is now a holding company over 95% of the assets of which consist of all of the outstanding capital stock of four subsidiaries, two of which are the SBIC subsidiaries. Applicants further state that the SBIC subsidiaries are principally engaged in the business of making venture capital-type investments in small business concerns, and normally seek out other venture capital investment entities to participate in the transactions.

According to the application, the Venture Partners with which Allied or Venture may co-invest are the following: (1) Affiliates of Entreprises Quilmes S.A. ("EQ"), a European holding company whose affiliates are affiliated persons of Allied both because one of its affiliates holds approximately 14% of the outstanding shares of Allied Capital (an executive of EQ is a director of Allied Capital and of Advisory) and because another of its affiliates is a copartner with Management in Venture; (2) Acacia Mutual Life Insurance Company, which owns shares in Allied Capital and an executive of which is a director of Allied and of Advisory, but which is an affiliate of Allied Capital solely because it is a copartner with Management in Venture; (3) Security Pacific Capital Corporation, an SBIC which is an affiliate of Allied solely because it is a copartner with Management in Venture; (4) Capital for Business, Inc., a subsidiary and affiliate of Commerce Bankshares, Inc., which is a bank holding company that is an affiliate of Allied solely because it is a copartner with Management in Venture; and (5) The First National Bank of Chicago as Trustee for the Institutional Venture Capital Fund, a national banking association which is an affiliate of Allied solely because, in its capacity as trustee for a fund other than the commingled trust fund for which it may desire to co-invest with Allied or Venture, it is a copartner with Management in Venture.

Applicants state that by a Commission order dated September 17, 1985 (Investment Company Act Release No. 14725), Allied Capital, Advisory, Management and Venture, and certain other affiliates were permitted to establish Venture as a venture capital limited partnership. Applicants further state that by an earlier Commission order (Investment Company Act Release No. 13461, August 23, 1983), co-investment transactions on the part of Allied and affiliates of EQ were permitted subject to certain conditions ("EQ Order"). Applicants, however, state that because of the organization of Venture and the participation as limited partners therein by an EQ affiliate as well as by the other Venture Partners, the EQ Order conditions can no longer be literally complied with. Therefore, Applicants seek a new order, pursuant to section 17(d) of the Act, and Rule 17d–1 thereunder, to permit the EQ affiliates to continue to co-invest with Allied as well as with Venture and to permit the other Venture Partners individually to co-invest with Allied or Venture or both. Applicants also seek relief from section 6(c) of the Act because relief from section 17(d) involves only individual, prospective transactions and applicants seek exemption for a class of transactions.

Applicants undertake, however, that they will be subject to the following rules: (i) Allied's board of directors will determine in the first instance the extent to which Allied and Venture combined will participate in any investment opportunity originated by Allied and the extent to which participations therein will be offered to others, or the extent to which Allied and Venture combined will participate in investment opportunities originated by others in which Allied is invited to participate; (ii) if the board of directors determines that any participations in investment opportunities originated by Allied are to be offered to others, the persons to whom such participations are to be offered may include one or more of the Venture Partners or their affiliates. Before, however, an offer of a participation may be made to any Venture Partner or an affiliate of a Venture Partner, the board of directors must specifically approve such offer, and such approval must be based on findings by the board of directors that the participation in the transaction of that Venture Partner (or affiliate) would be advantageous because of the specific contribution that such Venture Partner (or affiliate) is expected to make to the quality of the transaction; (iii) if Allied is invited to participate in an investment opportunity originated by others and the board of directors determines that the participation therein by Allied or Venture is in the best interests of Allied and Venture, then, if the other participants in the proposed transaction include one or more of the Venture Partners or their affiliates, the board of directors must specifically approve the amount of Allied's and Venture's participation and the amount of the proposed participation by each participant which is one of the Venture Partners or an affiliate of one of the Venture Partners; (iv) if the combined participation to be retained by Allied and Venture, is in an amount less than the then applicable combined prudential limit for Allied and Venture for exposure in a single risk, then, if the other participants in the proposed transaction include one or more of the Venture Partners or their affiliates, the board of directors must make a specific determination that such lesser participation is in the best interests of Allied and Venture; (v) the board of director's approval of the participation by Allied or venture in any transaction in which any of the Venture Partners or their affiliates is also to be a participant must be based on findings by the board of directors that: (a) The terms of the proposed transaction including the consideration to be paid and received, and including specifically any fees to be paid by any participant to any other participant in the transaction, are reasonable and fair to the shareholders of Allied Capital and do not involve overreaching of Allied, Venture or Allied Capital's shareholders on the part of any person concerned; and (b) the proposed transaction is consistent with the interests of the shareholders of Allied Capital and is consistent with the policy of Allied and Venture as recited in filings made by Allied with the Commission under the Securities Act of 1933 ("1933 Act") or the Act, the registration statements and reports filed by Allied Capital under the Securities Exchange Act of 1934, Allied Capital's reports to shareholders and the limited partnership agreement of venture; (vi) the bond of directors will record in its minutes and preserve in its records, for such periods as records are required to be maintained under section 31(a) of the Act, a description of each transaction in which Allied or Venture participates and in which any of the Venture Partners or their affiliates is also a participant, the findings on which any determination pursuant to paragraph (ii), (iii), (iv) or (v) is based, the information and materials on which such findings are based, and the basis therefor; (vii) no member of the board of directors will be a party to or have a financial interest in such transaction other than: (a) As the owner of securities of which Allied Capital is the issuer, or (b) as the owner, directly or indirectly, of a limited partnership interest in Venture, or (c) as the owner of securities of which any of the Venture Partners or their affiliates is the issuer; provided, however, that any member of the board of directors who is a director or officer of, or owner of

securities issued by, any of the Venture Partners or an affiliate thereof will not take part in any determination pursuant to paragraphs (ii), (iii), (iv) or (v) with respect to the participation by such Venture Partner or an affiliate thereof. For the purpose of this paragraph, a director, officer or employee of Allied or Advisory or a Venture Partner or an affiliate thereof who receives his usual and ordinary compensation for usual and customary services as a director, officer, employee or professional consultant to any such entity shall not be deemed to have a financial interest or in the transaction solely by reason of his receipt of such compensation; (viii) neither Allied nor Venture will make any investment in an entity in which a Venture Partner or a affiliate of a Venture Partner, but not Allied or Venture, has previously invested; (ix) the basis as to time of investment and unit prices on which any Venture Partner or an affiliate thereof participates in the propose transaction will be identical to the basic on which Allied or Venture participates therein. For this purpose, the payment to Allied or Advisory or the Venture Partner or an affiliate thereof, by any participant in the transaction other than Allied Capital, any subsidiary of Allied Capital, Venture, any of the Venture Partners or any affiliate thereof, of any reasonable fee will not be considered as differentiating the basis of the Venture Partner's or its affiliate's participation from that of Allied or Venture; (x) Allied and Venture, on the one hand, and any Venture Partner or its affiliates, on the other, will exercise any warrants, conversion privileges, or other rights to acquire equity securities of an issuer, or affiliate of an issuer, which were acquired by Allied and or Venture on the one hand, and such Venture Partner or an affiliate thereof on the other, in a transaction in which they both participated, only at the same time and in amounts proportionate to their respective holdings of such rights; (xi) Allied and Venture on the one hand, and any Venture Partner or its affiliates on the other, will sell, exchange, or otherwise dispose of an interest in any security of a class held by Allied and or Venture, only at the same times and for the same unit consideration and in amounts proporationate to their respective holdings of such securities, unless at the time of sale there exists a public trading market in securities of such class and the sale by the respective holder is made in such market; (xii) the expenses, if any, of the distribution of any securities registered under the 1933 Act and sold by Allied, Venture and any of the Venture Partners at the same time will be shared by the sellers in proportion to the respective amounts they are selling.

Applicants contend that the proposed transactions are consistent with the applicable standards under sections 6(c) and 17(d) of the Act and Rule 17d–1 thereunder. Applicants state that Allied and Venture would participate in these transactions on a basis identical to that of Venture Partners of their affiliates. Applicants further state that the payment to Advisory or a participating Venture Partner (or an affiliate thereof) of a financing fee for services in structuring and negotiating any specific transaction does not make the basis of its participation more or less advantageous than that of any other participant.

Applicants indicate that the board of directors of Allied capital, the SBIC subsidiaries and Advisory are identical. Applicants assert that all of the members of the board of directors have a personal financial stake (often substantial) in either Allied or Venture or both so that in any dealings with third persons, including Venture Partners, their interests are wholly congruent with those of Allied and Venture and adverse to those of the third person. Exceptionally, a possible conflict could arise where there is under consideration a participation in an investment transaction with a Venture Partner (or an affiliate thereof) of which one of the members of the board of directors is an executive or in which he otherwise has an interest, and in any such case, Applicants propose that that member may not take part in any determination with respect to such participation. Subject to that exception, Applicants undertake that any determination of the board of directors contemplated in the proposed co-investment rules be made by a majority of its members, regardless of whether they are interested persons of Allied Capital or have a personal financial interest in Venture.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 22, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

[FR Doc. 86–4885 Filed 3–5–86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. IC–14964; 812–6257]

Applications, Hearings, Determinations, etc.: Pactel Capital Resources

February 28, 1986.

Notice is hereby given that Pactel Capital Resources, a California corporation ("Applicant"), 140 New Montgomery Street, San Francisco, CA 94105, filed an application on December 10, 1985, and an amendment thereto on February 28, 1986, for an order of the Commission, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below, and to the Act and the rules thereunder for a complete text of the applicable provisions.

According to the application, Applicant is a wholly-owned subsidiary of Pacific Telesis Group ("PTG"), a Nevada corporation and one of the seven regional holding companies formed pursuant to the consent decree ("Consent Decree") which arose out of anti-trust litigation by the Department of Justice ("DOJ") and which was agreed to by the American Telephone and Telegraph Company ("AT&T") and the DOJ with certain modifications required by the United States District Court for the District of Columbia ("Court"). Applicant states that PTG owns Pacific Bell and Nevada Bell, telephone operating companies subject to regulation by the California Public Utilities Commission and the Public Service Commission of Nevada, respectively. Both Pacific Bell and Nevada Bell are regulated as to authorized rates of return on their rate bases by the Federal Communications Commission and by the California and Nevada State Commissions. Applicant also states that PTG engages in other business activities through the activities

VOL
51
ISS
44
MR
6
1986
UMI

of various subsidiaries ("Diversified Subsidiaries"), as permitted under the Consent Decree and pursuant to waivers obtained thereunder from the Court. The application indicates that PTG may establish additional subsidiaries in the future. Applicant represents that neither PTG nor any of the Diversified Subsidiaries which is to obtain financing through Applicant is an investment company under section 3(a) of the Act.

The applicant states that at December 31, 1984, PTG had total assets of $18.1 billion and at September 30, 1985, PTG's total assets were $19.5 billion. For the year ended December 31, 1984, PTG had net income of $829 million on revenue of $7.8 billion, and for the nine month period ended September 30, 1985, PTG's net income and revenue were $721 million and $6.3 billion, respectively. In the year ended December 31, 1984, Pacific Bell and Nevada Bell collectively declared payable $885.1 million in cash dividends to PTG, and an additional $174.1 million in net income was available for such dividends if required.

The Applicant states that its sole business will be to provide funds which PTG will use to finance its diversification activities and those of the Diversified Subsidiaries. The Applicant will issue debt instruments for sale in the United States and foreign commercial paper and debt markets ("Securities"), and, in turn, loan the proceeds of those issuances to PTG and the Diversified Subsidiaries. Applicants represents that all loans by it to PTG and the Diversified Subsidiaries will bear interest equal to that which Applicant is required to pay to obtain funds through its corresponding borrowings, plus a small mark-up sufficient to cover operating costs. Applicant further states that the amount and maturity of such loans will allow Applicant to make timely payments of principal and interest on its borrowings. According to the application, the Applicant will remit to PTG and/or the Diversified Subsidiaries at least 85% of the cash or cash equivalents raised by the Applicant as soon as practicable after receipt thereof, but in no event later than six months after the Applicant receives such as or cash equivalents. The Applicant represents that it will not issue voting securities to any person other than PTG, and that it will not hold securities other than government securities and other securities as permitted by Rule 3a–5(a)(6) under the Act.

Applicant states that the Consent Decree limits the lines of business which may be engaged in by the regional holding companies such as PTG. Applicant further states that, pursuant to the Consent Decree, the Court has held that regional holding companies may be permitted to engage in certain ventures (such as many of the activities of the Diversified Subsidiaries), so long as any guarantee of obligations owed on Securities issued to finance the activities thereof would not grant recourse against the stock or assets of the telephone operating companies. Applicant represents that PTG is therefore prohibited from guaranteeing obligations owed on Securities issued by or for the benefit of Diversified Subsidiaries if the guarantee would permit recourse against the stock or assets of Pacific Bell or Nevada Bell.

The Applicant states that before it issues any Securities, PTG and the Applicant will enter into a Support Agreement ("Support Agreement") pursuant to which PTG will agree to cause the Applicant to maintain a positive tangible net worth (as determined in accordance with generally accepted accounting principles) and, if the Applicant is unable to pay when due principal, interest and premium, if any, owed by it in connection with the Securities, PTG will then provide funds to the Applicant to assure that the Applicant will be able to meet its obligations in connection with the Securities. The Support Agreement will also provide that in the event of any default by PTG in meeting its obligations under the Support Agreement, or in the event of default by the Applicant in the timely payment of principal, interest, and premium, if any, owed on any Securities, holders of Securities or, if applicable, a trustee acting on their behalf shall be entitled to proceed directly against PTG, so long as no holder of Securities or trustee acting on their behalf will have recourse to or against the stock or assets of Pacific Bell or Nevada Bell. The Support Agreement will also provide that PTG shall own all of the outstanding voting capital stock of the Applicant throughout the term of the Support Agreement, that without the written consent of all of the holders of the then outstanding Securities the Support Agreement may not be modified or amended in ways less favorable to holders of Securities than the existing agreement, and that it may be terminated only after all outstanding Securities have been retired.

Applicant represents that the Securities are expected to consist of short-term, intermediate-term and long-term debt securities to be offered and sold either in transactions exempt from the registration requirements of the Securities Act of 1933 ("1933 Act") or in public offerings of securities registered under the 1933 Act. The Applicant further represents that, in the case of a public offering of any of its securities not exempt from the registration requirements of the 1933 Act, the Applicant and PTG will, prior to offering such securities, file a registration statement under the 1933 Act with the Commission and will not sell such securities until the registration statement is declared effective by the Commission and any related indenture is qualified under the Trust Indenture Act of 1939 to the extent required thereunder. The Applicant further represents that it and PTG will comply with the prospectus delivery requirements of the 1933 Act in connection with the offering and sale of such securities.

Applicant states that, in the case of an offering of securities not requiring registration under the 1933 Act, the Applicant will provide each offeree with disclosure materials which will include a description of the business of PTG and other data of the character customarily supplied in such offerings. In the event of subsequent offerings, those materials will be updated at the time thereof to reflect material changes in the financial condition of PTG and its subsidiaries, taken as a whole.

Applicant represents that prior to any issuance and sale of its Securities in the United States capital market, those Securities shall have received one of the three highest investment grade ratings from at least one nationally recognized rating organization. No such rating shall be required to be obtained, however, if in the opinion of counsel for Applicant an exemption from registration is available with respect to such issue and sale under section 4(2) of the 1933 Act.

The Applicant represents that it was formed to function as a financing conduit for the diversification activities of PTG and PTG's Diversified Subsidiaries, and to advance the efficient administration and management of financing activities for PTG and certain of the Diversified Subsidiaries. The Applicant states that it meets all of the requirements for the Rule 3a–5 exemption under the Act except for the rule's requirement that the securities issued by a finance subsidiary be unconditionally guaranteed by its parent company. The Applicant argues that PTG's execution and delivery of the Support Agreement provides a satisfactory alternative to an unconditional guarantee of the Securities since the Support Agreement enables purchasers of the Securities to proceed directly against PTG in the

event of a failure by the Applicant to pay principal, interest or premium, if any, when due on the Securities, limited only so as to exclude the stock or assets of Pacific Bell and Nevada Bell. Applicant states that, despite this limitation, funds available to satisfy PTG's obligations under the Support Agreement include net income available for payment of dividends to PTG by Pacific Bell and Nevada Bell, as well as the assets of PTG and the Diversified Subsidiaries other than the stock or assets of Pacific Bell and Nevada Bell. Therefore, Applicant argues that the Support Agreement enables purchasers of Applicant's debt instruments to look utlimately to PTG, not the Applicant, for repayment. In addition, the Applicant points out that, given the limitations of the Consent Decree and the subsequent orders in which the Court has restricted the kind of guarantee that PTG is able to provide to the Applicant, by means of the Support Agreement PTG intends to support the Securities with all legally available assets. By means of the Support Agreement, PTG will make available to the holders of the Securities the same assets which would be available to the holders of PTG's own securities used to fund PTG's similar diversification activities, and thus Applicant argues that the Support Agreement will put the purchasers in the same position as if PTG itself had issued the Securities directly.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 24, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-22957; File Nos. SR-CBOE-85-49, SR-Amex-86-2, SR-NYSE-86-6]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc., American Stock Exchange, Inc., New York Stock Exchange, Inc.; Order Approving Proposed Rule Change and Granting Accelerated Approval to Proposed Rule Changes

The Chicago Board Options Exchange, Incorporated ("CBOE") submitted on December 13, 1985 and the American Stock Exchange, Inc. ("Amex") and the New York Stock Exchange, Inc. ("NYSE") submitted on January 16, and February 4, 1986 respectively, copies of proposed rule changes pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to extend the close of trading in index options traded on the above-named exchanges from 4:10 p.m. to 4:15 p.m. (New York time).[1]

Notice of the proposed rule changes together with their terms of substance was given by the issuance of Commission releases (Securities Exchange Act Release Nos. 22790, January 13, 1986, 22842, January 27, 1986, and 22881, February, 1986, respectively) and by publication in the Federal Register (51 FR 2614, January 17, 1986, 51 FR 4253, February 3, 1986, and 51 FR 5626, February 14, 1986, respectively). No comments have yet been received with respect to the proposed rule changes.

The CBOE is amending its Rules 6.1 (Days and Hours of Business), 6.2 (Trading Rotations), 11.1 (Exercise of Optionl Contracts) and 24.6 (Days and Hours of Business for Index Options) to extend the closing and exercise cut-off time for CBOE index options from 3:10 p.m. to 3:15 p.m. (Chicago time).[2] The Amex is amending its Rules 1 (Hours of Business) and 903C (Series of Stock Index Options) to extend the trading hours in its Major Market Index ("XMI") options from 4:10 p.m. to 4:15 p.m. (New York time), and to similarly extend the cut-off time for exercising XMI options.[3] The NYSE also plans to extend the closing and exercise time in its index options from 4:10 p.m. to 4:15 p.m. by amending Rules 717 (Trading Rotations, Halts and Suspensions), 780 (Exercise of Option Contracts), and Rule 702 (Days and Hours for Options Trading).[4]

Futures contracts and options on identical or substantially similar indexes allow investors and traders to hedge their positions in one contract with positions in the other. The purpose of the proposed rule changes is to coordinate the close of trading in index options on the CBOE, Amex and NYSE with the close of trading in broad-based stock index futures contracts traded elsewhere thus enhancing their ability to use these instruments for hedging purposes.

For example, at present on the CBOE, market makers in the Standard & Poor's ("S&P's") 100 Stock Index ("OEX") frequently assume positions in the S&P's 500 Index Future ("SP") traded at the Chicago Merchantile Exchange ("CME") to hedge their positions in OEX. Conversely, investors and traders with positions in SP often rely upon OEX to hedge their futures positions. Because trading at CBOE ceases at 3:10 p.m. (Chicago time) while trading at CME continues until 3:15 p.m., investors and market makers with positions in both OEX and SP are unable to adjust their positions in the former in response to price movements in the latter during the last five minutes of trading.

On the NYSE, investors with positions in NYSE Composite Index futures traded on the New York Financial Futures Exchange ("NYFE") frequently offset those positions with options positions on the NYSE Composite and Double Indexes. Conversely, positions held in NYSE index options are offset with positions in NYSE Composite Index futures. NYSE indicates that the current difference in closing times hobbles the adjustment of risk by investors and traders with futures-options offsetting positions. NYSE believes that synchronizing the closing times for the options and futures contracts will solve this problem.

On the Amex, market participants frequently assume positions in the Major Market Index ("XMI") futures contracts traded on the Chicago Board of Trade

---

[1] The CBOE rule change would effectively extend trading in CBOE index options from 3:10 p.m. to 3:15 p.m. (Chicago time).

[2] Changes to CBOE Rule 6.2 clarify that open trading on expiring series of index options shall be permitted on the last business day prior to expiration until 3:15 p.m. (Chicago time), but a closing rotation for such expiring series of index options shall not be employed. Changes to Rule 11.1 extend to 3:15 p.m. the deadline for submission of exercise memoranda and advices.

[3] Amex Rule 903c clarifies that on the business day prior to expiration, index options shall trade until 4:10 p.m., unless the Board of Governors has established different hours of trading for certain index options.

[4] Changes to NYSE Rule 717.10(c) clarify that open trading in all index option series continues until the close of trading, even on the business day prior to expiration, and that should be closing rotation in index options be necessary, it should commence at 4:15 p.m. as well. Amendments to Rule 780.10 extend the deadline for submission of exercise memoranda and advices to 4:15 p.m. to coincide with the end of trading.

VOL 51
ISS 44
MR 6
1986
UMI

("CBT") to hedge their positions in XMI options. Amex desires to coordinate the daily close of trading in XMI options with the 4:15 p.m. (3:15 p.m. Chicago time) close of trading in the CBT's XMI futures contracts. As present, market participants who assume positions in both XMI futures and options contracts are unable to adjust their positions in the XMI options in response to price movements in the XMI futures during the last five minutes of trading.

In addition to providing market participants with the opportunity to more fully hedge their positions, identical index option and futures closing times should provide a proportional increase in trading volume and add to the depth and liquidity of the market in index options.

The rule changes will also benefit market participants by ensuring the availability of last sale information of the respective indexes' component stocks. Currently, the tape "run-off" showing the last sales of the various indexes' component stocks occasionally continues beyond 4:10 p.m. (3:10 p.m. Chicago time). Extending the index option trading day by five minutes will enable market participants to take such information into account in their trading activity.

For these reasons, the Commission finds that the CBOE's proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the Amex and NYSE proposed rule changes prior to the thirtieth day after the date of publication of the proposals in the **Federal Register** in that both proposed rule changes are substantially identical to the CBOE proposal which was noticed for comment for the full 21 day comment period and is being approved herein by the Commission. No comments on the CBOE proposal were received by the Commission. The Commission believes that extending the trading hours of index options to coordinate with the hours of trading of similar futures indexes will provide index options market participants with the opportunity to adjust index options positions to reflect price changes in corresponding futures indexes, thereby promoting fair hedging opportunities, enhanced last sale information and adding to the depth and liquidity of the market in index options.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule changes are approved. For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 27, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Heating; Cincinnati Stock Exchange, Inc.

February 25, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following stock:

Triangle Industries, Inc., Cumulative Preferred Stock, $1.00 Par Value, (File No. 7–8845).

This security is listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 19, 1986 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34–22946; File No. SR–MSRB–86–2]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board

The Municipal Securities Rulemaking Board ("MSRB"), Suite 800, 1818 N Street NW., Washington, DC 20036–2491, submitted on January 2, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to establish a new rule governing transfer of customer accounts from one municipal security broker or dealer to another.

Notice of the proposed rule change was given by the issuance of Securities Exchange Act Release No. 22810 (January 17, 1986) and by publication in the **Federal Register** (51 FR 3288, January 24, 1986). No comments were received.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the MSRB, and, in particular, the requirements of section 15B(b)(2)(c) and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: February 25, 1986.

John Wheeler,

Secretary.

[Public Notice CM-8/947]

Shipping Coordinating Committee; Meeting

The Shipping Coordinating Committee will conduct an open meeting on March 27, 1986 at 9:30 AM in Room 6319 of U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington.

The purpose of the meeting is to review the results of the 55th Session of the International Maritime Organization Legal Committee, and to consider the U.S. position for the 56th Session. The 56th Session will be held in London on April 7–11, 1986.

At the 56th Session, the Legal Committee will continue its preparation of a draft Convention on salvage. The Legal Committee will also consider an UNCTAD proposal to establish a joint IMO/UNCTAD working group to address the international regime of maritime liens and mortgages. Finally, the Committee will consider a proposed resolution regarding participation in official inquiries into maritime casualties.

Members of the public may attend up to the seating capacity of the room.

For further information, contact Captain Frederick F. Burgess, Jr., U.S. Coast Guard (G–LMI), Washington, D.C., Telephone (202) 426–1527.

Dated: February 28, 1986.

Richard C. Scissors,

Director, Shipping Coordinating Committee.

BILLING CODE 4710-07-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

Seminar on Annex II of the 1973 International Convention for the Prevention of Pollution From Ships (MARPOL 73/78)

AGENCY: Coast Guard, DOT.

ACTION: Notice of Annex II seminar.

SUMMARY: The purpose of this notice is to inform the public of a seminar that will be conducted by the Coast Guard on April 9, 1986 to discuss Annex II of MARPOL 73/78. Annex II controls operational and accidental pollution from ships carrying hazardous chemicals in bulk and affects the ports and terminals at which the vessels are loaded and unloaded. Written comments and questions concerning Annex II requirements submitted during the comment period will be responded to at this seminar.

DATES: The seminar will take place on April 9, 1986 from 9:30 A.M. to 3:30 P.M. Any questions and comments to be responded to at this seminar must be submitted by March 26, 1986.

Place: Room 2415, 2100 Second Street SW., Coast Guard Headquarters, Washington, DC.

ADDRESSES: Persons interested in attending or in submitting any questions and comments should write to U.S. Coast Guard (G–MTH–1), 2100 Second Street SW., Washington, DC 20593.

FOR FURTHER INFORMATION CONTACT: For any questions regarding the Annex II Seminar or this notice, contact Ms. Barylski, Hazardous Materials Branch (G–MTH–1), Room 1214, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593; (202) 426–1217, from 7:00 a.m. to 3:30 p.m., Monday through Friday, except federal holidays.

SUPPLEMENTARY INFORMATION: This seminar is open to the public, but attendees must pre-register. Those interested in attending must notify Ms. Barylski (see **FOR FURTHER INFORMATION**) by April 2, 1986.

The Coast Guard will hold this seminar to inform the marine chemical transportation industry of impending requirements of Annex II of the MARPOL Protocol (MARPOL 73/78) (International Convention for the Prevention of Pollution from Ships, 1973 (done at London November 2, 1973), as modified by the Protocol of 1978 relating to the International Convention for the Prevention of Pollution from Ships, 1973 (done at London February 17, 1978). The purpose of Annex II of MARPOL 73/78 is to control operational and accidental pollution from ships carrying hazardous polluting chemicals in bulk. Annex II will affect ocean going chemical vessels that transport polluting chemicals in bulk and the ports and terminals at which these chemicals are loaded and unloaded. These requirements will be discussed at this seminar, however, primary emphasis will be on vessel requirements. A public meeting is planned for discussing Annex II requirements for reception facilities. This meeting will be announced in a future **Federal Register**. The following IMO (International Maritime Organization) Papers will be included in discussions:

1. MARPOL Annex II as amended by the 22nd session of the IMO Marine Environment Protection Committee;

2. Unified interpretations of Annex II;

3. Standards for the Procedures and Arrangements for the Discharge of Noxious Liquid Substances;

4. Amendments to the Bulk Chemical Code and the International Bulk Chemical Code that include pollution concerns;

5. IMO Guidelines on the Provisions of Adequate Reception Facilities in Ports, Part II (Noxious Liquid Substances).

Members of the U.S. SOLAS Working Group on Bulk Chemicals will be mailed copies of these IMO papers. Others interested in obtaining copies in advance of the meeting may do so by a telephone or written request (see **FOR FURTHER INFORMATION**). Additional copies will be available at the meeting. Seminar Outline:

1. Introduction and opening remarks.
2. Introduction to IMO papers.
3. Requirements for ocean going chemical tank vessels.
4. Question and answer period on vessel requirements for comments received prior to March 26, 1986.
5. As time permits, verbal comments and questions will be answered.

Dated: March 3, 1986.

J.W. Kime,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

Federal Aviation Administration

Radio Technical Commission for Aeronautics (RTCA); Special Committee 151—Airborne Microwave Landing Systems (MLS) Area Navigation Equipment; Meeting

Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 151 on Airborne Microwave Landing Systems (MLS) Area Navigation Equipment to be held on April 2–4, 1986, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of the Minutes of the Committee Meeting Held on December 16–18, 1985; (3) Review and Discuss Special Committee 137 (Aiborne Air Navigation Systems) and the European Organization for Civil Aviation Electronics (WG–27) Activities; (4) MLS Program Status Report; (5) Technical Presentations; (6) Report of Working Group Activities; (7) Review Sixth Draft of Committeee Report on Minimum Operational Performance Standards for Airborne MLS Area Navigation Equipment: (8) Working Groups Meeting in Separate Sessions; (9) Committee Meeting in Plenary Session; (10) Assignment of Tasks; (11) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCS Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682–0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC on February 28, 1986.

Karl F. Bierach,

Designated Officer.

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement; Madison Co., Illinois

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a four-lane highway from Federal-Aid Interstate 270 (FAI–270) at the northern terminus of FAI–255 to U.S. Route 67 north of Alton in Madison County, Illinois. The proposed project would be designated Federal-Aid Primary Route 413 (FAP 413).

FOR FURTHER INFORMATION CONTACT: Mr. P.L. Olson, District Engineer, Federal Highway Administration, 320 West Washington Street, 7th Floor, Springfield, Illinois 62701, Telephone: (217) 492–4627. Mr. M.J. Macchio, Engineer of Location and Environment, Division of Highways, Illinois Department of Transportation, 2300 South Dirksen Parkway, Springfield, Illinois 62764, Telephone: (217) 782–1959.

SUPPLEMENTARY INFORMATION: The Proposed Action is to construct a divided, multi-lane highway facility within Madison County, Illinois, beginning at a point of intersection with I–270 at the northern terminus of I–255, and running in north and northwesterly directions to terminate at U.S. Route 67 north of Alton, Illinois. The project corridor is located generally in the urbanizing fringe of several cities and villages in the Illinois portion of the St. Louis Standard Metropolitan Statistical Area (SMSA).

The facility has been designated as Federal-Aid Primary (FAP) Route 413 and will be approximately 20 miles in length.

The need for construction of FAP 413 is based on several major factors including transportation demands, safety considerations, enhancement of economic development, and improved traffic circulation among communicaties in the project area.

At this time, it has not been determined if the facility will be a fully access controlled freeway or a limited access expressway. However, regardless of the nature of the highway, interchanges or intersections likely will be provided at all State routes and other major high-volume highways. Numerous alignment alternatives are presently being evaluated for the proposed project including the no-action alternative.

A formal scoping process will be undertaken as a part of this project. The process will include meetings, informal coordination, and review sessions as appropriate. The first scoping meeting with interested agencies is scheduled on March 12, 1986. Further details and a scoping information packet may be obtained from Mr. Max Landes, Illinois Department of Transportation, 2300 South Parkway, Springfied, Illinois 62764, Telephone: (217) 785–4315.

To ensure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to FHWA or IDOT at the addresses provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of Executive Order 12372 regarding State and local clearinghouse review of Federal and federally assisted programs and projects apply to this program.)

Issued on February 24, 1986.

D.L. Merida,

Staff Specialist for Environment.

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains extensions and lists the following information: (1) The department or staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) how often the form must be filled out, (5) who will be required or asked to report, (6) an estimate of the number of responses, (7) an estimate of the total number of hours needed to fill out the form, and (8) an indication of whether section 3504(h) of Pub. L. 96–511 applies.

ADDRESSES: Copies of the form and supporting documents may be obtained from Nancy C. McCoy, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389–2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place, NW, Washington, DC 20503, (202) 395–7316.

Dates: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: February 28, 1986.

By direction of the Administrator.

PRESIDENTIAL COMMISSION ON THE SPACE SHUTTLE CHALLENGER ACCIDENT

[Notice 86–18]

Presidential Commission on the Space Shuttle Challenger Accident; Meeting

AGENCY: Presidential Commission on the Space Shuttle Challenger Accident.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the Commission announces a forthcoming meeting.

DATE AND TIME: March 6, 1986, beginning at 9:30 a.m.

ADDRESS: NASA Kennedy Space Center, Galaxy Theater, Visitor's Center, Kennedy Space Center, FL 32899.

FOR FURTHER INFORMATION CONTACT: Dr. Alton G. Keel, Executive Director, Presidential Commission on the Space Shuttle Challenger Accident (202/453–1797).

Purpose of meeting: To review photographic and film evidence of the Space Shuttle Challenger launch and accident and to receive testimony on the results of failure analysis.

SUPPLEMENTARY INFORMATION: The Presidential Commission on the Space Shuttle Challenger Accident was established as a group of distinguished leaders of the government and the scientific, technical and management communities to investigate the accident of the Space Shuttle Challenger which occurred on January 28, 1986.

Exceptional circumstances requiring less than 15 days notice: the meeting is required to be held promptly due to the Presidential direction that the Commission investigate the January 28, 1986, Space Shuttle Challenger accident and submit a final report to the President and the Administrator of the National Aeronautics and Space Administration within 120 days of issuance of Executive Order 12546, dated February 3, 1986.

Type of meeting: Open.

March 5, 1986.

Richard L. Daniels,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

Sunshine Act Meetings

Federal Register
Vol. 51, No. 44
Thursday, March 6, 1986

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

Item
Civil Rights Commission 1
Federal Election Commission 2
Pacific Northwest Electric Power and Conservation Planning Council 3
Securities and Exchange Commission 4, 5

1

COMMISSION ON CIVIL RIGHTS

PLACE: 1121 Vermont Avenue, NW., Washington, DC, Room 512.

DATE AND TIME: Friday, March 7, 1986, 9:00 a.m.–5:00 p.m.

STATUS OF MEETING: Open to the public.

MATTERS TO BE CONSIDERED:

I. Approval of Agenda
II. Approval of Minutes of Last Meeting
III. Staff Director's Report for January
  A. Status of Funds
  B. Personnel Report
  C. Office Directors' Reports
IV. Resolution Authorizing Further Hearing on Protection of Handicapped Infants
V. Consideration of the Statement on Indian Rights in Northern Wisconsin
VI. Consideration of the Central States SAC report, *State Enforcement of Nondiscrimination Requirements in Education programs*
VII. Further Discussion of Project Concepts
VIII. Panel Presentation on Religious Discrimination Issues
IX. Civil Rights Developments in the Rocky Mountain Region

PERSON TO CONTACT FOR FURTHER INFORMATION: Barbara Brooks, Press and Communications Division, (202) 376–8312.

Lawrence B. Glick,
Solicitor.

2

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, March 11, 1986 at 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC

STATUS: This meeting will be closed to the public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. 437g.

Audits conducted pursuant to 2 U.S.C. 437, and 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration.
Internal personnal rules and procedures or matters affecting a particular employee.

* * * * *

DATE AND TIME: Thursday, March 13, 1986 at 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of dates of future meetings
Correction and approval of Minutes
Draft AO 1986–7
  William B. Dosland, American Crystal Sugar Company
Routine administrative matters.

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, Telephone: 202–376–3155.

Marjorie W. Emmons,
Secretary of the Commission.

3

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

STATUS: Open.

TIME AND DATE: March 12–13, 1986, 9:00 a.m.

PLACE: Council Offices, 850 S.W. Broadway, Suite 1100, Portland, Oregon.

MATTERS TO BE CONSIDERED:

1. Staff Presentation on Bonneville Power Administration, Corps of Engineers, Bureau of Reclamation, and Federal Energy Regulatory Commission Fiscal Year 1987 Budget.
2. Modeling of Salmon and Steelhead Life Cycles.
3. Public Comment on Issue Paper on Wildlife Mitigation for Hungry Horse Dam.
4 Council Business.
5. Public Comment.

FOR FURTHER INFORMATION CONTACT: Ms. Bess Atkins at (503) 222–5161.

Edward Sheets,
Executive Director.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [51 FR 6199 February 20, 1986].

STATUS: Closed meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Tuesday, February 11, 1986.

CHANGE IN THE MEETING: Additional item.

The following item was considered at a closed meeting held on Thursday, February 20, 1986, following the 10:00 a.m. open meeting.

Consideration of *amicus* participation.

Chairman Shad and Commissioners Cox, Peters, Grundfest and Fleischman determined that Commission business required the above change and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Ronald A. Schy at (202) 272–2468.

John Wheeler,
Secretary.
February 28, 1986.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [51 FR 6613 February 25, 1986].

STATUS: Closed meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Thursday, February 20, 1986.

CHANGE IN THE MEETING: Additional item/meeting.

The following additional item was considered at a closed meeting held on Tuesday, February 25, 1986, at 2:30 p.m.

Litigation matter.

The following items were considered at a closed meeting held on Thursday,

February 27, 1986, following the 10:00 a.m. open meeting.

Consideration of *amicus* participation.

Subpoena enforcement action.

Chairman Shad and Commissioners Cox, Peters, Grundfest and Fleischman determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Judith Axe at (202) 272–2092.

John Wheeler,
Secretary.
February 28, 1986.

14 CFR Part 36

Noise Standards for Helicopters in the Normal, Transport, and Restricted Categories; Proposed Rule

VOL 51
ISS 44
MR 6
1986
UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 36

[Docket No. 24929; Notice No. 86–3]

Proposed Noise Standards for Helicopters in the Normal, Transport, and Restricted Categories

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to revise noise certification standards for aircraft to add provisions applicable to helicopters. These proposals would apply to civil helicopters in the normal, transport, and restricted categories, and would provide noise level limits and test procedures for the issuance of original and amended type certificates. The notice also proposes to prohibit changes in type design of helicopters that might increase their noise levels beyond certain limits. While this notice contains several provisions similar to those contained in an earlier notice withdrawn in 1981, it differs from that notice in several important aspects. One of these is the absence of any proposal to limit the further manufacture of older non-complying helicopter types; another is the commonality between the proposed standards and those adopted by the International Civil Aviation Organization (ICAO). The FAA believes that these rules are necessary to provide current and future relief and protection to the public health and welfare from the noise of affected helicopters.

DATE: Comments must be received on or before June 5, 1986.

ADDRESSES:

Send comments on the proposed rule in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Docket No. 24929, 800 Independence Avenue, SW., Washington, D.C. 20591;

Or deliver comments in duplicate to: FAA Rules Docket, Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591

Comments may be examined in the Rules Docket, weekdays except Federal Holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Tedrick, Noise Policy and Regulatory Branch (AEE–110), Noise Abatement Division, Office of Environment and Energy, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 755–9027.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasonable regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 24929." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

Synopsis of the Proposal

Part 36 of the Federal Aviation Regulations (14 CFR Part 36) contains noise standards for aircraft type and airworthiness certification. As the part is currently organized, Subparts B and C and Appendices A, B, and C apply to transport category large airplanes and subsonic turbojet powered airplanes regardless of category. Appendix F contains the provisions applicable to propeller-driven small airplanes. This notice proposes to prescribe noise levels and test procedures for civil helicopters certificated in the normal, transport, and restricted categories. These proposals include rules governing the issuance of original and amended type certificates for helicopters for which application is made on and after the adoption date of this proposed amendment. The proposed rule would prohibit certain growth or other design changes if those changes might result in noise levels beyond prescribed limits. The proposed rule also provides the test conditions and procedures for conducting helicopter noise tests to demonstrate compliance with the prescribed noise levels, including the technical noise measurement and evaluation specifications employing Effective Perceived Noise Level (EPNL) as the evaluation unit.

The proposed helicopter noise standards, if adopted, would have the following effects:

A. Certification Procedure Provisions

FAR Part 21, as amended would prescribe the procedural requirements for noise certification of civil helicopters certificated in the normal, transport, and restricted categories. Those proposed amendments apply to issuance of new type certificates in the normal, transport, or restricted categories for which application is made on or after the publication date of this notice. The effect of these provisions would be to prohibit issuance of the affected certificates after the effective date of the amendments for helicopters which have not been shown to comply with the applicable noise requirements of Part 36. Thus, newly type certificated helicopters (except those for which application was made before the publication date of this notice) would be required to comply with Part 36 noise standards. Further, proposed "acoustical change" provisions would prescribe requirements for certain changes in type design of helicopters which might increase their noise levels. Appropriate references to Part 36 acoustical change requirements would be contained in Part 21. The proposed acoustical changes for helicopters would apply to any type design change (including operational limitations) that the Administrators determines might increase noise levels of that helicopter, such as changes in rotor size or trim, rpm, number of blades, weight or power. Under the proposal, test procedures, conditions, and noise limits for acoustical changes would be prescribed under Part 36.

B. Noise Standard Provisions

FAR Part 36 would be amended to prescribe noise standards for civil helicopters certificated in the normal, transport, and restricted categories. These provisions are similar to those currently applicable to many other aircraft under Part 36 and are summarized as follows:

1. *General.* The general provisions of Part 36, Subpart A, would be amended to provide applicability, definitional, and acoustical change provisions covering civil helicopter noise certification. For example, the word "aircraft" is substituted for "airplane" in those provisions whose applicability simply would be expanded to include helicopters. Under the proposal, definitions identify *two* "stages" or levels of *noise* ("Stage 1" and "Stage 2" helicopter noise levels). *Stage 2* helicopters are those which have been shown to comply with the proposed Stage 2 noise levels. Stage 1 helicopters are those which have not been shown to comply.

A new section would be added to prescribe noise requirements for those changes in type design defined as "acoustical changes" under FAR Part 21. Those provisions would apply to acoustical change approvals applied for on and after the publication date of this notice. Specifically, Stage 1 helicopters would be prohibited from increasing any noise level (takeoff, flyover, or approach) after a change in the type design. For acoustical changes in Stage 1 helicopters, the proposed tradeoff provisions could not be used to increase any Stage 1 noise level. A Stage 2 helicopter before a change in type design could not be a Stage 1 helicopter after the design change. It should be noted that the ICAO standards applying to acoustical changes of Stage 1 helicopters are more stringent than those proposed herein. Under ICAO Annex 16, all helicopters must meet the State 2 limits after such a change.

As proposed, the helicopter noise standards would apply to all helicopters, as defined under FAR Part 1, except helicopter configurations designated exclusively for agricultural aircraft operations, for dispensing fire fighting materials, or for carrying external loads. This exception is similar to the one for small propeller-driven airplanes, but it is especially important for helicopters since nearly every type has provisions for at least occasionally carrying external loads. Such loads would make it extremely difficult to meet either the weight or performance requirements; thus, the proposed noise standards would only apply to internal load configurations. On the other hand, an exclusion of all helicopters with external load capability would defeat the entire purpose of the regulation, unless that exclusion applies only to those aircraft type certificated exclusively for external load operation. It should be noted that it is proposed to make these standards applicable to type certification actions for which applications are received on or after the date of this notice. The intent here is to preclude premature applications by those seeking to avoid compliance with the proposed standards.

At a May 1983 ICAO meeting in Montreal, U.S. helicopter manufacturers suggested excluding helicopters "designed for mineral exploration and recovery, off shore, ranching, or similar remotely located purposes." ICAO did not accept the proposal and FAA has not included it in this notice, since it is felt that the wording is too broad and might reasonably include every current and future helicopter type. The FAA solicits public comment on this issue.

2. *Manuals, Markings, and Placards.* The Part 36 provisions regarding requirements for operating limitations in manuals, markings, and placards under current Subpart G would be redesignated under Subpart H and amended to extend their applicability by including approved Rotorcraft Flight Manuals, manual materials, or placards, as appropriate.

3. *Helicopter Noise Rule.* A proposed new Subpart H to Part 36 would prescribed the basic requirements for demonstrating compliance with the helicopter noise rules. The technical standards, conditions, and procedures for conducting helicopter noise tests and the helicopter noise limits under the proposed new Appendix H are specifically referenced.

4. *Noise Measurement and Evaluation.* The proposed new Subpart H to Part 36 would contain, among other things, the technical noise measurement and evaluation specifications for conducting helicopter noise tests. With exceptions necessary to account for the unique operating characteristics of helicopters, the FAA proposes to apply the specifications currently applicable to tests of transport category large airplanes and turbojet-powered airplanes under Appendices A and B of Part 36 (as amended by FAR Amendment 36–9; 43 FR 8731, March 2, 1978 and as may be amended as a result of Notice 85–2, 50 FR 4172, January 29, 1985).

Highlights of the proposed differences for helicopter noise test under Appendix H from the requirements of Appendices A and B may be summarized as follows:

(a) Three noise test series would be used—takeoff, flyover, and approach noise series with simultaneous measurements for each test series at a flight-track noise measuring station and two sideline noise measuring stations, one on each side of the reference flight track.

(b) The helicopter's height and lateral position over the noise measuring station would be relative to the center line of the reference flight path rather than the runway.

(c) The approach angle for the helicopter approach noise test would be 6°(±0.5°) rather than 3.0° ±0.5°.

(d) Numerous symbols and units for helicopter noise certification would be substituted for airplane noise symbols under the § A36.7 "Flight Profile Identification Positions" and "Distance-Unit-Meaning" descriptions used in Part 36. The proposal includes graphic depictions and textual descriptions of the various helicopter test profiles.

Comments are specifically invited on the appropriateness of the proposed flight procedures. While it is necessary to specify rigid reference flight path profiles so that the corrected data may be compared to the standard (and to each other), some leeway in test profiles is necessary to allow realistic variations in aircraft performance and piloting techniques.

Another issue upon which the FAA solicits comments is the need for a "no-correction window." The ICAO standard does not require adjustment of the reported noise levels for small variations from reference conditions of flight path, airspeed, weight, ambient temperature and relative humidity, and rotor rpm. This notice would not exclude these corrections. The FAA believes that since the measurements have to be made anyway, either to make corrections or to determine which are inside the "window", it serves no purpose to avoid making all appropriate corrections. Cost savings, if any, would be negligible and would be far outweighed by the quality of the data available to the applicants.

5. *Noise Levels.* The proposed new Appendix H to Part 36 would also contain the provisions governing helicopter noise levels for which compliance must be shown by actual flight tests. These provisions include: (1) "Stage 1" and "Stage 2" noise limits for each test series (related to the maximum certificated takeoff weight of the helicopter); (2) tradeoff provisions

VOL 51
ISS 44
MR 6
1986
UMI

(governing limited "exceedances" of noise levels for one or two tests series when completely offset by reductions in the noise levels of the other required noise levels); and (3) separate test conditions for each of the three noise test series (including requirements for airspeed, altitude, or operational profile over the noise measuring station, power, and helicopter position relative to the flight-track noise measuring station).

"Stage 1" noise limits represent the prohibition on noise level increases prescribed for "acoustical changes" of those helicopters which cannot achieve Stage 2 noise levels before a change in type design. "Stage 2" noise limits would be prescribed separately for the three test series (takeoff, flyover, and approach). The respective noise levels would range, according to maximum certificated weights of the helicopter, between 89 and 109 Effective Perceived Noise Level in decibels (EPNdB) for takeoff, between 88 and 108 EPNdB for flyover, and between 90 and 110 EPNdB for approach. Under the proposal, the highest noise limit applies to maximum weights of 176,370 pounds or more, which is reduced by 3.01 EPNdB for incremental, 50% reduction ("halving") of the 176,370-pound weight down to the lowest noise limit, which applies to maximum weights of 1,764 pounds or less.

Tradeoffs of any "exceedances" would be limited to a sum not greater than 4 EPNdB with no single exceedance greater than 3 EPNdB consistent with the ICAO standard. For turbojet powered airplanes, these numbers are 3 and 2, respectively. The exceedances must be completely offset by noise levels below those required at the other two points.

As proposed, the noise level limits would apply to helicopters of all weights, just as the noise level limits for other categories of aircraft are applied. However, few United States civil helicopters have maximum weights above 50,000 pounds. Therefore, the FAA is considering a proposal from the Helicopter Association International for an alternative limit. Under this alternative, the noise level limits proposed in this notice for takeoff, approach, and sideline would end at an upper weight of 56,000 pounds. Accordingly, comments are specifically invited regarding the appropriate upper bound to the weight versus noise standards proposed herein.

For the purposes of considering compliance with the acoustical change provisions, this notice would allow the first civil derivative of a military helicopter to be treated as though the military "parent" were a Stage 1 civil helicopter whose noise levels are more than two decibels above the Stage 2 noise level limit. This would have the the effect of removing the requirement for noise data from the parent aircraft. Among the reasons for proposing this are: (1) Lack of availability of noise level data for military aircraft and; (2) the costs associated with performing tests on both versions. It should also be noted that the term military aircraft includes those operated by the U.S. Coast Guard.

6. *Applicability to current production types.* As mentioned earlier, the rule proposed in this notice would not be applicable to helicopter types currently in production as long as they are not changed to increase their noise (an "acoustical change"). However, public comment is invited on the economic reasonableness and technological practicability of adding such a provision. Specifically, comments are sought on the following questions:

(a) Would such a rule be appropriate for application to helicopters currently in production.

(b) What effective date (such as January 1, 1990) would best balance the legitimate concerns of all affected parties?

(c) Should such a rule be applied across the board to all helicopter types of should military derivatives be exempted?

Regulatory History

On December 28, 1973, the FAA published an advanced notice of proposed rulemaking (ANPRM) (Notice No. 73–32; 38 FR 35487) in which it announced that it was considering proposing noise standards for aircraft that were expected to be developed for efficient short stage length operations. It was anticipated that such a class of aircraft, referred to as "short-haul," would include aircraft having short, reduced, or vertical (or near vertical) takeoff and landing capabilities. Since the noise technologies appropriate to those aircraft as a separate class required further study, original FAR Part 36 in 1969 did not prescribe separate rules for those aircraft; some, such as helicopters, were not covered by any regulation. Notice No. 73–32 (ANPRM) was issued as part of an additional study to invite early public participation in the identification and selection of a course, or alternative courses, of action concerning development of proposed noise standards which would provide relief and protection to the public health and welfare from aircraft noise.

On July 9, 1979, a notice of proposed rulemaking (NPRM) (Notice No. 79–13; 44 FR 42410) was published by the FAA. This notice proposed helicopter noise certification standards and limits on further production of older, noiser helicopter types. The procedures proposed for noise testing were similar (although not identical) to those proposed in this notice; however, the proposed noise level limits were significantly more stringent. Information submitted to the Docket revealed that the economic impact of limiting future production of existing helicopter types might result in an impact of several hundred million dollars, due to the general unavailability of an effective noise abatement technology to meet the specified noise levels. After careful consideration of the economic impacts of the proposed rule and of the Docket comments on the effects of those impacts, Notice No. 79–13 was withdrawn (December 17, 1981; 46 FR 61486). At the time of withdrawal, the FAA stated that the action neither precluded consideration of similar proposals in the future nor committed the agency to any further or future course of action on this subject.

In the time period since Notice No. 79–13 was withdrawn, the FAA has continued to study the issues surrounding noise level certification of helicopters. One of these is the ICAO rule, contained in Annex 16, Chapter 8. The United States has been an active participant in modifications to that rule (including raising the allowable noise levels) with the aim of bringing into better balance the economic costs and the environmental benefits.

Aircraft Noise Rules

Public Laws 90–411 and 92–574 were enacted to provide the statutory basis under the Federal Aviation Act of 1958, (the Act) for relief and protection to the public health and welfare from noise and sonic boom from civil aircraft. Under the Act, the Federal Aviation Administrator, after consultation with the Secretary of Transportation and the Administrator of The Environmental Protection Agency, is responsible for the adoption and amendment of rules which prescribe the necessary standards and regulations. On November 3, 1969, the Administrator adopted FAR Part 36 entitled "Noise Standards: Aircraft Type Certification" (34 FR 18355; November 18, 1969). That regulation initiated the FAA noise abatement regulatory program under the new statutory authority. It prescribed noise type certification standards for subsonic transport category large airplanes and for subsonic turbojet powered airplanes regardless of category. Part 36 also prescribed the technical specifications for measuring and evaluating flight test

noise data in demonstrating compliance with prescribed noise level limits.

In promulgating proposals and amendments under the authority of § 611 of the Act, factors which the FAA must consider include the following:

1. Available data relating to aircraft noise, including results of research, development, testing, and related evaluation activities.

2. The views and position of other Federal, state and interstate agencies.

3. Whether the proposed regulations are consistent with the highest degree of safety in the air commerce or air transportation in the public interest.

4. Whether proposed regulations are:

a. Economically reasonable;

b. Technologically practicable; and

c. Appropriate for the particular type of aircraft, aircraft engines, appliances, or certificates to which they would apply.

5. The extent to which the proposed regulations contribute to providing protection to the public health and welfare by carrying out the purposes of section 611 of the Act. The overall environmental impacts of the proposed regulations (including environmental factors other than noise) must be assessed in accordance with the National Environmental Policy Act of 1969, and implementing Federal guidelines and directives.

Need for Regulation

The latest industry directory of helicopter operators in the United States, Canada, and Puerto Rico lists 2,441 U.S. (including Puerto Rico) operators in 1982 using a fleet of 7,388 helicopters. The number of U.S. business/executive operators of helicopters in 1982 increases to 1,575 craft and U.S. commercial helicopters accounted for 4,627 craft. A 1984 industry directory of helicopters also indicated that there are 4,020 public and private heliports and helistops in the United States. Approximately 9 percent of these heliports are rooftop facilities located in urban areas.

Heliports are bring used for emergency, automobile traffic control, and law enforcement vehicles. Victims of traffic accidents, natural disasters, or other emergencies are frequently transported by helicopter directly from the scene to hospitals or shock trauma centers. There were 1,071 hospital heliports in the United States listed in the industry directory.

The emergency rescue capability of helicopters is fully recognized by responsible officials in several major metropolitan areas today. For example, city ordinances in Chicago and Los Angeles require that buildings above a certain height be provided with rooftop emergency landing facilities for helicopters because modern fire-fighting apparatus cannot reach above eight floors. As other governments recognize the need to provide increased protection for high-rise inhabitants, the number of heliports for both routine and emergency uses may increase significantly.

The growing civil helicopter fleet combined with increased and more diversified uses of helicopters has intensified the demand for establishing additional heliports. However, environmental concerns have slowed the rate of heliport establishment and, in some instances, has caused various restrictions to be imposed on heliport operations.

In other cases, environmental pressure has forced closing of certain heliports with the resultant loss of helicopter services at those locations. The FAA believes that the adoption of appropriate helicopter noise standards will help alleviate the adverse impacts on the public by reducing both the noise levels of helicopters and the trends toward impairing or losing the benefits of their services in the air transportation system.

One of the key issues in the withdrawal of Notice 79–13 was the general unavailability of effective noise abatement technology. As a result, an accelerated joint research program was set up in 1982 by the National Aeronautics and Space Administration (NASA), the FAA, and American helicoper manufacturers. This National Rotorcraft Noise Research Program is a five-year twenty-million dollar cooperative effort under the technical guidance of NASA. It has two major goals: The development of noise abatement technology for reducing helicopter external noise levels and the development of detailed parametric noise prediction techniques. This program is expected to furnish the technological basis for helicopter noise reduction into the twenty-first century and could significantly lower the cost impacts of the application of that technology. At the conclusion of the program, the FAA will consider the appropriateness of lowering the noise certification levels of helicopters.

The FAA, however, does not consider it appropriate in light of the considerations listed in section 611 of the Act to delay all rulemaking on noise standards for helicopters until such times as the cooperative research program is completed.

The FAA has reviewed the helicopter as a noise source affecting persons and property in the areas in which they operate. As a result, the FAA believes that it should now adopt appropriate helicopter noise regulations to provide the necessary relief and protection to the health and welfare contemplated by section 611 of the Act. The proposals contained in this notice, if adopted, will achieve that objective by preventing further escalation of helicopter noise levels and laying the regulatory foundation for assuring that future helicopter types and eventually all newly produced helicopters of older type designs comply with firm but realistic noise standards. The FAA has determined that sufficient noise control technology exists to meet the considerations under section 611(d) of the Act. Economic aspects of the need for the proposed regulations are discussed in more detail in the regulatory assessment prepared in conjunction with this notice, and placed in the Docket. However, it should be noted that U.S. manufacturers of rotorcraft are already subject to the ICAO noise certification standards for each heliport type that they wish to export. Since exports account for approximately 40 percent of the civil sales of U.S. helicopter manufacturers and since the standards proposed in this notice (except for "acoustical changes" of older, Stage 1 aircraft) are nearly identical to ICAO's, only minimal costs impacts are expected from this standard. Offsetting these minimal costs are savings which will accrue to American manufacturers by certificating in the U.S. rather than in foreign countries.

Rule Structure

As part of this proposal, the FAA is considering some reorganization and restructuring of certain portions of current Part 36 without any change in their substance. In order to improve their usefulness and understandability, the FAA believes that the technical provisions governing the measurement and evaluation of aircraft noise test data under Appendices A and B should contain only those matters that apply generally to all noise tests for all regulated classes of aircraft which employ EPNL as the qualifying unit. Those provisions which affect each particular regulated class should be prescribed separately in provisions that apply only to that class. In that way, the FAA believes that potential confusion over which portions of Appendices A and B apply in measuring and evaluating noise levels in terms of Effective Perceived Noise Levels (EPNL) would be eliminated since those provisions would apply generally unless otherwise expressly provided in those

VOL 51
ISS 44
MR 6
1986
UMI

provisions applicable to the particular regulated class of aircraft.

Since Appendices A and B currently apply to only one regulatory class, transport category large airplanes and turbojet powered airplanes under Subpart C of Part 36, the current regulation achieves that objective. However, if a proposed noise standard for helicopters or any future regulatory class is adopted, the technical specifications would apply to additional regulatory classes and, thus, the statement of regulation would become more complex. Accordingly, comments are specifically invited regarding whether those provisions should be restructured, and, if so, specifically how should it be done in order to improve the presentation and the statement of the rules while retaining their substantive content. In order to indicate those substantive areas under the proposal which differ from the requirements of current Appendices A and B (as applied to transport category large airplanes and turbojet powered airplanes), the proposed helicopter noise rule contained in this notice states that the provisions of Appendices A and B apply, except as otherwise provided under proposed requirements that apply only to noise tests for helicopters.

Regulatory Impact Evaluation

The FAA conducted a detailed regulatory evaluation which is included in the regulatory docket. This evaluation reviews all proposed changes to Parts 21 and 36. The FAA determined that the NPRM is consistent with the objectives of Executive Order 12291 and does not impose an unnecessary or unreasonable regulatory burden on the private sector or on the public.

The amendments proposed in the NPRM would provide benefits in the aggregate that would outweigh the costs associated with compliance. Specifically, the benefits would be associated with the greater acceptability of helicopters and heliports in urban environments and the increased markets for helicopters and helicopter services that would ensue. Thus, the economic benefits woud accrue not only to the manufacturers and operators, but to the general public as well. The environmental benefits woud accrue mainly to those working or residing near heliports, although some noise level improvements can be expected near helicopter flight corridors.

Costs would result from increased development and certification expenses borne originally by the manufacturers but which would be passed on to the operators of helicopters and eventually on to the aviation public. These costs would be mitigated by three factors: (1) The proposed noise levels are more realistic than earlier proposals and they represent attainable goals with today's technology; (2) the National Aeronautics and Space Administration has underway a joint helicopter noise reduction technology program with U.S. manufacturers and the FAA to improve the state-of-the-art and to lower the cost of application; and (3) all helicopter models for export will be required to comply with the ICAO noise standards even if the U.S. does not adopt the proposals contained in this notice.

Regulatory Flexibility Determination

As detailed in the evaluation, the only cost associated with the proposed changes to FAR Part 36 will be the cost to manufacturers related to the noise certification test. However, no domestic helicopter manufacturer is considered a small entity as is currently defined. Therefore, it is certified that the proposal, if enacted, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Analysis

Pursuant to Department of Transportation "Policies and Procedures for Considering Environmental Impacts" (FAA Order 1050.1D), the FAA has determined that this proposal would not constitute a major federal action significantly affecting the quality of the human environment. The proposed amendment would have the effect of limiting the growth of noise from new helicopter types and derivatives of existing types. This, in turn, would reduce noise levels around heliports and, to some extent, under helicopter flight corridors when compared to unconstrained growth. Since it would take from five to fifteen years after adoption for a significant number of affected aircraft to enter the nation's fleets, little noticeable short-term general effect is expected. However, some helicopter operations and heliports are expected to be designed based upon the lower noise capabilities of newer aircraft, making site-specific improvements in the noise environment. Therefore, no environmental assessment or environmental impact statement was prepared.

Trade Impact Analysis

There would be little or no impact on U.S. or foreign trade if this proposal were adopted. Absent the rule, U.S. helicopter exports may be placed at a comparative cost disadvantage since each helicopter model would be required to meet ICAO standards. The cost of multiple certifications would result in either higher selling prices or lower profits to U.S. manufacturers.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend Parts 21 and 36 of the Federal Aviation Regulations (14 CFR Parts 21 and 36) as follows:

PART 21—[AMENDED]

1. The authority citation for Part 21 continues to read as follows:

Authority: 49 U.S.C. 1341(a), 1343(d), 1348, 1354(a), 1357(d)(2), 1373, 1421 through 1430, 1432, 1443, 1472, 1510, 1522, 1652(c), 1655(c), 1657(f), 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

2. In § 21.93 by revising paragraph (b) introductory text and by adding a new paragraph (b)(4) to read as follows:

§ 21.93 Classification of changes in type design.

* * * * *

(b) For the purpose of complying with Part 36 of this Chapter, and except as provided in paragraphs (b)(2), (b)(3), and (b)(4) of this section, any voluntary change in the type design of an aircraft that may increase the noise levels of that aircraft is an "acoustical change" (in addition to being a minor or major change as classified in paragraph (a) of this section) for the following aircraft:

* * * * *

(4) Helicopters, as defined under Part 1 of this chapter, except helicopter configurations that are type certificated exclusively for "agricultural aircraft operations" as defined in § 137.3 of this chapter, as effective on January 1, 1966, or designated for dispensing fire fighting materials or for carrying external loads as defined in § 133.1(b) of this chapter, as effective on December 20, 1976. For helicopters to which this paragraph applies "acoustical changes" include the following type design changes:

(i) Any changes to, or removal of, a muffler or other component designed for noise control.

(ii) Any other design or configuration change (including a change in the operating limitations of the aircraft) that, based on approved analytical or test data, the Administrator determines might result in any increase in noise level.

§ 21.115 [Amended]

3. By amending § 21.115 at the end of paragraph (a) by removing the words "§ 36.7 and 36.9 of this chapter" and

substituting for them the words "§§ 36.7, 36.9, or 36.11 of this chapter."

PART 36—NOISE STANDARDS: AIRCRAFT TYPE AND AIRWORTHINESS CERTIFICATION

4. The authority citation for Part 36 continues to read as follows:

Authority: 49 U.S.C. 1344, 1348, 1354(a), 1355, 1421, 1423, 1424, 1425, 1428, 1429, 1430, 1431(b), 1651(b)(2), 2121 through 2125; 42 U.S.C. 4321 et. seq.; Sec. 124 of Pub. L. 98-473; E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

§ 36.1 [Amended]

5. By amending § 36.1 as follows:

a. By adding a new paragraph (a)(4) to read as follows:

(a) * * *

(4) Type certificates, and changes to those certificates, for helicopters, as defined under Part 1 of this chapter, except helicopter configurations designated exclusively for "agricultural aircraft operations" as defined in § 137.3 of this chapter, as effective on January 1, 1966, or for dispensing fire fighting materials or for carrying external loads as defined in § 133.1(b) of this chapter, as effective on December 20, 1976.

* * * * *

b. By amending paragraph (c):

(1) By removing the word "airplane" and substituting for it the word "aircraft"; and

(2) By removing the words "the applicable provisions of § 36.7 or § 36.9 of this part" and substituting for them the words "the applicable provisions of §§ 36.7, 36.9, or 36.11 of this part."

c. By adding a new paragraph (g) to read as follows:

(g) For the purpose of showing compliance with this part, for helicopters in the normal, transport, and restricted categories, the following terms have the specified meanings:

(1) A "Stage 1 noise level" means a takeoff, flyover, or approach noise level greater than the Stage 2 noise limits prescribed in § H36.305 of Appendix H of this part.

(2) A "Stage 1 helicopter" means a helicopter that has not been shown under this part to comply with the takeoff, flyover, and approach noise levels required for Stage 2 helicopters.

(3) A "Stage 2 noise level" means a takeoff, flyover, or approach noise level at or below the Stage 2 noise limits prescribed in section H36.305(a)(2) of Appendix H of this part.

(4) A "Stage 2 helicopter" means a helicopter that has been shown under this part to comply with Stage 2 noise levels (including applicable tradeoffs) prescribed in section H36.305 of Appendix H of this part.

§ 36.2 [Amended]

6. By revising § 36.2(a) to read as follows:

(a) Notwithstanding § 21.17 of this chapter, irrespective of the date of application in the case of airplanes and on and after (date of publication of this NPRM) in the case of helicopters, each person who applies for a type certificate for an aircraft covered by this part must show compliance with the applicable provisions of this part.

§ 36.3 [Amended]

7. By amending § 36.3 by removing the word "airplane" wherever it appears and substituting for it the word "aircraft".

8. By amending Subpart A by adding a new § 36.11 to read as follows:

§ 36.11 Acoustical change: Helicopters.

This section applies to all helicopters in the normal, transport, and restricted categories for which an acoustical change approval is applied for under § 21.93(b) of this chapter on and after March 6, 1986.

(a) *General requirements.* Except as otherwise provided, for helicopters covered by this section, the acoustical change approval requirements are as follows:

(1) In showing compliance, noise levels must be measured, evaluated, and calculated in accordance with the applicable procedures and conditions prescribed in Parts B and C of Appendix H of this Part.

(2) Compliance with the noise limits prescribed in section H36.305 of Appendix H must be shown in accordance with the applicable provisions of Part D of Appendix H of this Part.

(b) *Stage 1 helicopters.* Except as provided in § 36.805(c), for each Stage 1 helicopter prior to the change in type design, the helicopter may not, after the change in type design, exceed the noise levels specified in section H36.305(a)(1). The tradeoff provisions under section H36.305(b) may not be used to increase any Stage 1 noise level beyond these limits.

(c) *Stage 2 helicopters.* For each Stage 2 helicopter prior to the change in type design, the helicopter must be a Stage 2 helicopter after the change in type design.

By redesignating Subpart G as "Subpart O.—Operating Limitations and Information" and marking Subparts: G, I, J, K, L, M, and N as "[Reserved]"

§ 36.1581 [Amended]

10. By amending § 36.1581 as follows:

a. By amending paragraph (a) after the words "Airplane Flight Manual" in each place where those words appear by adding the words "or Rotorcraft Flight Manual."

b. By amending paragraph (b) in the prescribed statement by deleting the word "airplane" and substituting for it the word "aircraft."

c. By redesignating paragraph (e) as paragraph (f) and revising it to read as follows:

(f) Except as provided in paragraphs (c), (d), and (e) of this section, no operating limitations are furnished under this part.

d. By adding a new paragraph (e) to read as follows:

(e) For normal, transport, and restricted category helicopters for which the weight used in meeting the take-off, flyover, or approach noise requirements of this part is less than the cetificated maximum takeoff weight, established under either §§ 27.25(a) or 29.25(a) of this chapter. That lesser weight must be furnished, as an operating limitation, in the operating limitations section of the Rotorcraft Flight Manual, in approved manual material, or on an approved placard.

11. By adding a new Subpart H to read as follows:

Subpart H—Helicopters

Sec.
36.801 Noise measurement.
36.803 Noise evaluation and calculation.
36.805 Noise limits.

Subpart H—Helicopters

§ 36.801 Noise measurement.

For normal, transport, and restricted category helicopters, the noise generated by the helicopter must be measured under Part B of Appendix H of this part or under an FAA-approved equivalent procedure.

§ 36.803 Noise evaluation and calculation.

The noise measurement data obtained under § 36.801 must be evaluated and calculated under Part C of Appendix H of this part or an FAA-approved equivalent procedure.

§ 36.805 Noise limits.

(a) Compliance with this Subpart must be shown and demonstrated at the noise measuring points and under the test conditions prescribed under Part D of Appendix H of this part for helicopters for which application for issuance of a type certificate in the normal, transport, or restricted category is made on or after March 6, 1986.

(b) For helicopters covered by this section, except as provided in paragraph

VOL 51 ISS 44 MR 6 1986

(c), it must be shown, in accordance with this subpart, that the noise levels of the helicopter are no greater than the applicable limits prescribed under § H36.305 of Appendix H of this part.

(c) For helicopters for which application for issuance of an original type certificate in the normal, transport or restricted category is made on or after (the date of this NPRM), and whish the FAA finds to be the first civil version of a helicopter which was designed and constructed for, and accepted for operational use by, an Armed Force of the U.S. on or before (date of this NPRM), it must be shown that the noise levels of the helicopter are no greater than the noise limits for a change in type design as specified in section H36.305(a)(1)(ii). Subsequent civil versions must meet the Stage 2 requirements.

Appendix B [Amended]

12. By amending Appendix B of Part 36; section B36.1 at the end of the first sentence by deleting the words "under section 36.103" and substituting them for the words "under §§ 36.103 and 36.803."

13. By adding a new Appendix H to read as follows:

Appendix H—Noise Requirements for Helicopters Under Subpart H

Sec.

Part A—General

H36.1 *Scope.*

Part B—Noise Measurement Under § 36.801

H36.101 *Noise certification test and measurement conditions.*
H36.103 *Measurement of helicopter noise received on the ground.*
H36.105 *Reporting and correcting measured data.*
H36.107 *Symbols and units.*
H36.109 *Atmospheric attenuation of sound.*
H36.111 *Detailed data correction procedures.*

Part C—Noise Evaluation and Calculation Under § 36.803

H36.201 *Evaluation of measured noise values.*
H36.203 *Calculation of noise levels.*

Part D—Noise Limits Under § 36.805

H36.301 *Noise measurement, evaluation, and calculation.*
H36.303 *Noise measuring points.*
H36.305 *Noise levels.*
H36.307 *Takeoff test conditions.*
H36.309 *Flyover test conditions.*
H36.311 *Approach test conditions.*

Appendix H—Noise Requirements for Helicopter Under Supert H

Part A—General

Section H36.1 *Scope.* This appendix prescribes noise requirements for helicopters specified under § 36.1 including:

(a) The conditions under which helicopter noise certification tests under Part H must be conducted and the measurement procedures that must be used under § 36.801 to measure helicopter noise during each test;

(b) The procedures which must be used under § 36.803 to evaluate the measured noise data and to calculate the noise evaluation quantity designated as Effective Perceived Noise Level (EPNL); and

(c) The noise limits for which compliance must be shown under § 36.805 at the prescribed noise measuring points under the prescribed test conditions.

Part B—Noise Measurement Under § 36.801

Section H36.101 *Noise certification test and measurement conditions.* (a)(1) Except as provided in paragraph (a)(2) of this section, the provisions of Section A36.1 Appendix A of Part 36 apply to helicopter noise certification tests conducted under this appendix. Section A36.1 includes requirements governing—

(i) Test site requirements;

(ii) Weather restrictions; and

(iii) Aircraft test procedures.

(2) Notwithstanding the provisions of Section A36.1 of Appendix A to the contrary, the following apply to helicopter noise certification tests:

(i) The test site requirements of paragraph (b) of this section apply to helicopter noise tests. The temperature and relative humidity measured at aircraft altitude and at 10 meters above ground shall be averaged and used to adjust for propagation path absorption.

(ii) The takeoff and approach testing procedure requirements of paragraph A36.1(d) apply to takeoff, and approach noise tests for helicopters, respectively. The requirements of paragraph A36.1(d)(5) also apply to flyover noise tests. The helicopter height and lateral position is relative to the centerline of the reference flight track (which passes through the noise measuring point) rather than the runway.

(iii) The approach angle under paragraph A36.1(d)(6) is 6.0°(±0.5°)

(iv) Each takeoff must comply with the provisions under Section H36.307 of this appendix.

(v) Each fly-over test must comply with the provisions under Section H36.309 of this appendix.

(vi) Each approach must comply with the provisions under Section H36.311 of this appendix.

(b) *Helicopter test site requirements.* (1) Tests to show compliance with established helicopter noise certification levels must consist of a series of takeoffs, flyovers, and approaches during which measuring stations are located at the measuring points prescribed in Section H36.303 of this appendix.z

(2) Each takeoff test, flyover test, and approach test includes simultaneous measurements at the flight-track noise measuring station vertically below the reference flight path and at two sideline noise measuring stations, one on each side of the reference flight track 492 feet (150m) from, and on a line perpendicular to, the flight track of the noise measuring station.

(3) The height of the ground at either sideline noise measuring station may not differ from that of the flight-track noise measuring station by more than 20 feet.

(4) Each noise measuring station must be surrounded by terrain having no excessive sound absorption characteristics, such as might be caused by thick, matted, or tall grass, shrubs, or wooded areas.

(5) The wind velocity, temperature, and relative humidity measurements required under this appendix must be measured in the vicinity of noise measuring stations 10 meters above the ground. The location of the meteorological measurements must be approved by the FAA as representative of those atmospheric conditions existing near the surface over the geological area which aircraft noise measurements are made. In some cases, a fixed meteorological station (such as those found at airports or other facilities) may meet this requirement.

(6) During the period when the takeoff, flyover, or approach noise/time record indicates the noise measurement is within 10dB of Maximum Tone Corrected Perceived Noise Level (PNLTM), no obstruction that significantly influences the sound field from the aircraft may exist—

(i) For any flight-track or sideline noise measuring station, within a conical space above the measuring position (the point on the ground vertically below the microphone), the cone being defined by an axis normal to the ground and by half-angle 80° from the axis; and

(ii) For any sideline noise measuring station, above the line of sight between the microphone and the helicopter.

Section H36.103 *Measurement of helicopter noise received on the ground.* The measurement of helicopter noise received on the ground during helicopter noise certification tests under this appendix must be accomplished in accordance with the provisions of Section A36.3 of Appendix A of Part 36. Section A36.3 includes requirements governing—

(a) Measurements which provide that data for determining the one-third octave band noise produced by aircraft during testing at specific noise measuring stations, as a function of time;

(b) Sound pressure level data for aircraft noise certification purposes which must be obtained with approved acoustical equipment and measurement practices;

(c) Equipment specifications and the calibration and measurement procedures which apply to each certification test series.

Section H36.105 *Reporting and correcting measured data.* (a) Except as provided in paragraph (b) of this section, the provisions of Section A36.5 and A36.11(a) of Appendix A of Part 36 apply to helicopter noise certification tests under this appendix. Detailed correction procedures applicable to helicopters are contained in Section H36.111 of this appendix.

(b) The following apply to helicopter noise certification tests:

(1) The reference approach angle is 6°.

(2) The provisions of paragraph A36.5(e)(1), regarding validity of tests results within the 90 percent confidence limits and each EPNL

UMI

value, apply separately to each takeoff, flyover, and approach.

(3) To comply with Sections H36.307(b) H36.309(b), and H63.111(b), a minimum of six takeoffs, six approaches, and six level flyovers is required. To be counted toward this requirement, each flight event must be validly recorded at all three noise measuring stations.

(4) The approved values of V_H and V_y used in calculating test and reference conditions and flight profiles must be reported along with measured and corrected sound pressure levels. (See Note in Section H36.111(c).)

Section H36.107 *Symbols and units.* (a) Except as provided in paragraph (b) of this section, the symbols and units described in Section A36.7 of Appendix A of Part 36 apply to this appendix.

(b) Notwithstanding the meaning to the contrary prescribed in Section A36.7, for helicopter noise certification, the following symbols and units as used in the appendix have the following meanings—

FLIGHT PROFILE IDENTIFICATION POSITIONS

Position	Description
A	Location of the noise measuring point at the flight-track noise measuring station vertically below the reference (takeoff, flyover, or approach) flight path.
C	Start of noise certification takeoff flight path.
C_r	Start of noise certification reference takeoff flight path.
D	Start of noise certification flyover flight path.
D_r	Start of noise certification reference flyover path.
E	Start of noise certification approach flight path.
E_r	Start of noise certification reference approach flight path.
F	Position on takeoff flight path directly above noise measuring station A.
G	Position on flyover flight path directly above noise measuring station A.
H	Position on approach flight path directly above noice measuring station A.
I	End of noise type certification takeoff flight path.
I_r	End of noise type certification corrected takeoff flight path.
J	End of noise type certification flyover flight path.
J_r	End of noise certification reference flyover flight path.
K	End of noise certification approach type flight path.
K_r	End of noise type certification reference approach flight path.
L	Position on measured takeoff flight path corresponding to PNLTM at station A.
M	Position on measured flyover flight path corresponding to PNLTM of station A.
M_r	Position reference flyover flight path corresponding to PNLTM of station A.
N	Position on measured approach flight path corresponding to PNLTM at station A.
N_r	Position on reference approach flight path corresponding to PNLTM at station A.
S	Position on measured approach path nearest to station A.
S_r	Position on reference approach path nearest to station A.
T	Position on measured takeoff path nearest to station A.
T_r	Position on reference takeoff path nearest to station A.

FLIGHT PROFILE DISTANCES

[Units in feet]

Distance	Meaning
AF	*Takeoff Height.* The vertical distance between the helicopter and station A.
AG	*Flyover Height.* The vertical distance between the helicopter and station A.
AH	*Approach Height.* The vertical distance between the helicopter and station A.
AL	*Measured Takeoff Noise Path.* The distance from station A to the measured helicopter position L.
AL_r	*Corrected Takeoff Noise Path.* The distance from station A to the reference helicopter position L_r.
AM	*Measured Flyover Noise Path.* The distance from station A to the measured helicopter position M.
AM_r	*Reference Flyover Noise Path.* The distance from station A to helicopter position M on the reference flyover flight path.
AN	*Measured Approach Noise Path.* The distance from station A to the measured helicopter noise position N.
AN_r	*Reference Approch Noise Path.* The distance from station A to the reference helicopter position N_r.
AS	*Measured Approach Minimum Distance.* The distance from station A to the position S on the measured approach flight path.
AS_r	*Reference Approach Minimum Distance.* The distance from station A to the position S_r on the reference approach flight path.
AT	*Measured Takeoff Minimum Distance.* The distance from station A to the position T on the measured takeoff flight path.
AT_r	*Corrected Takeoff Minimum Distance.* The distance from station A to the position T_r on the reference takeoff flight path.
CI	*Takeoff Flight Path Distance.* The distance from position C at which the helicopter establishes a constant climb angle on the takeoff flight path passing over station A and continuing to position I at which the position of the helicopter and need no longer be recorded.
DJ	*Flyover Flight Path Distance.* The distance from position D at which the helicopter is established on the flyover flight path passing over station A and contineing to position J at which the position of the helicopter need no longer be recorded.
EK	*Approach Flight Path Distance.* The distance from position E at which the helicopter establishes a constant angle on the approach flight path passing over station A and continuing to position K at which the position of the helicopter need no longer be recorded.

Section H36.109 *Atmospheric attenuation of sound:*

The values of the one-third octave band spectra measured during helicopter noise certification tests under this appendix must conform, or be corrected, to the prescribed reference-day conditions in accordance with the provisions of section A36.9 of Appendix A of Part 36. Section A36.9 includes requirements governing—

(a) Correction of measured noise values to conform to reference-day conditions;

(b) Meteorological conditions at the noise measuring stations;

(c) Standards for sound attenuation rates; and

(d) Correction of noise values to account for sound attenuation rates.

Section H36.111 *Detailed data correction procedures.*

(a) *General.* If the test conditions do not conform to those prescribed as noise certification reference conditions under § H36.105 of this appendix, the correction procedures and requirements prescribed under section A36.11(a) of Appendix A of Part 36 apply. Section A36.11(a) includes requirements governing the correction precedures and standards for positive and

MR
6
1986
UMI

negative values resulting from any differences between reference and test conditions.

(b) *Takeoff profile.* (1) Figure H1 illustrates a typical takeoff profile, includinig reference conditions.

(i) The reference flight path is defined as a straight line segment inclined from the starting point (1640 feet prior to the center microphone location at 65 feet above ground level) at an angle β defined by the certificated best rate of climb and V_y for minimum engine performance. The constant climb angle β is derived from the manufacturer's data (approved by the FAA) to define the flight profile for the reference conditions. The constant climb angle β is drawn through C_r and continues, crossing over station A to the position corresponding to the end of the type certification takeoff path represented by position I_r.

(ii) The takeoff parameters are functions of the helicopter's performance and weight and the atmospheric conditions of temperature, pressure, wind velocity and direction.

(2) For the actual takeoff, the helicopter approaches position C in level flight at 65 feet (20 meters) above ground level at the flight track noise measuring station and at either V_y ± 5 knots (± 9 km/hr) or the maximum speed of the curve contiguous to the ordinate of the height-speed envelope plus 3.0 knots (+ 5/−3 knots), whichever speed is greater. Rotor speed is stabilized at the normal operating RPM (± 1 percent) specified in the flight manual. The helicopter is stabilized at the best rate of climb using minimum engine specifications along a path starting from a point located 1640 feet forward of the flight-track noise measuring station and 65 feet (20 meters) above the ground. The helicopter climbs at a constant angle through point C to the end of the noise certification takeoff flight path represented by position I. The position of the helicopter shall be recorded for a sufficient distance (CI) to ensure recording of the entire interval during which the measured helicopter noise level is within 10dB of PNLTM as required. Station A is the flight-track noise measuring station. The relationships between the measured and corrected takeoff flight profiles can then be used to determine the corrections which must applied to the EPNL calculated from the measured data.

(3) Figure H1 also illustrates significant geometrical relationships influencing sound propagation. Position L represents the helicopter location on the measured takeoff flight path for which PNLTM is observed at station A and L_r is the corresponding position on the reference sound propagation paths AL and AL_r, respectively, which form angle ϕ with their flight paths. Position T represents the point on the measured takeoff flight path nearest station A, and T_r is the corresponding position on the reference flight path. The minimum distance to the measured and reference flight paths are indicated by the lines AT and AT_r, respectively, which are normal to their flight paths.

(c) *Flyover profiles.* (1) The beginning of the noise type certification level flyover profile is represented by helicopter position D (Figure H2). The helicopter approaches position D in level flight 492 feet above ground level at station A. Airspeed is stabilized (within +5, −3 knots) at either 0.9 V_H or 0.45 V_H + 65 knots (0.45 V_H + 120 km/hr) whichever speed is lesser. For each run, the difference between airspeed and ground speed shall not exceed 10 knots between the 10dB down points. Rotor speed is stabilized at the maximum continuous RPM within one percent throughout the 10dB down time period. The helicopter crosses station A in level flight and proceeds to position J. If the test requirements are otherwise met, flight direction may be reversed for each subsequent flyover, to obtain three test runs in each direction.

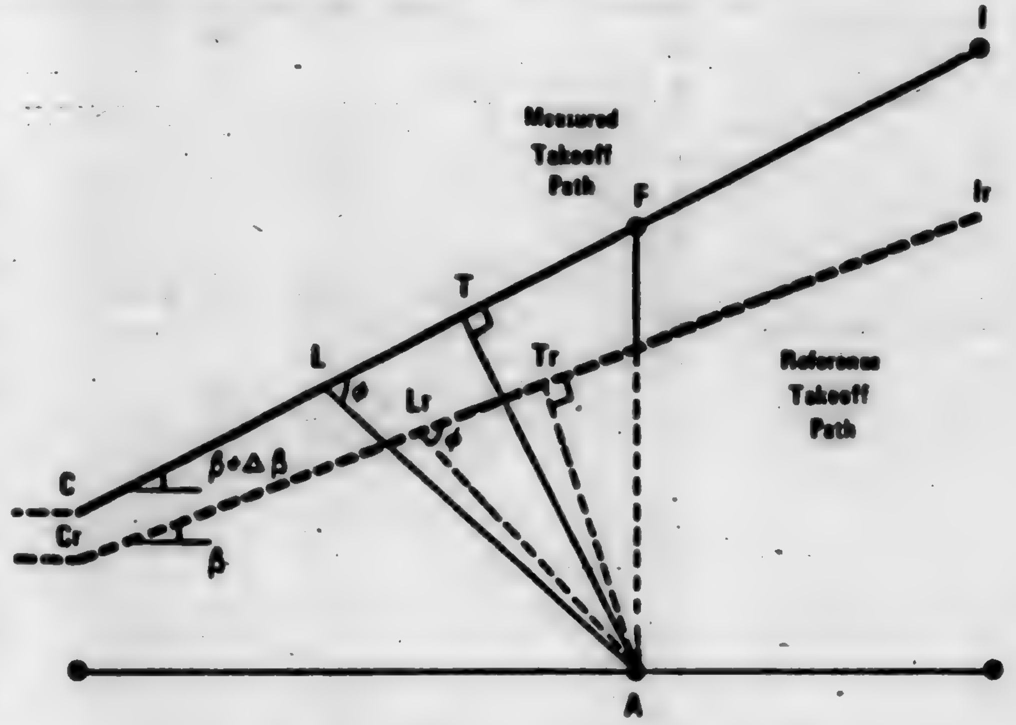

Figure H1. COMPARISON OF MEASURED AND CORRECTED TAKEOFF PROFILES

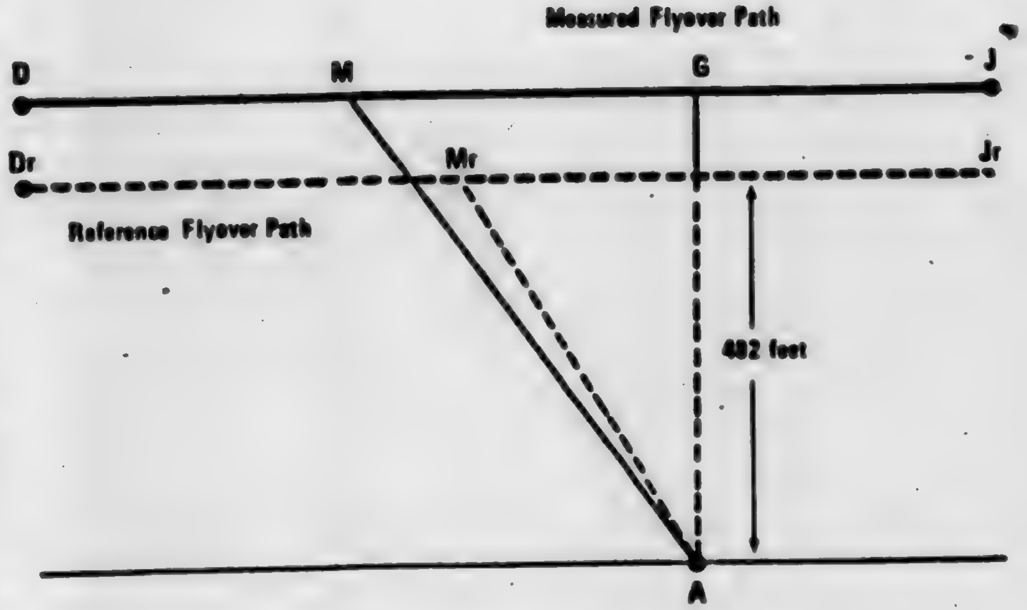

Figure H2. COMPARISON OF MEASURED AND CORRECTED FLYOVER PROFILES

(2) Figure H2 illustrates comparative flyover profiles when test conditions do not conform to prescribed reference conditions. The position of the helicopter shall be recorded for a sufficient distance (DJ) to ensure recording of the entire interval during which the measured helicopter noise level is within 10dB of PNLTM, as required. The flyover profile is defined by the height AG which is a function of the operating conditions controlled by the pilot. Position M represents the helicopter location on the measured flyover flight path for which PNLTM is observed at station A and M_r is the corresponding position on the reference flight path.

Note.—For noise certification purposes, V_H is defined as the airspeed in level flight obtained using the torque corresponding to minimum installed, maximum continuous power available for sea level, 15°C ambient conditions. The value of V_H thus defined is to be listed in the Rotorcraft Flight Manual.

(d) *Approach profiles.* (1) Figure H3 illustrates a typical approach profile, including reference conditions.

(i) The beginning of the noise type certification approach profile is represented by helicopter position E. The position of the helicopter should be recorded for a sufficient distance (EK) to ensure recording of the entire interval during which the measured helicopter noise level is with 10dB of PNLTM, as required. EK must represent a stable flight condition in terms of torque, rpm, indicated airspeed, and rate of descent resulting in a 6° (± 0.5°) approach angle.

(ii) The approach profile is defined by approach angle η passing directly over the station A at a height of AH, to position K, which terminates the approach noise certification profile.

(iii) The approach profile is defined by the approach angle and the height AH which are functions of the helicopter operating conditions controlled by the pilot. If the measured approach conditions are different from the corresponding reference conditions, corrections, if positive, must be applied to the EPNL calculated from the measured data.

(2) The helicopter approaches position H along a 6° (±0.5°) average approach slope throughout the 10dB down time period. The helicopter crosses position E and proceeds along the approach slope crossing over station A until it reaches position K. The approach procedure shall be acceptable to the FAA and shall be included in the Rotorcraft Flight Manual.

(3) Figure H3 illustrates portions of the measured and reference approach flight paths including the significant geometrical relationships influencing sound propagation. EK represents the measured approach path with approach angle η avd E_r and K_r represents the reference approach angle of 6°. Position N represents the helicopter location on the measured approach flight path for which PNLTM is observed at station A and N_r is the corresponding position on the reference approach flight path. The measured and corrected noise propagation paths and AN and AN_r, respectively, which form the same angle λ with their flight paths. Position S represents the point on the measured approach flight path nearest station A and S_r is the corresponding point on the reference approach flight path. The minimum distance to the measured and reference flight paths are indicated by the lines AS and AS_r, respectively, which are normal to their flight paths.

(e) *Correction of noise at source during level flyover.* (1) If any combination of the following three factors, 1) airspeed deviations from reference, 2) rotor speed deviations from reference, and 3) temperature deviations from reference, results in an advancing blade tip Mach number during level flyover which deviates from the reference Mach value, then source noise adjustments shall be determined. This adjustment shall be determined from the manufacturer supplied data approved by the FAA.

(2) Off-reference tip Mach number adjustments shall be based upon a sensitivity curve of PNLTM versus advancing blade tip Mach number, deduced from overflights carried out at different airspeeds around the reference airspeed. If the test aircraft is unable to attain the reference value, then an extrapolation of the sensitivity curve is permitted if data cover at least a range of 0.03 Mach units. The advancing blade tip Mach number shall be computed using true airspeed, onboard outside air temperature, and rotor speed. A separate PNLTM versus advancing blade tip Mach number function shall be derived for each of the three certification microphone locations, centerline, sideline left, and sideline right. Sideline left and right are defined relative to the direction of the flight on each run. PNLTM adjustments are to be applied to each microphone datum using the appropriate function.

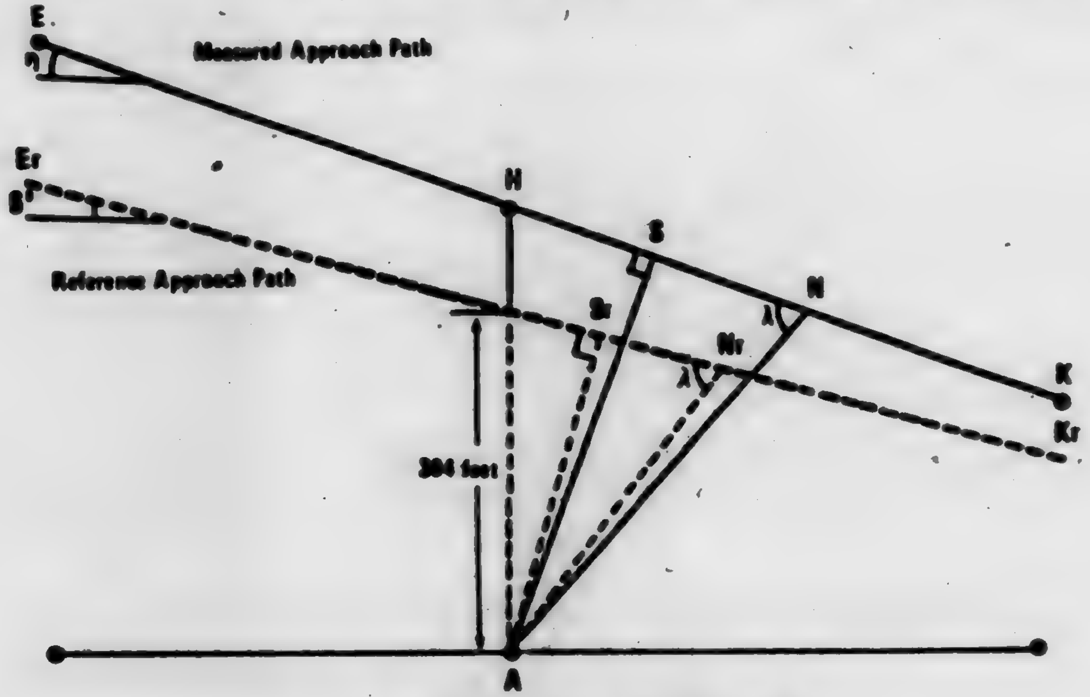

Figure H3. COMPARISON OF MEASURED AND CORRECTED APPROACH PROFILES

Part C—Noise Evaluation and Calculation Under § 36.803

Section H36.201 *Evaluation of measured noise values.*

(a) Except as provided in paragraph (b) of this section, the procedures in Appendix B of Part 36 must be used for helicopter noise certification tests under this appendix to determine the noise evaluation quantity designated as Effective Perceived Noise Level (EPNL) in units of effective perceived noise decibels (EPNdB) for noise level values under § 36.803 of Part 36. Appendix B includes requirements governing determination of noise values, including calculations of:

(1) Instantaneous perceived noise levels;
(2) Corrections for spectral irregularities;
(3) Tone corrections;
(4) Duration corrections;
(5) Effective perceived noise levels; and
(6) Mathematical formulation of noy tables.

(b) Notwithstanding the provisions of section B36.5(a) to the contrary, for helicopter noise certification, corrections for spectral irregularities shall start with the corrected sound pressure level in the 50Hz one-third octave band.

Section H36.203 *Calculation of noise levels.*

(a) To demonstrate compliance with the noise level provisions of § H36.305, the noise values measured simultaneously at the three noise measuring points must be arithmetically averaged to obtain a single EPNdB value for each flight.

(b) The calculated noise level for each noise test series (takeoff, flyover, or approach) must be the numerical average of at least six separate flight EPNdB values. The 90 percent confidence limit for all valid test runs under section H36.105(b)(2) of this appendix applies separately to the EPNdB values for each noise test series.

Part D—Noise Limits Under § 36.805

Section H36.301 *Noise measurement, evaluation, and calculation.*

Compliance with this part of this appendix must be shown with noise levels measured, evalauted, and calculated as prescribed under Parts B and C of this appendix.

Section H36.303 *Noise measuring points.*

Compliance with the noise standards under Section H36.305 must be shown for the arithmatic average of the values measured at the three noise measuring points for each takeoff, flyover, and approach test series at noise measuring stations located at the following points:

(a) *Flight-track noise measuring point*—On the centerline of the flight track projected vertically below the reference flight path; and

(b) *Sideline noise measuring points*—On each side of flight-track noise measuring point and located 492 feet from and on a line perpendicular to, the centerline of the reference flight track.

Section H36.305 *Noise levels.*

(a) *Limits.* For compliance with this appendix, it must be shown by flight test that the calculated noise levels of the helicopter, at the measuring points described in Section H36.301 of this appendix, do not exceed the following (with appropriate interpolation between weights):

(1) *Stage 1* noise limits for acoustical changes for helicopters are as follows:

(i) For takeoff, flyover, and approach calculated noise levels—each Stage 1 helicopter whose noise levels exceed the Stage 2 noise limits plus 2 EPNdB may not, after change in type design, exceed the noise levels created prior to the change in type design.

(ii) For takeoff, flyover, and approach calculated noise levels—each Stage 1 helicopter whose noise levels do not exceed the Stage 2 noise limits plus 2 EPNdB may not, after the change in type design, exceed the Stage 2 noise limits plus 2 EPNdB.

(2) *Stage 2* noise limits are as follows:

(i) *For takeoff calculated noise levels*—109 EPNdB for maximum takeoff weights of 176,370 pounds or more, reduced by 3.01 EPNdB per halving of the 176,370-pound maximum weight down to 89 EPNdB for maximum weights of 1,764 pounds or less.

(ii) *For flyover calculated noise levels*—108 EPNdB for maximum weights of 176,370 pounds or more, reduced by 3.01, EPNdB per halving of the 176,370-pound maximum weight down to 88 EPNdB maximum weights fo 1,764 pounds or less.

(iii) *For approach calculated noise levels*—110 EPNdB for maximum weights of 176,370 pounds or more, reduced by 3.01 EPNdB per halving of the 176,370-pound maximum weight down to 90 EPNdB for maximum weight of 1,764 pounds or less.

(b) *Tradeoffs.* Except to the extent limited under § 36.11(b) of Part 36, the noise limits prescribed in paragraph (a) of this section may be exceeded by one or two of the takeoff, flyover, or approach calculated noise levels determined under section H36.203 of this appendix if—

(1) The sum of the exceedances is not greater than 4 EPNdB;

(2) No exceedance is greater than 3 EPNdB; and

(3) The exceedances are completely offset by reductions in the other required calculated noise levels.

Section H36.307 *Takeoff test conditions.*

(a) This section, in addition to the applicable requirements of sections H36.101 and H36.111(b) of this appendix applies to all takeoff noise test conducted under this appendix in showing compliance with Part 36.

(b) A test series must consist of at least six flights over the flight-track noise measuring station (with simultaneous measurements at all three noise measuring stations) as follows:

(1) An airspeed of either V_y (+5/−3 knots) or the maximum speed of the curve contiguous to the ordinate of the limiting height-speed envelope plus 3.0 knots (+5/−3 knots) whichever speed is greater, must be established during the horizontal portion of each test flight and maintained during the remainder of the test flight.

(2) The horizontal portion of each test flight must be conducted at an altitude of 65 feet (20 meters) above the ground level at the flight-track noise measuring station.

(3) Upon reaching a point 1,640 feet (500 meters) from the noise measuring station, the helicopter shall be stabilized at,

(i) for helicopters for which the determination of takeoff performance is required by airworthiness regulations, the torque used to establish the takeoff distanced for sea level, 25°C ambient conditions;

(ii) for all other helicopters, the torque corresponding to minumum installed power available for sea level, 25°C ambient conditions;

(4) The helicopter shall be maintained throughout the takeoff reference procedure at,

(i) for helicopters for which the determinaton of takeoff performance is required by airworthiness regulations, the speed used to establish takeoff distance for sea level, 25°C ambient conditions;

(ii) for all other helicopters, the best rate of climb speed V_y, or the lowest approved speed for climb after takeoff, whichever is greater, for sea level, 25°C ambient conditions.

(5) The rotor speed must be stabilized at the normal operating RPM (± 1%) during the entire period of the test flight when the measured helicopter noise level is within 10 dB of PNLTM.

(6) The helicopter must pass over the flight-track noise measuring station within ± 5° from the zenith.

Section H36.309 *Flyover test conditions.*

(a) This section, in addition to the applicable requirements of section H36.101 and H36.111(c) of this appendix, applies to all flyover noise tests conducted under this appendix in showing compliance with Part 36.

(b) A test series must consist of at least six flights (three in each direction) over the flight-track noise measuring station (with simultaneous measurements at all three noise measuring stations)—

(1) In level flight;

(2) At a height of 492 feet ± 30 feet (150 ± 9 meters) above the ground level at the flight-track noise measuring station; and

(3) Within ± 5° from the zenith.

(c) Each flyover noise test must be conducted—

(1) At a speed of 0.9 V_H or 0.45 V_H + 120 km/h (0.45 V_H 65 kt), whichever is less, which speed shall be maintained throughout the measured portion of the flyover;

(2) At rotor speed stabilized at the normal operating rotor RPM (± 1 percent); and

(3) With the power stabilized during the period when the measured helicopter noise level is within 10 dB of PNLTM.

(d) The airspeed shall not vary from the reference airspeed by more than ±5 knots (±9 km/hr).

Section H36.311 *Approach test conditions.*

(a) This section, in addition to the requirements of sections H36.101 and H36.111(d) of this appendix, applies to all approach tests conducted under this appendix in showing compliance with Part 36.

(b) A test series must consist of at least six flights over the flight-track noise measuring station (with simultaneous measurements at the three noise measuring stations)—

(1) On an approach slope of 6° (±0.5°);

(2) At a height of 394 ± 30 feet above the ground level at the flight-track noise measuring station;

(3) Within ± 5° of the zenith;

(4) At a stabilized airspeed equal to the certificated best rate of climb V_y, or the lowest approved speed for approach, whichever is greater, with power stabilized during the approach and over the flight path reference point, and continued to a normal touchdown; and

(5) At rotor speed stabilized at the maximum normal operating rotor RPM (± 1 percent).

(c) The airspeed shall not vary from the reference airspeed by more than ± 5 knots (± 9 km/hr).

Note.—For reasons discussed earlier in the preamble, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291, (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and (3) it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, as promulgated, will not have a significant impact on a substantial number of small entities. In addition, this proposal, if adopted, would have little or no impact on trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

Issued in Washington, D.C., on February 27, 1986.

John E. Wesler,

Director of Environment and Energy.

Part III

Department of Transportation

Urban Mass Transportation Administration

49 CFR Part 604
Charter Bus Operations; Proposed Rule

VOL 51 ISS 44 MR 6 1986 UMI

DEPARTMENT OF TRANSPORTATION

Urban Mass Transportation Administration

49 CFR Part 604

[Docket No. 82-I]

Charter Bus Operations

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: In this notice, the Urban Mass Transportation Administration (UMTA) proposes to revise its existing regulation on Charter Bus Operations which governs the permissible charter bus operations that UMTA recipients can provide. This proposed revision modifies the existing regulation to ensure that federally assisted equipment is used to meet mass transit needs as intended by the UMT Act and to increase the protections for private intercity charter bus operators. At the same time, the revision should ease the existing paperwork burdens imposed on UMTA recipients.

DATE: Comments are due on May 5, 1986.

ADDRESS: Comments must be submitted to UMTA Docket No. 82-I, 400 7th Street, SW., Room 9228, Washington, D.C. 20590. All comments and suggestions are available for examination in room 9228 at the above address between 8:30 a.m. and 5:00 p.m., Monday through Friday. UMTA will acknowledge the receipt of comments if the commenter includes a self-addressed, stamped postcard with the comment.

FOR FURTHER INFORMATION CONTACT: Douglas G. Gold, Office of the Chief Counsel, Urban Mass Transportation Administration, 400 7th Street, SW., Washington, D.C. 20590; Telephone: (202) 426-1936.

SUPPLEMENTARY INFORMATION:

Introduction

Two provisions of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.) (UMT Act), concern charter bus operations by recipients of financial assistance under the UMT Act and under 23 U.S.C. 103(e)(4) and 142(a) and (c) (the Acts). First, section 12(c)(6) defines "mass transportation" as "transportation by bus or rail, or other conveyance, either publicly or privately owned, which provides to the public general or special service (*but not including school buses or charter or sightseeing service)* on a regular and continuing basis." (49 U.S.C. 1608(c)(6).) (Emphasis added.) The exclusion of school buses and charter and sightseeing service has been part of the definition of "mass transportation" since the UMT Act became law in 1964.

The Comptroller General in a 1966 opinion interpreted section 12(c)(6) to disallow the use of financial assistance under the UMT Act for the purchase of buses or other equipment for the sole purpose of providing charter service. The Comptroller General, however, stated that the "incidental" use for charter service of vehicles purchased for mass transit was permissible as long as the charter activity "does not detract from or interfere with urban mass transportation service for which the equipment is needed." Opinion of the Comp. Gen. B-160204 (Dec. 7, 1966). There is nothing in this opinion which prohibits the Secretary from prohibiting such incidental use if such a prohibition is deemed necessary.

The second provision that concerns charter bus service is section 3(f) of the UMT Act. Congress enacted section 3(f) in 1974 to protect private operators in the intercity charter bus industry from being foreclosed from this business by UMTA recipients, and operators for recipients, who use federally funded equipment. This provision requires that each recipient of Federal funds under the Acts for the purchase or operation of buses must, as a condition of such assistance, enter into a charter bus agreement with the Secretary of Transportation. As part of this agreement, each recipient must agree that it will not engage in any intercity charter bus operations (charter bus operations outside of the urban area in which it provides regularly scheduled mass transportation service) except as provided in the agreement.

Section 3(f) does not prescribe the terms that the agreement must include to protect private operators. It states, however, that the agreement shall provide for

> fair and equitable arrangements, appropriate in the judgment of the Secretary, to assure that the financial assistance granted under the Act will not enable public bodies and publicly and privately owned operators for public bodies to foreclose private operators from the intercity charter bus industry where such private operators are willing and able to provide such service. (49 U.S.C. 1602(f)).

(For a discussion of the legislative history of this provision see 47 FR 44795 (October 12, 1982).)

Existing Rule

UNTA issued a regulation to implement these two statutory provisions on April 1, 1976 (41 FR 14123) (49 CFR Part 604). (For a detailed regulatory history of this regulation see 47 FR 44795 (October 12, 1982).) Section 604.11 of the existing rule implements the definition of mass transportation in section 12(c)(6) of the UMT Act, which excludes charter bus service, and the Comptroller General's related decision by prohibiting UMTA funded equipment and facilities to be used to provide charter bus service unless the service is incidental to the provision of mass transportation service. (Section 604.11(a).) The rule presumes that a recipient is using its equipment and facilities incidentally if it does not conduct weekday charters: (1) during peak morning and evening rush hours; (2) requiring a bus to travel more than 50 miles beyond the recipient's urban area; or (3) requiring the use of a particular bus for more than 6 hours in any one day. (Section 604.11(b).) These presumptions apply to all charter service, both intracity and intercity, but do not apply to any weekend charter service.

The existing rule implements section 3(f)'s protections for private intercity charter operators by requiring each recipient to enter into an agreement with UMTA that it will not perform any charter services outside of its urban area except as provided in the agreement. (Section 604.12.) This requirement applies to all recipients whether or not they plan to offer any intercity charter service. Although a recipient can negotiate its own agreement with UMTA (Section 604.14), the regulation provides a standard agreement that contains fair and equitable arrangements to protect private operators. (Section 604.13.)

The standard agreement contains two key provisions. The first requires any recipient conducting intercity charter service to cover its total charter costs with charter revenues on an annual basis. The costs that must be included are listed in Appendix B and include 79 separate items. The second provision prohibits a recipient from charging a predatory rate for any charter trip. If a recipient does not provide any intercity charter service, these economic restrictions do not apply.

If a recipient provides, or proposes to provide, intercity charter service, it must include several items in any grant application. First, it must include a statement that it has provided written notice to all private operators in the existing or proposed charter service area. Second, it must include a statement that it has published a notice in a local newspaper describing its existing or proposed charter service. Third, it must include a certification of costs and a cost allocation plan if it provides charter service. (Section 604.15.) If there are no private charter bus operators in the recipient's urban area, the recipient can make a certification in its application to that effect in lieu of including the above described documents. (Section 604.16.)

Although the charter bus regulation does not require an applicant to hold a specific public hearing on its proposed or existing charter operations, the regulation does permit private operators to comment on such operations at the public hearing required by section 3(d) of the UMT Act. (Section 604.4.) This hearing is required of all applicants for capital assistance under the UMT Act. If comments are offered, they must be submitted, with a transcript of the hearing, to the Administrator. (Section 604.17.)

The Administrator reviews the documents submitted by the applicant, including any comments by private operators. If the Administrator finds that the applicant has complied with the regulation, the Administrator may accept the certification of costs and cost allocation plan. The applicant is then permitted to enter into a charter bus agreement with UMTA. If the Administrator finds that the applicant has not complied with the regulation, the Administrator must notify the applicant and provide 30 days to submit revised documents. (Section 604.18.)

Any interested party (complainant) may file a complaint with the Administrator alleging that a recipient has violated the terms of its charter agreement. The Administrator will review the complaint to determine if probable cause of a violation exists. (Section 604.40.) If the Administrator determines that probable cause of a violation does exist, the Administrator notifies the recipient (respondent). (Section 604.41.) A respondent is provided 30 days to submit evidence and the complainant is provided with an equal amount of time to rebut the respondent's evidence. (Section 604.42.) After reviewing all of the evidence, the Administrator makes a written determination regarding whether a violation has occurred and, if so, the Administrator may order an appropriate remedy. Only when the Administrator determines that there has been a continuing pattern of violation can the respondent be barred from the receipt of further Federal assistance for mass transportation. (Section 604.43.) The Administrator's decision is deemed to be a final agency action, but may be judicially reviewed pursuant to 5 U.S.C. 701-706. (Section 604.45.)

A recipient who, together with all operators for the recipient, derived $15,000 or less in annual charter bus revenues, during its most recently completed fiscal year, is exempted from the scope of the regulation concerning intercity service. (Section 604.2.) Such recipients, however, must still comply with the incidental use presumptions.

Problems with the Current Regulation

The purpose of the UMTA charter bus regulations is to ensure that federally assisted equipment is used to meet mass transit needs as intended by the UMT Act and to protect the private intercity charter bus industry against subsidized and destructive competition by federally assisted grantees. The current regulation seeks to achieve this end by restricting the use of federally subsidized equipment for charter service to incidental operations and by requiring the revenues generated by such service annually to cover all costs, including subsidized costs and exempted taxes.

There are, however, a number of significant problems with the effectiveness of current regulation in either safeguarding the use of transit equipment or protecting the health of the private intercity charter industry.

First, since the charter bus regulations were first established, the economics of the intercity bus industry have become decidedly more fragile. Profitability has suffered a dramatic drop since 1970. In that year, the intercity charter bus industry enjoyed a 9.9 per centum profit margin. By 1984, however, the profit margin dropped to only 1.7 per centum. In addition, the industry net operating profit has dropped since 1970 by more than 50 percent to $39.9 million in 1984. The revenues taken away by Federal grantees is conservatively estimated to be $45 million annually. Loss of these reveneus could endanger the continued viability of the private bus industry, particularly in the face of new economic pressures such as dramatically escalating insurance rates. Additionally, the large spare ratio (national average has risen to 46 pecent) and new freedoms afforded by deregulation will encourage the public transit industry to seek an even greater share of the charter market.

Second, public transit operators are largely able to provide charter service because of the excess equipment and manpower available during off-peak hours. Peak-hour service which requires added equipment, facilities and labor, however, is generally acknowledged as the most expensive to provide. Even though revenues generated by rush-hour services are higher than other service, such revenues are not nearly enough to offset the high cost of rush hour service. The growth of such service is considered the greatest source of escalating transit deficits. Deficits have risen from $300 million in 1970 to $6 billion in 1984.

Rather than continuously expanding the rush-hour fleets and then seeking to forge into charter and other markets traditionally served by the private sector with excess transit equipment available during off-peak hours, it would be economically more prudent for Federal policy to encourage localities to reduce transit rush-hour requirements by greater reliance on significantly lower cost private sector strategies. Direct operation of premium express services by private operators and the establishment of active car and vanpool programs cost the public virtually nothing and have proven extremely satisfactory to customers. Contracting services that require subsidies has also proven very effective. Private operators have consistently demonstrated a 20- to 60-percent cost savings to the public when service has been competitively contracted to them.

The current UMTA charter bus regulations, however, are grounded in philosophy which encourages the accumulation of transit equipment to meet rush-hour needs while permitting utilization of that equipment to intrude into private markets during other periods. This philosophy is economically harmful to both the transit and private charter bus industries.

Third, in effect, the policing of the current charter bus regulations is left to private operators who are expected to report violations and protest unfair pricing practices by UMTA grantees. However, private operators cannot distinguish federally assisted buses from those that are not so assisted. It is also difficult to gauge the fairness of prices being charged, since only an annual accounting of costs and revenues is required.

It is also difficult for private operators to protest public agency charter service because in many cases they may receive or desire contracts with federally assisted grantees. In a few instances, they may even be regulated by this agency.

Fourth, even UMTA recipients complain that the current economic approach, i.e., the cost allocation plan, is not effective. They argue that it is a useless accounting exercise and that it does not account for all necessary costs or permit deductions that appropriately reduce charter costs.

Fifth, the current regulation is difficult to enforce. UMTA does not have adequate personnel to effectively enforce the current regulation. Effective enforcement would require UMTA

VOL

1986
UMI

financial audits of transit properties, evaluations of the cost allocation plans, as well as periodic audits of the manifests of transit agency's charter trips. To determine that no predatory pricing is occurring, UMTA would additionally need to review private charter bus companies' pricing structures. Given Federal budgetary constraints, UMTA cannot realistically expect to police the current regulations. Consequently, UMTA action in resolving complaints is often a very lengthy and time consuming process. Complaints have taken years to resolve and the burden of proof lies with the protesting private operator.

Sixth, the limitation in the existing regulation on the use of UMTA-assisted vehicles to incidental intracity charter service has been insufficient to safeguard the use of that equipment for mass transit purposes. The current regulation provides that the use of federally funded buses "will be presumed not to be incidental" when engaged in charter service during peak-hours, going more than fifty miles beyond the grantee's urban area, or for more than a total of six hours in any one day. Despite these presumptions, considerable confusion exists as to what constitutes incidental service. For example, varying interpretations of "peak-hours" have been made. Some recipients have narrowed their peak-hours to only the peak-of-the peak. In one such case, the peak period lasts only 14 minutes in the morning and 8 minutes in the afternoon rather than the traditional several hour period. This lack of uniformity undermines the presumption that any peak hour charter service by UMTA funded vehicles demonstrates a non-mass transit need.

The problem with incidental use is increased by the number of spare UMTA funded buses in the fleets of many transit agencies. As mentioned above, the national spare ratio has now risen to 46 per centum. Such high ratios, often far in excess of peak-hour service requirements, render the incidental use presumptions ineffective since they allow transit authorities to rebut those presumptions. This situation makes available a substantial amount of UMTA funded equipment for non-transit purposes, as well as permitting, perhaps encouraging, recipients to provide significant competition with private operators.

Seventh, it is important to note that the private charter industry, unlike UMTA's statute and regulations, is not divided into intracity and intercity segments. The same private operators providing intercity charter service also offer intracity service. Therefore, subsidized competition, which is permitted by the regulation if only intracity service is provided, poses a threat to their financial well-being. Thus, the current regulation fails to address this serious problem.

Some of these same concerns were brought to the attention of the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). As a result, the regulation was placed on the review list of the Presidential Task Force on Regulatory Relief. UMTA, therefore, expedited its review process and published an advance notice of proposed rulemaking (ANPRM) on October 12, 1982 (47 FR 44795). UMTA issued this ANPRM since there were several fundamental issues that needed exploration and many areas for which public comment was needed before an effective revision of the regulation could be proposed. Although the ANPRM also included a related UMTA regulation on School Bus Operations, we have decided to separate the two at this point and to issue this NPRM separately to hasten publication of the final charter bus regulation. Nevertheless, UMTA is still committed to issuing an NPRM for School Bus Operations in the near future.

The ANPRM

In the ANPRM, UMTA proposed four alternative approaches to the existing regulation. The first alternative would have retained the existing regulation and would have made certain modifications such as adding or deleting specific costs in the cost allocation plan. Thus, no change was proposed to the existing implementation of sections 12(c)(6) and 3(f) of the UMT Act.

The second alternative would have modified the existing implementation of section 12(c)(6) by making the incidental use presumptions conclusive. As a result, UMTA recipients' intercity charter operations generally would have been limited to the weekends. This alternative would not have modified the existing approach for implementing the section 3(f) protections for private intercity charter operators. The same cost, revenue, and rate requirements would have applied. In an attempt, however, to reduce the administrative burdens on UMTA recipients, we proposed a self-certification process. Recipients would have been able to submit a certification to UMTA stating that its charter revenues equal or exceed its charter costs rather than submitting the detailed cost allocation plan and certification of costs required now.

The third and fourth alternatives only proposed modifications to the existing provisions implementing section 3(f). UMTA proposed in the third alternative to require recipients to charge charter rates comparable to those charged by private operators. Specifically, a recipient would have been prohibited from charging intercity charter rates that were lower than the lowest rate charged by the three largest private operators providing the same or similar service in the area. This approach was suggested in legislative history (H.R. Rep. No. 553, 93rd Cong. 1st Sess. 3 (1973)) and is consistent with the requirements of certain States, including Colorado. (Colo. Rev. Stat. 32–9–103(7)(b) (1973).

The fourth proposed alternative would have restricted a recipient's intercity charter bus activities based on passenger-miles. UMTA proposed to limit a recipient's intercity charter activities to 50 percent of the average number of intercity charter passenger-miles that the recipient had provided during its last three fiscal years. Under the proposal, a recipient could have exceeded its ceiling only if the private charter operators in the service area agreed to the additional miles.

In the ANPRM, UMTA recognized that there may be other alternatives to the four described. For example, UMTA possibly could implement section 3(f) by prohibiting a recipient from conducting any intercity charter activities, but allowing the recipient to lease its equipment to private operators for such charter trips. Another approach would be to propose legislative changes that would more clearly spell out the scope of permissible charter activities. Furthermore, UMTA could enter into individual agreements with recipients rather than issuing a regulation containing an agreement.

In the ANPRM, UMTA also discussed four collateral issues that are integral to the charter bus regulation. First, UMTA asked whether the current provision that excepts recipients from the regulation if their annual charter revenues are $15,000 or less should be retained. Second, UMTA proposed to revise the definition of "urban area" since the current expansive definition has often been criticized by private operators. Third, UMTA asked whether it might be helpful to require a recipient to limit the number of spare buses it could use in charter service. Finally, UMTA asked what revisions could be made to the current complaint process to make the resolution of complaints more meaningful and expeditious.

UMTA requested comments on each of the four alternatives and the four

collateral issues. In addition, UMTA requested that all charter bus operators, both UMTA recipients and private operators, provide UMTA with information on their charter bus operations.

Comments on the ANPRM

UMTA received 93 comments on the ANPRM. A total of 91 different commenters submitted these comments. The breakdown by category is as follows:

52—Public transit operators (UMTA recipients)
19—Private bus companies
3—Trade Associations representing public transit operators
5—Trade Associations representing private bus companies
3—Municipal governments
5—State Departments of Transportation
4—Others

In general, comments from public transit operators, and those trade associations representing them, favored those proposals that would ease the regulatory and administrative burdens placed on their charter bus operations. Specifically, these commenters argued that it is unfair for UMTA to further restrict their ability to provide charter service, and limit their ability to earn needed revenues to offset operating deficits, at a time when Federal operating assistance is being curtailed. These commenters also argued that restrictions proposed in several of the alternatives would prevent the best use of Federal tax dollars since they would result in federally assisted buses sitting idle when they could be put to good use.

Comments from private bus companies, and the trade associations representing them, in general urged UMTA to select the alternatives that would provide more protection for them. In several cases, these commenters urged UMTA either to prohibit charter operations by recipients or to at least apply the same requirements to intracity operations as to intercity operations.

UMTA will discuss the specific comments on the ANPRM below not by alternative, but by section of the UMT Act. Thus, there are two main sections, one on 12(c)(6) and the second on 3(f). We have taken this approach since it focuses on the philosophical differences in the proposed approaches.

A. Section 12(c)(6)

The existing rule implements the definition of mass transportation in section 12(c)(6) of the UMT Act and the related Comptroller General's decision by prohibiting a recipient from providing any charter service, whether intracity or intercity, unless it is incidental to the provision of mass transportation service. The rule states that certain weekday charter service is presumed to be not incidental if it: (1) Occurs during peak periods; (2) involves a trip that goes 50 miles beyond a recipient's urban area; or (3) requires the use of a particular bus for more than 6 hours in one day. If a complaint is filed alleging a violation of this requirement, a recipient is permitted to rebut the presumption with factual evidence.

As described above, only the first and second alternatives in the ANPRM addressed section 12(c)(6). The first alternative would not have modified the existing presumptions. The second alternative woud have made the presumptions conclusive. As a result, any charter service that was contrary to the presumptions would have automatically resulted in a violation. The recipient would not have been able to rebut the presumption once it was established that, in fact, it had operated charter service during peak periods, going 50 miles beyond the recipient's urban area, or requiring the use of a bus for more than 6 hours in any one day. UMTA's experience with charter bus complaints has been that this has been the source of many problems. In the ANPRM, we stated our opinion that by making the presumptions irrebuttable the number of alleged violations would be greatly decreased and it should be easy to determine if, in fact, a violation had occurred.

Fifty-four commenters commented on UMTA's second alternative. The majority of these comments were submitted by public operators. Seventeen, or almost one-third, of the commenters favored this alternative. These commenters represent a cross-section of the pool of commenters and include both public and private operators. The majority, however, are private operators and trade associations representing them.

More than one-half of the commenters addressing this alternative, most of whom were public operators, rejected it. These commenters provided a wide range of reasons to support their arguments against this alternative. In general, they stated that this approach would be too burdensome. Many stated that making the incidental use presumptions conclusive, and thus in effect limiting their charter operations to the weekend, decreases local flexibility and takes away needed management options as to the use of personnel, facilities, and equipment. Public operators also stated that the flat prohibition does not take into account seasonal variations in charter demand and could leave many consumers without needed charter services in the summer and other peak demand periods. One public operator stated that making the incidental use presumptions conclusive would take away 95 percent of its charter business.

One private citizen offered a comment indicating the practical problems that this approach would create. This person stated that the only charter service available in her area that is accessible to handicapped persons is provided by the local public operator. The commenter argued that if UMTA were to make the incidental use presumptions irrebuttable, the local public operator would not be available for charter trips for local handicapped organizations who would have their mobility restricted further.

Several commenters noted that one problem with this approach, and even with the current presumptions, is that UMTA does not define peak hours. Under the current presumptions, a charter service provided during "peak morning and evening rush hours" is presumed to be not incidental as to mass transit service. These commenters stated that peak hours vary from operator to operator and can even vary within one urban area depending on the season.

Moreover, the commenters stated that their need for buses during any peak period is not constant. Peak periods, like the day in general, have certain times when more buses are needed than at others. Thus, while a peak period may last from 6:30 a.m. to 9:30 a.m., the maximum buses are in use between 7:30 a.m. and 9:00 a.m. The time on either side of this maximum period is referred to as "shoulders." Commenters argued that they could begin or end some charter service during the "shoulders" without interfering with their regular transit service. They asked UMTA to modify this second alternative to account for this phenomenon if this approach were adopted.

UMTA, however, has decided not to adopt either of these approaches in the NPRM. Instead, as will be discussed below, we believe that section 12(c)(6) provides UMTA with broader discretion to impose stricter requirements that will provide better protections for UMTA equipment to ensure that its use is for mass transportation.

B. Section 3(f)

The existing regulation implements the section 3(f) protections for private intercity charter operators with two key provisions in the standard charter bus agreement in § 604.13 of the regulation.

VOL
51
ISS
44
MR
6
1986
UMI

First, if a recipient conducts any intercity charter service, it must cover its total charter costs, both intracity and intercity, with charter revenues on an annual basis. Appendix B lists the 79 separate costs that must be accounted for. The second provision prohibits a recipient from charging a predatory rate for any charter trip.

1. The first alternative would not have altered this approach except to add or delete certain costs from the calculation in order to put a recipient's operations on a more equal footing with a private operator's operations.

A total of 49 commenters provided comments on UMTA's first alternative. A majority of these commentors, mainly public operators, favored either retaining the regulation as is or with modifications. The most commonly suggested modifications included making the cost allocation plan/certification of costs self-certifying, as UMTA proposed under the second alternative. A majority of the nine private operators that commented on this alternative also favored its retention. Only three commenters opposed the alternative outright.

By far the largest number of comments on this alternative addressed the problem with the current cost allocation plan. In general, public operators urged UMTA to eliminate this requirement on the grounds that it is too burdensome, a futile accounting exercise, and a waste of valuable personnel and resources. Several public operators, however, stated that the preparation of this plan is not burdensome and that they would, as good business practice, prepare such data even if not required to do so by UMTA.

Several private operators stated that the requirement that recipients who provide intercity charter service prepare a cost allocation plan to show that their charter revenues equal or exceed their charter costs provides little protection for them. These private operators argued that since most private charter bus operators are small companies, they do not have the money or personnel to thoroughly review or challenge a recipient's cost allocation plan.

As indicated in the ANPRM, many parties involved with the charter bus regulation have urged UMTA either to include or to permit deductions for specific costs in the current "List of Expenses" for the cost allocation plan found in Appendix B to the regulation. UMTA received many comments with specific suggestions. These suggestions include requiring recipients to add a factor for profit and to add the prorated general and administrative expenses attributable to charter operations. Several public operators stated that the cost of complying with Federal regulations, such as the cost of preparing the cost allocation plan or defending charter bus complaints, should be deducted from the total charter costs. The public operators argued that unless these costs, which private operators do not have to incur, are deducted, the comparison of costs between the two types of operators is not comparable.

Although this alternative received wide support from commenters, we do not believe it is a workable solution to the problems facing the private charter bus industry. As indicated above, both public operators and private operators find the current cost allocation plan useless or burdensome. Not only is it burdensome to prepare, but it apparently does not serve as a protection to private operators. The suggested modification of including or deleting certain costs does not, in UMTA's opinion, address the real problem.

Furthermore, the continuation of this current approach relies primarily on the regulation of rates charged by UMTA recipients in order to protect charter operators. This Administration opposes regulation of this sort. The Bus Regulatory Reform Act (Pub. L. No. 97-261) reduced the involvement of the Federal Government in reviewing and approving the rates that interstate bus carriers can charge. This is but one example in the trend away from the economic regulation of the transportation industry. A continuation of the approach in the current charter regulation would be contrary to this policy. Thus, UMTA has decided not to adopt the first alternative approach.

2. In the second alternative, UMTA proposed to continue the existing implementation of section 3(f) except to make it a self-certification process. As indicated above, this was one modification to the existing rule that many commenters supported. UMTA feels, however, that the reasons given for not adopting the first alternative are equally applicable here. As a result, UMTA has decided not to adopt this second alternative.

3. In the third alternative, UMTA proposed to implement section 3(f) of the UMT Act by requiring a recipient to charge a rate for all charter trips no lower than the lowest rate charged by the three largest private operators providing the same or similar service in the area. Of the 42 commenters commenting on this proposal, ten favored it. Several of these commenters, however, suggested modifications such as eliminating the requirement that it be "the same or similar service," or requiring a comparison with three private operators only if three exist.

Thirty-three of the commenters opposed this approach. Over half of these are public operators.

In the ANPRM, UMTA noted several practical problems associated with this alternative. For example, how should "largest" be determined? Should it be based on volume of business, number of passengers transported, annual revenues, number of employees, or number of buses? In addition, what should be done if there are only one or two public operators in the service area? Moreover, how should "service area" be defined? The majority of commenters opposing this alternative cited the difficulty in answering these and other questions as a reason for not adopting it.

One public operator provided a personal example of how difficult this approach would be to implement. This commenter stated that a provision in its State Public Utilities Code requires a similar rate-comparability approach. The commenter relates, however, that when it held a hearing in an attempt to establish charter rates not less than those charged by the three largest private operators operating the same or similar service in the area, "unbelievable confusion reigned." As a result, the commenter abandoned all plans to institute local charter service.

In the ANPRM, UMTA noted that the Bus Regulatory Reform Act also contributes to the problems with this approach. This Act makes it easier for private companies to enter the charter bus market and removes many restrictions on the rates they can charge. This could result in a large category of potential competitors whose rates would be unknown to a recipient. Many commenters agreed with UMTA's observations and cited them as a sufficient reason for rejecting the rate-comparability approach.

It is UMTA's opinion that these comments indicate that this approach would prove to be generally unworkable. In addition, this approach, like the first two alternatives, relies on regulating the rates UMTA recipients can charge to protect private operators. As stated above, the Administration is opposed to this form of regulation. Therefore, UMTA has not selected this approach.

4. Under the fourth alternative that UMTA proposed in the ANPRM, the protections for private intercity charter operators would have been implemented by limiting the amount of intercity charter service recipients could provide by placing a ceiling on the allowable number of charter passenger-miles. UMTA proposed that this ceiling be set once, be recipient-specific, and that it equal 50 percent of the average number of charter passenger-miles that a recipient had provided during its past three fiscal years. UMTA also proposed that a recipient would have been able to engage in charter operations in excess of its ceiling only if it received the approval of the local private operators, through a sign-off process, for those additional miles.

As noted in the ANPRM, UMTA, recognizes that this approach represents a marked difference from the existing charter bus regulation and the other alternatives. This alternative is based on the concept of volume of business, not the rates charged for that business. Although a close monitoring of the rates a recipient charges is one way to ensure that the recipient is not foreclosing private operators, the volume of business a recipient provides may be an equally effective means of preventing overall foreclosure. It may not, however, be as effective at preventing foreclosure on specific routes.

Thirty-nine commenters addressed this alternative. More than two-thirds of these commenters are public operators. Five commenters favored this approach. They stated that it would provide an easier regulation to enforce than the current rule. They suggested, however, that UMTA modify the proposal to raise the ceiling to 85 percent or 90 percent of the average past three years of charter passenger-miles and revise the ceiling every five years.

The remaining 34 commenters opposed this approach. More than 80 percent are public operators. Many of these commenters provided specific arguments against the passenger-mile ceiling. Many argued that this approach would be too inflexible and that it would force public operators out of the charter business. Others argued that setting the ceiling would be unfair to existing charter operators since it would enable operators who begin charter service to set their own ceiling by providing a certain level of charter service during the base period. Many commenters pointed out that setting the ceiling once would not accommodate areas with growing populations and, hence, expanding charter service demands. In addition, public operators stated that requiring private operators to sign off on any charter miles that exceed the ceiling would give the private operator veto power, would create a paperwork nightmare, and would harm not only the public operators but also the consumer who needs the service.

While UMTA still believes that this alternative may present a desirable alternative to the current rate regulating approach, we believe that the administrative burden it would impose, particularly on recipients, does not justify its adoption.

5. The four approaches that were presented in detail in the ANPRM do not exhaust the range of alternatives to the current charter bus operation. In the ANPRM, UMTA briefly listed alternatives such as restricting recipients' intercity charter bus activities to leasing arrangements with private operators, entering into individual agreements with recipients in place of a regulation, and proposing amendments to the UMT Act to clarify the permissible charter activities.

Eighteen commenters addressed these alternatives. Three of these commenters favored rescinding the regulation and requiring UMTA to enter into individual charter bus agreements with recipients. The three commenters who opposed this approach argued that while it may be one way to account for the variations in the charter industry from one urban area to another, it would be administratively cumbersome for UMTA. Furthermore, these commenters stated that individual ageements would not ensure any degree of uniformity from recipient to recipient. UMTA agrees with these commenters and feels that the burdens associated with this approach outweigh its benefits.

Four commenters addressed the proposed leasing approach. These four represent both the public and private sector and all opposed this approach. Similarly, the three commenters who commented on the proposal to change the UMT Act opposed it.

Commenters also proposed a variety of other approaches. Most of these, however, involved variations of the four main alternatives. While UMTA believes that these suggestions have merit, many would further complicate the existing regulation in an attempt to provide either more protections for private operators, or ensure greater freedom for recipients.

The NPRM

In this NPRM, UMTA proposes an approach different from those proposed in the ANPRM. For the reasons discussed above, there are sufficient problems with the existing rule and with each proposal to cause UMTA to propose a different approach which UMTA believes more effectively implements the existing statutory provisions.

In this NPRM, UMTA proposes to prohibit an UMTA recipient from providing any charter bus operations to the extent that there is a private charter but operator willing and able to provide such charter service in the area in which the recipient desires to provide charter bus operations. This general prohibition is set forth in § 604.9 and is rooted in the language of section 3(f) of the UMT Act which provides protections for willing and able private intercity charter bus operators. The NPRM proposes a definition for the key term of "willing and able." This and other proposed definitional changes will be discussed below.

For the purpose of this NPRM and this discussion, "charter bus operations" means charter service which a recipient provides using UMTA funded equipment or facilities. This proposal would not change the philosophy of the current rule that charter service provided with 100 per centum local assistance is not subject to any UMTA restrictions. As under the existing rule, UMTA operating assistance could not be used to support charter bus operations.

There are exceptions to this proposed general prohibition. Obviously, if there are no willing and able private charter bus operators, the recipient would be permitted to do any and all charter service using UMTA buses, equipment or facilities that it is requested to do. In this case, however, UMTA intends that the recipients' rates reflect the actual cost of providing the service. Under the NPRM, there would be no restrictions on the charter service provided if this exception were to apply. UMTA asks commenters to address this point. Should UMTA, for example, impose restrictions such as the current incidental use presumptions?

Proposed § 604.9 also sets forth two specific exceptions. First, a recipient would be able to provide charter bus operations if a willing and able private operator did not have the capacity requested. For example, suppose the request to A.B.C. Private Charter Co. (A.B.C.), were for 20 buses. A.B.C., however, only has 10 buses. The NPRM would permit the local UMTA recipient to provide some or all of the service *if* A.B.C. were unable to secure the necessary additional buses from the other private willing and able charter companies. Thus, the NPRM proposes the UMTA recipient as the charter provider of last resort. It is important to stress that the recipient would be providing the service *not* on its own, but only through a contract with, in the example, A.B.C.

The second exception is similar. A recipient would be able to provide charter bus operations if the willing and able private charter operator did not

VOL
51
ISS
44
MR
6
1986
UMI

have equipment accessible to handicapped persons. Suppose A.B.C. is requested to provide wheelchair lift-equipped buses to take a local handicapped organization on an outing. If A.B.C. did not have any lift-equipped buses, but the UMTA recipient did, the recipient could provide the service. As with the first exception, however, the private operator could only use the recipient as a last resort after it was unable to secure the equipment from other willing and able private operators. Futhermore, the recipient would be providing the service under a contract with the private operator and not directly itself.

UMTA requests comments whether the final rule should provide other exceptions. For example, should an UMTA recipient be able to directly provide charter service, as opposed to under contract with a willing and able private operator, if the request were for a total number of buses that exceeds the total fleet capabilities of all willing and able private charter operators? Similarly, would it make more sense to permit the public to contract directly with the recipient if it alone possessed the requested type of accessible equipment such as wheelchair lift-equipped buses?

Given this basic prohibition, the NPRM proposes several procedural steps that an UMTA applicant and recipient, i.e., an applicant who receives UMTA funding, would have to comply with. First, following the language in section 3(f), all applicants for UMTA assistance to provide mass transportation service would have to enter into a charter agreement with UMTA. Section 604.7 proposes this requirement. UMTA proposes that the agreement be included in each grant application, but would permit an incorporation by reference in subsequent applications once the agreement were entered into.

The text of the proposed agreement is set forth in § 604.7 and applicants would be required to use it. Deviations would not be permitted. Basically, the applicant would agree to not provide any charter bus operations to the extent there were a private charter bus operator willing and able to provide charter service in the area it desires to provide charter bus operations unless one or more of the exceptions discussed above were to apply. In addition, the applicant would agree to comply with the regulation before commencing any charter bus operations. The applicant would have to include two copies of the agreement signed by the applicant's designated official with its application. The NPRM proposes to define the "designated official" as "the applicant's and recipient's employee authorized to execute and file applications on behalf of the applicant or to enter into agreements on behalf of the recipient." Thus, the person signing the agreement for the applicant would be the same person signing the grant application.

Under the NPRM, UMTA would only sign the agreement if it approves the grant application. Absent the type of legal relationship created by a grant agreement, it does not appear necessary for UMTA and an unsuccessful applicant to be bound in any way. The UMTA official approving the application, generally one of the Regional Administrators, would sign for UMTA and return one copy to the former applicant, now a recipient.

The second procedural section is proposed § 604.11. This is, in many respects, the heart of the NPRM since this section proposes the mechanism a recipient would have to follow to determine who are, if any, the willing and able private charter bus operators in the area in which it desires to provide charter bus operations. If a recipient did not desire to provide any charter bus operations, this and the rest of the rule would not apply to it until it were to decide it wanted to offer such service.

To make the determination of whether there were any private charter bus operators willing and able to provide charter bus service in the area within which the recipient desires to provide charter bus operations, the recipient would have to hold a public hearing. For a recipient that currently provides no charter bus operations, but desires to do so after the effective date of this rule when finalized, the public hearing would have to be held at least 60 days prior to offering to provide charter bus operations. For recipients currently providing charter bus operations under the existing regulation on Charter Bus Operations and desirous of continuing to offer such service, the public hearing would have to be held no more than 60 days after the rule as final becomes effective.

The NPRM would require the recipient to provide notice of its hearing in three distinct ways. First, the recipient would have to publish the notice in a newspaper, or newspapers, of general circulation within the proposed charter service area. UMTA has included the "or newspapers" language to provide for the situation where there is not one newspaper of general circulation that would cover the entire proposed charter service area. In such a case, the recipient would have to publish notices in as many newspapers as necessary to cover the entire proposed charter service.

Second, the recipient would have to send a copy of the notice to any private charter bus operator requesting that it be sent copies of such notices. This would provide actual notice to any private operator that requested it. Once a private operator requested notice, the recipient would provide it with a copy of the notice for all subsequent hearings held under Section 604.11.

Third, the recipient would have to send a copy of the notice to the United Bus Owners of America (UBOA), 1275 K Street, Suite 808, Washington, D.C. 20005, and the American Bus Association (ABA), 1025 Connecticut Avenue, NW., Washington, D.C. 20036. It is UMTA's opinion that notice to these organizations would be helpful. UBOA and the ABA are the trade associations representing virtually all private charter bus companies. Consequently, notice to them would be another way to ensure that notice is received by the potential willing and able private charter operators in the proposed service area. This could be effectively done by UBOA and the ABA through their newsletters.

The NPRM lists the information that would have to be included in the notice. This would include basic information such as the date, place and time of the hearing. The critical information that would have to be included would be a description of the area and type of charter bus operations the recipient desires to provide. If the recipient only desires to provide charter bus operation within its urban area, or only on certain days, the notice would need to so state. This is important since the rule would only prohibit a recipient from providing charter bus operations to the extent there is a willing and able private operator. Therefore, if no private operator is willing and able to provide charter service in part or all of the recipient's proposed charter service area or only on some of the proposed days, the recipient's would be able to provide the rest of the charter service since there would be no willing and able private charter bus operator.

In addition, the notice would have to state the evidence a private operator would have to present at the hearing to prove that it is willing and able. The NPRM proposes to define "willing and able" as "having the physical capability to actually provide charter bus service and the legal authority and necessary safety certifications, licenses and other legal requirements to provide charter bus service." Thus, under the first part of the definition, a willing and able

private operator would be one that has the capability to provide the service. A broker who has only an office and a telephone and arranges for the recipient or private operators to provide service would not, therefore, under the NPRM, be willing and able since the broker would never itself provide the service. UMTA asks commenters to address this point. If one goal of the revised rule is to open opportunities for the private sector, should not a private sector broker be considered just as willing and able as an operator to provide charter service?

In this NPRM, UMTA does not intend to include within the concept of capability any notion of capacity. Thus, a private operator that operates one bus is as capable as a private operator that operates 100 buses. A private operator would not be considered willing and able to provide charter service only up to its own actual capacity. As a result, if one private operator meets the definition of willing and able for the entire area and for all the days the recipient desires to provide charter bus operations, even though it operates only one bus, the recipient would be limited to providing charter bus operations through a contractual arrangement with that private operator when it lacks the capacity or accessible equipment.

The second part of the definition concerns the legal authority to provide charter bus service. To be willing and able, a private operator would have to have all the required operating authority, safety certifications, insurance requirements, and any other legally required documents, to provide the charter service it alleges it can provide. The evidence, therefore, that a private operator would have to provide for the recipient at the public hearing would be a statement of its capability to actually provide charter service and copies of the necessary legal documents.

UMTA asks commenters to address this definition and the type of evidence that would have to be submitted. Specifically, UMTA wonders what additional elements, if any, should be included in the definition.

Finally, the notice would have to summarize how the recipient would process the evidence submitted. These procedures are set forth in more detail in proposed § 604.13. First, the NPRM would require the recipient to complete its review of all the evidence submitted within 30 days of the hearing. Second, the recipient would have to notify each private charter bus operator within 60 days of the public hearing whether the recipient finds the private operator to be "willing and able." The recipient would have to include with the notification a list of all private operators that it determined were willing and able.

The NPRM states that the recipient would have to review the evidence submitted by the private operators to decide whether the evidence shows that the operator is willing and able. If the evidence proves that the operator meets the definitional requirements, the recipient must determine that it is willing and able. Thus, UMTA proposes to give recipients no discretion in making these determinations.

UMTA asks commenters to address particularly this aspect of the NPRM. For example, should a recipient be able to look behind the evidence submitted to determine if it is valid or should a recipient have to accept it on face value? Furthermore, if a recipient should be able to look behind the documents, should this extra scrutiny be permitted only in limited circumstances such as when the recipient has reason to believe the documents are falsified?

Proposed § 604.11(d) would require a recipient that desires to provide charter bus operations to annually redetermine the extent to which there are any willing and able private charter bus operators in the urban area. The recipient would have to hold a public hearing annually during the month in which it held its first hearing. The recipient would have to follow the same notice and evaluation procedures it did for the first hearing and send a copy of the notice to all previously determined willing and able private operators.

This provision is critical since it would provide an opportunity for new private operators to prove that they are willing and able and for existing willing and able private operators to extend the spheres of their operations. While the result of these reevaluations could be that the recipient would be able to provide less service, it would also enable a recipient to expand its charter bus operations if fewer private charter bus operators were in business.

It is UMTA's position that only an annual determination is necessary. More frequent public hearings would place unnecessary paperwork burdens on recipients. We would, however, be interested in comments on the frequency of hearings. For example, a hearing every other year may be adequate.

Complaint Process

UMTA proposes to modify the existing charter bus complaint procedures. In the ANPRM, UMTA proposed several modifications to the existing complaint process. First, we proposed to require that private operators attempt to settle disputes with recipients at the local level either before filing a complaint with UMTA or as the first stage of the UMTA complaint process. Second, UMTA proposed that neutral third parties, instead of the Administrator, act as the fact-finder in complaints. This third party could also prepare proposed decisions that the Administrator would have to ratify. Third, UMTA proposed that deadlines be imposed on all parties in the complaint process in order to ensure an expeditious resolution of complaint.

Twenty-five commenters commented on the proposed revisions. Three-fifths were public operators. Several commenters stated that the complaint process should not be changed. Nearly one-half of the commenters favored a required local conciliation process. UMTA agrees with these commenters. The NPRM proposes local conciliation as the first step in the complaint resolution process. Once the UMTA Regional Administrator determines that a complaint has merit and states a claim for which relief can be granted, the Regional Administrator would notify the parties and direct them to attempt to conciliate the dispute informally and without UMTA involvement.

Nearly one-half of the commenters favored a fixed timetable for processing complaints. UMTA also agrees with these commenters, and the NPRM proposes strict guidelines for all stages of the process. UMTA seeks specific comments on the appropriateness of the proposed time periods.

Of the eight commenters who addressed the use of the neutral fact-finder, six opposed it. The commenters cited several reasons for this opposition including the argument that UMTA should not delegate its statutory responsibility to resolve complaints, and the fear that the use of a fact-finder who was not an UMTA employee would delay the complaint process.

After thorough review, UMTA had decided not to propose the use of any third parties in the complaint process. UMTA will resolve the complaints in-house in an expeditious manner.

Commenters offered a variety of other suggestions on the complaint process. These include requiring a losing recipient to pay a complainants' costs, publishing all decisions in the Federal Register and encouraging UMTA to impose significant penalties.

UMTA has not adopted any of these suggestions in the NPRM. We have, however, made it clear that the initial decision would be made in UMTA's Regional Offices, with Headquarters concurrence. We also propose to provide an appeals process to the Administrator. In addition, UMTA will

VOL
51
ISS
44
MR
6
1986
UMI

prepare an annual digest of charter bus decisions and publish it in the Federal Register. UMTA has decided to take this action in response to a recent General Accounting Office report.

The specific aspects of the complaint procedure are as follows. Under § 604.15, if an interested party believes a recipient has violated the regulation, the NPRM proposes that the party file a written complaint with the UMTA Regional Administrator for the region in which the complaint arises. If the Regional Administrator believes that the complaint is meritorious and states grounds on which some relief could be granted, the Regional Administrator notifies the parties in writing and directs them to conciliate the dispute informally. The NPRM would provide 20 days for this process. It would permit an extension of this time if the parties agreed it was needed.

If conciliation occurs, the process is complete. If not, the parties must so inform the Regional Administrator. The Regional Administrator then requests documents from the recipient as to its position in response to the complaint. The respondent has 20 days to produce the evidence. The complainant is then given 15 days to rebut the evidence.

Once the evidence is received, the Regional Administrator would either prepare a draft decision or the Regional Administrator would determine that more information is needed. This additional information could be obtained in written form or through a hearing. The preparation of the draft decision must be completed by 15 days after the complainant rebuts the respondent's evidence, after the additional information is received, or after a hearing is held.

The Regional Administrator then submits the draft decision to UMTA Headquarters for review. If Headquarters agrees with it, the decision is sent immediately to all parties. If Headquarters disagrees, it has 10 days to resolve the dispute and have the decision issued.

The NPRM, therefore, proposes a complaint process that lasts for approximately 80 days. The NPRM, however, would permit UMTA to extend any deadlines for administrative convenience.

Section 604.17 would permit the Regional Administrator to impose remedies that would be appropriate to the finding. If the Regional Administrator finds that a violation has occurred and it is one in a continuing pattern of violations, the Regional Administrator has the authority to bar the recipient from future Federal funding for mass transportation. These provisions do not differ in substance from existing §§ 604.43(b)–604.44. UMTA requests comments on whether the rule should define "continuing pattern" and, if so, what the definition should be. Furthermore, UMTA asks commenters whether the rule should specify a specific penalty for violations including a continuing pattern of violations. For example, the rule could specify that a violation would result in a 10 per centum withholding of UMTA funds and a continuing pattern would result in a complete bar of any UMTA funds in the future.

Section 604.19 would add a new step in the complaint process. Since the initial decision would be made at the regional level, the NPRM provides for an appeal to the Administrator for review. The request for review must be made by the losing party within 10 days after the Regional Administrator issues the initial decision. The Administrator will take action on an appeal only if the losing party produces evidence that there are new matters of fact or points of law that were not available or known when the initial decision was made. If the Administrator takes action on an appeal, the NPRM provides the prevailing party with 10 days to rebut the evidence. After that evidence is received, the Administrator has 15 days to issue a final decision.

UMTA asks commenters to address whether the rule should provide an appeal prior to that proposed in Section 604.19. Such an intermediate step would permit the losing party to receive a review of the initial decision even though no new matters of fact or points of law that were not available or known when the initial decision was made have come to light.

UMTA also asks commenters to address the issue of whether it would be advantageous for the rule to set up an advisory committee made up of representatives of both recipients and private operators to review the submissions by complainants and respondents and offer advice to the UMTA decisionmaker. Such a review panel may be of particular help in the intermediate appeal process discussed in the paragraph above.

Section 604.21, like current § 604.45, provides that judicial review of a final agency action is authorized pursuant to sections 701–706 of the United States Code.

Definitions

The NPRM proposes several new definitions to the regulation. The definitions of "designated official" and "willing and able" have been discussed above. UMTA proposes a minor change to the definition of "charter bus operations." We proposed adding the phrase "with UMTA equipment or facilities funded or operating assistance provided under the Acts." There are two reasons for this proposal. First, it makes clear that the only charter bus operations which this regulation affects are those an UMTA recipient provides using UMTA assistance. As stated above, it is UMTA's current policy, and we propose to continue it, that any charter bus services which a recipient provides with 100 per centum local funds are not touched by this rule.

The second reason is for economy of words. In the current regulation every time the phrase charter bus operations appears it must be modified by "with UMTA equipment or facilities funded under the Acts" or a similar phrase. Adding this language to the definition will make the regulatory language less cumbersome.

One definition which UMTA proposes to eliminate is "urban area." The definition of "urban area" serves a triggering function under section 3(f). Once a recipient engages in charter operations outside the "urban area within which it provides regularly scheduled mass transportation services," its charter operations become subject to agreed upon ". . . arrangements, appropriate in the judgement of the Secretary, to assure that the financial assistance granted under [the] Act will not enable public bodies and publicly and privately owned operators for public bodies to foreclose private operators from the intercity charter bus industry." (49 U.S.C. 1602(f).) So long as a recipient keeps its charter bus operations within its "urban area," it need not comply with the "fair and equitable arrangements" for the protection of private operators imposed by its section 3(f) agreement with UMTA, although it must comply with incidental use presumptions pursuant to UMTA's and the Comptroller General's interpretations of the definition of mass transportation in section 12(c)(6) of the UMT Act. Currently, the charter regulation makes all of a recipient's charter bus operations, both within and beyond its urban area, subject the arrangements of a recipient's section 3(f) agreement when a recipient engages in charter operations outside its urban area.

The definition of "urban area" for purposes of the UMT Act is left to the Secretary's discretion. Under the UMT Act, the term "urban area" means any area "which is appropriate, in the judgement of the Secretary, for a public

transportation system to serve commuters or others in the locality." (49 U.S.C. 1608(c)(10).

The definition of "urban area" in the existing charter bus regulation consists of three parts: (1) The area in which a recipient *is authorized* by local and State, or Federal law to provide regularly scheduled mass transportation services; (2) the "urbanized area" as defined by the Bureau of Census; and (3) other areas as determined by the Secretary pursuant to section 12(c)(1) of the UMT Act. This definition is broader than the "urban area" referred to in the charter bus section of the UMT Act, which refers to the area "within which [the operator] provides *regularly scheduled mass transportation services.*" (Emphasis added).

The regulation's definition of "urban area" has been the focus of many of the charter bus complaints filed with UMTA. Various State statutes permit public bus operators to provide service anywhere within the State. Recipients in these States argue that the entire State is their "urban area" since they are authorized to provide service there. Consequently, these recipients contend that the intercity charter restrictions in the regulation do not apply to them.

Since the regulation's expansive definition has led to a number of complaints, UMTA proposed to redefine "urban area" in the ANPRM. The proposal would have limited a recipient's urban area to "the area within which it can reasonably be assumed that a recipient can provide mass transportation service, in morning and evening peak periods, to and from a central city." This proposed definition is based on a recent UMTA charter bus decision. In that decision, UMTA stated that the fact that State law may authorize a recipient to provide service on a statewide basis does not preclude UMTA from limiting its definition of the urban area to the area in which it is reasonable for the recipient to provide regularly scheduled mass transportation service. The result in this situation, without the submission of additional evidence by the recipient, was to limit the recipient's urban area to the territorial limits of the counties in which it provides service.

Thirty commenters commented on the proposed redefinition of "urban area." Nine favored the proposal. These commenters represent a range of support from both public and/or private providers. An equal number of commenters favored retention of the current definition. In general, these commenters stated that it provides the needed flexibility to apply to a variety of situations and that if a few States have caused problems, they should be handled as exceptions to the rule and not as a reason to penalize other UMTA recipients.

An additional 11 commenters offered specific comments on the problems with the proposed definition. These commenters, mainly public operators, argued that the proposed definition is too restrictive and that it will harm the consumer by limiting the available charter service area for public operators. Other commenters stated that the proposed definition needs to be expanded so that "area" is defined, too. As proposed, a communter asked if the "area" a bus route services is just the streets it travels on, a corridor one-mile on each side of the route, or perhaps, the entire county in which it operates.

UMTA has reviewed this whole issue and we propose to eliminate the definition from the rule. The reason for this is that the NPRM, unlike the existing rule, does not make any distinctions based on whether activities are performed within or outside of an urban area.

Commenters are invited to address these proposed changes and to suggest additional definitions that they believe are necessary or would be helpful.

Other Matters

The NPRM would not continue the existing revenue exception. Thus, the proposed requirements would apply to all applicants and only those recipients desirous of providing charter bus operations.

Section 604.2 of the existing charter bus regulation excludes from the scope of the regulation concerning intercity service any recipient who, together with all operators for the recipient, earned $15,000 or less in charter revenues during its most recently completed fiscal year. This provision was added to the final rule in 1976 based on UMTA's opinion that $15,000 in charter revenues is an insignificant amount and any recipient earning that amount or less would not be foreclosing willing and able private operators in the area. UMTA sought comments on this exception in the ANPRM to determine if it should be retained and, if so, whether the dollar amount should be raised.

Twenty-six commenters commented on the revenue exception. Seven comments argued that the regulation should provide no revenue exception. Several of these commenters argued that since the regulation is supposed to protect private operators, any exclusion is harmful to them because it permits some UMTA recipients to conduct unsupervised intercity charter operations.

The rest of the commenters favored the continuation of a revenue exclusion and offered many suggestions on how to calculate the dollar level. A few of these commenters suggested that it be set individually for each recipient and be based on a percentage of its operating expenses or annual revenues. Other commenters suggested that UMTA set levels but that they be tiered to the size of the operator or the size of the urban area.

The majority of the commenters, however, favored raising the dollar level to a specific amount. Suggestions of $24,000, $26,500, $30,000, $50,000 and $100,000 were made.

UMTA's 1983 Section 15 data indicates that 168 recipients provide charter service. One hundred twenty of these also reported their annual charter revenues. Forty-nine of those 120 recipients, or 40 percent, are currently excepted. Almost all of these are small operators who claim that the administrative burden of complying with the current regulation is beyond their administrative and financial capabilities.

If UMTA were to raise the ceiling to $50,000 or $100,000 as some commenters suggested, the percentage of recipients excepted from the regulation would increase to 68 percent and 80 percent, respectively.

UMTA is sympathetic to the recordkeeping problems that the current exception overcomes for small operators. The NPRM would drastically reduce the paperwork burdens on recipients. Based on this and our recognition that the UMT Act requires protections for private intercity charter operators from foreclosure by all UMTA recipients, we propose to delete the current revenue exception.

One issue that UMTA raised in the ANPRM is whether the rule should set a limit on the number of spare buses (spare ratio) that a recipient could use for charter service. UMTA does not have any regulatory restrictions on the spare ratio that a recipient may have. Instead, UMTA reviews each grant for new buses on a case-by-case basis to determine if the requested additional or replacement buses are needed.

UMTA received a total of 33 comments on this issue. Two-thirds of these commenters are public operators. Ten commenters favored the imposition of a spare ratio. Over one-half of these commenters were public operators. These commenters, however, suggested that the ratio should be locally determined. Others indicated that a ratio of 5 percent or 10 percent would be acceptable, but not higher.

VOL
51
ISS
44
MR
6
1986
UMI

The remainder of the commenters opposed the imposition of any spare ratios. Many argued that it limits local flexibility in providing charter service and that any decision on the number of spare buses should be left up to the local transit operators. Other commenters argued that even if UMTA were to impose a spare ratio, UMTA should continue to monitor and limit the number of a recipient's spare buses through the grant making process.

UMTA agrees with the majority of the commenters and does not propose in the NPRM to limit the number of spare buses a recipient can have. We believe that the grant making process and the Triennial Review are the correct processes to review and determine the number of buses a recipient needs.

Legal Basis for Proposed Approach

The NPRM represents a marked change from the existing rule. One paramount concern in administrative law is that there be a sufficient legal basis to support any changes to existing regulations. This is particularly of concern here since it can be argued that section 3(f) of the UMT Act provides protections for only willing and able intercity private charter bus operators and that the NPRM's protections for private intracity charter bus operators go beyond UMTA's statutory authority. It is UMTA's opinion that the UMT Act provides the needed statutory support for the proposed changes.

Section 12(c)(6) provides an absolute prohibition on the provision of charter bus operations with UMTA assistance. The Comptroller General's Opinion in 1966 interpreted this prohibition, however, to permit a narrow exception. That opinion holds that UMTA assistance can be used to provide charter bus operations so long as that service is incidental to the provision of mass transportation service. The Comptroller General's opinion provides UMTA with the discretion to permit its recipients to provide some charter service. The provision of such service is merely a privilege granted and controlled by UMTA, not an absolute right.

To date, UMTA has limited the restrictions on charter service based on section 12(c)(6) to the incidental use presumptions in § 604.11 of the current regulation. The rest of the regulation implements the restrictions on intercity charter service enacted by Congress in section 3(f). It is UMTA's opinion that the language in section 12(c)(6) provides UMTA with the discretion to impose restrictions, in addition to those in section 3(f), if UMTA determines such restrictions are warranted. Based on our research to date, we believe that added restrictions are needed to carry out the legislative mandates in the UMT Act.

Furthermore, even if UMTA did not have broad discretion under section 12(c)(6), an identical implementation of sections 12(c)(6) and 3(f) is permissible. It is UMTA's opinion that if private operators are given the opportunity to provide charter operations *before* UMTA recipients, the private operators and the mass transportation equipment will be protected. Thus, UMTA assistance would be used to provide charter operations only incidentally, i.e., when private operators are not willing and able to provide the services.

Executive Order 12291

This is not a "major" regulation as defined in Executive Order 12291.

DOT Policies and Procedures on Improving Government Regulations

This is a "significant" regulation as defined in "DOT's Policies and Procedures on Improving Government Regulations" because of substantial public interest and the effects on competition.

Regulatory Flexibility Act

The Regulatory Flexibility Act (Pub. L. No. 96–354) requires each Federal agency to prepare an initial regulatory flexibility analysis for each notice of proposed rulemaking that, if promulgated, would have a "significant economic impact on a substantial number of small entities." The Act requires that each agency also prepare a final analysis that takes into consideration those comments received on the initial analysis. If the head of the agency determines, however, that the regulation will not, if promulgated, have the requisite impact, he or she can certify that finding in the regulation and include a brief statement explaining the reasons for the certification.

Based on UMTA's analysis, to date, I certify that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. The small entities that are UMTA recipients are mainly Section 18 recipients. The small private entities are small private charter bus operators. UMTA recognizes that the NPRM may reduce the amount of charter service that Section 18 recipients provide. Although this may affect a substantial number of Section 18 recipients, we do not believe that the negative impact will be significant.

Similarly, any decrease in charter service provided by UMTA recipients under this rule could result in an increase in service provided by private charter operators, both large and small. UMTA believes that while a substantial number of small private operators may realize increased business, the impact will not be significant.

UMTA, however, seeks comments on this certification. If these comments and additional in-house research indicate that a Regulatory Flexibility Analysis is appropriate, such an analysis will be prepared for the final rule.

Regulatory Analysis

A copy of the regulatory analysis has been placed in the docket for public inspection. A brief summary of the benefits, and costs is provided below.

First, the proposed approach does not in any way rely on the regulation of charter rates to achieve the twin goals of the UMT Act: protection of UMTA equipment for mass transportation and protection of private intercity charter operators. A continuation of regulating rates is contrary to the Bus Regulatory Reform Act and this Administration's regulatory policies.

Second, this approach attempts to improve the economics of the private intercity charter bus industry. Although it does so at a potential cost to UMTA recipients, we believe this UMTA Act supports and calls for such action:

UMTA's research to date, however, would indicate that instead of a potential costs, the NPRM would actually improve recipients' revenues on a nationwide basis. Although a more detailed discussion can be found in the Draft Regulatory Analysis, UMTA finds that the generating of $45 milion in annual charter revenues costs recipients $47.5 million. Consequently, recipients, nationwide, lose $2.5 million annually. Therefore, the NPRM would, by reducing charter opportunities, improve recipients' financial situations.

Admittedly, the nationwide view does overlook some recipients who actually realize net positive cash flows from charter service. For these recipients, the NPRM would increase their operating deficits. Currently, UMTA's Section 9 and 18 programs do provide some operating assistance to offset this deficit. UMTA strongly believes, however, that operating expenses are a local concern and should not be borne by the Federal Government. To that extent, we are confident that any potential negative impacts on mass transportation operating funds resulting from a reduction in charter revenues will be made up by State and local subsidies.

Furthermore, it should be noted that modest improvements in operating efficiency could entirely offset the

revenue reductions occasioned by the NPRM. As mentioned above, significant savings could be realized by bringing down the spare ratio, reducing peak requirements, as well as by making use of more cost-efficient providers.

Third, this NPRM would shift the burden of proof from private operators and UMTA to UMTA recipients. It would do so by prohibiting a recipient from doing any charter service so long as there were a willing and able private operator. As discussed above, private operators have a difficult time enforcing the current regulation's protections for them. Not only do private operators have a difficult time distinguishing when a federally assisted bus is being used for charter service, but the difficultly in interpreting and understanding the cost allocation plan further restricts a private operator's ability to challenge a recipient's charter service. By shifting the burden of proof, UMTA believes that the protected class of private operators will be better served.

Fourth, this rule would be easier for UMTA to enforce. Not only does this NPRM propose strict deadlines for the processing of complaints, but by eliminating the need to review cost allocation plant, UMTA's staff will be able to process complaints more quickly.

Fifth, the NPRM would provide additional protections for private intracity charter operators. The NPRM would do so by making no distinction between the type of charter bus operations provided. Before a recipient could provide any charter service it must ensure that there are no willing and able private operators in the area in which it desires to provide charter service. As described above, UMTA research indicates that the private intracity charter bus operators are facing competition from UMTA recipients. It is UMTA's opinion that this problem can be appropriately remedied through the provisions imposed in this NPRM.

Based on these benefits and costs, it is UMTA's opinion that this NPRM would successfully correct many of the problems with the current regulation. UMTA is interested in comments on this approach in this NPRM and invites proposals for alternative ways of achieving UMTA's goal of correcting the problems with the existing regulations. In addition, we are interested in receiving information that will be useful in evaluating this regulation.

Collection of Information Requirements

The collection of information requirements contained in the proposed rule are being submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980 (Pub. L. No. 96–511). Comments on the proposed information collection requests must be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Department of Transportation. UMTA requests that the commenter also transmit an information copy of any such comments to UMTA Docket 82–I.

List of Subjects in 49 CFR Part 604

Administrative practice and procedures, Buses, Mass transportation.

List of Subjects in 49 CFR Part 604

Administrative practice and procedures, Buses, Mass transportation, Reporting and recordkeeping requirements.

In consideration of foregoing, UMTA proposes to revise Part 604 of Title 49 Code of Federal Regulations, to read as follows and to remove Appendices A and B.

PART 604—CHARTER BUS OPERATIONS

Subpart A—General

Sec.
604.1. Purpose.
604.3. Applicability.
604.5. Definitions.
604.7. Charter Bus Agreement.
604.9. Charter Bus Operations.
604.11. Procedures for Determining if a Private Charter Bus Operator is Willing and Able.
604.13. Reviewing Evidence Submitted by Private Charter Bus Operators.

Subpart B—Complaint Process

604.15. Filing a Complaint.
604.17. Remedies.
604.19. Appeal.
604.21. Judicial Review.

Authority: Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.); 23 U.S.C. 103(e)(4) and 142(a) and (c); and 49 CFR 1.51.

Subpart A—General

§ 604.1 Purpose.

The purpose of this Part is to implement section 3(f) and section 12(c)(6) of the UMT Act (49 U.S.C. 1602(f) and 1608(c)(6)).

§ 604.3 Applicability.

This part applies to all applicants and recipients of Federal financial assistance under:

(a) Section 3 (excluding sections 16(b)(2)), 5, 9A, 9 or 18 of the UMT Act (49 U.S.C. 1601 et seq.); or

(b) Sections 103(e)(4) and 142(a) and (c) of Title 23 United States Code which permit the use of Federal-Aid Highway funds to purchase buses.

§ 604.5 Definitions.

(a) All definitions in the UMT Act (at 49 U.S.C. 1608) are applicable to this part, except as may otherwise be provided in this section.

(b) "The Acts" means the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 *et seq.*), and those parts of Title 23 of the United States Code, 23 U.S.C. sections 103(e)(4) and 142(a) and (c) that provide funds for assistance to public bodies purchasing buses.

(c) "Administrator" means the Administrator of the Urban Mass Transportation Administration.

(d) "Charter bus operations" means transportation using equipment or facilities funded under the Acts, by bus of a group of persons who, pursuant to a common purpose, and under a single contract, at a fixed charge for the vehicle or service, in accordance with the carrier's tariff, have acquired the exclusive use of a bus to travel together under an itinerary either specified in advance or modified after having left the place of origin. This definition includes the incidental use of buses for the exclusive transportation of school students, personnel, and equipment.

(e) "Days" means calendar days in Subpart A and Federal working days in Subpart B.

(f) "Designated Official" means the applicant's and recipient's employee authorized to execute and file applications on behalf of the applicant or to enter into agreements on behalf of the recipient.

(g) "Interested party" means an individual, partnership, corporation, association, or public or private organization that has a financial interest which is adversely affected by the act or acts of a recipient regarding charter bus operations.

(h) "Recipient" means one that has received or is receiving Federal financial assistance under the Acts. The term includes subrecipients of a recipient and public bodies that receive or assistance that will be passed on to another public or quasi-public body, and any operator for a recipient, whether publicly or privately owned and may include lessees of federally assisted buses and other equipment.

(i) "Regional Administrator" means the Administrator of one of the Urban Mass Transportation Administration Regional Offices.

(j) "UMT Act" means the Urban Mass Transportation Act of 1964, as amended, 49 U.S.C. 1601 *et seq.*

VOL 51
ISS 44
MR 6
1986
UMI

(k) "UMTA" means the Urban Mass Transportation Administration, United States Department of Transportation.

(l) "Willing and able" means having the physical capability to actually provide charter bus service and the legal authority and the necessary safety certifications, licenses and other legal requirements to provide charter bus service in the area it proposes to provide such service.

§ 604.7 Charter bus agreement.

(a) Every applicant for financial assistance under sections 3 (excluding section 16(b)(2)), 5, 9A, 9 or 18 of the UMT Act or 23 U.S.C. 103(e)(4) and 142 (a) and (c) must include two copies of a charter bus agreement signed by the applicant's designated official with each grant application submitted to UMTA after [insert effective date of rule]. Once the applicant and UMTA enter into a charter bus agreement, the applicant may incorporate that agreement by reference into any subsequent grant application.

(b) The text of the agreement follows:

I, (name), (title), agree that (name of applicant) will provide charter bus operations with equipment or facilities provided under the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. Section 1601 *et seq.*), or under 23 U.S.C. Sections 103(e)(4) and 142(a) and (c) (the Acts) only to the extent that there are no private charter bus operators willing and able to provide charter bus operations in the area the (name of applicant) desires to provide charter bus operations unless one or more of the exceptions in 49 CFR 604.9 applies.

I further agree that (name of applicant) will comply with the provisions of 49 CFR Part 604 before it provides any charter bus operations with equipment or facilities, provided under the Acts, that the requirements of 49 CFR Part 604 will apply to any such charter bus service that is provided, and that the definitions in 49 CFR Part 604 apply to this agreement.

(c) If UMTA approves the grant application, the approving official shall sign the agreement when the grant application is approved. One copy of the signed agreement will be returned to the applicant.

§ 604.9 Charter bus operations.

(a) If a recipient desires to provide any charter bus operations with UMTA funded equipment or facilities it must first determine if there are any private charter bus operators willing and able to provide charter service in the area in which it desires to provide charter bus operations. To the extent that there are such private bus operators, the recipient is prohibited from providing charter bus operations unless one or more of the exceptions in § 604.9(b) applies.

(b) *Exceptions.* A recipient may enter into a contract with a willing and able private charter bus operator to provide charter bus service for the private charter bus operator if:

(1) The willing and able private charter bus operator is requested to provide charter bus service that exceeds its capacity and it is unable to obtain the additional capacity from other willing and able private charter bus operators; or

(2) The willing and able private charter bus operator is unable to provide of equipment accessible to handicapped persons itself or obtain the equipment from other willing and able private charter bus operators.

§ 604.11 Procedures for determining if a private charter bus operator is willing and able.

(a) To determine if there are any private charter bus operators willing and able to provide charter service in the area in which it desires to provide charter bus operations, a recipient must hold a public hearing:

(1) At least 60 days before it desires to begin charter bus operations; or

(2) Not more than 60 days after [insert effective date of this Part] if the recipient is providing charter bus operations in accordance with former 49 CFR Part 604 on [insert effective date of this Part] and desires to continue to provide charter bus operations.

(b) The recipient must:

(1) Publish a notice in a newspaper, or newspapers, of general circulation within the proposed charter service area;

(2) Send a copy of the notice to each private charter bus operator that requests that it be sent copies of such notices; and

(3) Send a copy of the notice to the United Bus Owners of America, 1275 K Street, NW., Suite 800, Washington, D.C. 20005 and the American Bus Association, 1025 Connecticut Avenue, N.W., Washington, D.C. 20036.

(c) The notice shall include:

(1) The name of the recipient;

(2) A statement that the recipient desires to provide charter bus operations;

(3) A description of the charter bus operations which the recipient desires to provide;

(4) A description of the area in which the recipient desires to provide charter bus operations;

(5) A statement that any private charter bus operator may attend the hearing and present evidence that it is willing and able to provide the proposed or a portion of the proposed charter bus operators;

(6) A statement that the evidence necessary for the recipient to determine if a private charter bus operator is willing and able includes only the following:

(i) A statement that the private charter bus operator has the physical capability to actually provide the charter bus operations; and

(ii) A copy of the documents to show that the private charter bus operator has the requisite legal authority to provide the proposed charter bus operation and that it meets all necessary safety certification, licensing and other legal requirements to provide the proposed charter bus operations;

(7) A statement that the recipient shall review all evidence presented at the public hearing within 30 days of the public hearing, and within 60 days of the public hearing shall notify each private charter bus operator that presented evidence of the recipient's determination whether the private operator is "willing and able"; and

(8) A statement that the recipient shall not provide any charter bus service with equipment, facilities or operating assistance funded under the Acts to the extent that there are willing and able private charter bus operators unless it qualifies for one or more of the exceptions in 49 CFR § 604.9(b).

(d) The recipient shall hold a public hearing annually during the month in which it held its first hearing to redetermine the extent to which there are private charter bus operators willing and able to provide charter service in its desired charter bus operations service area. The recipient shall follow the procedures in 49 CFR 604.11 (b) and (c) and 604.13 for this process and include in the list of private operators receiving notice under § 604.11(b)(2), all private operators the recipient has determined under this Part are willing and able.

§ 604.13 Reviewing Evidence Submitted by Private Charter Bus Operators.

(a) The recipient shall review all evidence presented at public hearings held under 49 CFR 604.11 within 30 days of the public hearing.

(b) Within 60 days of the public hearing held under 49 CFR 604.11, the recipient shall notify each private charter bus operator that presented evidence of the recipient's determination whether the private operator is "willing and able." In addition the recipient shall provide a list of all willing and able private charter bus operators with the notification.

(c) The recipient shall review the evidence submitted by each private charter bus operator to determine if the evidence proves that the private charter bus operator has:

(1) The physical capability to actually provide charter bus service; and

(2) The required legal authority and the necessary safety certifications, licenses and other legal requirements to provide charter bus service.

(d) The recipient must determine that a private charter bus operator which meets the requirements in 49 CFR 604.11(c) is a willing and able private charter bus operator.

Subpart B—Complaint Process

§ 604.15 Filing complaint.

(a) An interested party ("complainant") who believes that a recipient is in violation of the requirements of this Part may submit a written complaint to the UMTA Regional Administrator for the region in which the alleged violation has occurred. The Complainant shall also send a copy of the complaint to the recipient ("respondent").

(b) If the Regional Administrator determines that the complaint is not without obvious merit and that it states grounds on which relief may be granted, based on the information supplied by the complaint, the Regional Administrator in writing shall advise the complainant and respondent to attempt informally to conciliate the dispute. The period for informal conciliation shall last 20 days from the date that the Regional Administrator orders it, unless an extension is mutually agreed upon by the parties.

(c) If the parties are unable to conciliate the dispute, either party shall so notify the Regional Administrator in writing. The Regional Administrator shall then give notice to the respondent in writing that it has 20 days from the date of the notice to provide written evidence to show that no violation has occurred. The respondent shall provide a copy of this information to the complainant.

(d) After the Regional Administrator receives the respondent's evidence, the Regional Administrator shall inform the complainant that it has 15 days from the date of the notice to rebut the respondent's evidence. The complainant shall provide a copy of this information to the respondent.

(e) The Regional Administrator shall review the evidence submitted by the parties and prepare a recommended written decision, including recommended remedies, on the complaint based on the written record within 15 days after the time period provided in paragraph (d) of this section expires. If, however, the Regional Administrator determines within this 15-day period that further investigation is necessary, including the submission of additional information or the holding of an informal evidentiary hearing, the Regional Administrator shall so inform the parties in writing. In addition, either party may request an informal evidentiary hearing prior to the Regional Administrator's recommended written decision. The Regional Administrator may grant or deny such request. The date and location of the hearing shall be arranged by the Regional Administrator in consultation with the parties. If a hearing is held, the parties shall submit in writing any new evidence introduced at the hearing to the Regional Administrator within 10 days after the hearing. The notice to the parties of the need for additional information or a hearing shall stop the running of 15-day time period required in this paragraph. The Regional Administrator shall, however, prepare a recommended written decision based on the written record within 15 days after the additional information is received or 15 days after the hearing is held or the new evidence introduced at the hearing is submitted in writing, whichever is later.

(f) The Regional Administrator's recommended written decision shall include a statement on whether a violation has been found and an analysis and explanation of the findings upon which the decision is based.

(g) The Regional Administrator shall submit each recommended written decision to UMTA Headquarters for concurrence. Absent special circumstances, UMTA Headquarters shall inform the Regional Administrator of its concurrence or nonconcurrence 10 days after receipt. If UMTA Headquarters concurs in the recommended decision, it shall so inform the Regional Administrator who immediately will send a copy of the decision to the parties. If UMTA Headquarters nonconcurs, the disagreement will be worked out internally within 10 days. After an agreement on the decision is reached, the Regional Administrator shall immediately send a copy of the decision to the parties.

(h) UMTA may extend the deadlines imposed in this part for administrative convenience by notifying all parties in writing of the extensions.

§ 604.17 Remedies.

(a) If the Regional Administrator determines that a violation of this part has occured, the Regional Administrator may order such remedies as the Regional Administrator determines are appropriate.

(b) If the Regional Administrator determines that there has been a continuing pattern of violations of the terms of this part, the Regional Administrator, with UMTA Headquarters' concurrence, may bar the respondent from the receipt of further financial assistance for mass transportation facilities and equipment.

§ 604.19 Appeal.

(a) The losing party may appeal the decision to the Administrator within 10 days of its issuance. The losing party shall include in its appeal the basis for the appeal and evidence to support the position. A copy of the appeal shall be sent to the prevailing party by the losing party.

(b) The Administrator will only take action on an appeal if the losing party presents evidence that there are new matters of fact or points of law that were not available or known during the investigation of the complaint. If action is taken on an appeal, the Administrator shall provide the prevailing party with 10 days to rebut the evidence contained in the request and make a final determination of the complaint within 15 days of the receipt of such evidence.

§ 604.21 Judicial review.

The Regional Administrator's decision, or the Administrator's decision on appeal if so requested, shall be final

DEPARTMENT OF EDUCATION

Office of Vocational and Adult Education

34 CFR Parts 400, 401, and 415

Vocational and Adult Education: State Vocational Education Discretionary Programs

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend regulations governing the State Vocational Education Program and make a technical amendment in the regulation governing one of the Secretary's Discretionary Programs of Vocational Education. These proposed regulations would implement statutory changes contained in Pub. L. 99–159 and make minor technical and typographical corrections.

DATE: Comments on these proposed regulations must be received on or before April 21, 1986.

ADDRESSES: Comments should be addressed to Dr. Thomas L. Johns, Acting Director, Policy Analysis Staff, Office of Vocational and Adult Education, U.S. Department of Education, (Room 620, Reporters Building), 400 Maryland Avenue SW., Washington, DC 20202–5609. Telephone: (202) 732–2237.

FOR FURTHER INFORMATION CONTACT: Mrs. Sharon A. Jones, Chairperson, Vocational Education Regulations Task Force, U.S. Department of Education, (Room 620, Reporters Building), 400 Maryland Avenue SW., Washington, DC 20202–5609. Telephone: (202) 732–2237.

SUPPLEMENTARY INFORMATION:

Background

These proposed amendments implement recent changes to the Carl D. Perkins Vocational Education Act (Act), 20 U.S.C. 2301 *et seq.*, made by Title VII of the National Science, Engineering, and Mathematics Authorization Act of 1986, Pub. L. 99–159.

The regulations being amended affect the State Vocational Education Program which assists States in conducting, directly or through awards to local recipients, vocational education programs. The regulations that govern the State Vocational Education Program are in 34 CFR Parts 400 and 401, and were published in the Federal Register on August 16, 1985 (50 FR 33226).

Summary of Major Provisions

(a) Section 401.15(d) is revised to implement the new statutory requirement that States certify to the Secretary the establishment and membership of State councils by the beginning of each State plan period. Under the existing regulations State councils must be certified at least 90 days prior to the beginning of each State plan period.

(b) Section 401.19 is revised by eliminating the requirement that the State plan include a description of the manner in which the State reserves funds for services an activities for individuals with limited English proficiency. This requirement is unnecessary in light of the new statutory formula for reserving funds for such persons.

(c) Sections 400.4(b) and 401.30(b)(1) are revised to reflect the new statutory requirement that the Secretary provide funds to the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands for State councils on vocational education. The Territories were not provided funds to establish State councils under the current regulations.

(d) Section 401.96(b) is revised to implement the new statutory formula for utilizing funds to provide vocational education services and activities for individuals with limited English proficiency under the Vocational Opportunities Progam for disadvantaged individuals. These proposed regulations interpret the statute as distributing funds based on the number of individuals with limited English proficiency enrolled in vocational education. Because of interpretive difficulties with the original statutory formula, the existing regulations permit States to implement the formula in several ways.

(e) Section 401.97 is revised to reflect the new statutory provisions which authorizes the use, under certain conditions, of in-kind contributions to meet the matching requirement under the Vocational Education Opportunities Program for disadvantaged individuals. The current regulations allow for the use of cash expenditures only. The proposed regulations would authorize an eligible recipient to make an in-kind contribution to the extent it determines that it cannot otherwise contribute. Additional guidance regarding the permissible use of in-kind contributions in connection with projects, services, and activities under the Vocational Education Opportunities Program for disadvantaged persons may be found in Subpart G of 34 CFR Part 74.

(f) Sections 401.102 and 401.105 implement the new statutory requirements that a State may not expend for State administration of its Consumer and Homemaking Education Program and its Comprehensive Career Guidance and Counseling Program under Titles III–B and III–D, respectively, more than six percent of its allotment for each program. The existing regulations impose a six percent cap on expenditures for State leadership.

Executive Order 12291

These proposed regulations have been reviewed by the Department in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. Under the State Vocational Education Program, grants for vocational education purposes are available only to States and State agencies. States and State agencies are not considered to be small entities under the Regulatory Flexibility Act. To the extent that these regulations have an impact on small entities, they repeat statutory requirements. Federal regulations governing the State grant program do not impose any non-statutory requirements that will have a significant economic impact on the small entities affected. States are authorized to establish individual application requirements under the State program.

Intergovernmental Review

The State Vocational Education Program and Secretary's Discretionary Programs of Vocational Education in 34 CFR Parts 401 and 415 are subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for these programs.

Invitation to Comment

General Comments

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments, suggestions, and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 45th day from the date of publication of these proposed regulations will be considered.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 620, Reporters Building, 300 7th Street SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week, except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is also invited on whether there may be further oppurtunities to reduce any regulatory burdens found in these proposed regulations.

Special Issues

(a) Section 203(a)(3) of the Act, as amended, contains a new formula for utilizing funds for programs, services, and activities for individuals with limited English proficiency under the Vocational Education Opportunities Program for disadvantaged individuals. Comments are invited on the Secretary's interpretation of the formula (§ 401.96(b)). Of particular interest is whether the interpretation that funds are distributed on the basis of the number of individuals with limited English proficiency enrolled in vocational education raises special problems.

(b) Section 502(b) of the Act now permits the use of in-kind contributions in satisfying the matching requirement in Vocational Education Oppurtunities Programs serving disadvantaged individuals. However, section 201(c)(2) of the Act continues to require that Federal and matching funds reserved for disadvantaged individuals be used solely for the supplemental or additional costs of programs, services, and activities for such individuals. The Secretary is therefore inviting comments on—

(1) Whether additional guidance is needed on the use of in-kind contributions; and

(2) What problems users foresee in the implementation of this provision, including recommendations on how the problems might be solved.

(c) Sections 401.102 and 401.105 of the regulations now restrict expenditures under the Consumer and Homemaking Education Program and the Comprehensive Guidance and Counseling Program for State administration to six percent. Section 400.4(b) defines the term "administration," and the Secretary interprets "State leadership" activities to include, but not be limited to, curriculum development activities, personnel development, technical assistance, or research activities. Comments are requested on whether the regulations should provide more explicit guidance on State leadership activities.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects

34 CFR Parts 400 and 401

Adult education, Education, Education of disadvantaged, Education of handicapped, Equal education opportunity, Private schools, Reporting and recordkeeping requirements, Schools, School construction, Vocational education, Women.

34 CFR Part 415

Educational facilities, Reporting and recordkeeping requirements, Vocational education.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance Numbers 84.048 (Basic Grants to the States), 84.049 (Consumer and Homemaking Education Program), and 84.053 (State Councils on Vocational Education). Catalog of Federal Domestic Assistance Numbers have not been assigned for the Comprehensive Career Guidance and Counseling Program)

Dated: March 3, 1986.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by amending Parts 400, 401, and 415 as follows:

PART 400—VOCATIONAL EDUCATION PROGRAMS—GENERAL PROVISIONS

1. The authority statement for 34 CFR Part 400 is revised to read as follows:

Authority: 20 U.S.C. 2301 *et seq.*, unless otherwise noted.

§ 400.4 [Amended]

2. In § 400.4, paragraph (b) is amended by removing the definition of "Insular Area."

PART 401—STATE VOCATIONAL EDUCATION PROGRAM

3. The authority statement for 34 CFR Part 401 is revised to read as follows:

Authority: 20 U.S.C. 2301 *et seq.*, unless otherwise noted.

4. in § 401.13, paragraph (a) introductory text is revised, paragraph (b) is revised, and a new paragraph (c) is added to read as follows:

§ 401.13 What are the personnel requirements regarding the elimination of sex discrimination and sex stereotyping?

(a) A State that desires to participate in the State Vocational Education Program shall assign one individual, within the appropriate agency established or designated by the State board under § 401.12(d) to administer vocational education programs within the State, to work full time to assist the State board to fulfill the purposes of the Act by—

* * * * *

(b) A State shall, in accordance with § 401.91(b), reserve at least $60,000 to carry out the provisions of paragraph (a) of this section, including the provision of necessary and reasonable staff support.

(c) For the purposes of this section, the term "State" includes only the fifty States and the District of Columbia.

(Approved by the Office of Management and Budget under OMB Control No. 1830-0030)

(Sec. 111(b); 20 U.S.C. 2321(b))

5. Section 401.14 is revised to read as follows:

§401.14 Must a State establish a State council on vocational education?

A State that desires to participate in the State Vocational Education Program shall establish a State council on vocational education, which must be appointed—

(a) By the Governor; or

(b) In the case of States in which the members of the State board of education are elected, including election by the State legislature, by the State board of education.

(Sec. 112(a); 20 U.S.C. 2322(a); House Report No. 98–1129, 98th Cong. 2d Sess., p. 89 (1984))

6. In § 401.5, paragraph (d) is revised to read as follows:

§ 401.15 What are the membership requirements of the State council on vocational education?

* * * * *

(d) Each State shall certify to the Secretary the establishment and membership of the State council by the beginning of each State plan period described in § 401.17.

VOL 51
ISS 44
MR 6
1986
UMI

(Sec. 112 (a), (b); 20 U.S.C. 2322 (a), (b))

7. In § 401.16, paragraph (b)(1) is revised to read as follows:

§ 401.16 What are the responsibilities of the State council on vocational education?

* * * * *

(b) Each State council on vocational education, during each State plan period described in § 401.17 unless otherwise indicated in the regulations in this section, shall—

(1) Meet with the State board or its representatives to advise on the development of the subsequent State plan, or any amendments to the current State plan, while the State plan or amendment is being developed;

* * * * *

(Sec. 112 (c)–(f); 20 U.S.C. 2322 (c)–(f))

8. In § 401.19, paragraph (b)(6) is revised and paragraph (b)(14) is removed to read as follows:

§ 401.19 What must the State plan contain?

* * * * *

(b) * * *

(6) The methods proposed for the joint planning and coordination of programs carried out under the Act with programs conducted under the JTPA, the Adult Education Act, Chapter 1 of the Education Consolidation and Improvement Act of 1981, the Education of the Handicapped Act, and the Rehabilitation Act of 1973, and with apprenticeship training programs.

(Sec. 113(b)(10); 20 U.S.C. 2323(b)(10))

* * * * *

§ 401.22 [Amended]

9. In § 401.22(b)(1), "national" is revised to read "natural".

10. In § 401.30, paragraph (b)(1) is revised to read as follows:

§ 401.30 How does the Secretary make allotments under the State Vocational Education Program?

* * * * *

(b)(1) From funds appropriated under section 3(c) of the Act, the Secretary allots funds each fiscal year for State councils on vocational education according to the provisions of section 112(f)(1) of the Act.

* * * * *

11. In § 401.73, paragraph (c)(2)(xi) is revised to read as follows:

§ 401.73 What activities does the Secretary support under the Consumer and Homemaking Education Program?

* * * * *

(c) * * *
(2) * * *
(xi) State administration and leadership, including the activities of student organizations, subject to § 401.102(c).

(Secs. 311, 312 (a), (b); 20 U.S.C. 2361, 2362 (a), (b))

12. In § 401.76, paragraph (c)(2)(ix) is revised to read as follows:

§ 401.76 What activities does the Secretary support under the Comprehensive Career Guidance and Counseling Program?

* * * * *

(c) * * *
(2) * * *
(ix) State and local administration, including supervision, subject to §§ 401.93(b) and 401.105(c);

* * * * *

13. In § 401.93, paragraph (b)(1) is revised to read as follows:

§ 401.93 What are the administrative cost requirements under the State Vocational Education Program?

* * * * *

(b) *Special Programs.* To administer—

(1) Each of the Special Programs under its State plan (other than the Consumer and Homemaking Education Program, the Comprehensive Career Guidance and Counseling Program, and the Industry-Education Partnership for Training in High-Technology Occupations Program) a State may use, in addition to funds reserved under § 401.91, no more than the amount of funds from its allotment for each program that is necessary and reasonable for the proper and efficient State administration of that program; and

* * * * *

14. In § 401.96, paragraph (b) is revised to read as follows:

§ 401.96 How does a State allocate funds for disadvantaged individuals under the Vocational Education Opportunities Program?

* * * * *

(b) A State shall ensure that funds allocated among participating eligible recipients under paragraph (a) of this section are used by each participating eligible recipient to provide vocational education services and activities for individuals with limited English proficiency at least in proportion to the number of individuals with limited English proficiency enrolled in vocational education in that eligible recipient in the program year preceding the program year in which the determination is made, compared to the total number of disadvantaged individuals, including individuals with limited English proficiency, so enrolled in the preceding program year.

Example: Assume that eligible recipient X enrolls 100 economically disadvantaged individuals and serves in its vocational education program 50 disadvantaged and limited English proficient individuals. Assume further that among all participating eligible recipients, there are 1000 of those persons enrolled and 400 of those individuals served, respectively. In the succeeding program year, eligible recipient X is eligible to receive under the Vocational Education Opportunities Program an amount for disadvantaged individuals equal to 1/10 (or 100 economically disadvantaged individuals enrolled in eligible recipient X/1000 economically disadvantaged individuals enrolled in the State) of ½ of the amount reserved for those individuals under § 401.92(b) and ⅛ (or 50 disadvantaged and limited English proficient individuals served by eligible recipient X/400 disadvantaged and limited English proficient individuals served in the State) of ½ of that same amount.

In addition to the assumptions made in the preceding paragraph, assume further that eligible recipient X serves 25 individuals with limited English proficiency in its vocational education program. In the succeeding program year, if eligible recipient X receives an award of $1,000 for disadvantaged individuals under the Vocational Education Opportunities Program, eligible recipient X must use $500 (or 25 individuals with limited English proficiency served by eligible recipient X/50 disadvantaged and limited English proficient individuals served by eligible recipient X times $1,000) for individuals with limited English proficiency.

(Sec. 203(a) (2), (3); 20 U.S.C. 2333(a) (2), (3))

15. Section 401.97 is revised to read as follows:

§ 401.97 How does a State match funds for handicapped individuals and disadvantaged individuals under the Vocational Education Opportunities Program?

(a) A State shall provide the non-Federal share of the cost of projects, services, and activities for handicapped individuals and for disadvantaged individuals under the Vocational Education Opportunities Program equitably from State and local sources, except that the State shall provide the non-Federal share of the cost from State sources if the State board determines that an eligible recipient cannot reasonably be expected to provide for these costs from local sources.

(b) Contributions from local sources towards the non-Federal share of the costs of projects, services, and activities for disadvantaged individuals under the Vocational Education Opportunities Program must be in cash or, to the extent the eligible recipient determines that it cannot otherwise provide the contribution, in the form of in-kind contributions, fairly valued, including facilities, overhead, personnel, equipment, and services.

(Sec. 502(b); 20 U.S.C. 2462(b))

16. In § 401.102, paragraph (b)(2) is revised and a new paragraph (c) is added to read as follows:

§ 401.102 How must funds be used under the Consumer and Homemaking Education Program?

* * * * *

(b) * * *

(2) The State board shall use funds from its allotment under this program to provide State leadership that is qualified by experience and preparation in home economics education.

(c) A State may use, in addition to funds reserved under § 401.91, not more than six percent of its allotment under this program for State administration of projects, services, and activities under this program.

(Secs. 312(c), 313; 20 U.S.C. 2362(c), 2363)

17. In § 401.105, paragraph (b)(2) is revised and a new paragraph (c) is added to read as follows:

§ 401.105 How must funds be used under the Comprehensive Career Guidance and Counseling Program?

* * * * *

(b) * * *

(2) The State board shall use funds from its allotment under this program to provide State leadership that is qualified by experience and knowledge in guidance and counseling.

(c) A State may use, in addition to funds reserved under § 401.91, not more than six percent of its allotment under this program for State administration of projects, services, and activities under this program.

(Secs. 332(c), 333; 20 U.S.C. 2362(c), 2363)

PART 415—MODEL CENTERS FOR VOCATIONAL EDUCATION FOR OLDER INDIVIDUALS

18. The authority statement for 34 CFR Part 415 is revised to read as follows:

Authority: 20 U.S.C. 2417, unless otherwise noted.

§ 415.31 [Amended]

19. In § 415.31, paragraph (i)(2)(ii), "to the types" is revised to read "of the types".

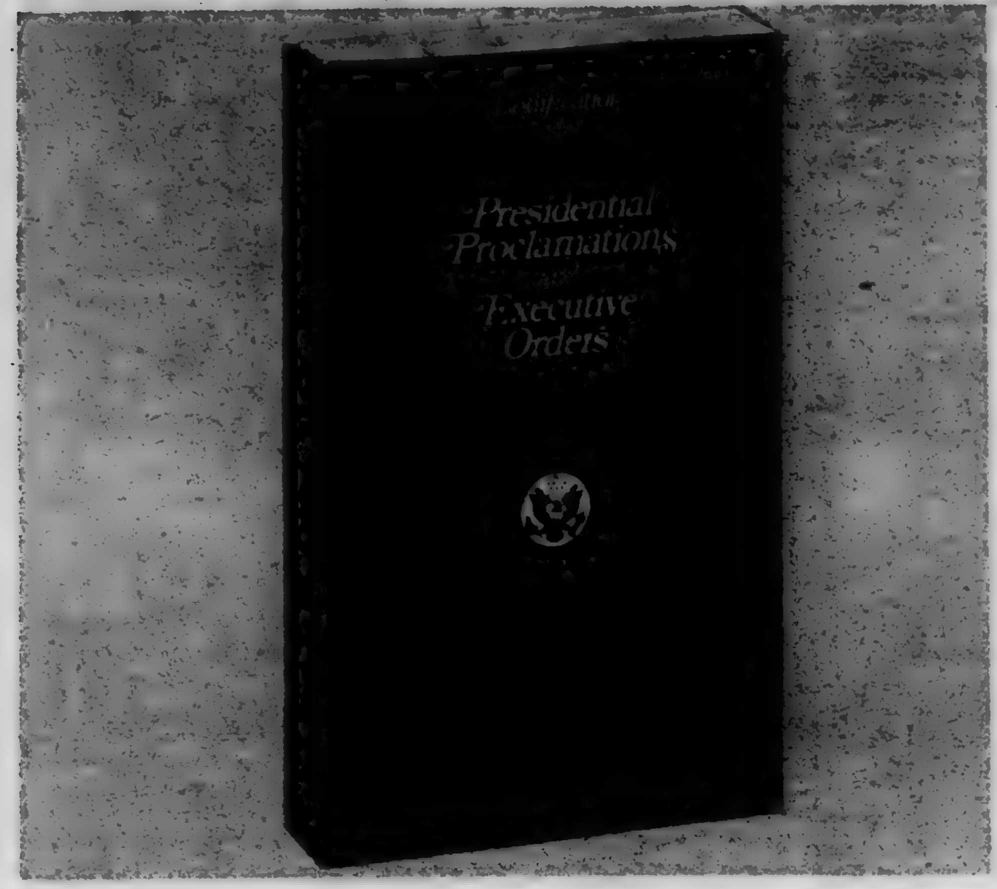
New edition now available....



For those of you who must keep informed about **Presidential Proclamations and Executive Orders**, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20, 1985, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961-1985 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 51, No. 45
Friday, March 7, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

BILLING CODE 7400-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 629]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 629 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period March 7–13, 1986. Such action is needed to provide for the orderly marketing of fresh navel oranges for the period specified due to the marketing situation confronting the orange industry.

DATE: Regulation 629 (§ 907.929) is effective for the period March 7–13, 1986.

FOR FURTHER INFORMATION CONTACT: James B. Wendland, Acting Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone: 202–447–5053.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. The Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

This rule is issued under Order No. 907, as amended [7 CFR Part 907], regulating the handling of navel oranges grown in Arizona and designated part of California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674]. This action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1985–86 adopted by the Navel Orange Administrative Committee. The committee met publicly on March 4, 1986, at Yuma, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The committee reports that the market for fresh navel oranges is good. The regulation is needed to continue providing stability in the market and promote orderly marketing.

It is further found that it it impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. To effectuate the declared purposes of the act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 907

Agricultural Marketing Service, Marketing Agreements and Orders, California, Arizona, Oranges (Navel).

1. The authority citation for 7 CFR 907 continues to read:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.929 Navel Orange Regulation 629 is hereby added to read:

§ 907.929 Navel Orange Regulation 629.

The quantities of navel oranges grown in California and Arizona which may be handled during the period March 7, 1986 through March 13, 1986, are established as follows:

(a) District 1: 1,050,000 cartons;
(b) District 2: Unlimited cartons;
(c) District 3: Unlimited cartons;
(d) District 4: Unlimited cartons.

Dated: March 5, 1986.

Joseph A. Gribbin,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1430

Implementation of Dairy Termination Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This final rule implements the Dairy Termination Program authorized by section 201 of the Agricultural Act of 1949, as amended by the Food Security Act of 1985. Under the program the Commodity Credit Corporation (CCC) will enter into contracts with producers of milk in the forty-eight States of the continental United States who agree to sell for slaughter or export all dairy cattle in which they have an interest and who, for a period of five years, agree not to acquire any interest in dairy cattle or the production of milk or make available to any person any milk production capacity that becomes available because of the producer's compliance with the program.

EFFECTIVE DATE: February 10, 1986.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed in accordance with procedures implementing Executive Order 12291 and Secretary's Memorandum 1512-1 and has been classified as "major" since the program will have an annual effect on the economy exceeding $100 million.

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since CCC is not required by 5 U.S.C. 553 or any other provision of the law to publish a notice of proposed rulemaking with respect to the subject matter of this rule. Section 201(d)(3) of the Agricultural Act of 1949 (the "1949 Act"), as amended by Title I of the Food Security Act of 1985 (Pub. L. 99-198) (the "1985 Act") provides that the Secretary of Agriculture shall establish and carry out a Dairy Termination Program for the 18-month period beginning April 1, 1986. Section 102 of the 1985 Act provides that the rulemaking requirements set forth in section 553 of title 5, United States Code, shall not apply with respect to the implementation by the Secretary of Agriculture of section 201(d) of the Agricultural Act of 1949 (7 U.S.C. 1446(d)) as amended by section 101 of the 1985 Act, including determinations made regarding the Dairy Termination Program.

An Environmental Evaluation with respect to the Dairy Termination Program has been completed. It has been determined that this action is not expected to have a significant impact on the quality of the human environment. In addition, it has been determined that this action will not adversely affect environmental factors such as wildlife habitat, water quality, air quality, and land use and appearance. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

A Final Regulatory Impact Analysis of this regulation has been prepared. Copies of the analysis are available to the public by contacting Jerry W. Newcomb.

The title and number of the federal assistance program to which this notice applies are: Title—Commodity Loans and Purchases; Number 10.051, as found in the Catalog of Federal Domestic Assistance.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

These regulations implement the Dairy Termination Program as authorized by section 201(d)(3) of the 1949 Act, as amended. Under the program, the Commodity Credit Corporation (CCC) will enter into contracts with milk producers who agree to to sell their dairy cattle for slaughter or export and terminate milk production for five years. Generally, a producer will be eligible to participate in the Dairy Termination Program and receive payments under the program only if all producers on all units with respect to which such producer or any related person was a producer on or after January 1, 1986, execute a contract to participate in the program. Producers must submit bids to enter into the contracts with CCC. If a bid is accepted, CCC will pay the producer an amount which is equal to the bid in dollars and cents per hundredweight multiplied by the milk base established for the contract. Only producers of milk in the forty-eight contiguous States of the continental United States are eligible to participate in the program. At least one of the participating producers who is a party to a contract must: (1) Have been continuously engaged in milk production from January 1, 1985, through the bid date, unless prevented from doing so because of dairy herd conditions beyond the producer's control; or (2) Be entitled to claim, in establishing a milk base under the contract (i.e., a contract base), the quantity of milk marketed for commercial use by another producer. In establishing a contract base, a producer may claim the quantity of milk marketed for commercial use by another producer only if: (1) The producer claiming such milk marketings commenced the production of milk on or after January 1, 1985; (2) The other producer was, or is, a family member of the producer claiming such milk marketings; and (3) The other producer's entire herd and facility were transferred to the producer claiming such marketings directly by reason of a gift from, or death of, the other producer.

The contract base is determined based upon the lesser of the quantity of milk marketed for commercial use by the producers entering into a contract with CCC during the twelve-month period ending June 30, 1985 or the twelve-month period ending December 31, 1985.

Producers may submit bids to enter into contracts with CCC for one or more of the following periods: (1) April 1, 1986 through August 31, 1986; (2) September 1, 1986 through February 28, 1987; and (3) March 1, 1987 through August 31, 1987. The period for which a bid is accepted by CCC, if any, will be considered to be the "contract disposal period". With two limited exceptions, the following dairy cattle must be slaughtered or exported by the end of the contract disposal period: (1) All dairy cattle which, on or after the date the bid was submitted, were located on dairy units with respect to which the contracting producers or related persons were producers on or after January 1, 1986, and (2) All dairy cattle in which, on or after the bid date, any contracting producers or related persons had an interest.

The two exceptions to the foregoing requirements are that: (1) Calves and unbred heifers may be slaughtered by September 30, 1986, with respect to contracts entered into under which producers agree to slaughter their dairy cattle during the first contract disposal period, and (2) CCC may permit cattle sold for export during the third contract disposal period to be exported not later than September 30, 1987. After the disposal of such dairy cattle, the contracting producers or related persons will not be permitted for a five-year period (the "nonproduction period") to acquire any interest in dairy cattle or milk, or to acquire or make available any milk production facility that becomes available for use as a result of the compliance by any person with the terms and conditions of the Dairy Termination Program. In addition, any new milk production facility erected on any unit on which a contracting producer or related person was a producer on or after January 1, 1986, cannot be used during the nonproduction period.

Any person who knowingly purchases dairy cattle which are sold as a result of the requirements of a contract under the Dairy Termination Program will be subject to a penalty of up to $5,000 for each head of such cattle which are not slaughtered or exported within the time limits prescribed by the terms and conditions of the program regulations. The liability of such buyers for the failure to slaughter or export such dairy cattle within the prescribed time periods will not affect the liability of the contracting producers to assure that such dairy cattle are slaughtered or exported.

The regulations provide that dairy cattle which are destroyed because of a disease or for any other reason will be considered to have been sold for slaughter. The regulations also provide that any dairy cattle which are exported to meet the requirements of the program cannot reenter the fifty States of the United States, its territories or possessions.

In addition, the regulations specify that some sales of dairy cattle which are required to be sold for slaughter or export will be permitted prior to the beginning of the contract disposal period. This will permit normal culling and thus allows for the maintenance, consistent with the overall nature of the program, or normal seasonal marketing patterns.

The regulations also specify branding requirements for dairy cattle which are sold for slaughter or export under the program and limit the time period which may expire between the date the dairy cattle are sold for slaughter or export and the actual date such cattle are slaughtered or exported. The regulations limit to one the number of intermediate buyers between the sale of the dairy cattle by the owner for slaughter or export and the actual slaughter or export of such dairy cattle. Except as otherwise permitted by CCC, contracting producers will be required to present a certification of the slaughter of the dairy cattle by the slaughtering party or, for dairy cattle which are exported, an official certification of export.

The regulations provide for the assessment of other penalties by CCC as a result of the failure of the contracting producers to comply with the terms and conditions of the Dairy Termination Program. Penalties may be assessed in those situations where a contracting producer or related person acquires an interest in milk or in dairy cattle contrary to the terms and conditions of the program. In addition, if a contracting producer makes a false statement concerning herd sizes or sales of dairy cattle such producer will be subject to a penalty in the amount of $5,000 for each head of dairy cattle which is represented by such false statement. A penalty in the amount of $1,000 may also be assessed for any other program violation.

The regulations provide that successful bidders may elect one of two options to receive cash payments under the Dairy Termination Program. Under the first option, producers may receive up to 80 percent of their payment in the first year following herd disposition with the remainder paid in four equal annual installments thereafter. This option will permit the producer to receive payments in five equal installments by choosing a 20 percent payment as the first payment. Under the second option, a producer may choose to receive, as an initial payment, up to 85 percent of the payment in the second year following the herd disposition with the remainder paid in three equal annual installments thereafter.

If there is a failure to comply with any of the terms and conditions of the program, all payments previously made under a program contract must be refunded to CCC and no further payments will be made. Contracting producers will be jointly and severally liable for all refunds and related charges (i.e., interest and late payment charges) which are determined to be due and owing to CCC under the program.

The maximum bids which will be accepted under the program may vary by region if such variations are determined to be necessary to avoid undue market effects. These regulations also provide that bids will be accepted which will result in greater numbers of dairy cattle being sold for slaughter under the program in the first and third contract disposal periods rather than in the second contract disposal period.

CCC will not permit contracts to be assigned under the Dairy Termination Program unless a contracting producer dies, in which case CCC may permit the estate of the contracting producer to assign the contract. CCC will permit the assignment of payments under the program in accordance with the provisions of 7 CFR Part 1409, except that such assignments may also be made to secure or pay preexisting indebtedness of the contracting producer.

This final rule also sets forth other terms and conditions of the Dairy Termination Program.

The information collection requirements of this subpart have been approved by the Office of Management and Budget (OMB) for purposes of the Paperwork Reduction Act and OMB number 0560-0124 has been assigned.

Subpart—Dairy Termination Program

§ 1430.450 General statement.

This subpart implements the Dairy Termination Program which is authorized by section 201(d)(3) of the Agricultural Act of 1949, as amended by the Food Security Act of 1985 (Pub. L. 99-198) for the eighteen-month period beginning April 1, 1986. The purpose of the program is to achieve reductions in the quantity of milk marketed for commercial use. Under the program, the Commodity Credit Corporation will enter into contracts with producers under which producers will agree to sell their dairy cattle for slaughter or export and terminate milk production for a five-year period.

§ 1430.451 Administration.

(a) The program will be administered under the general supervision of the Administrator, Agricultural Stabilization and Conservation Service (ASCS), and shall be carried out in the field by Agricultural Stabilization and Conservation State and county committees (herein called "State and county committees") and the ASCS Kansas City Management Field Office (KCMO).

(b) State and county committees, the KCMO, and representatives and employees thereof do not have authority to modify or waive any of the provisions of the regulations in this subpart, as amended or supplemented.

(c) The State committee shall take any action required by these regulations which has not been taken by the county committee. The State committee shall also:

(1) Correct, or require a county committee to correct, any action taken by such county committee which is not in accordance with this subpart, or

VOL 51
ISS 45
MR 7
1986
UMI

(2) Require a county committee to withhold taking any action which is not in accordance with this subpart.

(d) No delegation herein to a State or county committee shall preclude the Administrator, ASCS, or a designee, from determining any question arising under the program or from reversing or modifying any determination made by a State or county committee.

§ 1430.452 Definitions.

In determining the meanings of the provisions of this subpart, unless the context indicates otherwise, words imparting the singular include and apply to several persons or things, words imparting the plural include the singular, words imparting the masculine gender include the feminine as well, and words used in the present tense include the past and future as well as the present. The following terms shall have the following meanings and all other words and phrases shall have the meanings assigned to them in the regulations governing reconstitution of farms in Part 719 of this chapter.

(a) *Acceptable evidence of milk marketed for commercial use* means documentation of the quantity of milk marketed for commercial use which is considered to be sufficient by CCC and verified through compliance checks and includes such items as:

(1) Monthly sales receipts or check stubs; or

(2) Computer printouts or handwritten reports prepared by a third party showing milk marketings certified to be complete and accurate by the preparer, and verified by actual marketing evidence.

(b) *Actively engaged in the production of milk* means engaged in the production and marketing of milk for commercial use in the United States.

(c) *ASCS* means the Agricultural Stabilization and Conservation Service, United States Department of Agriculture.

(d) *Bid* means a bid(s) submitted to obtain a contract, such bids being the amount of the nearest penny per hundredweight which when multiplied by the contract base shall constitute the maximum payment allowable under the contract.

(e) *Bid date* means the date on which the participating producers in the contracting entity submit a signed bid.

(f) *Brand or Branded* means the marking of dairy cattle in accordance with instructions from the county ASCS office.

(g) *Calf* means any female dairy bovine which weighs less than 500 pounds and is not pregnant.

(h) *CCC* means the Commodity Credit Corporation.

(i) *Contract* means the DTP Contract when executed by CCC after acceptance of a bid by CCC.

(j) *Contract base* means the milk base for the contracting entity as determined in accordance with § 1430.455 of this subpart.

(k) *Contract disposal period* means the dairy herd disposal period applicable to the contract.

(l) *Contract units* means units which are either (1) used to establish a contract base or (2) units to which the exemption in § 1430.453(c) of this subpart is applicable.

(m) *Contracting entity* means the producer or producers who submit a bid and are party to the same contract.

(n) *County ASCS office* means the office of the county committee in the county in which all or a portion of one or more of the units from which marketings used to establish the contract base are located and which the contracting entity elects to be the location through which all business related to the bid and contract shall be conducted.

(o) *County committee* means an ASCS county committee as established in accordance with section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)).

(p) *Cow* means any female dairy bovine that has had one or more calves.

(q) *Dairy cattle* means cows, heifers, and calves.

(r) *Dairy Termination Program (DTP)* means the program for purchasing by contract the termination of milk production by producers which is required by section 201(d)(3) of the Agricultural Act of 1949, as amended by the Food Secruity Act of 1985 (Pub. L. 99–198).

(s) *Dairy herd disposal* means the disposal of all dairy cattle in accordance with the provisions of this subpart and the contract.

(t) *Disposal period* means a period within which a producer must sell for slaughter or export all dairy cattle required to be sold by the contract.

(u) *Heifer* means any female dairy bovine which: (1) Weights 500 pounds or more or is pregnant; and (2) Has not yet had a calf.

(v) *Herd disposal completion date* means, except as otherwise specified in this subpart, the date on which the last of the participating producers in the contracting entity certifies to the satisfaction of CCC that the dairy cattle disposal which is required to be made by the end of the contract disposal period has been completed.

(w) *Interest in dairy cattle* means any ownership or financial interest of any kind, whether present, future, or conditional, in dairy cattle, including any interest as a lessee or lessor.

(x) *Interest in the production of milk* means sharing in the risk of production of or the proceeds from the sale of milk.

(y) *Marketed for commercial use* means milk which has been produced in the United States and also disposed of in the United States in raw or processed form by voluntary or involuntary sale, barter or exchange, or by gift.

(z) *Marketed milk* means milk produced in the United States and marketed for commercial use.

(aa) *Milk* means milk of dairy cows.

(bb) *Milk production facility* means all buildings used for the production or handling of milk.

(cc) *Nonproduction period* means the five-year period that begins on the day after the earlier of: (1) The last day of the contract disposal period; or (2) the herd disposal completion date.

(dd) *Participating producer* means any of the actual producers who is a party to a DTP contract.

(ee) *Person* means an individual, partnership, association, corporation, trust, estate, or other business enterprise or other legal entity or a State, a political subdivision of a State, or any agency thereof.

(ff) *Principal producer* means the producer who is designated on the contract as the person to receive communications from the county ASCS office concerning the contract.

(gg) *Producer* means any person who: (1) Is involved in, contributes to, or has any interest, including any ownership or financial interest, in any unit that is used for the production of milk, and (2) shares in the risk and/or proceeds of the production of milk from such unit.

(hh) *Program regulations* means the regulations contained in this subpart.

(ii) *Related person* means with respect to any participating producer any person identified as a related person under the provisions of § 1430.454 of this subpart.

(jj) *Secretary* means the Secretary of Agriculture of the United States.

(kk) *Unit* means the dairy cattle, milk production facilities, and land used together to produce milk.

(ll) *United States* means, except as otherwise specified in this subpart, the forty-eight contiguous States in the continental United States.

§ 1430.453 Eligibility requirements.

(a) Except as provided in paragraph (c), in order for any producer to be eligible for payments under a contract under this subpart, all producers on all units with respect to which any participating producer or related person was a producer on January 1, 1986, must sign and be party to the same contract.

(b) Only those persons who were producers of milk in the United States as of the bid date are eligible for payments under the contract except with respect to an assignment of payments made pursuant to the terms and conditions of the contract and this subpart.

(c) The provisions of paragraph (a) shall not be applicable to any unit from which, at the election of the participating producers, no quantity of milk marketed for commercial use will be used to establish a contract base. However, with respect to any such unit:

(1) All dairy cattle on such unit on or after the bid date must be slaughtered or exported by the end of the contract disposal period;

(2) No milk production facility on any such unit may be used to produce milk during the five-year nonproduction period for the contract; and

(3) No new milk production facility may be utilized on such unit during the nonproduction period either for purposes of producing milk or to maintain dairy cattle.

(d) The contracting entity must submit a bid by the final date for submitting bids established by CCC for the program.

(e) Each participating producer must file, by the bid date, the herd report required by paragraph (h).

(f) A contract base must have been established for the contract by the bid date.

(g) All participating producers must sign the contract.

(h) Each participating producer must, by the bid date, file with the county ASCS office a report showing for all units with respect to which such producer or related person had an interest in dairy cattle or in the production of milk on January 1, 1985, January 1, 1986, or the bid date:

(1) The number of cows on each such unit as of each of those dates;

(2) The number of heifers on each such unit as each of those dates; and

(3) The number of calves on each of those units as of each of those dates.

(i) The herd report required by paragraph (h) shall also show:

(1) Any transfer on or after January 1, 1986, of any dairy cattle onto any unit, from which marketings of milk for commercial use will be used to establish a contract base;

(2) Any transfer on or after January 1, 1986, of any dairy cattle from any unit with respect to which any participating producer or related person had an interest in dairy cattle or in the production of milk on or after January 1, 1986; and

(3) Any dairy cattle with respect to which any participating producer or related person had an interest on or after January 1, 1986, if the participating producer or related person no longer has an interest in such dairy cattle.

(4) The disposition or status of all dairy cattle to which the provisions of paragraphs (i) (2) and (3) are applicable.

(j) At least one of the participating producers in the contracting entity must either: (1) have been actively engaged in the production of milk continuously from January 1, 1985 through the bid date unless CCC determines that such continuous production of milk was not possible due to dairy herd conditions beyond the producer's control; or (2) be entitled to claim the marketings of another producer toward the establishment of a contract base in accordance with the provisions of § 1430.455 of this subpart.

§ 1430.454 Related persons.

(a) For purposes of this subpart the following persons are considered to be "related persons" with respect to any participating producer and, in addition, the actions of such persons will be considered for compliance purposes and other purposes specified in this subpart to be the actions of the participating producer: (1) The spouse and minor child of such producer and/or guardian of such child; (2) Any corporation in which the producer is a stockholder, shareholder, or owner (except publicly-held corporations in which the producer has a less than one percent interest in such corporation); (3) Any partnership, joint venture, or other enterprise in which the producer has an ownership interest or financial interest; and (4) Any trust in which the participating producer or any person listed in paragraphs (a) (1) through (3) is a beneficiary or has a financial interest.

(b) If the participating producer is a corporation, partnership, or other joint venture, then, for purposes of applying paragraph (a), the participating producer shall be considered to be such corporation, partnership, or other joint venture, and each individual owner, participant, or stockholder therein, except for persons with less than a one percent share in a corporation.

§ 1430.455 Base establishment.

(a) A preliminary milk base shall be established for the contract based upon the quantity of milk marketed for commercial use by the participating producers from all units with respect to which any such person was a producer on the bid date. In establishing a preliminary milk base, a producer may only claim that quantity of milk marketed for commercial use with respect to which the producer shared in the risk of production and only to the extent that the producer was entitled to an individual share of the proceeds of such marketings. Notwithstanding the first sentence of this section, no quantity of milk marketed for commercial use from any unit to which the exemption in § 1430.453(c) is applicable shall be used to establish the preliminary milk base. The preliminary milk base for the contract shall be the lesser of the total quantities of milk marketed for commercial use which may be used to establish such base for the participating producers in the contracting entity for the following two periods: (1) the 12-month period ending June 30, 1985; and (2) the 12-month period ending December 31, 1985.

(b) Each producer must present acceptable evidence of the quantity of milk marketed for commercial use for the relevant periods to the county ASCS office.

(c) Except for dairy cattle slaughtered or exported by the bid date, the preliminary milk base shall be reduced by 20,000 pounds for:

(1) Each head of dairy cattle transferred on or after January 1, 1986, but before the bid date, from those units with respect to which any participating producer or related person was a producer on or after January 1, 1986; and,

(2) To the extent to which paragraph (c)(1) is not applicable, each head of dairy cattle in which any participating producer or related person had an interest on or after January 1, 1986, if, as of the bid date, no interest in such dairy cattle is retained by any participating producer in the contracting entity or related person with respect to any such producer. If the maximum interest which any such participating producer or related person had in such dairy cattle on or after January 1, 1986, was less than 100 percent, the 20,000 pound reduction provided for in this subparagraph shall be adjusted accordingly.

(d)(1) The preliminary milk base shall be adjusted in accordance with the provisions of paragraph (d)(2) if the number of cows as of the bid date on those units from which quantities of milk marketed for commercial use have been used to establish such base, less the number of all cows transferred onto such units on or after January 1, 1986, is less than 90 percent of: (i) the number of cows on those units on either January 1, 1985, or January 1, 1986; and (ii) the number of cows estimated needed to

VOL
51
ISS
45
MR
7
1986
UMI

produce the preliminary milk base as adjusted under paragraph (c).

(2) If an adjustment is required under the provision of paragraph (d)(1), the preliminary milk base shall be further reduced to the extent necessary so that such base does not exceed the product of multiplying: (i) the number of cows as of the bid date on the units from which the quantities of milk marketed for commercial use have been used to establish such base, less the number of cows transferred onto such units on or after January 1, 1986, by (ii) the higher of: (A) 13,000 pounds or (B) the average annual milk production for the cows remaining on such units.

(3) For purposes of paragraph (d)(1), the estimated number of dairy cows needed to produce the preliminary milk base as adjusted in accordance with paragraph (c) shall be computed by dividing such adjusted base by 13,000 pounds.

(e)(1) Notwithstanding any other provision of this subpart, a participating producer may, in establishing a contract base, claim the quantity of milk marketed for commercial use by another producer if: (i) the participating producer commenced the marketing of milk after December 31, 1984; (ii) the other producer was or is a member of the family of the participating producer; and, (iii) the other producer's entire herd and facility were transferred to the participating producer directly by reason of the death of, or gift from, the other producer.

The participating producer may only claim that quantity of milk marketed for commercial use which such other producer would have been entitled to claim in establishing a milk base if such other producer had been a producer on the unit as of the bid date.

(2) For purposes of this paragraph, a member of the family of the participating producer means: (i) the parent, grandparent, or spouse of parent or grandparent, or legal guardian of such producer; (ii) the spouse of such producer; or (iii) the son, daughter, or grandson, or granddaughter of such producer, or the spouse of any such persons.

(f) The preliminary milk base as adjusted in accordance with the provisions of this section shall constitute the contract base. The contract base shall be determined by the county ASCS office. The adjustments provided for in this section shall be made to the extent practicable and CCC may make such additional adjustments in the contract base as are determined to be necessary in order to ensure that CCC receives the maximum value for the payments made by CCC under the program authorized by this subpart.

§ 1430.456 Bid submission.

(a) The bid shall be stated in a dollar amount per hundredweight to the nearest penny which, when multiplied by the contract base, shall equal the total payment which may be made by CCC under the contract if the bid is accepted. A producer's bid may not be withdrawn after the last date for bid submission established by CCC. CCC is not obligated to accept any bid and may give preference by contract disposal periods to submitted bids. The maximum bid per hundredweight which is accepted may vary by region if such variances are determined to be needed to avoid undue disruption of dairy markets. The bid shall be submitted by signing the contract which shall set forth the bid or bids of the producer(s). If a bid is accepted by CCC the requirements of the contract and this subpart shall be applicable even if, by reason of noncompliance with the eligibility requirements of § 1430.453 of this subpart, none of the participating producers are entitled to payment under the contract.

(b) A bid may be submitted for one or more of the three following disposal periods: (1) April 1, 1986 through August 31, 1986; (2) September 1, 1986 through February 28, 1987; (3) March 1, 1987 through August 31, 1987.

(c) When a bid is accepted by CCC, a representative of CCC will sign the contract and a copy of the executed contract will be supplied to each participating producer. The period for which the bid is accepted shall be the contract disposal period.

§ 1430.457 Dairy herd disposal and nonproduction period requirements.

(a) All dairy cattle, which on or after the bid date were located on any unit with respect to which any participating producer or related person was a producer on or after January 1, 1986, shall be sold for slaughter or export by the end of the contract disposal period in accordance with the provisions of § 1430.458 of this subpart. In addition, all dairy cattle in which any such producer or related person had an interest on or after the bid date shall be so sold by the end of the contract disposal period.

(b) During the five year nonproduction period as calculated under the provisions of § 1430.459 of this subpart, no participating producer or related person may have, retain, or acquire any interest in dairy cattle or in the production of milk.

(c) No participating producer or related person shall, during the nonproduction period, acquire or make available to any person any production facility that becomes available for use as a result of the compliance by any person with any DTP contract. This restriction shall be considered to include, but not be limited to, any milk production facility used by any participating producer or related person on or after January 1, 1986, to produce milk. The use by any person of such a facility during the nonproduction period for a contract shall be a violation of the terms and conditions of the contract regardless of whether the participating producer or related person owns, or has owned, the milk production facility.

(d) No milk production facility on any unit with respect to which any participating producer or related person was a producer on or after January 1, 1986, may be used by any person to produce milk or to maintain dairy cattle during the nonproduction period and no new milk production facility may be brought into use on such unit during the nonproduction period.

(e) Unless CCC shall otherwise agree in writing, if any participating producer or related person involuntarily acquires an interest in dairy cattle or in the production of milk as a result of the death of another person or otherwise, the total amount of payments which are due under the contract shall be reduced by the amount of any gross proceeds realized by any such producer or related person from the use or sale of such interest.

§ 1430.458 Sales for slaughter or export.

(a) All dairy cattle which are required to be sold for slaughter or export under the provisions of this subpart shall be branded if such dairy cattle have not been sold by the date that the principal producer receives notice that the contract has been accepted by CCC.

(b) There may be no more than one intermediate purchase of any dairy cattle which are required to be sold for slaughter or export under the provisions of this subpart between the date of sale for that purpose and the date of the actual slaughter or export of such dairy cattle.

(c) The participating producers in the contracting entity shall be responsible for ensuring that any purchaser of dairy cattle which are sold to meet the requirements of the contract has, with respect to each such sale, signed a notice on a CCC-approved form listing the type, weight, price and final slaughter or export date for the dairy cattle. Such notice will not relieve the participating producers of their liability for any failure of such cattle to be

slaughtered or exported by the required date. Any such failure shall be a violation of terms and conditions of the contract. Each notice signed by a purchaser of dairy cattle as prescribed in this subsection shall be submitted to the county ASCS office by the tenth day of the month following the month in which the sale to meet the requirements of the contract occurred.

(d) Not more than 50 percent of the dairy cows on any unit to which the requirements for slaughter and export in this subpart are applicable may be slaughtered before the beginning of the contract disposal period.

(e)(1) Except as provided in paragraph (e)(2), all dairy cattle which are to be sold for slaughter or export in accordance with the terms and conditions of the contract must be slaughtered or exported by the end of the contract disposal period.

(2) Notwithstanding the provisions of paragraph (e)(1), if the contract disposal period ends on August 31, 1986, calves and unbred (nonpregnant) heifers may be slaughtered not later than September 30, 1986. In addition, with respect to contracts entered into for the third disposal period, CCC may permit dairy cattle sold for export to be exported not later than September 30, 1987.

(f) Subject to the final date for slaughter or exports as prescribed by the provisions of paragraph (e), the sale of dairy cattle for slaughter or export shall be subject to the following additional time limitations:

(1) All cows and bred (pregnant) heifers sold for slaughter must be slaughtered within 15 days from the date such cows and bred heifers were sold for that purpose;

(2) Calves and unbred heifers sold for slaughter must be slaughtered within six months from the date such calves and unbred heifers were sold for that purpose;

(3) Dairy cattle sold for export must be exported within 45 days from the date such cattle have been sold for that purpose.

(g) Dairy cattle sold for export shall be considered to have been exported only if such cattle are exported outside the fifty States of the United States, its territories and possessions and do not reenter the fifty States of the United States, its territories and possessions at any time after such export.

(h) In order to establish the export or slaughter of any head of dairy cattle, the contracting entity must present to the county ASCS office with respect to such cattle:

(1) All sales receipts relating to such sale including any receipt generated by a sale by an intermediate buyer;

(2) All notices required by this subpart to be signed by the purchasers of such cattle; and

(3)(i) For any dairy cattle sold for slaughter, a certificate of slaughter by the slaughtering party unless other acceptable evidence of slaughter has been presented;

(ii) For any dairy cattle exported to a country other than Canada or Mexico, a certificate of inspection showing the export of the dairy cattle issued by the Animal and Plant Health Inspection Service, United States Department of Agriculture; and,

(iii) For any dairy cattle exported to Canada or Mexico, a certification of exportation issued by United States customs officials or a certification of importation by officials of the importing country, unless other acceptable evidence of export to Canada or Mexico is presented.

(i) Any dairy cattle which are destroyed because of disease or for any other reason shall be considered to have been sold for slaughter.

§ 1430.459 Payments.

(a) The total amount of payments which may be made by CCC to a contracting entity under the contract shall be that amount which is equal to the accepted bid miltiplied by the contract base. Such amount shall be paid by CCC only if it has been determined that there has been compliance with all of the terms and conditions of the regulations and the contract. If any terms, conditions, or requirements of the contract are not met, payments previously made by CCC shall be refunded and no further payments shall be made by CCC.

(b) Not later than 30 days following the end of the contract disposal period each participating producer shall file a certification showing whether the following dairy cattle have been exported or slaughtered:

(1) All dairy cattle, which, on or after the bid date, were on any unit with respect to which the producer or related person was a producer on or after January 1, 1986;

(2) Any dairy cattle with respect to which such producer or related person had an interest at any time on or after the bid date.

(c) If the contract disposal period ended August 31, 1986, the certification required by paragraph (b) may be filed on or before October 30, 1986.

(d) The herd disposal completion date for purposes of the contract and this subpart shall be the date of filing of the last certification which is required to be filed by participating producers under the provisions of paragraph (b).

(e) The five-year nonproduction period for the contract shall be the period which begins on the day after the earlier of: (1) The end of the contract disposal period; or (2) The herd disposal completion date.

(f) Each participating producer's share of the total contract payment shall be indicated on the face of the contract. After the acceptance of a bid, each producer shall elect one of the two following schedules for receiving payment of the producer's share:

(1) A schedule by which not more than 80 percent of the share will be paid by CCC within 30 days of the herd disposal completion date with the remainder to be paid in four equal installments within 30 days of each of the next four anniversaries of such date; or

(2) A schedule by which not more than 85 percent of the share will be paid on the first anniversary of the herd disposal completion date with the remainder to be paid in three equal installments payable within 30 days of each of the next three anniversaries of that date.

(g) On or within 30 days following each of the first five anniversaries of the herd disposal completion date, each participating producer shall certify to the county ASCS office whether there has been compliance with the requirements of the contract. The failure of any participating producer to file such a certification shall render all of the participating producers and any other person ineligible for any payment under the contract including any payments previously made. Payments previously made shall be refunded to CCC. If any participating producer has failed to file the certification required by paragraph (b), the herd disposal completion date for purposes of this paragraph shall be considered to be the date on which the contract disposal period ended. The filing by any participating producer of the certification required by this subsection after the first day on which such certification could be filed shall extend commensurately the time by which CCC shall make payment of any payment that becomes due with respect to the anniversary of the herd disposal completion date to which the certification is applicable.

§ 1430.460 Producer and purchaser penalties.

(a) (1) A participating producer shall be subject to a marketing penalty if such producer or related person as specified in § 1430.454 retains or acquires an interest in dairy cattle or the production of milk in violation of the terms and

VOL 51
ISS 45
MR 7
1986
UMI

conditions of a contract entered into under this subpart. Such penalty shall be in addition to any other amount due CCC under this subpart and shall be applied against the full quantity of milk to which the interest in milk production applies and/or the full quantity of milk produced by the dairy cattle to which the interest applies. Such penalty shall be computed at the support price for milk in effect (as established in accordance with the provisions of 7 U.S.C. 1446) during the period in which the milk production occurred.

(2) Each person who makes a false statement with respect to a contract as to: (i) the quantities of milk marketed for commercial use by a producer, or (ii) the size or composition of the dairy herd that produced such marketings, or (iii) the size or composition of the dairy herd at the time the bid is submitted, shall be subject, in addition to any other amount due CCC, to a civil penalty of $5,000 for each head of dairy cattle to which such statement applied.

(3) In addition to any other amount due CCC, each person who makes a false statement as to the number of dairy cattle that were sold for slaughter or export under a contract under this subpart shall be subject to a civil penalty of not more than $5,000 for each head of cattle to which such statement applied.

(4) Each person who buys one or more head of dairy cattle sold for slaughter or export because of a DTP contract, who knows that such cattle are sold for slaughter or export, and who, after receiving such cattle, fails to cause the slaughter or export of such cattle within the time limits for slaughter or export as prescribed by § 1430.458 of this subpart, shall be liable for a civil penalty of not more than $5,000 with respect to each head of such cattle to which such failure of slaughter or export is applicable.

(5) Each person who knowingly violates any other provision of this subpart shall be liable for a civil penalty of not more than $1,000 for each such violation.

(b) Penalties under this subpart shall be assessed after notice and opportunity for an informal administrative hearing.

(c) Interest shall accrue on penalties at the rate which CCC is required to pay for its borrowing from the United States Treasury at the time the penalty is assessed. Further, the penalties assessed under this subpart shall be subject to late payment charges in the same manner and at the same rate which is set forth at 7 CFR Part 1403 with respect to delinquent debts which are owed to CCC.

§ 1430.461 Misrepresentation, scheme and device, and fraud.

(a) If CCC determines that any participating producer has erroneously represented any fact or has adopted, participated in, or benefitted from, any scheme or device which has the effect of, or is designed to, defeat the purpose of this subpart and/or the contract, no person shall be eligible for payments under the contract and all payments previously made to any person under the contract shall be refunded to CCC. The amount paid to CCC shall include any interest or related charges as are prescribed in § 1430.462 of this subpart.

(b) If any misrepresentation, scheme or device or practice has been employed for the purpose of causing CCC to make a payment under a DTP contract which CCC otherwise would not make, all amounts paid by CCC under the contract to any person shall be refunded to CCC together with interest and related charges as provided for in § 1430.462 of this subpart, and no further payments shall be made by CCC.

(c) If the county committee finds that any person has adopted or participated in any practice which tends to defeat the purpose of the program, the county committee may withhold or require to be refunded all or part of the payments which otherwise would be due the producer under the program.

§ 1430.462 Refunds to CCC; joint and several liability.

(a) In the event that there is a failure to comply with any term, requirement, or condition for payment arising under the contract, or this subpart, or if any refund of a contract payment to CCC shall otherwise become due in connection with the contract, all payments made under the contract to any person shall be refunded to CCC, together with interest and late payment charges as provided for in this paragraph.

(b) The participating producers in the contracting entity shall be jointly and severally liable for any refund, including related charges, which is determined to be due CCC for any reason under the terms and conditions of the contract or this subpart.

(c) Interest shall be charged with respect to any refund which is determined to be due CCC at the rate of interest which CCC is required to pay for its borrowings from the United States Treasury as of the date of the disbursement by CCC of the monies to be refunded. Interest shall accrue from the date of such disbursement by CCC. Upon the sending of the notification of the debt by CCC to the principal producer, no additional interest charges shall be assessed. However, the account shall thereafter bear late payments charges to be assessed in accordance with the provisions of, and subject to the rates prescribed in, 7 CFR Part 1403. If, for any reason, no late payment charges may be assessed with respect to such account under the provisions of 7 CFR Part 1403, additional charges on the account will accrue at the rate equal to the current rate for CCC borrowings from the United States Treasury plus three percent per annum.

(d) Participating producers who are party to a DTP contract must refund to CCC any excess payments made by CCC with respect to such contract.

(e) In the event that the contract base was established as a result of erroneous information provided by any person to the county ASCS office or was erroneously computed by such office, the contract base shall be recomputed and the payments due under the contract shall be corrected as necessary Any refund of payments which are determined to be required as a result of such recomputation of the contract base shall be remitted to CCC.

§ 1430.463 Cumulative liability.

The liability of any person for any penalty under this subpart or for any refund to CCC or related charge arising in connection therewith shall be in addition to any other liability of such person under any civil or criminal fraud statute or any other statute or provision of law including, but not limited to, 18 U.S.C. 286, 287, 371, 641, 1001; 15 U.S.C. 714m; and 31 U.S.C. 3729.

§ 1430.464 Assignments of payments.

Payments which are earned by a producer under a DTP contract may be assigned in accordance with the provisions of 7 CFR Part 709, except that such assignments may also be made to secure or pay pre-existing indebtedness.

§ 1430.465 Setoffs and withholdings.

The regulations issued by the Secretary of Agriculture with respect to setoffs and withholdings, 7 CFR Part 13, and any amendments thereto shall be applicable to the Dairy Termination Program authorized by this subpart. Any amount due CCC under the program

provided for in this subpart shall be subject to setoffs and withholdings pursuant to those regulations.

§ 1430.466 Appeals.

Reconsideration and review of the determinations made under this subpart shall be made in accordance with the Administrative Appeal Regulations, 7 CFR Part 780. If any penalty determination is delegated to any agency of the Department other than ASCS such determination shall be made by such delegatee under procedures which, as near as practicable, shall comport with Part 780.

§ 1430.467 Performance based upon advice of action of county or state committee.

The provisions of 7 CFR Part 790 and any amendments thereto, relating to performance based upon action or advice of an authorized representative of the Secretary shall be applicable to this subpart.

§ 1430.468 Miscellaneous provisions.

(a) It is the responsibility of participating producers that CCC, or its designee, have full and complete access to all units with respect in which any of the participating producers or related persons was a producer on or after January 1, 1986, and any unit on which were located any dairy cattle in which any such person had an interest in dairy cattle on or after that date.

(b) Each participating producer or knowing purchaser of dairy cattle sold pursuant to a DTP contract must, for a period three years from the date of the nonproduction period under this contract or for such longer period as CCC may specify, keep, maintain, and make available to CCC all records which CCC may require to enforce provisions of the contract, as well as any records necessary to establish compliance with the terms and conditions of this contract of this subpart.

(c) Any payment which is due any person shall be allowed without regard to questions of title under State law and without regard to any claim or lien against the unit or any milk produced from the unit, and the proceeds, thereof, which may be asserted by any creditor, except agencies of the United States Government.

(d) There shall be no succession of interest in any DTP contract except that, upon the death of a participating producer, the estate of such producer may perform the obligations of the producer under the contract or, upon approval of the CCC, may assign the contract.

(e) Notwithstanding any other provisions of this subpart, the retention or holding of dairy cattle otherwise prohibited by this subpart may be permitted if the Executive Vice President, CCC, or the Executive Vice President's designee, determines that such retention will not defeat the goals of the Dairy Termination Program.

(f) The participating producer shall execute all certifications specified in the contract or required by CCC or any other representative of the Department in the administration of this subpart.

(g) The burden shall be on participating producers to establish compliance with the requirements of the contract and this subpart. In addition, buyers of dairy cattle to which a DTP contract applies shall have the burden of establishing compliance with the provisions of this subpart.

§ 1430.469 Other regulations.

The following regulations and amendments thereto shall also be applicable to this subpart:

(a) 7 CFR Part 13—Setoffs and Withholdings;

(b) 7 CFR Part 707—Payments Due Persons Who Have Died, Disappeared or Have Been Declared Incompetent;

(c) 7 CFR Part 780—Appeal Regulations;

(d) 7 CFR Part 790—Incomplete Performance Based Upon Action or Advice of an Authorized Representative of the Secretary;

(e) 7 CFR Part 791—Authority to Make Payments When There Has Been a Failure to Comply Fully With the Program;

(f) 7 CFR Part 796—Harvesting of Marijuana or Other Such Drug-Producing Plants for Illegal Use; and

(g) 7 CFR Part 1403—Interest on Delinquent Debts.

§ 1430.470 Paperwork Reduction Act assigned numbers.

The information collection requirements contained in these regulations (7 CFR Part 1430) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Control Number 0560-0124.

Signed at Washington, DC, on March 4, 1986.

Frank W. Naylor,

Acting Secretary, U.S. Department of Agriculture.

[FR Doc. 86-5083 Filed 3-6-86; 8:45 am]

BILLING CODE 3410-05-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-NM-144-AD; Amdt. 39-5251]

Airworthiness Directives; British Aerospace Viscount Models 700 and 800 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, correction.

SUMMARY: This action corrects an existing airworthiness directive (AD) applicable to British Aerospace Aircraft Group Viscount Models 700 and 800 series airplanes. AD 84-07-03 requires inspection and modification of the nose landing gear to prevent collapse. This amendment clarifies the compliance time of that AD.

DATE: Effective March 24, 1986.

ADDRESSES: The service bulletin specified in this AD may be obtained upon request to British Aerospace, Inc., Box 17414, Dulles International Airport, Washington, DC 20041, or may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Harold N. Wantiez, Standardization Branch, ANM-113; telephone (206) 431-2977. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The FAA issued Amendment 39-4837, AD 84-07-03 on March 22, 1984 (49 FR 13014). This AD requires an inspection and modification to the nose landing gear on British Aerospace Viscount Models 700 and 800 airplanes. Paragraphs 1. and 2. of the airworthiness directive give the required compliance time as follows: "Within the next six months time in service after the effective date of this airworthiness directive . . ." The words *time in service* as defined in FAR Part 1, mean "the time from the moment an aircraft leaves the surface of the earth until it touches it at the next point of landing." Since the intent of the AD was to have compliance within six months after the effective date of the AD, an amendment is necessary to delete the words ". . . time in service" in paragraphs 1. and 2. of the AD.

Since this amendment only makes a correction to provide a clarification, it has no adverse economic impact and imposes no additional burden on any person. Therefore, notice and public

VOL
51
ISS
45
MR
7
1986
UMI

procedures hereon are unnecessary and the amendment may be made effective in less than 30 days.

The FAA has determined that this amendment is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Model BAe Viscount Series 700 and 800 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By revising Airworthiness Directive 84–07–03, Amendment 39–4837 (49 FR 13014; March 22, 1984), as follows:

Remove the words ". . . time in service . . ." from the first sentence of paragraphs 1. and 2.

This amendment becomes effective March 24, 1986.

Issued in Seattle, Washington, on February 27, 1986.

Thomas J. Howard,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 85–NM–84–AD; Amdt. 39–5252]

Airworthiness Directives; Fairchild Model F27 and FH227 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This notice adopts a new airworthiness directive (AD), applicable to Fairchild Model F27 and FH227 series airplanes, which requires inspection and replacement, if necessary, of the main landing gear drag strut assemblies. Cracks in the tube bores in the vicinity of the lock strut attachments have been reported. These checks, if allowed to grow undetected, could cause failure of the main landing gear drag strut assemblies and loss of control of the airplane.

DATES: Effective April 13, 1986.

Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information specified in this AD may be obtained from Fairchild Industries, Inc., Fairchild Republic Division, Hagerstown, Maryland 21740. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the New York Aircraft Certification Office, FAA, New England Region, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Mr. Alfred A. Maila, ANE–172, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; telephone (516) 791–6221.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations by adopting an airworthiness directive (AD) which would require an eddy current or ultrasonic inspection for cracking in the tube bore in the vicinity of the lock strut attachments, and replacement, if necessary, of the main landing gear drag stay assembly of Fairchild F27 and FH227 series airplanes, was published in the **Federal Register** on November 29, 1985 (50 FR 49055). The comment period closed on January 20, 1986.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed. Minor editorial changes have been made in the final rule to clarify the applicability of provisions of the referenced service bulletins.

It is estimated that 57 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2.5 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Repair parts are estimated to be $8323 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $480,111.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities, because of the minimal cost of compliance per airplane ($100 per inspection). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Fairchild: Applies to all Model F27 and FH227 series airplanes certificated in any category. Compliance required as indicated.

To detect cracks in the FH227 and F27 main landing gear drag strut assemblies due to the bores of some tubes having surface break-up generated during the drawing process, accomplish the following, unless previously accomplished:

A. For airplanes which have accumulated 20,000 landings or more prior to the effective date of this AD, within 400 hours time-in-service after the effective date of this AD, using eddy current or ultrasonic inspection equipment and procedures, inspect the left and right upper main undercarriage drag stay for flaws, in accordance with the Accomplishment Intructions and sketches outlined in Dowty Rotol Service Bulletin 32–45N (for Model FH227 airplanes) or Service Bulletin 32–81C (for Model F27 airplanes), dated October 16, 1981.

B. For airplanes which have accumulated more than 10,000 landings but less than 20,000 landings prior to the effective date of this AD, within 800 hours time-in-service after the effective date of this AD, using eddy current or ultrasonic inspection equipment and procedures, inspect the left and right upper main undercarriage drag stay for flaws in accordance with the Accomplishment Instructions and sketches outlined in Dowty Rotol Service Bulletin 32–45N (for Model FH227 airplanes) or Service Bulletin 32–81C (for Model F27 airplanes), dated October 16, 1981.

C. Within 2,000 hours time-in-service after the effective date of this AD, visually inspect the left and right upper main undercarriage stay in accordance with Dowty Rotol Service Bulletin 32–45N (for Model FH227 airplanes) or Service Bulletin 32–81C (for Model F27 airplanes), Item 2B(1)(2)(3)(4), dated October 16, 1981.

D. If, as a result of the inspections referred to in paragraphs A. and B., above, flaws are detected, replace damaged part with a serviceable part prior to next flight.

E. Upon the request of an operator, an FAA Maintenance Inspector, subject to prior approval by the Manager, New York Aircraft Certification Office, FAA, New England Region, may adjust the inspection times specified in this AD to permit compliance at an established inspection period of that operator if the request contains substantiating data to justify the change for that operator.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the inspection requirements of this AD.

G. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, New York Aircraft Certification Office, FAA, New England Region.

All persons affected by this proposal who have not already received these documents from the manufacturer may obtain copies upon request to Fairchild Industries, Inc., Fairchild Republic Division, Hagerstown, Maryland 21740. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, Room 202, Valley Stream, New York.

This Amendment becomes effective April 13, 1986.

Issued in Seattle, Washington, on February 27, 1986.

Thomas J. Howard,

Acting Director, Northwest Mountain Region.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 225 and 277

[Docket Nos. RM80–8–001 through RM80–8–005; Order No. 95–A]

Right of First Refusal of Bona Fide Offers; Order Granting in Part and Denying in Part Applications for Rehearing, Reconsideration and Clarification of Order No. 95

Issued: February 28, 1986.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Order on Rehearing.

SUMMARY: The Federal Energy Regulatory Commission is granting in part and denying in part applications for rehearing, reconsideration, and clarification of its final rule implementing section 315(b) of the Natural Gas Policy Act of 1978. That section provides that upon expiration of contracts for the sale of certain categories of natural gas removed from the Commission's Natural Gas Act (NGA) jurisdiction, the seller must make a bona fide offer to the purchaser and give the purchaser an opportunity to match a third party offer before selling the gas to a third party. The Commission grants rehearing in order to (1) eliminate the Commission's interpretation that § 154.93 of its NGA regulations governs the price escalation clauses which may be included in a bona fide offer, (2) remove the original purchaser's right to alter the delivery terms of a third party offer, (3) eliminate the prohibition on waivers of section 315(b) rights more than one year before contract expiration, (4) provide that the requirement that bona fide offers not be made more than eighteen months before contract expiration does not apply to implied contracts, and (5) limit the record retention requirement to three years.

EFFECTIVE DATE: May 21, 1986.

FOR FURTHER INFORMATION CONTACT: Richard Howe, Jr., Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357–8308.

SUPPLEMENTARY INFORMATION:

Order No. 95–A; Order Granting in Part and Denying in Part Applications for Rehearing, Reconsideration and Clarification of Order No. 95

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt, and C.M. Naeve.

Bona Fide Offers; Right of First Refusal: Docket Nos. RM80–8–001, RM80–8–002, RM80–8–003, RM80–8–004, and RM80–8–005.

Issued: February 28, 1986.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is granting in part and denying in part applications for rehearing, reconsideration, and clarification of Order No 95.[1] The final rule adopted by that order implemented section 315(b) of the Natural Gas Policy Act of 1978 (NGPA).[2] That section requires a seller of certain categories of natural gas, for which the existing contract expires, (1) to make a bona fide offer to the original purchaser to continue to sell that gas and, (2) if the bona fide offer is rejected, to extend to the purchaser the right of first refusal of the gas on the basis of a third party offer. The Commission is amending Parts 255 and 277 of its regulations to make necessary clarifications and revisions, both in response to the applications of rehearing and clarification and as a result of the Commission's March 14, 1985 request for further comment on its rules under Order No. 95 in light of deregulation.[3]

II. Background

Section 315(b) of the NGPA modifies the effect of the removal of certain gas from Natural Gas Act (NGA) jurisdiction by NGPA section 601(a)(1) (B). The gas so removed is gas committed or dedicated to interstate commerce on November 8, 1978, which is also (1) new natural gas as defined in NGPA section 102(c),[4] (2) natural gas produced from any new, onshore production well as defined in NGPA section 103(c), or (3) high-cost natural gas as defined in NGPA section 107(c)(1)–(4). Without section 601(a)(1)(B), the seller of such gas would be required to continue to make sales to the original purchaser, even after a contract expires, until the Commission authorized abandonment of service under section 7(b) of the NGA.[5]

Section 315(b) provided a form of substitute protection to purchasers. It gave the purchaser of gas removed from NGA jurisdiction two opportunities to contract with the seller for continued delivery of the gas—the opportunity to accept a bona fide offer which the seller must make to him and the right to match the terms of a third party offer to purchase the gas (right of first refusal). Congressman Dingell described the purpose of section 315(b) as follows:

---

[1] Bona Fide Offers, Right of First Refusal, 45 FR 53,116, (Aug. 11, 1980) (Order No. 95) (codified at 18 CFR 277.201–10 (1985)).

[2] 15 U.S.C. 3375(b) (1982).

[3] Bona Fide Offers; Right of First Refusal, 50 FR 10,243 (Mar. 14, 1985) (Notice of Request for Additional Comments). This notice is hereinafter referred to as the March notice.

[4] Thus, gas produced from a new lease on the Outer Continental Shelf (OCS) (NGPA section 102(c)(1)(A)) is removed from NGA jurisdiction, but OCS gas produced from a new reservoir under an old lease (NGPA section 102(d)) is not.

[5] 15 U.S.C. 717f (1982). *See Sunray Mid-Continent Oil Co. v. FPC,* 364 U.S. 137 (1960). Under the NGA, neither producer nor pipeline may cease deliveries to their respective customers without complying with section 7. *California v. Southland Royalty Co.,* 436 U.S. 519, 527 (1978).

VOL 51 ISS 45 MR 7 1986 UMI

> This section was included principally to ensure a degree of continuity of gas supplies to the interstate system despite non-price deregulation of certain categories of gas. . . . It has been correctly observed that, in conjunction with the Commission's authority under sections 501 and 503, section 315 provides a mechanism to protect the security of present interstate pipeline supplies. . . .[6]

The Commission in Order No. 95 established Part 277 of its regulations in order to implement section 315(b). Section 277.205 of Part 277 requires a seller of gas covered by NGPA section 315(b) to make a bona fide offer to the original purchaser for the continued sale of gas generally before the expiration or termination of the contract covering the gas.[7] The purchaser may accept or reject the bona fide offer. If the purchaser accepts the bona fide offer, the matter is thereby concluded.

If the purchaser rejects the bona fide offer, § 277.206 requires the seller to extend to the original purchaser a right of first refusal of such natural gas before the seller may sell the gas to a third party. The right of first refusal gives the original purchaser the right to match the terms of the third party's offer to purchase the natural gas. If the offer is rejected, the seller can then sell the gas to the third party under the terms of the offer. If the original purchaser in its acceptance alters any terms of the offer, other than delivery point, treating, conditioning or compression, the purchaser is deemed to have rejected the offer and the seller is free to sell the gas to the third party. Once the gas is sold to a third party pursuant to an offer rejected by the original purchaser, the seller has no further obligation under section 315(b) to the original purchaser. The seller's obligation to the original purchaser could end sooner, however, should the purchaser waive its rights under section 315(b) and applicable regulations.

Three applications for rehearing, one application for reconsideration and one application for clarification were filed concerning Order No. 95.[8] On March 11, 1985, the Commission requested additional comments primarily concerning whether and how the recent changes in the natural gas market, including the January 1, 1985, price-deregulation of section 102(c) and some section 103(c) gas, should affect the Commission's disposition of the issues raised on rehearing. Seventeen companies, three trade associations, and one state commission filed comments.

This order grants rehearing in order to (1) eliminate the Commission's interpretation in Order No. 95 that § 154.93 of its NGA regulations governs the price escalation clauses which may be included in a bona fide offer, (2) remove the original purchaser's right to alter the delivery terms of a third party offer, (3) eliminate the prohibition on waivers of section 315(b) rights more than one year before contract expiration, (4) provide that the requirement that bona fide offers not be made more than eighteen months before contract expiration does not apply to implied contracts, and (5) limit the period for which records are required to be kept to three years.

III. Discussion

A. Interpretation of Section 315(b)

Several applicants for rehearing[9] allege that the final rule exceeded the Commission's statutory authority under section 315(b) by imposing what is effectively NGA regulation on sales of gas no longer subject to that Act. Some applicants[10] also contend that the final rule misinterpreted section 315(b) as requiring that a bona fide offer and an opportunity to reject a third party offer be given in all instances.

1. Terms Legal Under the Natural Gas Act

The applicants contend that the Commission reimposes NGA jurisdiction through its definition of "bona fide offer." Section 277.203(c) of the final rule defines bona fide offer to mean, in part, a "written offer by the seller to the original purchaser which would be *legal for such purchaser to accept under the Natural Gas Act* . . ." (emphasis added).[11] This language is in the NGPA Conference Report. The conferees explained that "the term bona fide offer is intended, at a minimum, to include terms that would be legal for any purchaser to accept under the Natural Gas Act."[12] Order No. 95 stated that this wording in § 277.203(c) applied to bona fide offers the legal restrictions in § 154.93 of the Commission's NGA rules (18 CFR 154.93).[13] Section 154.93 invalidates any pricing provisions in gas contracts under the NGA other than fixed price clauses, area rate clauses, or five-year price redetermination clauses. Accordingly, § 154.93 prohibits indefinite escalation clauses, such as favored nation clauses.[14]

Applicants argue that, by restricting the pricing provisions of the bona fide offer to the clauses permitted under § 154.93, the rule violates the intent of Congress in enacting NGPA section 601(a)(1)(B), which was to remove certain gas from NGA sales jurisdiction. Many of the commenters responding to the March notice support the applicants' contentions.[15] A few of the commenters oppose those contentions.[16]

The Commission agrees that section 315(b) was not intended to prevent parties from negotiating price escalation clauses that authorize collection of deregulated or NGPA maximum lawful prices. The preclusion of such clauses would frustrate the collection of prices authorized by the NGPA.

In *Pennzoil Co.* v. *FERC*,[17] the court held that Congress prohibited the Commission from applying § 154.93 to existing interstate contracts for the sale of committed or dedicated gas subject to NGPA sections 102(c), 103(c), or 107(c)(1)–(4) through removal of that gas from NGA jurisdiction by section 601(a)(1)(B). By the same reasoning, Congress must also have intended through section 601(a)(1)(B) to prohibit the Commission from applying § 154.93 to bona fide offers to enter into new contracts covering gas removed from NGA jurisdiction. It makes no sense to permit indefinite price escalation clauses in existing contracts but prohibit them in the subsequent new contracts.

---

[6] 124 Cong. Rec. 38,366 (1978).

[7] The rule also requires a bona fide offer for gas sold in interstate commerce under an implied contract under the NGA for which no written contract is in effect. Under § 277.205(b)(2), the bona fide offer would have to be made within twenty days after gas is removed from NGA jurisdiction by a jurisdictional agency determination under section 503 of the NGPA.

[8] Arco Oil and Gas Co. (Arco) and Indicated Producers filed applications for rehearing on Aug. 25 and 27, 1980. Pennzoil Co., Pennzoil Producing Co., Pennzoil Oil and Gas, Inc., Pogo Producing Co., General American Oil Co. of Texas, Texasgulf, Inc., and Ashland Exploration, Inc., (Pennzoil *et al.*), filed a joint motion for rehearing on Aug. 27, 1980). American Natural Production Co. (American Filed a petition for reconsideration on Oct. 24, 1980. Bass Enterprises Production Co. (Bass) filed an application for clarification on Dec. 14, 1984.

[9] Indicated Producers and Pennzoil *et al.*

[10] Arco and Pennzoil *et al.*

[11] 18 CFR 277.203(c) (1985).

[12] H.R. Rep. No. 1752, 95th Cong., 2d Sess. 111, *reprinted in* 1978 U.S. Code Cong. & Ad. News 8983, 9027.

[13] Bona Fide Offers; Right of First Refusal, 45 FR 53116, 53,117 (Aug. 11, 1980) (Order No. 95) (codified at 18 CFR 277.201–10 (1985)).

[14] *See* Pure Oil Co., 25 F.P.C. 383 (1961), *aff'd*, Pure Oil Co. v. FPC, 299 F.2d 370 (7th Cir. 1962).

[15] These include Oxley Petroleum (Oxley), Independent Oil and Gas Assoc. of West Virginia (IOGA), Amoco Production Co. (Amoco), Interstate Natural Gas Assoc. of America (INGAA), Bass Enterprises Production Co. and Samson Resources Co. (Bass), Tennessee Gas Pipeline Co. (Tennessee), and Natural Gas Pipeline Co. of America.

[16] Pacific Gas and Electric Co. (PG & E), Columbia Gas Transmission Corp., (Columbia) and Consolidated Gas Transmission Corp. (Consolidated).

[17] 645 F.2d 360, 381 (5th Cir. 1981), *cert denied*, 454 U.S. 1142 (1982).

Moreover, the Commission has established a practice of waiving § 154.93 to permit acceptance of contracts for the sale of gas subject to the NGA containing certain indefinite price escalation clauses.[18] In light of this practice, it would be unreasonable to apply a more stringent standard to gas removed from NGA jurisdiction by section 601(a)(1)(B). Accordingly, the Commission modifies Order No. 95 so as to permit the use in bona fide offers of indefinite price escalation clauses.

2. Must a Seller Give the Original Purchaser Both a Bona Fide Offer and Right of First Refusal? (§ 277.204(a))

Section 277.204(a) of the final rule provides that a seller may not make a first sale of natural gas covered by section 315 until the original purchaser has rejected *both* a bona fide offer *and* an offer substantially accepted in principle by a third party purchaser.

Some applicants for rehearing[19] assert that the Commission misinterpreted section 315(b) to establish cumulative rather than disjunctive requirements with respect to the seller's obligations to the purchaser.[20] They argue that section 315(b)(2) does not require a bona fide offer in the event a contract expires because section 315(b)(2) does not mention contract expiration. They also point out that section 315(b)(3) requires a seller to extend a right of first refusal if *either* a contract expires or if a bona fide offer is rejected. The applicants contend that this means that a bona fide offer need not be extended when a contract expires. They claim that such an offer should be extended only if gas has never been sold under a contract, for example when a seller negotiates with the pipeline for the initial sale of gas from committed or dedicated but undrilled reserves. In support of its interpretation that section 315(b) does not require a bona fide offer when a contract expires, Arco suggests that the Commission could avoid jeopardizing the pipeline's supply in the absence of a bona fide offer by amending the final rule to require continuation of deliveries after a contract expires until the purchaser fails to exercise its right of first refusal.

The Commission rejects the applicants' interpretation of section 315(b). Their interpretation reads paragraph (2) of section 315(b) out of the statute. That paragraph independently requires the Commission to develop regulations requiring that a bona fide offer to sell any gas "subject to the requirements of this subsection" be made to the person who, but for removal of the gas from NGA jurisdiction, would be entitled to receive that gas. Accordingly, the bona fide offer requirements of section 315(b)(2) apply to all gas removed from NGA jurisdiction by section 601(a)(1)(B) regardless of whether an existing contract has expired.

The Conference Report also supports the conclusion that a purchaser must receive a bona fide offer and right of first refusal in all cases. The conferees noted that:

> Following the expiration of any contract covering such natural gas, and any rejection of a bona fide offer by the purchaser who would have been entitled to receive the gas under the Natural Gas Act, such purchaser is granted a right of first refusal.[21]

The Commission interprets section 315(b)(3) to mean that the right of first refusal vests at the earlier of the time of contract expiration or rejection of the bona fide offer.[22] The Commission believes that it is left free to determine the appropriate procedural timing of any exercise of the right of first refusal in relation to the bona fide offer. Conditioning the exercise of the right of first refusal on the rejection of a bona fide offer is entirely consistent with section 315(b)(3).

If a disjunctive interpretation of section 315(b) were adopted, existing customers would be deprived of the protection, which a bona fide offer provides, against cessation of deliveries after expiration of the contract. By requiring a bona fide offer to be made by the seller whenever a contract expires or terminates, the final rule protects purchasers during the period between expiration of the contract and rejection of a bona fide offer.

B. Technical Aspects of Bona Fide Offers, Right of First Refusal, and Interim Protective Sales

Applicants for rehearing and some commenters argue that, in various respects, the bona fide offer, right of first refusal, and interim protective sales provisions of the final rule are not justified under section 315(b) in terms of contract practices. They contend in essence that the rules are too complicated and burdensome and interfere with private contracts concerning deregulated gas.

The Commission does not, as a general matter, believe that the final rule establishes unnecessary requirements or unduly interferes with the private contracting process. Any abridgment of the contracting process derives from the statute itself, which balances the rights of the seller to market gas at the highest lawful price and the rights of purchasers to continue receiving such gas. As discussed below, the Commission does grant rehearing to eliminate the original purchaser's right to alter the terms of delivery in a third party offer, to eliminate the prohibition on waivers of section 315(b) rights more than one year before contract expiration, and to clarify that a requirement concerning the making of bona fide offers does not apply to implied contracts. These changes should minimize the rule's interference with private contracts.

1. Timing of Bona Fide Offer (§ 277.205(b))

The final rule requires a bona fide offer to be made not later than 20 days before expiration of the contract or, if a final NGPA well determination is made less than 45 days before contract expiration, not later than 20 days after that determination. Some applicants for rehearing[23] argue that the Commission has no statutory authority to impose deadlines on making a bona fide offer. In addition, those applicants and one commenter[24] interpret the rule to mean that, if a seller fails to extend a bona fide offer 20 days before the contract expires, the seller may never abandon the sale to the pipeline. Other applicants believe that the rule is unnecessary or should be amended to consider such exigencies as oversight, delay in transmittal, or sudden termination which may preclude compliance with the rule.[25]

Although section 315(b) itself does not provide for the timing of bona fide offers, the Commission believes that the 20-day rule is necessary to effectuate the purpose of section 315(b). Accordingly, the Commission may establish the deadline pursuant to its authority under NGPA section 501 to issue such rules as are necessary to carry out its functions under the NGPA. The deadline provides sellers with a clear indication of the nature of their duty to satisfy their section 315(b) obligations promptly and encourages the negotiation of a new

UMI

contract before expiration of the current contract by affording ample time for such negotiation before the contract expires. Furthermore, if the existing contract provides a higher price than the seller could otherwise expect, the seller's interests would lie in delaying a bona fide offer and continuing deliveries at the existing contract price under §§ 277.205(a) and 277.207. Consequently, without the deadline, a seller might never extend a bona fide offer. This would contravene the intent of section 315(b). On the other hand, if the seller could obtain a higher price under the new contract it would be in the seller's interest to make a timely bona fide offer in any event in order to avoid imposition of the less favorable terms of the expired contract.

The Commission believes that the 20-day rule should not unduly burden any contracting party subject to the requirements of section 315(b). A seller generally monitors individual contracts and this is especially true in light of its possible obligation to continue deliveries after a contract expires. Therefore, this requirement should have no adverse effect on the conduct of contract negotiations. In addition, if a seller fails to meet the 20-day deadline, the final rule does not, as applicants and one commenter apparently fear, compel a seller to continue sales to the original purchaser indefinitely at the existing contract price without the benefit of a new contract or the prospect of abandoning the service. A seller who misses the 20-day deadline is still required to extend a bona fide offer. Once the seller extends the bona fide offer, § 277.205(a) requires continued deliveries only until the existing customer rejects the bona fide offer. The purchaser must either accept or reject the offer within twenty days after its receipt (§ 277.205(c)).

2. Right of First Refusal (§ 277.206)

Section 277.206 of the final rule requires a seller to present any offer substantially accepted in principle by a third party purchaser in an arms-length transaction to the original purchaser. Applicants for rehearing and some commenters contend that the final rule (a) requires the third party offer to be overly detailed and specific, (b) improperly prohibits third party offers from affiliates of the seller, (c) improperly prohibits all sales to third parties until after a right of first refusal has been given, and (d) improperly allows the original purchaser to alter the provisions in the third party offer concerning the place and physical conditions of delivery and provides insufficient compensation to the seller when such changes are made.

(a) *Offer Substantially Accepted in Principle (§ 277.203(e))*—The NGPA requires that a purchaser must be given a chance to accept or reject an offer to sell the gas to a third party that is "substantially accepted in principle" by the third party. Although the statute does not define "offer substantially accepted in principle," § 277.203(e) defines it as a written acceptance of a written offer that is "sufficiently firm" that a binding contract will result if the original purchaser rejects the written offer. Some applicants [26] argue that the requirement imposes an undue burden on sellers without sufficient justification. They see no reason to require a high degree of completeness in an offer to a third party when the original purchaser can unilaterally alter major terms of that offer.

The Commission disagrees. The rule is necessary to ensure that the offer given to the original purchaser really reflects the "market conditions" it must meet if it wants to continue to receive the gas. The rule accomplishes this objective by requiring that the offer be clear on major terms. The rule, however, does not require a seller to negotiate comprehensive gas sales contracts with third parties. Such a requirement would be unduly burdensome. The Commission views the final rule as requiring the parties to reach an agreement on major substantive points, such as price, delivery point, pressure, and rate of take. The parties are free later to negotiate minor points if the original purchaser rejects the offer.

In the Commission's view, applicants may have misinterpreted the extent of the original purchaser's ability to vary the terms of the third party offer. The purchaser's only right to vary terms under that rule unilaterally was its option to take the gas at the delivery point and under the physical conditions of delivery specified in the existing contract. On rehearing the Commission has decided to eliminate that unilateral right, as discussed more fully below. Consequently, the original purchaser cannot unilaterally change any substantive terms of the third party offer.

(b) *Prohibition Against Affiliated Third Party Purchasers (§ 277.203(b))*—Section 315(b)(3) of the NGPA requires that the offer tendered to the original purchaser for first refusal must have been substantially accepted in principle by another person in an "arms-length transaction." The final rule defines "arms-length" as requiring adverse economic interests and excludes transactions between affiliates or family members. As a consequence of this rule, a seller may neither obtain a written acceptance from, nor make a first sale to, an affiliated pipeline, unless the original purchaser waives the prohibition under § 277.209.

Some applicants for rehearing [27] and commenters [28] argue that the Commmssion should eliminate the per se exclusion of affiliated transactions and apply the comparable sales standard found in NGPA section 601(b)(1)(E). They contend that, under a comparability standard, transactions between affiliates could be treated as arms-length transactions if the amounts to be paid for gas do not exceed the amounts paid in comparable transactions between non-affiliates. Hence, removing this prohibition would avoid disparate treatment between affiliated and non-affiliated third party purchasers. One commenter [29] states that that disparate treatment could place an affiliate pipeline at a substantial disadvantage in the marketplace by preventing it from competing for its affiliated producer's gas. Finally, while a purchaser may waive the rule requiring non-affiliated transactions, applicants allege that the purchasers could abuse those waiver rights. For example, when an affiliate is the original purchaser's only competitor for the gas, the original purchaser might refuse to waive the prohibition against affiliated transactions so as to avoid competition for the gas and secure a lower price.

In its final rule, the Commission rejected the argument that a third party comparable sales standard was more appropriate than an absolute prohibition. The Commission observed that:

> Inasmuch as the language of section 315 explicitly requires that transactions be at arms-length, the Commission finds that affiliate transactions were not intended to be included in the scheme of the right of first refusal.[30]

Applicants offer no new reasons to support a rescission or revision of this provision. The comparability test suggested by the applicants and some commenters would be administratively more difficult for the Commission to carry out. The Commission would have to analyze on a case-by-case basis which transactions between affiliates were comparable to those between non-affiliated entities. The factual inquiries thus necessitated would place a significant burden on the Commission. Moreover, the prohibition against affiliated transactions ensures the seller a price that is supported by the market. A purchaser's right of first refusal should not be subject to transactions between parties with a possible identity of interests unless the purchaser so chooses. There exist in such transactions the potential for prices higher than the market. Since the price paid by an affiliate does not affect the profit of the overall entity of which the affiliate is a part, an affiliated purchaser might not negotiate as hard for a low price as a non-affiliated purchaser.

Finally, there is no evidence that the problem of an affiliate being the original purchaser's only competitor for the gas occurs in a significant number of cases. When this problem does occur and the seller believes that permitting a third party offer from an affiliate is the only means of assuring that it receives a fair price for its gas, the seller may apply to the Commission for a waiver of the § 277.203(b) prohibition against affiliated third party purchasers.

Similarly, there is no evidence that foreclosing an affiliated purchaser from making an offer to purchase its affiliated producer's section 315(b) gas causes those purchasers difficulty in obtaining gas in a significant number of cases. However, if such a problem does occur, the purchaser could apply for a waiver of § 277.203.

(c) *Prohibition on Sales to Third Parties Until After Right of First Refusal Is Given (§ 227.204(a))*—One commenter [31] states that, regardless of the prohibition on a seller's tendering an offer from an affiliate for first refusal, the seller should be free to sell gas to an affiliate after rejection of a bona fide offer without giving the original purchaser a right of first refusal. The commenter argues that section 315(b)(3)'s requirement that the seller give the original purchaser a right of first refusal of offers accepted in arms-length transactions implicitly permits the seller to make non-arms-length sales without giving a right of first refusal.[32] Accordingly, the commenter proposes that the prohibition in § 277.204(a) on sales "to any third party purchaser" until after a right of first refusal has been given should be modified to prohibit only sales to third parties in arms-length transactions.[33]

The Commission does not believe that the statute permits sellers to sell gas to an affiliate without giving the original purchaser a right of first refusal. By granting the right of first refusal, the statute provides original purchasers a substitute for the protection previously afforded them by the requirement that the seller obtain abandonment authorization from the Commission before selling to a third party. To permit sales to affiliates without offering a right of first refusal, however, would allow a seller to nullify this substitute protection by the simple expedient of selling to its affiliates. The Commission believes that the language of the statute concerning arms-length transactions must be read solely to provide that the offer which must be tendered to the original purchaser for first refusal before a sale to any third party be one accepted by the third party in an arms-length transaction.

(d) *Delivery Terms Under An Accepted Offer (§ 277.206(d))*—The final rule provided that the original purchaser may accept the third party offer but receive the gas at the delivery point and under the physical conditions of delivery in the original contract even though the offer contains other terms (§ 277.206(d)). If the original purchaser exercises this option, the seller may apply to the Commission for increased costs incurred in delivering the gas under the old delivery terms as opposed to those in the third party offer, provided that collection of the allowance will not exceed any applicable maximum lawful price.

Some applicants for rehearing[34] and a number of commenters[35] argue that these provisions unjustifiably abridge the contracting process by overriding the seller's ability to negotiate such non-price terms of the contract as delivery, treating, conditioning, and compression. They believe the final rule improperly requires the producer to sell gas under the existing contract subject only to third party negotiations on price and "rates of take." The applicants contend that Congress intended to afford original purchasers only the protection of the market place and that accordingly the original purchaser must accept all the terms of the third party offer or forfeit further rights under section 315(b). If the Commission rejects these arguments, the applicants request that it provide greater guidance concerning (1) the compensation the seller may obtain for its increased costs resulting from the original purchaser's exercise of its rights under § 277.206(d) and (2) the method by which it may collect such costs.

The Commission, in the March notice, solicited comments on whether the provisions of § 277.206(d) should be altered in light of developments in the gas market since the final rule was issued and in light of the price-deregulation of section 102(c) and some section 103(c) gas on January 1, 1985. That deregulation, combined with the July 1, 1979 price-deregulation of section 107(c) (1) through (4) gas, means that most gas subject to section 315(b) is now price-deregulated. Numerous commenters addressed the issue, some supporting elimination of the original purchaser's right to alter delivery terms, others opposing elimination of that right.[36] After examining those comments, the Commission has determined that rehearing should be granted to eliminate the original purchaser's right to change the delivery terms of a third party offer.

Section 315(b) is silent concerning the original purchaser's ability to alter delivery terms in a third party offer. Instead, by delegating to the Commission authority to issue regulations governing the right of first refusal, that section gives the Commission discretion to develop practical and realistic solutions to such specific problems in the implementation of the right of first refusal. The Commission must, of course, exercise that discretion in light both of section 315(b)'s objective of giving the original purchaser an opportunity to retain access to the gas at market or NGPA maximum lawful prices and of other objectives of the NGPA including the deregulation of most categories of gas subject to section 315(b).

The original purchaser's unilateral right to alter delivery terms is inconsistent with deregulation. It deprives the seller of its ability to negotiate such terms of the contract as delivery and compression, terms which

have a significant effect on the price it is willing to accept. This prevents market conditions from fully affecting the transaction. Moreover, so long as the Commission allows the original purchaser to alter delivery terms unilaterally, it must provde the seller compensation for its increased costs. If the seller made price concessions to a third party purchaser in return for cheaper delivery terms than those in the contract with the original purchaser, it would be inequitable to allow the original purchaser to take the gas under the original delivery terms but at the price agreed to with the third party. However, compensating the seller for a change in delivery terms would require the Commission to calculate the addition to the contract price necessary to compensate the sellers for its increased costs. This would be inconsistent with deregulation since it would prevent the market from determining the appropriate contract price in light of the delivery terms required by the original purchaser.[37]

Commission calculation of the compensation would also involve serious administrative and practical difficulties. The Commission would face complex legal and factual issues, including what costs to compensate the seller for, whether to grant the seller a fair return in any necessary capital investment, and, if so, what the fair return should be.

In addition, there would be numerous practical difficulties, most arising from the fact that determination of the compensation would inevitably take an extended period of time. The original purchaser would have to determine whether to accept the third party offer without knowing the total price it would ultimately have to pay for the gas. Questions would arise such as (1) whether the original purchaser could withdraw its offer if the Commission required greater compensation to be paid for the change in delivery terms than the original purchaser had expected; and (2) whether sales would begin before the compensation had been determined, and, if so, what price would the original purchaser pay the seller pending final determination of the compensation. In addition, the Commission proceeding to determine the compensation would be costly for both the seller and the original purchaser.[38]

Finally, given recent developments in gas market, original purchasers have little need of the absolute protection provided by the unilateral right to alter delivery terms in a third party offer. The terms of delivery in the third party offer are generally the same as those in the original contract at least with respect to existing wells. This is because the original purchaser's system is probably already connected to the seller's, often at the wellhead, with the result that it is generally taking the gas under the only delivery terms which are practicable in light of the physical configuration of the seller's system.[39] Moreover, even in cases in which the original purchaser cannot take the gas directly under the delivery terms of the third party offer, the original purchaser may be able to negotiate with someone else to deliver the gas to it under the necessary conditions. Some commenters [40] stated that this solution would be available in few cases because of difficulty in finding a willing transporter with the necessary facilities and obtaining regulatory approvals. However, such transactions have become increasingly common in recent years. In addition, the Commission has amended is regulations in order to encourage pipelines to offer transportation services.[41]

For all the reasons discussed above, the Commission, in the exercise of its discretion to establish procedures governing the right of first refusal, chooses not to give the original purchaser a unilateral right to alter the delivery terms of a third party offer. Instead, the Commission believes that a more practical solution to the delivery terms problem is to require the matter to be negotiated between the seller and the original purchaser. Accordingly, where the third party offer contains delivery terms different from those in the original contract, the Commission will permit the original purchaser to make a counteroffer to purchase the gas under the original delivery terms, with an appropriate adjustment in price, but without such counteroffer constituting a rejection of the third party offer for purposes of NGPA section 315(b). The seller, as part of its obligation to give the original purchaser a right of first refusal, must consider the counteroffer. It may, at its option, either accept or reject the counteroffer. If it rejects the counteroffer, it may proceed as if the original purchaser had rejected the offer presented to it.

This procedure is consistent with the objectives of the NGPA. It provides the original purchaser an opportunity to contract for continued access to the gas at market or NGPA maximum lawful prices even if the third party offer contains unacceptable delivery terms. The original purchaser is not forced either to accept an offer with unacceptable delivery terms or lose the gas. At the same time, however, market forces are allowed to determine the price of deregulated gas and the practical difficulties of giving the original purchaser a unilateral right to alter delivery terms are avoided.

3. Termination of Section 315(b) Obligations (§ 277.204(b)(3))

The final rule releases a seller from its section 315(b) obligations to the original purchaser once the seller has actually sold the natural gas to a third party purchaser under terms rejected by the original purchaser.[42] Some applicants for rehearing [43] believe that a seller's obligations under section 315(b) should terminate at the time the original purchaser rejects the offer substantially accepted in principle. They argue that the actual sale need not take place because there should be no concern about collusion between the seller and the third party subsequent to rejection of the offer. They add that the provision requiring arms-length transactions should avoid such collusion. These applicants, therefore, believe that the seller's section 315(b) obligations should cease once a third party offer has been rejected. The only commenter to address this issue [44] opposes the applicant's contention.

In rejecting the same argument in the final rule, the Commission stated that it intended to discourage sellers from making a frivolous offer substantially accepted in principle by a third party. A seller might otherwise present the original purchaser with an unacceptable offer simply to divest itself of an unwanted customer. This would be an abuse of section 315(b) which is intended to continue service on the basis of good faith bargaining in the marketplace. The Commission explained that § 277.204(b)(3) is necessary to:

> Avoid the presentation to the original purchaser of offers which, while "substantially accepted in principle by a third party," were never intended to apply to an actual sale of natural gas.[45]

Contrary to applicants' contention, the Commission believes that requiring an actual sale of gas to the third party more effectively prevents collusion and guarantees that the seller and third party purchaser seriously intended the written offer and written acceptance to result in a contract binding on the seller than does a mere requirement of an arms-length transaction. The former requirement is a largely self-implementing means of accomplishing this purpose. The latter requirement, on the other hand, is more difficult to enforce because determining if a transaction with a third party was arms-length is harder than determining if a sale to that party actually occurred.

4. Interim Protective Sales (§ 277.207)

The final rule provides that deliveries required by § 277.205(a) to be continued after expiration of a contract until rejection of a bona fide offer shall be made under the terms and conditions in effect on the last day of the expired contract. Citing NGPA legislative history, some applicants for rehearing [46] argue that the Commission is unlawfully limiting the price payable after the expiration of the contract to a price less than the otherwise applicable maximum lawful or deregulated price.[47]

Applicants overlook the fact that section 315(b) is intended to protect the original purchaser's continued access to natural gas previously committed or dedicated to it while giving the seller an opportunity to market such gas under a new contract up to NGPA or deregulated prices. By avoiding abrupt changes in price at the time the contract expires, the final rule furthers the statutory purpose of continuing the availability of gas supplies. Moreover, the requirement that continued deliveries be at the price provided for in the expired contract imposes only a small burden on the seller. The seller can terminate its obligation to make such deliveries within twenty days by simply making a bona fide offer since the original purchaser must either accept or reject that offer within twenty days of its receipt.

Finally, nothing in the NGPA prohibits the Commission from requiring that deliveries be continued at the contract price until rejection of a bona fide offer even though the contract price may be less than the applicable maximum lawful or deregulated price. On the contrary, by removing certain gas from NGA sales jurisdiction, Congress eliminated the option available to sellers under the NGA to increase the price of gas sold after a contract expired to a higher area or national rate without contractual authorization. This increase was accomplished by filing a notice with the Commission under section 4(d) of the NGA.[48] In eliminating NGA sales jurisdiction, Congress subjected gas covered by section 315(b) to the general NGPA requirement of contractual authorization to collect NGPA prices. The cited legislative history only means that, after a fixed price contract expires, a seller could collect and the purchaser could pay no more than the maximum lawful price only if the parties contractually authorize such collection.

One commenter [49] argues that, since in today's market the price under the expired contract is often higher than the current market price, the final rule shields sellers from current market conditions and keeps the price artifically high. Accordingly, the commenter requests that the Commission permit a purchaser to cease purchasing the gas or, if its weighted average cost of gas (WACOG) in its current Purchased Gas Adjustment filing is less than the price in the expired contract, to make any continued purchases under § 277.205(a) at the WACOG.[50]

The Commission believes that the commenter's requested change in the final rule is unnecessary. Purchasers already may cease taking the gas by waiving their right to a bona fide offer. The final rule requires sellers to make bona fide offers no later than twenty days before expiration of the existing contract or after an NGPA well determination.[51] Thus, the final rule should not cause purchasers to be locked into higher than market prices for a significant period of time.

C. Waiver of Section 315(b) Rights (18 CFR 277.209)

The final rule provides that the original purchaser may waive its section 315(b) rights, but requires that such waivers be made not more than one year before contract expiration. Some commenters [52] contend that the prohibition on waivers more than one year before contract expiration should be eliminated. The Commission agrees.

The Commission is currently seeking to encourage the renegotiation of gas supply contracts to bring gas supplies and prices into line with market clearing

---

[37] Approximately half the commenters *supporting* the original purchaser's right to alter delivery terms (Pacific, Texas Eastern, and Tennessee) concede that it is inappropriate for the Commission to compensate the seller for increased costs in a deregulated environment. These commenters suggest that the Commission simply not provide the sellers any compensation for increased costs when the original purchaser alters the delivery terms in a third party offer. But this would be inequitable for the reasons stated above.

[38] Thus far the Commission has never had to confront these difficulties since no seller has ever applied to the Commission for compensation pursuant to § 277.205(d). However, this does not necessarily mean that no seller ever will. Nor does it seem wise for the Commission to include in its regulations a right for sellers to obtain compensation based on the assumption no seller will ever exercise that right. Futhermore, the fact no seller has ever requested compensation suggests that original purchasers rarely exercise the right to alter delivery terms and thus have little need for it. If original purchasers had been regularly exercising the right to alter delivery terms, one would expect that some seller would have applied to the Commission for increased compensation asserting that the change caused it increased costs.

[39] See also the discussion in footnote 38, *supra*.

[40] Columbia and Consolidated.

[41] Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol, 50 FR 42,408 (Oct. 18, 1985) (Order No. 436); 50 FR 42,217 (Dec. 23, 1985) (Order Granting in Part and Denying in Part Applications for Rehearing, Denying Petitions for Stay, and Granting Clarification) (Order No. 436–A). Some commenters, including Texas Eastern and Consolidated, note that the original purchaser may have invested in facilities to receive gas under the original delivery terms in reliance upon its right to continued access to the gas. They state that taking the gas under changed delivery terms could require new or additional facilities, increasing costs to their customers. The Commission does not believe that such a situation is likely to arise in a significant number of cases. For the reasons stated above, in most cases either the third party offer will contain the same delivery terms or the original purchaser will be able to arrange for another pipeline to transport the gas to it. In addition, the original purchaser would get the benefit of the price concessions presumably made to the third party offeror in return for more favorable delivery terms.

[42] This means that if the original purchaser rejects an offer by a third party but no contract is actually entered into between the seller and that third party, the seller cannot sell to another third party until it has given the original purchaser an opportunity to accept or reject that third party's offer.

[43] Indicated Producers.

[44] Tennessee.

[45] *See* Bona Fide Offers; Right of First Refusal, 45 FR 53,116, 53,119 (Aug. 11, 1980) (Order No. 95) (codified at 18 CFR 277.201–10 (1985)).

[46] Pennzoil *et al.*

[47] In support of this contention, applicants cite part of Congressman Dingell's statement during NGPA debate that "Once the existing contract no longer limits the price (of gas sold under sections 104 or 106) . . . . the producer could charge and the purchaser could pay any amount up to the maximum lawful price . . . which would be based upon the just and reasonable rate." 124 Cong. Rec. 38,366 (1978). Applicants did not cite the limiting phrase "which would be based upon the just and reasonable rate." The limiting phrase suggests that the gas could not qualify for NGPA incentive prices and that the Dingell statement has no bearing on gas covered by section 315(b). The producer is not limited to receiving a just and reasonable rate for that gas. *Id.*

[48] Pennzoil's reliance on the NGA case of Phillips v. FERC, 586 F.2d (5th Cir. 1978), in arguing that the Commission lacks authority under the NGPA to impose the requirement here at issue, is misplaced. That case held that a producer may file a unilateral rate increase, where not under contract, up to a higher small producer rate under section 4(d) of the NGA. It is irrelevant to the question of a producer's rights with respect to gas removed from NGA jurisdiction.

[49] Tennessee.

[50] The commenter also proposes to give purchasers under existing contracts which remain subject to the Commission's NGA jurisdiction a similar right. That proposal, however, is beyond the scope of this rulemaking and will not be considered here.

[51] If a seller refuses to make a bona fide offer in spite of this requirement, the purchaser should bring this situation to the Commission's attention.

[52] Bass, Natural, INGAA, and Williams Exploration Co.

levels.[53] As one commenter [54] observed, eliminating the one-year limit should facilitate the renegotiation process by allowing purchasers to use waiver of the section 315(b) rights as a bargaining card for price or rate of take concessions from sellers regardless of the expiration date of the contract. If the purchaser believes that his interests would be better served by waiving his section 315(b) rights in return for such considerations from the seller, the Commission sees no reason why the purchaser should be prohibited from doing so.

D. Implied Contracts

One applicant[55] requests that the Commission clarify that the requirement that bona fide offers be made not more than eighteen months before expiration of a contract (18 CFR 277.205(b)(3)) does not apply to "implied contracts."[56] Implied contracts for purposes of Part 277 arise upon expiration of a contract for the sale of gas subject to the NGA. Part 277 treats the seller's continuing service obligation under the NGA in such a situation as an implied contract to sell the gas to the original purchaser (18 CFR 277.203(g)). Under § 277.203 (a) and (h)(1) such implied contracts expire when the gas is removed from NGA jurisdiction by a jurisdictional agency determination that it is section 102(c), 103(c), or 107(c)(1)–(4) gas.[57]

The applicant contends that applying the 18-month requirement to implied contracts would seriously impede the seller's ability to sell the gas to a third party. The applicant alleges that a seller generally could never make a bona fide offer with any assurance that it would cover all the gas subject to the implied contract, since the possibility would always exist that a new well would be drilled and receive a determination removing its production from NGA jurisdiction more than eighteen months after the bona fide offer had been made. That would mean that the implied contract with respect to that gas had expired more than eighteen months after the making of the bona fide offer. Accordingly, the bona fide offer could not cover that gas. The applicant contends that consequently a seller could never give a third party clear title to all gas to be produced in the future from acreage subject to the implied contract. The applicant concludes that the 18-month requirement would mean that the seller would have to make bona fide offers essentially on a well-by-well basis. The applicant requests that the Commission deal with this problem by (1) holding that the 18-month requirement applies only to written contracts and not implied contracts and (2) holding that a single bona fide offer may be made which will cover all wells for which determinations have or will be made in the acreage covered by the implied contract regardless of when those determinations are made.

The Commission's request for additional comments expressly requested comments on this issue. Most commenters agreed that the 18-month requirement in question should not apply to implied contracts.[58] The Commission also agrees. The requirement that bona fide offers be made no more than eighteen months before expiration of the contract was added in order to avoid the possibility that without such a provision "the purchaser might find itself in the position of having to consider a bona fide offer years before the contract expires."[59] Also, there was a fear that years could elapse between the making of a bone fide offer and expiration of the right of first refusal.

These concerns have less, if any, force in the context of an implied contract. Here the actual contract between the parties has already expired. Accordingly, it makes sense that negotiations for a new contract to govern the relationship between the parties should take place at any time after expiration of the old contract. Since contracts often cover undrilled as well as drilled acreage, there is no reason why those negotiations, including the making of a bona fide offer, should occur only within a particular amount of time before jurisdictional agency determinations for new wells. Given this fact, the Commission agrees that the 18-month requirement should be inapplicable to implied contracts so as to simplify the parties' task in complying with section 315(b) and negotiating a new contract. This will permit the seller to make one bona fide offer that will cover all gas subject to the implied contract which is or may in the future be subject to section 315(b), and thus to negotiate one contract coverning all the gas. The difficulty of having to make bona fide offers essentially on a well-by-well basis will thus be avoided.[60]

Accordingly, the Commission is amending § 277.205(b)(3) to make clear that the 18-month requirement does not apply to implied contracts.

E. Voluntary Releases

A number of contracts contain "market out" or similar clauses under which a purchaser may release the seller from its obligation to deliver all or a portion of the gas. One applicant [61] requests that the Commission clarify that a purchaser's exercise of its rights under such a clause constitutes an expiration or termination of the contract for purposes of triggering the purchaser's rights under section 315(b). The applicant expresses the concern that otherwise a seller could seek an alternate purchaser only for the period between the release and final expiration of the contract since at that time the original purchaser would be entitled to its rights under section 315(b). The Commission expressly requested comments on this issue in its March notice.

The Commission cannot state that a purchaser's exercise of its rights under a "market out" clause necessarily constitutes a termination of the contract. In some cases a purchaser may release the seller from its obligation to deliver gas only for a part of the remaining term of the contract and then later recommence taking gas under the contract. In such a case the purchaser's exercise of its rights under a "market out" clause clearly does not terminate the contract.

However, where the purchaser does exercise its rights under a "market out" clause so as to release the seller from its obigation to deliver any gas for the entire remaining term of the contract, the Commission believes that that action must be treated as a termination of the contract for purposes of triggering the purchaser's rights under section 315(b). The contract is effectively at an end since the purchaser no longer has any right to take gas under it. Allowing the seller to give the purchaser its section 315(b) rights immediately upon its exercise of the " market out" clause will enable the seller to find another buyer for the gas unencumbered by the need to give the purchaser its section 315(b) rights upon expiration of the term of the original contract.

Some commenters [62] contend that a purchaser's exercise of a "market out" clause should be treated as a termination of the contract only if the contract expressly states that exercise of the clause would terminate the contract. The commenters state that this would avoid any confusion as to whether the contract has terminated. The Commission believes that such an express contractual provision is unnecessary. The purchaser's loss of any further right to take gas under the contract is the crucial fact causing the contract to be terminated. In most cases, this fact should be clear regardless of any express contractual language concerning whether the purchaser's exercise of a "market out" clause terminates the contract.[63]

In the March notice, the Commission requested comment on whether the purchaser's exercise of its rights under a "market out" clause so as to release the seller from his obligation to deliver any gas for the remaining term of the contract should be treated as a waiver by the purchaser of its section 315(b) rights. The Commission asked whether it makes sense to grant the purchaser rights designed to protect its continued access to gas if the purchaser's exercise of the "market out" clause represents a determination that it no longer requires the gas. A number of commenters [64] oppose this proposal. They state that a purchaser's exercise of a "market out" clause does not necessarily represent a determination that it does not require the gas in question. Rather, the purchaser may exercise the clause because the gas is unmarketable at the price provided by the contract, but may desire to continue purchasing the gas at a renegotiated lower price. The commenters also contend that allowing implied waivers based on a purchaser's exercise of a "market out" clause without an express written waiver could lead to confusion as to when a purchaser's section 315(b) rights have been waived.

The Commission has determined that the purchaser's exercise of a "market out" clause should not be treated as an implied waiver of its section 315(b) rights. Apart from the concerns expressed by the commenters, the Commission believes that such treatment would be inconsistent with section 315(b). Congress provided that the right of first refusal is triggered by "the expiration or termination of any contract" for the sale of gas subject to the section. Expiration is the expiration of a contract in accordance with its express provisions. Termination, on the other hand, is the ending of a contract by either party pursuant to a power contained in the contract. Section 315(b) does not limit the triggering of the right of first refusal to termination by the seller, but also provides for the triggering of that right upon termination by the purchaser. Thus, to hold that the purchaser's termination of a contract through exercise of a "market out" clause automatically waives the purchaser's section 315(b) rights would be inconsistent with section 315(b) which requires that a purchaser be granted a right of first refusal upon its termination of the contract.

One commenter [65] observes that under the terms of some "market out" clauses a purchaser may stop taking gas but retain a right to again take gas during the remaining term of the contract. The commenter states that, if the purchaser never exercises the retained right, it should be treated as having waived its section 315(b) rights so that when the contract expires no bona fide offer or right of first refusal need be given. The Commission disagrees. For the reasons stated above, whenever the purchaser finally loses its right to take any more gas under the contract, whether through termination of the contract by exercise of a "market out" clause or expiration of the contract, it must be accorded its section 315(b) rights.[66]

F. Record-Retention Requirements (§ 277.210)

The final rule imposes a record-retention provision of unlimited duration on first sellers to retain copies of all bona fide offers to third parties. Also, purchasers must retain all documents created in the ordinary course of business relating to Part 277 regulations.

Applicants[67] request that the record retention requirement be limited to three years. The Commission agrees. An unlimited record-retention requirement is unnecessary. There should be no need to retain permanently the records relating to the sale of gas which will usually be sold to third parties under Part 277 within a relatively short time. Accordingly, § 277.210 is amended to restrict the record-retention requirement to a period of three years from the date of each relevant document. This amendment requires a conforming change to the Commission's schedule of records and periods of retention at § 225.3, Item 65(d).

G. New Tight Formation Gas and Section 315(b).

Paragraph (1) of section 315(b) provides that that section applies to new natural gas under section 102(c), gas from new onshore, production wells under section 103(c), and high cost gas under section 107(c)(1)–(4) which were committed or dedicated to interstate commerce on November 8, 1978. Paragraph (1) does not make section 315(b) applicable to section 107(c)(5) gas, including new tight formation gas. However, in the recent rulemaking implementing the January 1, 1985, deregulation of section 102(c) and some section 103 gas (as well as other types of gas),[68] the Commission observed that a

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol: 50 FR 42,408, 42,404 (Oct. 18, 1985) (Order No. 436); 50 FR 42,217 (Dec. 23, 1985) (Order Granting in Part and Denying in Part Applications for Rehearing, Denying Petitions for Stay, and Granting Clarification; Order No. 436–A).

[54] Natural.

[55] Bass.

[56] Bass also requested clarification that the prohibition on waiver of section 315(b) rights more than one year before contract expiration does not apply to implied contracts. Since the Commission has decided to eliminate the prohibition entirely, it need not address that request.

[57] The gas must of course have been committed or dedicated to interstate commerce on November 8, 1978 (§ 277.203(a)(1)).

[58] The only exception was Tennessee. Tennessee claims that, even in the context of an implied contract, the 18-month requirement is necessary to ensure that the purchaser will not have to decide whether it wants to continue taking the gas years before it knows what its needs are.

[59] Bona Fide Offers; Right of First Refusal, 45 FR 53,116 (Aug. 11, 1980) (Order No. 95) (codified at 18 CFR 277.201–10 (1985).

[60] Similarly, before expiration of an existing contract the seller may make one bona fide offer covering all the gas subject to the contract, including any not yet removed from NGA jurisdiction. The Commission made this clear in the Notice of Proposed Rulemaking before issuance of Order No. 95. 44 FR 66,208 (Nov. 19, 1979). Again, this avoids the necessity of seriatum, well-by-well bona fide offers. The addition to the rule of the 18-month requirement by Order No. 95 did not affect the seller's right to make a bona fide offer covering all gas subject to a contract. That requirement was intended only to affect the timing of a bona fide offers, not to limit the scope of timely bona fide offers.

[61] Bass

[62] Natural, PG&E and Texas Eastern.

[63] In some cases, a purchaser may exercise a "market out" clause so as to give up permanently the right to take some, but not all, of the gas subject to the contract. When this occurs, the contract is terminated for purposes of triggering section 315(b) as to the gas the purchaser can no longer take but not as to the remaining gas which it may still take.

[64] INGAA, Natural, PG&E, Pacific, Columbia, Consolidated, and Tennessee.

[65] Amoco.

[66] Amoco also states that some contracts contain clauses allowing the seller to terminate the contract if the purchaser exercises a "market out" clause. The commenter suggests that the purchaser's agreement to inclusion of such a clause in the contract should be treated as a waiver of its section 315(b) rights if it exercised the "market out" clause. The Commission does not believe waiver should be implied in such circumstances. If the contract was entered into before enactment of the NGPA, the purchaser should not be construed as having wavied a right it did not even know it had. If the contract was entered into after enactment of the NGPA, the purchaser may have agreed to such a clause in reliance on its being entitled to a bona fide offer and right of first refusal under section 315(b). The Commission believes that section 315(b) rights should be waived only through an express written waiver as provided by § 277.209.

determination that gas is new tight formation gas includes gas which qualifies either as section 102 or section 103(c) gas. This is because in order to qualify as new tight formation gas a producer must file the same information, in addition to other information, that would be filed to qualify as section 102 or 103(c) gas. 18 CFR 274.205(e)(1)(i) (A) and (B) and 271.703(b)(2) (1985). The Commission concluded that in order to qualify as new tight formation gas under section 107(c)(5), the gas must meet section 102 or section 103 qualification requirements as a threshold to obtaining a section 107(c)(5) determination. This meant that new tight formation gas was price-deregulated since the applications for determination of such gas as new tight formation gas contained the data and met the requirements for section 102(c) or the appropriate section 103 gas.

In its March notice, the Commission sought comment as to whether the same principle should apply in the context of section 315(b). All but one of the commenters addressing the issue stated that it should.[69] The Commission agrees. Consistent with the Order No. 406, when applications for determinations that gas is new tight formation gas contain the data and meet the requirements for section 102(c) or 103(c), that gas must be considered section 102(c) or 103(c) gas for purposes of section 315(b) and the original purchaser must be given a bona fide offer and right of first refusal.

H. Other Issues

Commenters have raised three other issues in response to the March notice which the Commission briefly addresses. One commenter[70] requests that the Commission modify the final rule to prohibit clauses in third party offers which the original purchaser could not legally accept. It states that otherwise a third party offer from an intrastate pipeline might, for example, include a clause restricting sales of the gas to intrastate commerce. It further notes that inclusion in third party offers of clauses which the original purchaser could not legally accept would defeat Congress's purpose in enacting section 315(b) of providing a mechanism protecting the purchaser's continued access to gas. The Commission believes that this problem is best dealt with on a case-by-case basis rather than by inclusion in the regulations of a new provision prohibiting such clauses. The Commission is not aware of any instance in which an original purchaser has been unable to accept a third party offer because of a clause which could not legally be accepted under the NGA or the NGPA. If an original purchaser believes a third party offer which it would otherwise desire to accept contains such a clause it may file a complaint with the Commission.

Another commenter[71] raises the issue of how intracorporate transfers of gas from a company's production division to its pipeline division, which the Supreme Court has held are first sales within the meaning of the NGPA,[72] should be treated under section 315(b). It notes that the production division's giving the pipeline division a bona fide offer and right of first refusal when the company has decided to market the gas elsewhere would be a useless exercise. Instead, it suggests that the Commission require that the pipeline file a statement with its Purchased Gas Adjustment filing stating that the company has determined the pipeline no longer requires the gas. The Commission agrees that it makes no sense for a company to give itself a bona fide offer and right of first refusal. For that reason, the Commission does not believe that Congress intended section 315(b) to apply in the context of intracorporate transfers. Accordingly, no bona fide offer or right of first refusal need be given upon termination of intracorporate transfers, nor need any statement be filed with the pipeline's PGA clause.

Finally, one commenter[73] suggests that the Commission provide in the final rule for penalties for noncompliance with section 315(b). The Commission already has ample authority to enforce the requirements of section 315(b) pursuant to section 504 of the NGPA and sees no need to specify penalties for violations of section 315(b). Such penalties may be determined on a case-by-case basis.

IV. Paperwork Reduction Act Statement and Effective Date

The changes in information collection provisions in this rule that the Commission now makes on rehearing will be submitted to the Office of Management and Budget (OMB) for its approval under the Paperwork Reduction Act, 44 U.S.C. 3501–3520 (1982), and OMB's regulations, 5 CFR Part 1320 (1985). Interested persons can obtain information concerning the information collection provisions by contacting the Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, D.C. 20426 (Attention: Richard Howe, Jr., (202) 357–8308). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB (Attention: Desk Officer for the Federal Energy Regulatory Commission).

This rule will become effective May 21, 1986. If OMB's approval has not been received by this effective date, the Commission will issue a notice temporarily suspending the effective date.

For the Reasons Above, the Commission Orders

(1) The Applications for Rehearing, Petition for Reconsideration, and Motion for Clarification are denied, except as granted consistent with the amendments to the rule below and with the discussion in the preamble; and

(2) Parts 225 and 277 of Chapter I, Title 18, of the Code of Federal Regulations, are amended as set forth below.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 225—[AMENDED]

1. The authority citation for Part 225 is revised to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); Executive Order 12,009, 3 CFR 142 (1978); Natural Gas Act, 15 U.S.C. 717–717w (1982); Natural Gas Policy Act, 15 U.S.C. 3301–3432 (1982); Federal Power Act, 16 U.S.C. 792–828c (1982).

2. Section 225.3, in the table "Schedule of Records and Periods of Retention", Item 65(d), is amended by removing the words "not specified by regulation" under the column "Retention period", and adding, in their place, the words "3 years" to read as follows:

§ 225.3 Schedule of Records and Periods of Retention

* * * * *

---

[69] The exception is Indicated Producers. They rely on the fact that section 315(b) does not include section 107(c)(5) gas in the list of categories of gas to which section 315(b) applies.

[70] Texas Eastern.

[71] Consolidated.

[72] Public Service Comm'n v. Mid-Louisiana Co., 463 U.S. 319 (1983).

[73] Tennessee.

Description	Retention period
* * * * *	
65. Reports to Federal and State regulatory commissions:	
* * * * *	
(d) Records required to be retained under § 277.210 of this chapter, relating to the Natural Gas Policy Act of 1978.	3 years.
* * * * *	

PART 277—[AMENDED]

3. The authority citation for Part 277 is revised to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); Executive Order 12,009, 3 CFR 142 (1978); Natural Gas Policy Act, 15 U.S.C. 3301–3432 (1982); Natural Gas Act, 15 U.S.C. 717–717w (1982), unless otherwise noted.

§ 277.205 [Amended]

4. Section 277.205(b)(3) is amended by removing the words "subject contract" and adding, in their place, the words "subject contract (other than an implied contract)".

§ 277.206 [Amended]

5. Section 277.206 is amended by revising paragraph (d) to read as follows:

* * * * *

(d) If the offer provides for delivery of the natural gas to a different point or under different physical conditions than specified in the subject contract, the original purchaser may make a written counteroffer to purchase the gas under the delivery terms specified in the subject contract with such other changes in the terms of the offer presented by the seller as the original purchaser deems appropriate. Within 20 days of receipt of the counteroffer, the seller must inform the original purchaser in writing of its decision either to accept or reject the counteroffer. If the seller rejects the counteroffer, it may then proceed as if the original purchaser had rejected the offer presented it by the seller.

§ 277.209 [Amended]

6. Section 277.209(a) is amended by removing the last sentence.

7. Section 277.210 is revised to read as follows:

§ 277.210 Recordkeeping Requirements.

A seller of natural gas which is subject to this subpart must retain copies of all bona fide offers made under § 277.205 and offers to the original purchasers to satisfy the original purchaser's right of first refusal under § 277.206 for a three-year period from the date of the offer. The sellers and purchasers of natural gas which is subject to this subpart must also retain all other documents created in the ordinary course of business which relate to this subpart for a three-year period from the date of the document.

Food and Drug Administration

21 CFR Parts 74, 81, and 82

[Docket Nos. 84N–0319 and 76N–0366]

FD&C Yellow No. 5 and Its Lakes; Postponement of Closing Date, Provisional Listing, and Continued Stay of Effectiveness

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of FD&C Yellow No. 5 for use in coloring cosmetics generally and externally applied drugs and of its lakes for use in coloring food and ingested drugs. FDA is establishing a new closing date for FD&C Yellow No. 5 to give the agency time to complete its evaluation of the objections that it received in response to the final rule on the use of FD&C Yellow No. 5 that FDA published in the **Federal Register** of September 4, 1985 (50 FR 35774). The regulations that permanently list FD&C Yellow No. 5 and that remove it from the provisional list are stayed until May 6, 1986.

DATES: Effective March 7, 1986, the new closing date for FD&C Yellow No. 5 will be May 6, 1986. The effective date of the final rule published September 4, 1985, is stayed pending final FDA action on the objections that it received.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Center for Food and Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: FDA established the current closing date of March 7, 1986, for the provisional listing of FD&C Yellow No. 5 in a regulation published in the **Federal Register** of January 6, 1986 (51 FR 375). The agency established the March 7, 1986, closing date for FD&C Yellow No. 5 to provide time for its evaluation of three objections to the final rule on the use of this color additive, which FDA published on September 4, 1985.

Previously, after review and evaluation of the data relevant to the petition to list FD&C Yellow No. 5 for use in externally applied drugs and in cosmetics generally, the agency had concluded that FD&C Yellow No. 5 was safe for these uses. Therefore, FDA issued a final rule in the **Federal Register** of September 4, 1985 (50 FR 35774), that would permanently list FD&C Yellow No. 5 for those uses and would remove the stay on the use of FD&C Yellow No. 5 in external cosmetics. FDA stated that the final rule would become effective on October 7, 1985, unless stayed by the filing of proper objections.

FDA received three letters stating objections to this final rule. Because of the objections, under section 701(e)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371(e)(2)), the effect of this final rule is stayed until the agency can rule upon the objections. FDA expects that it will need only a small amount of additional time to complete its evaluation of the objections. Therefore, FDA concludes that only a brief postponement is necessary at this time. The regulation set forth below will postpone the March 7, 1986, closing date

VOL
51
ISS
45
MR
7
1986
UMI

for the provisional listing of FD&C Yellow No. 5 until May 6, 1986.

Because the current closing date expires on March 7, 1986, FDA has concluded that the use of notice and public procedure on this regulation is impracticable. Thus, good cause exists for issuing the postponement as a final rule. Moreover, this action is consistent with the protection of the public health because the agency has previously concluded that FD&C Yellow No. 5 is safe for its intended use under the Color Additive Amendments of 1960. This regulation will permit the uninterrupted use of the color additive until May 6, 1986. To prevent any interruption in the provisional listing of FD&C Yellow No. 5 and in accordance with 5 U.S.C. 553(d)(1) and (3), this regulation is being made effective on March 7, 1986. Any person who wishes to comment on the regulation may do so in accordance with 21 CFR 10.40(e)(1).

List of Subjects

21 CFR Part 74

Color additive, Cosmetics, Drugs, Medical devices.

21 CFR Part 81

BILLING CODE 4160-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OSWER FRL-2977-8]

40 CFR Part 300

National Oil and Hazardous Substances Contingency Plan; National Priorities List Update

AGENCY: Environmental Protection Agency.

ACTION: Notice of the deletion of sites from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA) announces the deletion of eight sites from the National Priorities List (NPL). The NPL is Appendix B to the National Oil and Hazardous Substances Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA).

EFFECTIVE DATE: March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Russel H. Wyer, Director, Hazardous Site Control Division, Office of Emergency and Remedial Response (WH-548E), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, Phone (800) 424–9346 (or 382–3000 in the Washington, DC, metropolitan area).

SUPPLEMENTARY INFORMATION: The EPA identifies sites that appear to present a significant risk to public health, welfare or the environment and maintains the NPL as the list of those sites. Sites on the NPL may be the subject of Hazardous Substance Response Trust Fund (Fund) financed remedial actions. Any site deleted from the NPL remains eligible for Fund-financed remedial actions in the unlikely event that conditions at the site warrant such action. Section 300.66(c)(8) of the NCP states that Fund-financed actions may be taken at sites deleted from the NPL.

The eight sites EPA deletes from the NPL are:

1. Enterprise Avenue, Philadelphia, Pennsylvania
2. Friedman Property (once listed as Upper Freehold), Upper Freehold, New Jersey
3. Lehigh Electric and Engineering Co., Old Forge Borough, Pennsylvania
4. Morris Arsenic Dump, Morris, Minnesota
5. PCB Spills, 210 miles of roads, North Carolina
6. PCB Warehouse, Saipan, Commonwealth of the Northern Mariana Islands
7. PCB Wastes, Trust Territory of the Pacific Islands
8. Taputimu Farm, Island of Tutuila, American Samoa

An explanation of the criteria for deleting sites from the NPL was presented in section II of the December 31, 1985 Notice of Intent to Delete (50 FR 53448). A description of each of the eight sites, and how they met the criteria for deletion, was presented in section IV of that notice.

The closing date for comments on the Notice of Intent to Delete was January 30, 1986. Three comments were received; the commentors concurred with EPA's determination that the sites pose no significant threat to public health and the environment and were supportive of the decision to delete them from the NPL.

One commentor requested that sampling wells at the Morris Arsenic site be properly closed before deletion. Closure operations on these test locations will begin as soon as weather conditions permit.

Another commentor stated he does not take responsibility for any future action at the Morris Arsenic site. Site

deletions from the NPL do not effect responsible party liability or impede Agency efforts to recover costs associated with response efforts.

PART 300—[AMENDED]

1. The authority citation for Part 300 continues to read as follows:

Authority: Section 105, Pub. L. 96–510, 94 Stat. 2764, 42 U.S.C. 9605 and sec. 311(c)(2), Pub. L. 92–500 as amended, 86 Stat. 865, 33 U.S.C. 1321(c)(2); E.O. 12316, 46 FR 42237; E.O. 11735, 38 FR 21243.

Appendix B [Amended]

2. The NPL, Part 300; Appendix B, is amended as follows:

- In Group 2 remove:
  - PCB Wastes, Trust Territory of the Pacific Islands
  - Taputimu Farm, Island of Tutuila, American Samoa
  - PCB Spills, 210 miles of roads, North Carolina
  - PCB Warehouse Saipan, Commonwealth of the Northern Mariana Islands
- In Group 6 remove:
  - Enterprise Avenue, Philadelphia, Pennsylvania
- In Group 7 remove:
  - Morris Arsenic Dump, Morris, Minnesota
- In Group 9 remove:
  - Friedman Property, Upper Freehold, New Jersey
- In Group 11 remove:
  - Lehigh Electric and Engineering Co., Old Forge Borough, Pennsylvania

The NPL will reflect these deletions in the next final update.

Dated: February 21, 1986.

J. Winston Porter,

Assistant Administrator, Office of Solid Waste and Emergency Response.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Parts 53 and 124

Grants for Hospital Construction and Modernization; Federal Right of Recovery and Waiver of Recovery

AGENCY: Public Health Service, HHS.

ACTION: Final rule.

SUMMARY: As a result of recent amendments to sections 609 and 1622 of the Public Health Service Act, the Public Health Service amends its regulations to provide for (1) written notification to the Secretary when a grant-assisted hospital is sold or no longer used as a health facility eligible for a grant under Title VI or XVI of the Act, (2) waiver of the Government's right of recovery under certain circumstances, and (3) methods of calculating interest on recovery amounts.

DATE: These regulations are effective on March 7, 1986.

ADDRESS: Richard R. Ashbaugh, Assistant Surgeon General, Associate Director for Health Facilities, Bureau of Health Maintenance Organizations and Resources Development, 5600 Fishers Lane, Room 11–03, Rockville, Maryland 20857, ATTN: Tuei Doong.

FOR FURTHER INFORMATION CONTACT: Tuei Doong, 301 443–3466.

SUPPLEMENTARY INFORMATION: Section 2381 of the Deficit Reduction Act of 1984 (Pub. L. 98–369) amended sections 609 and 1622 of the Public Health Service Act (42 U.S.C. 291i, 300s–1a). These sections provide for recovery of funds by the United States when a health care facility that was constructed with the aid of a grant under Title VI (the Hill-Burton Act) or XVI of the Public Health Service Act is, within 20 years after the completion of the grant-assisted construction, transferred to an entity that would not have been qualified to receive a grant. The sections also provide for recovery of funds where, within the same 20-year period, an assisted facility "ceases to be" a health facility with respect to which a grant could have been made. In either case, the sections established the amount to be recovered as the Federal proportionate share of the value of the facility at the time it is transferred or ceases to be an eligible entity. The right of recovery can be exercised against either the transferor or any subsequent transferee of a facility or, in the case of a facility that has ceased to be an eligible health care facility, *e.g.*, where the facility is closed, against its owners.

The amendments to sections 609 and 1622—while continuing the basic recovery provisions—made certain significant changes which may be summarized as follows:

(1) The transferor of an assisted facility must provide written notice to the Secretary of a sale or transfer within 10 days of the sale or transfer.

(2) The owner of an assisted facility the use of which is changed must provide written notice to the Secretary within 10 days of the change of use.

(3) For facilities that take longer than 180 days from the date of the Department's receipt of the notice of change of status to agree to and pay a recovery amount, interest will accrue on the eventual recovery amount beginning 180 days after receipt of the required notice by the secretary, and ending when the recovery amount is collected.

(4) For facilities that fail to notify the Secretary of a change in status (sale, transfer, or change of use) within 10 days of the change, interest will begin to accrue on the date of the change of status.

(5) In the case of facilities which changed status before the date of enactment of Pub. L. 98–369 (July 18, 1984), interest would begin to accrue 30 days after the enactment (August 17, 1984), but in no case earlier than 180 days from the date of the change of status regardless of when the facility notified the Secretary of the change.

(6) A proprietary entity that acquires an assisted facility may be granted a waiver of the recovery by the Secretary if the entity establishes an irrevocable trust in accordance with the statute that pays for medical care delivered to persons unable to pay, in accordance with the facility's uncompensated service obligation under 42 CFR Part 124 Subpart F. The trust must be established in an amount equal to the greater of (a) twice the amount of the remaining uncompensated care obligations of the facility or (b) the amount that would have been due under recovery.

Discussion of Public Comments

On March 18, 1985, a Notice of Proposed Rule Making (NPRM) was published in the **Federal Register** (50 FR 10798) to implement the amendments to sections 609 and 1622, by adding a new Subpart H to Part 124 of Title 42, CFR. A period of 30 days was provided for the public to comment on the proposal. The comments have been carefully reviewed and are summarized and discussed below:

1. *Notification of Sale, Transfer or Change of Use.*—Commenters requested inclusion of more specific definitions of the types of status changes which should be reported to the Secretary, and the aspects of management contracts which will be reviewed by the Secretary.

In response to the comments, the term "transfer" in § 124.704(a) has been explained in more detail as occurring when a facility is conveyed to another entity through lease, merger, bankruptcy, foreclosure or other arrangement. This explanation reflects, in part, the judicial decisions in *United States* v. *Brady*, 385 F. Supp. 1347 (S.D. Fla. 1974), and *United States* v. *First*

VOL 51
ISS 45
MR 7
1986
UMI

Georgia Bank, 529 F.Supp. 834 (N.D. Ga. 1982), where title to a Hill-Burton facility was conveyed following bankruptcy or foreclosure proceedings.

With regard to providing more guidance concerning management contracts, § 124.704(a)(ii) has been revised to provide that the managing organization will not be deemed to be the operator of the facility if the management agreement contains both of the following provisions:

1. The Board of Directors of the facility retains authority to terminate the agreement at any time upon reasonable notice to the contractor.

2. No employee of the contractor may be a member of the facility's Board of Directors. In the absence of either of these provisions, the Secretary will consider the degree of control granted to the managing organization over patient admission, determination of what services will be provided, and charges for services provided in the facility. The main criterion as expressed in the regulation is whether the contractor's responsibilities are so pervasive as to lead the Secretary to conclude that the contractor, rather than the grantee, is the operator of the facility, as opposed to its manager. The Department reiterates that a skilled management firm can develop a high level of administrative efficiency for a health care facility, and that it has no objection in principle to the use of management firms by hospitals constructed with Federal grant funds. In general, the Department will not examine the management details of such contracts provided the ultimate control clearly remains with the governing body of the hospital. In particular, we note that hiring and other personnel decisions made by a management firm would not cause a facility to cease to be "non-profit" as the term is defined in the Act. Nevertheless, the method of payment to firms managing hospitals may be examined. If payment to a management firm is calculated as a percentage of a facility's net income, then the facility would have ceased to be "non-profit" as the term is defined in section 645(e) of the Public Health Service Act (see also § 124.702 of these regulations). On the other hand, payments calculated as incentive fees based on management performance targets that do not violate the non-profit principle stated above will not trigger a recovery situation. The Department is reviewing existing guidelines to conform them with this rule. In the meanwhile, of course, any discrepancy is resolved by application of this rule.

Some comments noted that much of the information required for the notice of change of status is not readily available within the 10 day period following the change, contending that accounting and financial information related to the transaction are not usually available until 60 days after the transaction. They requested more time to submit this information, that it be limited solely to Hill-Burton assets, and that the grant information (type and amount of grant, etc.) maintained by the Department should not be provided by the owner.

The Department has eliminated the requirement that the owner provide grant information. With respect to the accounting and financial information, it is noted that § 124.704(b)(3) (proposed as (b)(4)) calls for *estimated* financial and accounting information for the assets involved in the transaction. The estimates are necessary to enable the Department to make its initial recovery calculation, and it is reasonable to assume that the parties to the transaction will have access to this type of information as part of normal business practice. Modifications to the submitted information can be made following the notice; the regulations provide a period of 30 days during which the Department will calculate the recovery amount and 60 days for a response to the Department's initial letter setting forth the recovery amount (see § 124.707(b)(ii)). It is noted that the accounting and financial information contemplated in § 124.704(b)(3) is generally regarded as confidential, commercial or financial information which is exempt from mandatory disclosure under the Freedom of Information Act.

2. *Timetables.*—Commenters requested that the timetable be modified to provide an opportunity for facilities to correct any deficiencies in the notice provided or to explain any delays in meeting the schedule before the Department imposes any penalty.

As previously noted, there is a period, which the Department believes to be ample, during which the information provided in the notice may be modified. That period includes the 30 days during which the Department is making the initial recovery calculation and the 60 days during which the owner can provide information in response to the initial recovery amount.

The comments stated that the timetable is contained in § 124.707(b) and is therefore limited to facilities which select the waiver option. They suggested that there be a similar timetable for recovery situations. A comment suggested that the Department should also be required to act on an independent auditor's certification of a facility's uncompensated care compliance within a specified time frame.

While the timetable is set out in § 124.707(b), it clearly applies also to purely recovery situations. Thus, section 124.707(b) provides that within 30 days after receiving the required notice, the Secretary will send a letter advising of the waiver option and the amount due as a recovery. If the waiver option is not selected, the parties have approximately 150 days remaining (180 from the date the notice is received) in which to negotiate and pay the recovery amount before interest can be imposed. The Department has considered and rejected imposing a timetable, other than that prescribed by the statute, in purely recovery situations. Certainly, the remaining 150 days is sufficient time to enable all parties to understand and evaluate the respective positions of each participant in the recovery process.

The Department has accepted the suggestion for a timetable regarding the Department's response to an auditor's certification of a facility's remaining uncompensated care obligation. That language is set out in § 124.707(c)(1)(ii).

3. *Amount of Recovery.*—Commenters suggested modifying the method set out in § 124.705 for calculating the recovery amount by (1) adjusting a transaction value for goodwill, (2) excluding the residual value of a facility (in lease situations), and (3) allowing appraisals in lieu of a calculation based upon depreciated reproduction value. They also questioned the appropriateness of the depreciated reproduction value and its exclusive use when a facility fails to provide the required information.

The Department has retained the methodology for calculating the amount of recovery as set forth in § 124.705 of the NPRM. Thus, the transaction value i.e. the sale price in the event of a sale and, in the case of a lease, the value of the lease plus the residual value of the facility when the lease terminates—will be used in each instance of an arms-length sale or transfer of a facility.

Goodwill is the value of a business in reputation over and beyond its tangible assets. Because of the speculative nature of goodwill and the difficulty of verifying its value, goodwill is recognized as excluded from the value of a facility in an arms-length transaction only when the adjusted transaction value, is greater than the replacement (reproduction) value and when the buyer enters goodwill as such in its new books.

The inclusion of the residual value of a facility that is leased is appropriate since recovery is based on the value of the *facility* at the time of transfer, not only on the value of the lease. Thus, the projected value of the facility at the conclusion of a lease is clearly relevant to its value at the time of the lease.

The Department believes it is justified in utilizing a depreciated reproduction valuation method where the required information is not provided since it is an objective method of determining value. Because an appraisal is a subjective method of arriving at value, the Department has adopted other more objective methods of transaction value or the depreciated reproduction valuation method.

4. *Calculation of Interest.*—The amendments to the statute expressly prescribe the period for charging interest for facilities which changed status before and after enactment of the amendments. The amendments also delay the imposition of interest charges for facilities which comply with the notice requirement. The Conference Report stated that:

> the conferees expect that the Department, upon notification will expedite recovery proceedings to avoid subjecting facilities to interest charges that might result from Departmental delays. The Secretary may in regulation provide that, where such delays are caused solely by the Department, the resulting interest charges may be waived.
>
> (130 Cong. Rec. H. 6742–43 (daily ed. June 22, 1984)).

It is in light of the statutory provisions concerning the calculation of interest and its legislative history that we turn to the comments.

A number of comments suggested waiving the interest during certain time periods and changing the time period. It was suggested that waiver of interest be tied to a timetable. It was also suggested that interest be waived during any period of disagreement between the Department and facility owner on the amount of the recovery or uncompensated care obligation. Finally, it was recommended that stronger language be used for waiver of interest when the Department is solely responsible for delays.

The time periods during which the Secretary is directed by statute to charge interest are set out in § 124.706(a). The Department has also incorporated the Conference Report statement relating to waiver of interest when delays are caused solely by the Department at § 124.706(b). In response to the comments, the Department does not intend to depart from the statutory directive by waiving interest during certain time periods or by tying negotiations to a specific timetable. The statute does provide a "grace period" of 180 days following receipt of the required notification. Congress thereby recognised that there would be instances of disagreement between the Department and other parties. It cannot be fairly concluded that delays resulting from such disagreements will in all cases be "caused solely by the Department". Rather, these instances are best resolved on a case-by-case basis. Further clarification or stronger regulatory language is, in our view, unnecessary.

It is noted that the statute required that regulations be prescribed within 180 days of enactment or by January 14, 1985. Since the issuance of implementing regulations is the responsibility of the Department, it could reasonably be argued that the failure to adopt regulations within the prescribed time frame represents a delay caused solely by the Department. Accordingly, interest charges will be suspended from the date prescribed by Congress for the Department to have promulgated its regulations (January 14, 1985) and the date the regulations actually are promulgated.

5. *Calculation of Uncompensated Care Obligation.*—Several comments related to the need to provide clarification on the methodology for calculating the uncompensated care obligation; specifically, guidance for the use of independent auditors, defining "expected useful life" of a facility, calculating the annual compliance level, consumer price index (CPI) adjustments, and treatment of wrongful denials of uncompensated care in the calculation.

Section 124.707(b)(1)(i) has been revised and clarified in response to the comments.

The most obvious change is the elimination of the uncompensated care calculation for facilities which changed status before May 8, 1979 (the effective date of Subpart F). Prior to that date, applicable regulations provided as a compliance alternative the so-called "open door option", which made it impossible to calculate a fixed uncompensated care obligation. Accordingly, for any such facility which opts for the waiver of recovery and establishment of the irrevocable trust to pay for medical care delivered to persons unable to pay, the amount to be placed in trust would be the recovery amount calculated under § 124.705.

In addition, § 124.707(b)(1)(i) as revised advises auditors to use Departmental procedures in Subpart F supplemented with special instructions to be provided by the Secretary.

For a facility which received a grant under Title XVI of the PHS Act, the remaining period of obligation is the "expected useful life" of the facility. That term has been defined as the period of time during which the structure may reasonably be expected to perform the functions for which it was designed or intended. The periods set out in the definition are consistent with the depreciation schedules adopted by the Internal Revenue Service, i.e., 40 years for buildings, 30 years for additions, 20 years for building renovations, 20 years for fixed equipment and 12 years for major movable equipment.

No provision has been made in the calculation to account for past wrongful denials of uncompensated care since such denials would not have applied toward satisfaction of the facility's uncompensated care obligation.

6. *Establishment and Monitoring of the Trust.*—Several commenters took the position that the seller as well as the buyer should have the option to establish a trust, and that the buyer should be required to contribute some minimum amount to the trust.

There is no authority to require the establishment of the trust or to require minimum contributions by any party. The statute requires that if the trust is established, it must be established by the buyer. Since there are no restrictions on who may capitalize the trust, however, contribution of the amount required for the trust is a matter that can be determined by the parties to the transaction involving the facility.

Commenters noted that any reporting requirements for the entity receiving the waiver should not be a burden and should not exceed those applicable to the uncompensated care obilgation. Commenters also proposed: That disbursements from the trust to pay for uncompensated care, costs associated with establishing and administering the trust, and costs associated with the independent audit should be made without any involvement by the Secretary; and that it is sufficient to provide an accounting for these costs by voucher or some other method. On the other hand, another commenter believed some control is necessary to prevent quick drawdowns of the trust.

The regulation attempts to strike a balance between reasonable monitoring and overregulation of the trust. The Secretary will monitor payments from the trust in accordance with Subpart F, and the reporting requirements for delivery of uncompensated care are no greater for a facility delivering such care pursuant to an irrevocable trust than for a facility operating its uncompensated care program without a trust. The Department will review the costs associated with establishing and

VOL 51
ISS 45
MR 7
1986
UMI

administering the trust as provided in § 124.707(d).

7. Waiver of Recovery for Good Cause.—It was suggested that good cause waivers be considered where there is (1) loss of the facility due to damage or destruction, (2) the lack of community need results in facility closure, and (3) ownership or control is transferred to a Federal provider.

In some circumstances in which a facility may be lost due to damage, destruction, or natural disaster such as earthquake, it may cease to be used for a permissible use, triggering the recovery provision of the statute; it is possible to qualify for waiver under § 124.708 in a "cease to be" situation. On the other hand, the then-value of a particular facility—which, under some circumstances, might be nominal or nothing—would be taken into consideration in determining a recovery amount. In the case of a facility that closes as a result of lack of community need, it has ceased to be used for a permissible use and a waiver could be considered in accordance with § 124.708. Finally, where ownership or control of the facility is transferred to a Federal entity, the transfer is not considered to be one which triggers the recovery provisions of sections 609 or 1622 of the Act.

8. Withdrawal of Waiver.—Some commenters felt that the provissions for withdrawal of a waiver are punitive in nature and may affect the decision to select the waiver option since failure to meet the conditions of the waiver could lead to a withdrawal of the waiver and payment of the recovery amount plus interest.

In providing for withdrawal of a waiver, the Department sought some recourse if a waiver recipient continues to fail to comply with the waiver conditions after it receives reasonable notice and an opportunity to take corrective action. Certainly, it is not the Department's desire nor in anyone's best interest that waivers granted by the Department be withdrawn. However, the provision does guard against abuse by a waiver recipient. It should be noted that if the waiver is withdrawn, § 124.709(e) provides for interest from the date of notification of noncompliance not from the prior date of the sale or transfer.

Commenters asked for clarification of what happens to the trust when a waiver is withdrawn, particularly whether the owner/transferee is obligated to complete its uncompensated care obligation until the trust is depleted. One commenter questioned the disposition of the trust if a facility is transferred to a second ineligible entity before the trust is expended.

So long as the trust is administered in accordance with the regulations, the waiver is in effect and there is no recovery. If the waiver is withdrawn, the regulations provide for recovery. Once a waiver is withdrawn, all Federal interest in the administration of the trust will cease.

9. General.—Some commenters recommended that there be a review and hearing process for settling disputes on the recovery amount, terms of waiver, or withdrawal of waiver.

The statute provides the formula for calculating recovery amounts and for judicial resolution of disputes in this area. The Department sees no need for formal administrative review and hearing procedures for settling disputes; such procedures could, in fact, have the effect of prolonging such disputes.

A commenter suggested that requiring compliance with the community service obligation in perpetuity will discourage selection of the waiver option.

The preamble to the notice of proposed rulemaking had noted that the regulations governing the community service obligation place no durational limit on that obligation. After further consideration, the Department has determined that the community service obligation, as characterized in the NPRM, should continue indefinitely. The Deficit Reduction Act amendment requires the entity granted a waiver to "meet the obligations of the facility under [the community service provisions of Titles VI and XVI of the Public Health Service Act]," without specifying any limit on the duration of the obligation. Moreover, the Conference Report explaining the amendment stated that the new owner must agree to assume the community service obligation "as implemented by current regulations," which do not limit the duration of the obligation.

Also § 124.703(a) has been revised to reflect more clearly the Department's long-standing position, upheld in *United States* v. *Brady*, 385 F.Supp. 1347 (S.D. Fla. 1974), that in the case of a transfer or sale of a grant-assisted facility, any transferee, initial or successive, that would be ineligible for a grant is liable for the recovery.

Finally, since new subpart H encompasses the existing regulations in Subpart M of Part 53, the latter rules are being removed.

Executive Order 12291

E.O. 12291 required that a regulatory impact analysis be prepared for major rules, which are defined in the order as any rule that has an annual effect on the national economy of $100 million or more, or certain other economic effects. The Secretary concludes that the regulations are not major rules within the meaning of the Executive Order, because they will not have an effect on the economy of $100 million or more or otherwise meet the threshold criteria.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act (15 U.S.C. Ch. 6) requires the Federal Government to anticipate and reduce the impact of rules and paperwork requirements on small businesses. For each proposed rule with a "significant economic impact on a substantial number of small entities," an initial analysis must be prepared describing the proposed rule's impact on small entities.

The impact of the interest charge provision and irrevocable trust option are not significant in relation to hospital revenues. In any case, these provisions are required by the terms of the statute and not as a result of this regulation.

Therefore, the Secretary hereby certifies that an initial regulatory flexibility analysis is not required.

Paperwork Reduction Act

The information collection requirements contained in §§ 124.704 and 124.707 have been approved by the Office of Management and Budget under section 3507 of the Paperwork Reduction Act of 1980 and have been assigned control number 0915-0099.

Grant programs—health, Health facilities; Hospitals, Loan programs—health, Public health, tuberculosis.

Accordingly, the Department of Health and Human Services is amending Parts 53 and 124 of Title 42 CFR.

Dated: February 3, 1986.

Donald Ian Macdonald,

Acting Assistant Secretary for Health.

Approved: February 14, 1986.

Otis R. Bowen,

Secretary.

PART 53—GRANTS, LOANS AND LOAN GUARANTEES FOR CONSTRUCTION AND MODERNIZATION OF HOSPITALS AND MEDICAL FACILITIES

Subpart M—[Removed]

1. Subpart M of Part 53 is hereby removed.

2. Subpart H of Part 124 is added to read as follows:

PART 124—MEDICAL FACILITY CONSTRUCTION AND MODERNIZATION

Subpart H—Recovery of Grant Funds

Sec.
124.701 Applicability.
124.702 Definitions
124.703 Federal right of recovery.
124.704 Notification of sale, transfer, or change of use.
124.705 Amount of recovery.
124.706 Calculation of interest.
124.707 Waiver of recovery where facility is sold or transferred to proprietary entity.
124.708 Waiver of recovery—good cause for other use of facility.
124.709 Withdrawal of waiver.

Authority: The provisions of this subpart H are issued under sections 609 and 1622 of the Public Health Service Act as amended 98 Stat. 112 (42 U.S.C. 291i and 300s–1a).

§ 124.701 Applicability.

The provisions of this subpart apply to facilities with respect to which grant funds were paid for construction or modernization—

(a) Under Title VI or XVI of the Public Health Service Act; or

(b) Pursuant to the authority of the Secretary under any of the following statutes:

(1) The Public Works Acceleration Act of 1962, Pub. L. 87–658 (42 U.S.C. 2641 et seq.)

(2) The District of Columbia Medical Facilities Construction Act of 1968, 82 Stat. 631 (Pub. L. 90–457)

(3) The Appalachian Regional Development Act of 1965, as amended (40 U.S.C. App.).

§ 124.702 Definitions.

As used in this subpart—

"Act" means the Public Health Service Act.

"Department" means the Department of Health and Human Services.

"Expected useful life" means the period of time during which the structure may reasonably be expected to perform the function for which it was designed or intended.

"Facility" means a facility with respect to which grant funds were paid under any of the authorizations listed in § 124.701.

"Fiscal year" means the facility's fiscal year.

"Nonprofit", as applied to any facility, means a facility that is owned and operated by one or more nonprofit corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

"Secretary" means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services to whom the authority involved has been delegated.

"State agency" means (1) in the case of a facility with respect to which a grant was made under Title VI of the Public Health Service Act or any of the statutes listed in § 124.701(b), the State agency designated pursuant to section 604 of the Public Health Service Act or its successor agency, and (2) in the case of a facility with respect to which a grant was made under Title XVI of the Public Health Service Act, the State health planning and development agency designated pursuant to Title XV of the Public Health Service Act.

"Then value" means the value of the facility on the date the facility is sold, transferred or ceases to be used for a permissible use as described in § 124.704.

§ 124.703 Federal right of recovery.

(a) If any facility is at any time within 20 years after the completion of the grant-assisted construction or modernization sold or transferred to any entity which is either not qualified for a grant under the statute pursuant to which the grant was awarded or not approved as a transferee by the State agency, the United States shall be entitled to recover on the basis of joint and several liability from any transferor, transferee, or successive transferee of the facility an amount determined in accordance with this subpart.

(b) If any facility at any time within 20 years after the completion of the grant-assisted construction or modernization ceases to be a public or other non-profit facility that would have been eligible for a grant under the statute pursuant to which the grant was awarded, the United States shall be entitled to recover from the owners of the facility an amount determined in accordance with this subpart.

§ 124.704 Notification of sale, transfer, or change of use.

(a) The transferor of a facility that is sold or transferred as described in § 124.703(a), or the owner of a facility which ceases to be a public or other nonprofit facility as described in § 124.703(b), shall provide the Secretary written notice of such sale, transfer, or other change not later than 10 days after the date on which the sale, transfer, or change occurs.

(1) *"Transfer."* For purposes of this subpart, a transfer occurs when a facility is conveyed to another entity through lease, merger, bankruptcy, foreclosure, or other arrangement.

(2) *"Cease to be."* For purposes of this subpart,

(i) A facility "ceases to be" a facility for which a grant could have been made under the statute pursuant to which the grant was awarded when it is no longer operated as such a facility; and

(ii) A facility "ceases to be a public or nonprofit facility" when an entity that is not a public or other non-profit corporation or association assumes management responsibilities with respect to the facility which, in the Secretary's judgment, are so pervasive as to constitute operation of the facility. The manager will not be deemed to be the operator of the facility if the management agreement contains both of the following provisions:

> The Board of Directors of the facility retains authority to terminate the agreement at any time upon reasonable notice to the contractor.
>
> No employee of the contractor may be a member of the facility's Board of Directors.

In the absence of either of these provisions the Secretary will consider the degree of control granted to the managing organization over patient admission, determination of what services will be provided, and charges for services provided in the facility.

(b) *Content of Notice.* The notice required by paragraph (a) of this section shall be sent to the Secretary by certified mail, and shall contain or be accompanied by

(1) The date of the sale, transfer, or other event that gives rise to the notice;

(2) Copies of any sales contracts, lease agreements, management contracts or other documents pertinent to the event giving rise to the notice;

(3) Estimates of current assets, current liabilities, book value of equipment, the expected value of land on the new owner's books, and the remaining depreciation for all fixed assets involved in the transaction calculated on a straight line basis using commonly adopted expected useful lifetimes.

(c) *Failure to provide notice.* Failure to provide the information required by paragraph (b) will be considered failure to provide the notice required by this section. In any case in which such

VOL 51
ISS 45
MR 7
1986
UMI

information has not been provided, the Secretary will, promptly upon receiving an incomplete notice or otherwise discovering that a sale, transfer or other event giving rise to a recovery may have occurred, send a letter to the owner of the facility requesting the information needed to calculate a recovery amount.

(Approved by the Office of Management and Budget under control number 0915–0090)

§ 124.705 Amount of recovery.

(a) Except as provided in § 124.706, the amount that the United States shall be entitled to recover under this subpart is that amount bearing the same ratio to the then value of so much of the facility as constituted an approved project (or projects) as the amount of Federal participation bore to the cost of the construction or modernization under such project (or projects).

(b) The then value of the facility will be based on:

(1) The transaction value in the case of an arms-length sale or transfer, or

(2) A depreciated reproduction value in the absence of an arms-length sale or transfer or if the buyer fails to provide, within 60 days after the date of the Secretary's letter described in § 124.704(c), the information which, in the judgment of the Secretary, is necessary to establish, adjust, and apportion a transaction value. As used in this section, "transaction value" means in the case of a sale, the sale price, and in the case of a lease, the value of the lease plus the residual value of the facility at the termination of the lease (i.e., the reproduction value or, if appropriate, an alternative use value).

(c) The transaction value will be adjusted to account for the purchase or lease of other assets and the assumption of liabilities associated with the transaction. To determine the amount of Federal recovery, the adjusted value will be apportioned to the grant-aided assets by the ration of the remaining useful lifetime values of those assets to the sum of the remaining useful lifetime values of all assets not previously accounted for in adjusting the transaction value.

(d) A depreciated reproduction value will be established by calculating a reproduction value using construction cost indexes or current costs per square foot for construction, depending on which is more relevant to the type of construction associated with the grant. This reproduction value will then be adjusted by the ratio of the remaining useful life to the total useful life for the assets involved.

(e) In calculating the recovery amount, the Secretary will include as Federal participation any grant assistance received by the facility under an authority listed in § 124.701 and any assistance supplementary to that assistance received for the construction or modernization of the facility under the Public Works and Economic Development Act of 1965 (42 U.S.C. 3121, et seq.) or the Local Public Works Capital Development Act of 1976 (Pub. L. 94–369).

§ 124.706 Calculation of interest.

(a) In addition to the amount of recovery calculated under § 124.705, the United States shall be entitled to recover interest on such amount in accordance with this section at the rate determined by the Secretary based on the average of the bond equivalent of the weekly ninety-day U.S. Treasury bill auction rate for the quarter previous to the quarter in which interest begins to accrue under this section.

(1) *Change of status before July 18, 1984.* For facilities that were sold or transferred or which ceased to be public or other nonprofit facilities before July 18, 1984, interest will be charged beginning August 17, 1984, or 180 days after the date of such sale, transfer or other, whichever is later, and ending on the date the amount the United States is entitled to recover is collected.

(2) *Change of status after July 17, 1984.* For facilities that are sold or transferred or which cease to be public or other nonprofit facilities after July 17, 1984, interest will be charged beginning 180 days after receipt by the Department of the notice required under § 124.704: *Provided, That* if such notice is not provided as prescribed, interest will be charged beginning on the date of the sale, transfer, or change of use, and ending on the date the amount which the United States is entitled to recover is collected.

(b) The Secretary may waive interest charges that result from delays caused solely by the Department.

§ 124.707 Waiver of recovery where facility is sold or transferred to a proprietary entity.

(a) *Conditions of the waiver.* The Secretary may waive the recovery rights of the United States arising under § 124.703(a) if the entity to which the facility was sold or transferred:

(1) Has filed a written request for the waiver within the time limits prescribed by this section;

(2) Has established an irrevocable trust in accordance with this section, in an amount equal to the greater of the amount that would otherwise have been recovered pursuant to § 124.705 (including accrued interest as calculated under § 124.706) or twice the cost of the remaining uncompensated services obligation of the facility as of the date of the change of status, that will be used by the entity only to provide services to those unable to pay in accordance with the requirements of Subpart F of this Part; and

(3) Has agreed to comply with the community service regulations set out in Subpart G of this Part.

(b) *Procedures for obtaining waiver.* (1) Within 30 days after the date of receipt of the information described in § 124.704(b), the Secretary will send a letter to the new owner of the facility advising of the United States' right of recovery and the opportunity to obtain a waiver. For the purpose of advising the new owner of the amount to be placed in the irrevocable trust should the owner wish to obtain a waiver, the letter will also state the dollar amount of the remaining uncompensated care obligation and the amount that would be due under § 124.705, computed as follows:

(i) *Computation of uncompensated care obligation.* (A) For a facility which changes status before the date that Subpart F of this part is effective for the facility, the remaining uncompensated services obligation is zero.

(B) For a facility which changes status after the date that Subpart F of this part is effective for the facility, the Secretary will multiply the annual compliance level, computed under the 10% method specified in 42 CFR 124.503(a)(1)(ii), for the fiscal year in which the change of status occurs times the number of years remaining in the facility's uncompensated services obligation. From this amount, the Secretary will subtract amounts of excess or add amounts of deficit for each fiscal year prior to the change of status for which the Secretary has previously conducted an audit of uncompensated services accounts. Excess and deficits will be adjusted by the percent change in the National Consumer Price Index for Medical Care between the year in which the excess or deficit occurred and the year in which the status change occurred. For each fiscal year prior to the change of status which the Secretary has not audited, the Secretary will add to the remaining obligation an amount equal to the annual compliance level in each such year adjusted by the percent change in the National Consumer Price Index for Medical Care between that year and the year of the status change. The amount computed as the total remaining obligation will then be multiplied by two. If the transferee chooses to accept the Secretary's calculation, no further assessments will

be made of uncompensated care provided prior to the change of status date. If the transferee does not accept the calculation, the transferor or transferee may hire, and may charge against the irrevocable trust established under this section, an independent auditor to certify the compliance level and any excess or deficit for the period from May 18, 1979, up to and including the date of the change of status, using standard Departmental procedures supplemented with instructions provided by the Secretary, and submit the results in accordance with paragraph (b)(2)(ii) of this section. The audit may be conducted for any years *not* included in a previous site assessment conducted by the Department. If the Secretary agrees that a change is appropriate, the Secretary will use this information to adjust the calculation as set out in paragraph (b)(3) of this section. If the independent auditor certifies that qualified care was rendered either at the facility or at a replacement facility operated by the transferee between the date of the change of status and the date of establishment of the trust, and the Secretary agrees, the post transfer level of care shall not affect the calculation of the total remaining uncompensated care obligation to be doubled, but instead shall be recognized as a credit to be drawn from the trust as provided in paragraph (c)(1)(ii) of this section. In the case of a facility with respect to which a grant was made under Title XVI of the Act, the remaining period of obligation will be the remainder of the expected useful life of the facility, as follows: 40 years for buildings, 30 years for additions, 20 years for building renovations, 20 years for fixed equipment and 12 years for major movable equipment.

(ii) *Computation of recovery amount.* The Secretary will determine the recovery amount as provided in § 124.705.

(2) Within 60 days following the date of the Secretary's letter provided pursuant to subparagraph (1), the owner of the facility shall notify the Secretary in writing that it either:

(i) Accepts the trust fund amount for the waiver as offered by the Secretary;

(ii) Provides a detailed statement of an alternative determination of the recovery amount or an independent audit of the remaining uncompensated services obligation as described in paragraph (b)(1)(i) of this section; or

(iii) Does not seek a waiver under § 124.707. Failure to provide a timely response to the Secretary under this subparagraph will be considered an election not to seek the waiver.

(3) Within 30 days following the receipt of the owner's views concerning the calculation, and after considering those views, the Secretary will send a final letter providing the Secretary's determination of twice the remaining uncompensated care obligation and the recovery amount under § 124.705. The amount to be placed in the irrevocable trust will be the higher of those two figures. (See paragraph (a)(2) of this section.)

(4) Within 30 days of the date of the final letter, the owner of the facility shall notify the Secretary in writing whether or not it accepts the terms of the waiver. Failure to provide timely notice to the Secretary under this subparagraph will be considered an election not to accept the waiver.

(c) *Establishment of the trust.* (1) Within 60 days of the date of its acceptance of a waiver under paragraph (b)(2) or (b)(4) of this section, the owner shall begin delivering services to those unable to pay in accordance with subpart F of this Part under an irrevocable trust established in the amount calculated pursuant to paragraph (b). *Provided, that*

(i) The owner shall provide a copy of the trust documents to the Secretary and no trust shall be considered established until the trust documents have been approved by the Secretary; and

(ii) The owner may credit against the trust any uncompensated services provided in accordance with subpart F of this Part between the date of the change of status of the facility and the establishment of the trust. For an owner to receive the credit before the establishment of the trust and deposit of funds therein, the auditor's report covering the post-transfer period shall be submitted with the notification of acceptance of the waiver, and in any event, not later than 30 days from the date of the Secretary's final letter described in paragraph (b)(3) of this section. Within 30 days following the receipt of the auditor's report, the Secretary will notify the owner of the allowable credit, if any. If the auditor's report is not timely submitted, the trust must be established and fully funded, in accordance with the time limits imposed by paragraph (c)(1) of this section, and the Secretary will notify the owner of the allowable credit, if any, within 30 days of the date of the establishment of the trust or within 30 days of the receipt of the report, whichever is later.

(2) The trust shall be administered by a Trustee who is neither an employee of the transferee nor an employee of a subsidiary or of the parent institution of the transferee.

(3) The trust shall provide that the trust corpus and income may be invested only in U.S. Government or U.S. Government insured securities.

(d) *Use of the trust.* The corpus and income of the irrevocable trust shall be used to pay for the costs of uncompensated services, which may include reasonable costs of establishing and administering the trust and the cost of the independent audit described in paragraph (b)(1)(i) of this section, until the trust is exhausted.

(Approved by the Office of Management and Budget under control number 0915–0099)

§ 124.708 Waiver of recovery—good cause for other use of facility.

The Secretary may for good cause waive the recovery rights of the United States arising under § 124.703(b). In determining whether there is good cause under this section for releasing the applicant or other owner of the facility from its obligation, the Secretary will take into consideration the extent to which:

(a) The facility will be devoted by the applicant or other owner to use for another public or nonprofit purpose which will promote the purpose of the Act;

(b) There are reasonable assurances that for the remainder of the 20-year period other public or nonprofit facilities not previously utilized for the purpose for which the facility was constructed will be so utilized and are substantially equivalent in nature and purpose.

§ 124.709 Withdrawal of waiver.

(a) Any waiver granted under this subpart is conditioned upon the recipient of the waiver carrying out the obligations imposed by § 124.707 or § 124.708 as applicable.

(b) The Secretary will monitor compliance with the community service and uncompensated care obligations of any entity that receives a waiver.

(c) Should a recipient of a waiver fail to comply with the applicable conditions, the Secretary will withdraw the waiver and seek recovery based on the value of the facility on the date the right of recovery first arose under § 124.703.

(d) No waiver will be withdrawn until the recipient has been notified in writing by the Secretary of the noncompliance and has failed to take corrective action within 90 days after the date of such notice.

(e) Should the waiver be withdrawn, the amount of the Government's recovery will be the amount set out in the Secretary's determination letter as described in § 124.707 (b)(1) or (b)(3) as

BILLING CODE [illegible]

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 67 and 69

[CC Docket No. 78-72; CC Docket No. 80-286; FCC 85-655]

MTS and WATS Market Structure; Establishment of a Joint Board

AGENCY: Federal Communications Commission.

ACTION: Final rule (decision and order).

SUMMARY: The Commission adopts the Federal-State Joint Board's recommendations concerning: (1) The jurisdictional separations and access charge treatment of Centrex/CO service; (2) direct assignment of closed end WATS access line costs and the allocation of toll terminal line costs; (3) expansion of the customer premises equipment (CPE) phase-out to include additional CPE-related costs; (4) separations treatment of coinless public telephones; and (5) separations procedures for terminal equipment used by telephone companies in their internal business operations. The Commission adopted the separations and access charge provisions recommended by the Joint Board because they will produce a cost based jurisdictional allocation and recovery of these costs. Implementation of separations procedures and access charge provisions which reflect cost causation principles will promote efficient use of the telephone network.

EFFECTIVE DATE: Amendments set forth in Appendix A, numbers 6, 8, 9, and 10 and Appendix B, number 2, are effective April 7, 1986; all other amendments effective on June 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: David Siddall, Common Carrier Bureau, (202) 632-0745.

Telephone.

Decision and Order

In the matter of MTS and WATS Market Structure (CC Docket No. 78-72), and Amendment of Part 67 of the Commission's Rules and Establishment of a Joint Board (CC Docket No. 80-286).

Adopted: December 18, 1985.
Released: January 7, 1986.
By the Commission.

I. Introduction

1. In its *Recommended Decision and Order*[1] in this proceeding adopted July 12, 1985, the Joint Board made recommendations concerning: (1) The jurisdictional separations and access charge treatment of Centrex/CO service; (2) direct assignment of closed end WATS access line costs and the allocation of toll terminal line costs; (3) expansion of the customer premises equipment (CPE) phase-out to include additional CPE-related costs; (4) separations treatment of coinless public telephones; and (5) separations procedures for terminal equipment used by telephone companies in their internal business operations. The Commission adopts the Joint Board's recommendations concerning these issues for the reasons given by the Joint Board. The following sections contain a brief discussion of each issue.

II. Centrex/CO Service

2. Centrex/CO service is offered by local telephone companies under state tariffs as an alternative to the use of a Private Branch Exchange (PBX) on the customer's premises, with the central office switch performing intercom switching and other functions that can also be performed by a PBX. This service requires a separate line or its equivalent between the central office and each telephone station on the subscriber's premises while use of a PBX allows fewer circuits between the customer's premises and the central office.

3. The Joint Board recommended that the Commission continue application of the existing separations procedures for Centrex/CO subscriber line costs. Under these procedures, Centrex/CO line costs are allocated in the same manner as the cost of other subscriber lines used jointly for local exchange and toll service. We agree with the Joint Board's recommendations in this regard. Establishment of special separations procedures to recognize the intercom usage of Centrex/CO lines would be inconsistent with our previous decision establishing a flat twenty-five percent interstate allocation factor for all non-traffic sensitive (NTS) facilities regardless of usage.[2] We also agree with the Joint Board's conclusion that application of a PBX trunk equivalency ratio[3] for separating Centrex/CO line costs would not solve any of the potential problems, described in the comments, concerning implementation of subscriber line charges for Centrex/CO service. While this approach would reduce the number of Centrex/CO lines subject to the subscriber line charge, it would substantially increase the intrastate allocation of Centrex/CO costs.

The Joint Board also recommended that the Commission increase the subscriber line charge for embedded Centrex/CO lines from $2.00 to $3.00 per month (or the full multi-line business subscriber line charge, whichever is less) effective on June 1, 1986. In conjunction with this, the Joint Board recommended a clarification of the distinction between new and embedded Centrex/CO lines. Under this approach, rearrangements or changes in the configuration of Centrex/CO lines by a single organization at a single, discrete location would not result in reclassification of embedded lines as new if the total number of lines and the Centrex/CO service offering and features remain unchanged. We endorse the Joint Board's recommendations in this regard. A gradual transition to application of the full multi-line business subscriber line charge for embedded Centrex/CO lines is necessary. However, the $2.00 monthly subscriber line charge for embedded Centrex/CO lines became effective May 25, 1984, and sufficient time has elapsed to allow state regulators to make any necessary adjustments to intrastate Centrex/CO rates. Pursuant to the Joint Board's recommendation, we will also consider waiving application of the additional $1.00 charge if any telephone company demonstrates that the charge will cause significant stranded investment due to abandonment of Centrex/CO service.

5. In conjunction with this, we adopt the clarification of the distinction between embedded and new Centrex/CO lines recommended by the Joint Board. This will ease the transition to application of the full multi-line business subscriber line charge for Centrex/CO lines by allowing certain lines to retain their status as embedded. We agree with the Joint Board's conclusion that the Commission should not require retroactive application of this approach to Centrex/CO lines which have already been reclassified due to the administrative burden involved and the fact that all Centrex/CO lines should eventually be subject to the full multi-line business subscriber line charge. Lines which have not been reclassified as new despite past rearrangements and changes are to continue to be treated as embedded absent future changes which require reclassification.

III. WATS Closed End Access Lines and Toll Terminal Lines

6. WATS access lines are used exclusively for either state or interstate toll service. The Commission's original access charge rules included interstate closed end WATS access lines with certain private lines in a dedicated access line category.[4] The Joint Board subsequently recommended that closed end WATS access lines be directly assigned to the state or interstate jurisdiction rather than allocated between the jurisdictions on the same basis as jointly used local exchange subscriber lines.[5] However, we decided to continue the existing separations treatment pending further study of direct assignment by the Joint Board.[6] Upon completion of further proceedings concerning this issue, the Joint Board recommended direct assignment of closed end WATS access lines costs to the appropriate jurisdiction, effective June 1, 1986. The Joint Board also recommended allocation of toll terminal line costs based upon relative toll minutes of use.

7. We agree with the Joint Board's conclusion that direct assignment of closed end WATS access lines constitutes a rational separations treatment since these access lines are used exclusively for either state or interstate toll service. The arguments against direct assignment based on competitive considerations are unconvincing. We also endorse the Joint Board's recommendation that we allocate toll terminal line costs on the basis of relative state and interstate toll minutes of use since these lines do not carry local exchange traffic.

IV. CPE Phase-Out

8. In the *First Recommended Decision and Order*[7] in *Amendment of Part 67 of the Commission's Rules*, the Joint Board recommended a plan for phasing customer premises equipment out of the separations process gradually over a five year period. This plan was intended to alleviate possible effects on local rates due to the Commission's decision to detariff CPE in the *Second Computer Inquiry*.[8] Detariffing CPE would eliminate the contribution which CPE revenues made to recovery of the costs of providing local exchange service. The Commission adopted the Joint Board's recommendation with a few minor technical changes.[9] Under this approach, a base amount of embedded CPE investment, and related expenses, reserves, and taxes for each local exchange carrier was frozen as of December 31, 1982. This amount included the CPE book costs in accounts 231 and 234 and expenses associated with these costs, such as repairs of station equipment and CPE depreciation. The CPE base amount was then reduced one-sixtieth per month beginning January 1, 1983. However, certain CPE-related expenses, such as those related to the station handling process, and commercial expenses were not included in the phase-out plan.

9. The Joint Board recommended continuation of the existing CPE phase-out plan without expansion to include additional CPE-related costs. We agree with the Joint Board's conclusion that the existing CPE phase-out plan has served as a successful transition mechanism to allow state regulators and the industry to adjust to the new environment for the provision of CPE. We endorse the Joint Board's conclusion that expansion of the CPE phase-out plan is not warranted based on the existing cost data which does not allow a determination of whether these additional CPE-related expenses generated a contribution to local exchange service costs, the relatively small amount of costs involved, and the administrative burdens involved in revising the CPE phase-out at this time.

V. Coinless Public Telephones

10. Both local exchange carriers and interexchange carriers have placed coinless public telephones in locations such as airports in which a high volume of toll calling originates. These telephones can be used only for credit card and collect calls. On October 6, 1983, the Commission amended the Uniform System of Accounts (USOA) to establish new accounting classifications and procedures for coinless public telephones, among other things.[10] The new accounting rules provided that the costs associated with such telephones were to be restored in Account 235, "Public Telephone Equipment" and Account 607, "Repairs of Public Telephone Equipment."

11. The Joint Board recommended that this Commission allocate the costs associated with coinless public telephones between the jurisdictions based on the relative toll usage for this equipment. If measurement of traffic over this equipment is not practical, the Joint Board recommended use of study area measurements of relative state and interstate toll usage. We agree with the Joint Board's recommendations since it appears that these telephones will be used almost entirely for toll calling because they operate only on a credit card and collect basis. Provision is made for the use of study area measurements of relative toll traffic if actual measurement of toll traffic over these facilities is not feasible. This will alleviate potential administrative burdens.

VI. Terminal Equipment

12. The Commission *Order* of October 6, 1983, also established a new Account 262, "Other Communications Equipment," to record the costs of terminal equipment used by telephone companies in the course of their internal business operations.[11] The Joint Board recommended that this Commission allocate the costs in Account 262 on the same basis as other office equipment and furniture, which is allocated based on the wage portion of maintenance, traffic, commercial and revenue accounting expense, excluding the wage portion of maintenance expense related

[1] *MTS and WATS Market Structure* and *Amendment of Part 67 of the Commission's Rules*, CC Docket Nos. 78-72 and 80-286, 50 FR 47774 (November 20, 1985).

[2] *Decision and Order, Amendment of Part 67 of the Commission's Rules*, CC Docket No. 80-286, 96 FCC 2d 781 (1984).

[3] Under this approach, a PBX trunk equivalency ratio would be applied to the actual number of Centrex/CO lines to calculate the equivalent number of PBX trunks. The existing separations procedures would be used to separate the cost of the PBX trunk equivalent Centrex/CO lines. The cost of the remaining Centrex/CO lines would be directly assigned to the state jurisdiction.

to general office space. We endorse the Joint Board's conclusion that telephone terminal equipment used in a telephone company's internal business operations is a cost of doing business similar to other office equipment and furniture and should be allocated on the same basis.

VII. Regulatory Flexibility Certification

13. We certify that the Regulatory Flexibility Act is not applicable to the rules we are adopting in this proceeding. Although some local exchange carriers are very small, local telephone companies do not appear to fall within the Regulatory Flexibility Act's definition of a "small entity." The Act incorporates the definition of a "small business" in Section 3 of the Small Business Act as the definition of a "small entity." The latter definition excludes any business that is dominant in its field of operation. Exchange carriers, even small ones, enjoy a dominant monopoly position in their local service area. The Commission has found all exchange carriers to be dominant in the *Competitive Carrier* proceeding, 86 FCC 2d 23–24 (1980). To the extent that interexchange carriers may be affected by these rules, we hereby certify that these rules will not have a significant economic effect on a substantial number of small entities.

VIII. Ordering Clauses

14. Accordingly, it is ordered that, the Joint Board's recommendations concerning the issues discussed above are adopted.[12]

15. It is further ordered that, the amendments to Parts 67 and 69 of the Commission's Rules set forth in Appendix A and Appendix B, are adopted.[13] These amendments are to be effective 30 days after publication in the Federal Register unless otherwise indicated.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

PART 67—[AMENDED]

47 CFR Part 67 is amended as follows:

1. The authority citation for Part 67 continues to read as follows:

Authority: (47 U.S.C. 151), 48 Stat. 1064, as amended 50 Stat. 189 (47 U.S.C. 154(i)), 48 Stat. 1066 (47 U.S.C. 154(j)), 48 Stat. 1064 (47 U.S.C. 221(c)), 48 Stat. 1080 (47 U.S.C. 410(c)), 95 Stat. 383.

2. Effective June 1, 1986, § 67.122 is amended by revising paragraph (a)(3) to read as follows:

§ 67.122 Categories of outside plant.

* * * * *

(a) * * *

(3)—Subscriber Line Outside Plant Excluding Wideband— Category 1.3—This category includes outside plant between local central offices and subscriber premises used for message telephone, TWX subscriber lines, private line local channels and circuits between control terminals and radio stations providing very high frequency maritime service or urban or highway mobile service. This category also includes outside plant between local central offices and public telephones.

3. Effective June 1, 1986, § 76.124 is amended by revising the introductory text of paragraphs (c) and (d), and revising (d)(1)–(d)(3) and (d)(7)(ii), to read as follows:

§ 67.124 Exchange outside plant categories and apportionment procedures.

* * * * *

(c) Exchange Trunk Outside Plant (Wideband and Non-Wideband)—Category 1.2—The cost of the exchange outside plant assignable to this category in the study area is separately identified for the following subsidiary categories: Category 1.21 Trunk plant used exclusively for exchange message services; Category 1.22 Trunk plant used exclusively for toll message services, excluding WATS closed end access, or jointly for exchange and toll message services, excluding WATS closed end access service; Category 1.23 Trunk plant used for TWX access lines; Category 1.24 Trunk plant used exclusively for interstate private line services and interstate WATS service; Category 1.25 Trunk plant used exclusively for state private line services and state WATS service.

* * * * *

(d) Subscriber Line Outside Plant Excluding Wideband—Category 1.3—The first step in apportioning the cost of the subscriber line outside plant among the operations is the determination of an average cost per working loop. This average cost per working loop is determined by dividing the total cost of subscriber line outside plant assigned Category 1.3 in the study area by the sum of the working loops described in subcategories 1.31, 1.32, 1.33, 1.34, and 1.35. The cost of the subscriber line outside plant assigned Category 1.3 is further assigned to the following subsidiary categories and apportioned in accordance with §§ 67.124(d)(1)–67.124(d)(4); Category 1.31—Subscriber line outside plant used exclusively for state private line services and state WATS closed end access service; Category 1.32—Subscriber line outside plant used exclusively for interstate private line services and interstate WATS closed end access service; Category 1.33—Subscriber line outside plant used jointly for exchange service and toll message services, excluding WATS closed end access; Category 1.34—Subscriber line outside plant used for TWX service; Category 1.35—Subscriber line outside plant used exclusively for toll message services, excluding WATS closed end access service.

(1) The cost of subscriber line outside plant assigned Category 1.35 for the study area is determined in the same manner as the plant assigned Category 1.34, and apportioned between state toll and interstate toll on the basis of the relative number of minutes of use of this plant in the study area.

(2) The average subscriber line outside plant cost per loop determined in § 67.124(d) is applied to the counts of working loops used in furnishing state and interstate private line local channels (excluding wideband) and state and interstate WATS closed end access lines, and the amounts so determined are assigned to categories 1.31 and 1.32 and are assigned directly to the appropriate operations.

(3) The cost of subscriber line outside plant assigned Category 1.33 is determined by subtracting amounts assigned Category 1.34, TWX service, Category 1.35, subscriber line outside plant used exclusively for toll message services excluding WATS closed end access service, and Categories 1.31 and 1.32 private line and WATS closed end access service in §§ 67.124(d)(1) and 67.124(d)(2) from the total cost assigned Category 1.3 in the study area.

* * * * *

(7) * * *

(ii) The determination of whether the decrease in the interstate allocation for a given study area resulting from the operation of §§ 67.124(d) and 67.941(a) through (c) exceeds ten percentage points shall be made by calculating a percentage interstate allocation for both of the years involved. This shall be done by dividing the interstate allocation of OSP Category 1.33, COE Category 8.13

---

[12] The word "exchange" was inadvertently dropped from the revised version of § 67.313(b)(5) set out in Attachment A of the Joint Board's *Recommended Decision and Order.* Accordingly, we have revised the recommended language for § 67.313(b)(5) to the term "exchange service." (The word "service" is being added to make the wording follow that which the Joint Board used in referring to other services.)

[13] This action is taken pursuant to sections 4 (i) and (j), 201, 202, 203, 205, 220, 221, 403, and 410 of the Communications Act as amended, 47 U.S.C. §§ 154 (i), (j), 201, 202, 203, 205, 220, 221, 403, and 410.

---

and inside wire plus associated expenses for each year as calculated pursuant to § 67.124(d)(7)(iv) by the total unseparated investment in OSP Category 1.33, COE Category 8.13 and inside wire plus associated expenses for the corresponding year as calculated pursuant to § 67.124(d)(7)(v). For this purpose, WATS closed end access lines shall be included in OSP Category 1.33 when comparing the interstate allocation for 1985 and 1986. WATS closed end access lines shall be excluded from OSP Category 1.33 when comparing the interstate allocation for 1986 and 1987.

* * * * *

4. Effective June 1, 1986, § 67.126 is amended by revising paragraphs (a)(1) and (a)(2) to read as follows:

§ 67.126 Host/remote message outside plant category and apportionment procedures.

(a) * * *

(1) The cost of host/remote message outside plant excluding WATS closed end access lines for the study area is apportioned on the basis of the relative number of study area minutes-of-use miles applicable to such facilities.

(2) The cost of host/remote message outside plant used for WATS closed end access for the study area is directly assigned to the appropriate jurisdiction.

5. Effective June 1, 1986, § 67.140 is amended by revising paragraph (e)(1)(i) to read as follows:

§ 67.140 Circuit equipment-category

* * * * *

(e) * * *

(1) * * *

(i) The category 8.3 cost of host/remote circuit equipment assigned to message services for the study area is apportioned among the exchange, intrastate toll, and interstate toll operations on the basis of the assignment of host/remote outside plant.

6. Section 67.151 is amended by revising paragraphs (a)(2), the introductory text to (b), and (b)(3) to read as follows:

§ 67.151 General

(a) * * *

(2) The first step in the separation of station equipment is the segregation of station connections in Accounts 232 and 234 (other than inside wiring provided for private line services and public telephone equipment) from all other investment. This plant is apportioned between the state and interstate operations on the same basis as OSP Category 1.33 described in § 67.124(d)(4) through § 67.124(d)(7).

(b) The next step is the assignment of the remaining plant to the six categories listed below and the determination of the cost of the plant so assigned. The basic procedures followed in making the assignments and cost determinations are: the identification of the units of station equipment installed on customers' premises assignable to Categories 1, 2, 3, 4, and 5; determination of the related costs in these categories by the application of an appropriate average unit cost to the units so identified; and the assignment of the remaining station equipment cost to Category 6.

* * * * *

(3) Only that station equipment provided under special service tariffs (e.g., special terminating equipment, trunk circuit equipment, idle circuit terminations, signaling equipment, telephone sets, keys, key sets and turrets which are used for the termination of special service circuits) is assigned to the special service categories. Correspondingly, station equipment used jointly for both special services and message telephone services (e.g., telephone keys, key sets, order turrets, private branch exchange switchboards which are used for the termination of both private lines and exchange lines) and provided under other than special service tariffs is assigned to Category 6.

7. Effective June 1, 1986, § 67.151 is further amended by revising paragraphs (a)(2), (b)(1), and (b)(3) to read as follows:

§ 67.151 General

(a) * * *

(2) The first step in the separation of station equipment is the segregation of station connections in Accounts 232 and 234 (other than inside wiring provided for private line services or WATS closed end access service, and public telephone equipment) from all other investment. This plant is apportioned between the state and interstate operations on the same basis as OSP Category 1.33 described in § 67.124(d)(4) through § 67.124(d)(7).

(b) * * *

(1) Identification of the units of station equipment installed on customers' premises is accomplished by the use of plant, accounting and engineering records supplemented by field inventories, where necessary. Where the numbers of units to be identified are large, sampling methods may be employed. Under such circumstances, however, the costs of telephone and miscellaneous telephone station apparatus in Account 231 and telephone and miscellaneous telephone station connections in Account 232 are assigned to Category 2 by applying to these costs in the study area the ratio of (i) the number of exchange loops used for telephone private line services and WATS closed end access service to (ii) the number of message telephone subscriber lines and exchange loops used for telephone private line services and WATS closed end access service, combined.

* * * * *

(3) Only that station equipment provided under special service tariffs or associated with WATS closed end access lines (e.g., special terminating equipment, trunk circuit equipment, idle circuit terminations, signaling equipment, telephone sets, keys, key sets and turrets which are used for the termination of special service circuits) is assigned to the special service categories. Correspondingly, station equipment used jointly for both special services, or WATS closed end access service and message telephone services excluding WATS closed end access (e.g., telephone keys, key sets, order turrets, private branch exchange switchboards which are used for the termination of both private lines or WATS closed end access lines and exchange lines) and provided under other than special service tariffs is assigned to Category 6.

8. Section 67.152 is amended to redesignate paragraph (e) as paragraph (f), to add a new paragraph (e), and to revise redesignated paragraph (f), to read as follows:

§ 67.152 Station equipment categories and apportionment procedures.

* * * * *

(e) Coinless Public Telephone Equipment—Category 5—This category includes the cost of coinless public telephone equipment contained in Account 235 used exclusively, or virtually exclusively, for toll service as well as the associated station connections. The cost of this coinless public telephone equipment, and the associated wiring in the study area, are apportioned between the state and interstate operations on the basis of the relative toll minutes of use of this equipment in the study area. Relative toll minutes of use for the entire study area may be used if calculation of the equipment-specific allocation factor would not be practical.

(f) Other Station Equipment—Category 6. This category includes all station equipment not assigned to other categories. The cost of station

7
1986
UMI

equipment assigned to this category in the study area is apportioned between state and interstate operations by the application of a subscriber plant factor developed as described in § 67.124(d)(4)–(d)(7).

9. Section 67.153 is amended by revising paragraph (b) to read as follows:

§ 67.153 Phase out and termination of interstate apportionment of customer premises equipment in accounts 231 and 234.

* * * * *

(b) Phase out of customer premises equipment recorded as of December 31, 1982. The recorded investments of customer premises equipment in Accounts 231 and 234 which are on the books as of December 31, 1982 shall be assigned to the categories set forth under § 67.152.

* * * * *

10. Section 67.161 is amended by revising paragraph (c) to read as follows:

§ 67.161 Furniture and office equipment—account 261; Other Communications Equipment—account 262.

* * * * *

(c) The cost of the other furniture and office equipment in Account 261 and the cost of other communications equipment in Account 262 is apportioned among the operations on the basis of the separation of the wage portion of maintenance, traffic, commercial and revenue accounting expenses excluding the wage portion of maintenance expense related to general office space.

11. Effective June 1, 1986, § 67.313 is amended by revising paragraphs (b)(2), (3), and (5) and (c)(4), (c)(5) introductory text, (c)(5)(i), (c)(5)(iii), and (c)(6) to read as follows:

§ 67.313 Test desk work—account 603.

* * * * *

(b) * * *

(2) Expense in this classification is segregated among (i) message services, excluding WATS closed end access; (ii) private line and WATS closed end access service; (iii) TWX; and (iv) wideband services, on the basis of the relative number of working subscriber loops provided for each of these services. In cases where substantial numbers of private line, WATS closed end access lines, TWX or wideband service loops are provided, and where either the analyses in §67.313(a) or analyses of trouble reports on private line, WATS closed end access lines, TWX and wideband services indicate that the exchange circuit plant testing expense per loop associated with any of such services is significantly different from the corresponding expense per loop associated with message services, excluding WATS closed end access, appropriate weighting factors are applied to the counts of loops used for private line, WATS closed end access, TWX and wideband services. These weighting factors are based on periodic analyses of accounting or other records for a representative period.

(3) Subscriber line and service order testing expense assigned message telephone, excluding WATS closed end access service, is apportioned between state and interstate operations on the same basis as that used for the apportionment of the cost of COSP Category 1.33.

* * * * *

(5) Exchange circuit plant testing expense assigned private line services and WATS closed end access service is apportioned among the operations on the basis of the relative number of working loops (weighted if appropriate) used in furnishing exchange services, state private line services, state WATS closed end access service, interstate private line services, and interstate WATS closed end access service.

* * * * *

(c) * * *

(4) The expense of testing all other inter-office circuit plant is further segregated among exchange trunk plant, interexchange circuit plant, host/remote message circuit plant on the basis of the relative number of circuit miles provided for each of these classifications in the study area. In cases where substantial numbers of circuit miles are provided for TWX service, private line services (other than wideband special services), WATS closed end access service, or exchange trunks, and where analyses of trouble reports or other records indicate that the testing expense associated with any of these classifications is significantly different from the corresponding expense per circuit mile associated with message interexchange service, excluding WATS closed end access circuit miles, appropriate weighting factors are applied to the counts of circuit miles for individual classifications to recognize this difference in testing expense. These weighting factors are based on periodic studies of charges to Account 603 for interoffice circuit plant testing during a representative period.

(5) The interexchange circuit trunk testing expense is further segregated among message telephone excluding WATS closed end access, TWX, private line and WATS closed end access services on the basis of the relative number of interexchange circuit miles (weighted, if appropriate) provided for each of these services in the study area.

(i) Interexchange circuit plant testing expense assigned message telephone excluding WATS closed end access is apportioned between state and interstate operations on the basis of the relative number of interexchange message telephone circuit miles, excluding WATS closed end access circuit miles, in the study area assigned to each operation. Jointly used circuit miles are apportioned between state and interstate operations on the basis of conversation-minute-miles.

* * * * *

(iii) Interexchange circuit plant testing expense assigned private line and WATS closed end access services are apportioned between state and interstate operations on the basis of the relative number of interexchange private line and WATS closed end access circuit miles (weighted, if appropriate) in the study area assigned each operation.

* * * * *

(6) Exchange circuit plant testing expenses assigned wideband services is apportioned among the operations on the basis of the assignment of host/remote message outside plant.

* * * * *

12. Effective June 1, 1986, § 67.611 is amended by revising paragraph (a)(1)–(4) and (8) to read as follows:

§ 67.611 Submission of information to the National Exchange Carrier Association.

(a) * * *

(1) Unseparated, i.e., state and interstate, gross plant investment in Outside subscriber Line Plant (OSP) Category 1.33, and COE Category 8.13. This amount shall be calculated as of December 31st of the year preceding each June filing.

(2) Unseparated depreciation reserve and accumulated deferred federal income taxes attributable to OSP Category 1.33 investment, and COE Category 8.13 investment. These amounts shall be calculated as of December 31st of the year preceding each June filing, and shall be stated separately.

(3) Unseparated depreciation expense attributable to OSP Category 1.33 investment, and COE Category 8.13 investment. This amount shall be the actual depreciation expenses for the calendar year preceding each June filing.

(4) Unseparated maintenance expenses attributable to OSP Category 1.33 investment and COE Category 8.13 investment. This amount shall be the actual maintenance expense for the calendar year preceding each June filing.

* * * * *

(8) The number of working subscriber line outside loops used jointly for non-wideband exchange and message telephone service, excluding WATS closed end access and TWX service, but including subscriber line outside plant associated with pay telephone (OSP Category 1.33). This figure shall be calculated as of December 31st of the year preceding each June filing.

13. Effective June 1, 1986, § 67.621 is amended by revising paragraph (a) to read as follows:

§ 67.621 National and study area average unseparated loop cost per working loop.

(a) Study area unseparated loop cost. For the purposes of calculation of the expense adjustment, the study area unseparated loop cost is equal to the sum of the following:

(1) Return component for net unseparated OSP Category 1.33 investment, and COE Category 8.13 investment. This amount is calculated by deducting the depreciation reserve and accumulated deferred federal income taxes attributable to OSP Category 1.33 investment and COE Category 8.13 investment reported pursuant to § 67.611(a)(2) from the gross plant investment in OSP Category 1.33, and COE Category 8.13 reported pursuant to § 67.611(a)(1) to obtain the net unseparated OSP Category 1.33 investment, and COE Category 8.13 investment. The net unseparated OSP Category 1.33 investment, and COE Category 8.13 investment is multiplied by the study area's cost of capital. The cost of capital is calculated by multiplying the embedded cost of debt times the percent of the total capital that is debt and adding to this amount the product of the authorized interstate rate of return on equity times the percent of total capital that is equity as this information is reported in § 67.611(a)(9).

(2) Depreciation expense attributable to OSP Category 1.33 investment, and COE Category 8.13 investment as reported in § 67.611(a)(3).

(3) Maintenance expense attributable to OSP Category 1.33 investment, and COE Category 8.13 investment as reported in § 67.611(a)(4).

(4) General, other expenses and taxes attributable to OSP Category 1.33 investment, and COE Category 8.13 investment. This amount equals the net unseparated OSP Category 1.33 investment, and COE Category 8.13 investment as calculated in § 67.621(a)(1) multiplied by the unseparated general and other expenses and taxes as reported in § 67.611(a)(5) divided by the unseparated net investment for total telephone plant for the study area. The unseparated net investment for total telephone plant for the study area equals the unseparated gross telephone plant investment as reported in § 67.611(a)(6) minus the unseparated depreciation reserve and accumulated deferred federal income taxes attributable to total telephone plant as reported in § 67.611(a)(7).

14. Effective June 1, 1986, § 67.701 is revised by removing the definition of "Message service" and inserting the new term "Message service or message toll service", to read as follows:

§ 67.701 Glossary.

* * * * *

Message service or message toll service—Switched service furnished to the general public (as distinguished from private line service). Except as otherwise provided, this includes exchange switched services and all switched services provided by interexchange carriers and completed by a local telephone company's access services, e.g., MTS, WATS, Execunet, open end FX and CCSA/ONALS.

* * * * *

Appendix B

PART 69—[AMENDED]

47 CFR Part 69 is amended as follows:

1. The authority for Part 69 continues to read as follows:

Authority: Secs. 4, 201, 202, 203, 205, 218, 403, 48 Stat. 1066, 1070, 1072, 1077, 1094, as amended, 47 U.S.C. 154, 201, 202, 203, 205, 218, 403, unless otherwise noted.

2. Section 69.202 is amended by revising paragraph (c) to read as follows:

§ 69.202 Initial End User Common Line Charges.

* * * * *

(c) A charge that is the lesser of the charge computed pursuant to § 69.104(d) or $2 shall be assessed for each line used for Centrex/CO service that was in place or on order on July 27, 1983. Effective June 1, 1986, each such line shall be assessed a charge that is the lesser of the charge computed pursuant to § 69.104(d) or $3.

BILLING CODE 6712-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Administration

48 CFR Parts 2401, 2403, 2407, 2414, 2415 and 2416

[Docket No. R-86-1270; FR-2196]

Acquisition Regulations; Technical Amendments and Corrections

AGENCY: Office of the Assistant Secretary for Administration, HUD.

ACTION: Final rule; technical amendments.

SUMMARY: This final rule amends and corrects the HUD Acquisition Regulation (HUDAR) to redesignate certain delegations of authority in various sections of the HUDAR to the Department's "Senior Procurement Executive" as defined in HUDAR 2402.101. In addition, this rule revises HUDAR 2416.405 to rephrase certain terms to read "Clause" or "Clauses". Finally, HUDAR 2415.506 is revised to delegate to the Office of the Assistant Secretary for Community Planning and Development the responsibility for ensuring that unsolicited proposals for funding under the Secretary's Discretionary Fund Program are controlled, evaluated, safeguarded, and disposed of in accordance with FAR Subpart 15.5.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Edward L. Girovasi, Jr., Director, Policy and Evaluation Division, Office of Procurement and Contracts, telephone (202) 755–5294. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The uniform regulations for the procurement of supplies and services by Federal departments and agencies—the Federal Acquisition Regulation (FAR)—were promulgated on September 19, 1983 (48 FR 42102). HUD promulgated its acquisition regulation (HUDAR) implementing the FAR in the Federal Register of March 1, 1984 (49 FR 7686). The HUDAR is codified at Title 48, Chapter 24 of the Code of Federal Regulations, and has been later revised in the Federal Register of November 8, 1985 (50 FR 46572).

The HUDAR revisions in this rule implement modifications of the FAR and HUD internal procedures since the effective date of the HUDAR (April 1, 1984). Many of these revisions concern the substitution of the term "Senior Procurement Executive" for "Procurement Executive". The term

VOL

1986
UMI

"Senior Procurement Executive" was added to the definitions in FAR 2.100 as part of the FAR revisions published in the **Federal Register** of January 11, 1985 (50 FR 1726). In addition, other revisions concern the substitution of the term "Clause" or "Clauses" for "Articles". The term "Clause" or "Clauses" for "Articles" is used in the FAR, particularly in Part 52. Finally, HUDAR 2415.506 is revised to delegate to the Office of Program Policy Development for the Assistant Secretary of Community Planning and Development the responsibility for ensuring that unsolicited proposals are controlled, evaluated, safeguarded, and disposed of in accordance with FAR Subpart 15.5.

The Department has determined that this document need not be published as a proposed rule, as is generally required by the Administrative Procedure Act (APA), since this rule merely makes technical amendments to existing HUD regulations.

A Finding of No Significant Impact with respect to the environment required by the National Environmental Policy Act (42 U.S.C. 4321–4347) is unnecessary, since these technical amendments are categorically excluded under HUD regulations at 24 CFR 50.20(k).

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of this rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520) requires that Federal agencies obtain approval from the Office of Management and Budget (OMB) before collecting information from 10 or more persons. There are no information collection requirements contained in these technical amendments to the HUDAR.

As required by section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities because it merely makes technical amendments to the Department's regulations.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 29, 1985 (50 FR 44166).

List of Subjects in 48 CFR Parts 2401, 2403, 2407, 2414, 2415 and 2416

Government procurement.

Accordingly, the Department amends Title 48, Chapter 24 of the Code of Federal Regulations as follows:

PART 2401—FEDERAL ACQUISITION REGULATIONS SYSTEM

1. The authority citation for 48 CFR Part 2401 continues to read as follows:

Authority: Sec. 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2401.403 [Amended]

2. In HUDAR 2401.403, the term "Procurement Executive" is replaced with the term "Senior Procurement Executive".

2401.404 [Amended]

3. In HUDAR 2401.404, the term "Procurement Executive" is replaced with the term "Senior Procurement Executive".

PART 2403—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

4. The authority citation for 48 CFR Part 2403 continues to read as follows:

Authority: Sec. 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2403.203 [Amended]

5. In HUDAR 2403.203, the term "Procurement Executive" is replaced with the term "Senior Procurement Executive".

2403.204 [Amended]

6. In HUDAR 2403.204, the term "Procurement Executive" is replaced with the term "Senior Procurement Executive".

2403.303–70 [Amended]

7. In HUDAR 2403.303–70, the term "Procurement Executive" is replaced with the term "Senior Procurement Executive".

2403.601 [Amended]

8. In HUDAR 2403.601, the term "Procurement Executive" is replaced with the term "Senior Procurement Executive".

PART 2407—ACQUISITION PLANNING

9. The authority citation for 48 CFR Part 2407 continues to read as follows:

Authority: Sec. 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2407.102 [Amended]

10. In HUDAR 2407.102, the term "Procurement Executive" is replaced with the term "Senior Procurement Executive".

PART 2414—SEALED BIDDING

11. The authority citation for 48 CFR 2414 continues to read as follows:

Authority: Sec. 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2414.407–701 [Amended]

12. In HUDAR 2414.407–701, the second paragraph "(b)" in that section is corrected to read "(d)".

PART 2415—CONTRACTING BY NEGOTIATION

13. The authority citation for 48 CFR Part 2415 continues to read as follows:

Authority: Sec. 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

14. In HUDAR 2415.506, the current paragraph (b)(2) is redesignated as paragraph (b)(3), and a new paragraph (b)(2) is added, to read as follows:

2415.506 Agency procedures.

* * * * *

(b) * * *

(2) *For funding under the Secretary's Discretionary Fund Program*—Department of Housing and Urban Development, Assistant Secretary for Community Planning and Development, Office of Program Policy Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

* * * * *

PART 2416—TYPES OF CONTRACTS

15. The authority citation for 48 CFR 2416 continues to read as follows:

Authority: Sec. 205(c) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)); sec. 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2416.405 [Amended]

16. In HUDAR 2416.405, the term "Article" is replaced with the term "Clause", and the term "Articles" or "General Provisions" is replaced with the term "Clauses".

Dated: February 27, 1986.

Judith L. Tardy,

Assistant Secretary for Administration.

[FR Doc. 86–5059 Filed 3–6–86; 8:45 am]

Vol. 51, No. 45
Friday, March 7, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 86-009]

9 CFR Parts 1, 2, and 3

Animal Welfare Standards; Laboratory Animals

AGENCY: Animal and Plant Health Inspection Services, USDA.

ACTION: Solicitation of information for drafting proposed regulations and standards under Pub. L. 99–198.

SUMMARY: Pub. L. 99–198, title XVII, Subtitle F, commonly known as the "Improved Standards for Laboratory Animals Act," amends the Animal Welfare Act. This law was signed by the President on December 23, 1985, and requires the Secretary to develop and promulgate standards and regulations in certain areas of animal care and use not previously regulated. In order to develop more workable and equitable regulations and standards, the Department is soliciting comments and suggestions.

DATE: Written comments must be received by May 6, 1986.

ADDRESS: Written comments should be submitted to Dr. R. L. Crawford, Animal Care Staff, Animal and Plant Health Inspection Service, USDA, Room 756, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected in Room 756 of the Federal Building between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Animal Care Staff, Animal and Plant Inspection Service, USDA, Room 756, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Telephone (301) 436–7833.

SUPPLEMENTARY INFORMATION: The Secretary will promulgate additional standards and regulations for the care and treatment of animals in research and by licenses. By this notice, the Department invites interested parties to submit any relevant comments on the following areas:

1. Exercise for dogs held by dealers, research facilities, and exhibitors.

a. What is the minimum period of exercise and the types of exercise that should be required.

b. How often should dogs be exercised.

c. What dogs require exercise (i.e., long-term holding, short-term holding, or all dogs).

2. Psychological well-being of primates held by dealers, research facilities, and exhibitors.

a. What is the minimum space and time period of exercise that should be required.

b. What types of devices or articles should be provided for environmental enrichment.

c. How often should this exercise and enrichment be provided.

d. Should it apply to long-term animals, short-term animals, or all animals,

3. A general listing of painful procedures which should require the use of anesthetics, analgesics, or tranquilizers in research animals at research facilities.

4. A general listing of major operative experiments from which an animal is allowed to recover, which should prohibit the same animal being used in another major operative experiment from which it is allowed to recover for surgical animals used by research facilities.

Comments received will be reviewed and considered during the drafting of proposed regulations and standards under the Animal Welfare Act amendment. It is anticipated that regulations in 9 CFR part 2 will be drafted and published as proposed rulemaking during the summer of 1986. Standards in 9 CFR Part 3 will be drafted and published at a later date.

Done at Washington, DC, this 4th day of March 1986.

J. K. Atwell,

Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 86–ASW–1]

Proposed Amendment of Transition Area; Dallas/Fort Worth, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the transition area at Dallas/Fort Worth, TX. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing a new standard instrument approach procedure (SIAP) to the Bourland Field Airport, Cresson, TX. This action is necessary since there is a proposed VOR/DME SIAP to the Bourland Field Airport utilizing the Action VORTAC (AQN). This proposed action is an amendment to the existing Dallas/Fort Worth, TX, transition area which already provides part of the necessary controlled airspace for Bourland Field Airport. Coincident with this proposed action, the airport status will be changed from visual flight rules (VFR) to instrument flight rules (IFR).

DATES: Comments must be received on or before April 21, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 86–ASW–1, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

The informal docket may also be examined during normal business hours at the Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: David J. Souder, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (817) 877–2822.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86–ASW–1." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, P.O. Box 1689, Fort Worth, TX 76101. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Dallas/Fort Worth, TX, transition area, thereby establishing a 700-foot transition area for aircraft conducting IFR activity at Bourland Field Airport, Cresson, TX. To enhance airport usage, a new instrument approach procedure is being developed for the Bourland Field Airport, Cresson, TX, utilizing the Action VORTAC as a navigational aid. The establishment of a new instrument approach procedure based on this navigational aid entails amending the Dallas/Fort Worth, TX, transition area to encompass Bourland Field Airport and the SIAP, at and above 700 feet above ground level within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and en route environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under IFR and other aircraft operating under VFR. This action will change the airport status from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations were republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979; and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.65.

2. Section 71.181 is amended as follows:

Dallas/Fort Worth, TX Amended

That airspace extending upward from 700 feet above the surface bounded by a line beginning at latitude 33°11'00"N., longitude 97°27'00"W.; to latitude 33°11'00"N., longitude 97°19'00"W.; to latitude 33°26'00"N., longitude 97°15'00"W.; to latitude 33°26'00"N., longitude 97°07'00"W.; to latitude 33°19'00"N., longitude 97°06'00"W.; to latitude 33°19'00"N., longitude 96°57'00"W.; to latitude 33°08'30"N., longitude 96°36'00"W.; to latitude 33°08'30"N., longitude 96°25'00"W.; to latitude 33°00'15"N., longitude 96°25'15"W.; thence clockwise along the arc of a 5-mile radius circle centered at latitude 32°56'00"N., longitude 96°26'00"W.; to latitude 32°51'30"N., longitude 96°25'30"W.; to latitude 32°44'00"N., longitude 96°26'00"W.; to latitude 32°41'00"N., longitude 96°29'30"W.; to latitude 32°37'30"N., longitude 96°30'15"W.; to latitude 32°37'45"N., longitude 96°32'45"W.; to latitude 32°34'00"N., longitude 96°37'00"W.; to latitude 32°29'00"N., longitude 96°32'00"W.; to latitude 32°25'00"N., longitude 96°38'00"W.; to latitude 32°31'00"N., longitude 96°44'00"W.; to latitude 32°29'00"N., longitude 97°01'00"W.; to latitude 32°23'00"N., longitude 97°05'00"W.; to latitude 32°16'30"N., longitude 97°25'30"W.; to latitude 32°19'30"N., longitude 97°33'00"W.; to latitude 32°25'00"N., longitude 97°33'00"W.; to latitude 32°25'00"N., longitude 97°42'00"W.; thence north along longitude 97°42'00"W., to and clockwise along the arc of a 23-mile radius circle centered at latitude 32°46'20"N., longitude 97°26'30"W.; to latitude 32°55'00"N.; to longitude 97°56'00"W.; to latitude 33°15'30"N., to longitude 97°49'00"W.; to latitude 33°13'30"N., thence clockwise along the arc of a 5-mile radius circle centered at latitude 33°15'30"N., longitude 97°34'40"W.; to latitude 33°12'00"N., longitude 97°31'30"W.; to point of beginning and within a 6.5-mile radius of the McKinney Municipal Airport (latitude 33°10'43"N., longitude 96°35'25.5"W.) and within 3 miles either side of the 010-degree bearing from the NDB (latitude 33°10'43"N., longitude 96°35'34.5"W.) extending from the 6.5-mile radius area to 8.5 miles north of the NDB; and within a 6.5-mile radius of the Cleburne Municipal Airport (latitude 32°21'16"N., longitude 97°26'02"W.).

Issued in Fort Worth, TX, on February 24, 1986.

Donald R. Guempel,

Acting Manager, Air Traffic Division, Southwest Region.

[Airspace Docket No. 86–ASW–6]

Proposed Amendment of Transition Area; Shawnee, OK

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the transition area at Shawnee, OK. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing a new standard instrument

VOL 51 ISS 45 MR 7 1986 UMI

approach procedure (SIAP) to the Prague Municipal Airport, Prague, OK. This action is necessary since the city of Prague intends to establish a nonfederal nondirectional radio beacon (NDB) approximately 2 miles north of the Prague Municipal Airport. This proposed action is an amendment to the existing Shawnee transition area which already provides part of the necessary controlled airspace for Prague. Coincident with this proposed action, the airport status will change from visual flight rules (VFR) to instrument flight rules (IFR).

DATES: Comments must be received on or before April 21, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 86–ASW–6, Federal Aviation Administration, P.O. Box 1689, Forth Worth, TX 76101.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

The informal docket may also be examined during normal business hours at the Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: David J. Souder, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Forth Worth, TX 76101; telephone: (617) 877–2822.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86–ASW–6." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, P.O. Box 1689, Fort Worth, TX 76101. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Shawnee, OK, transition area, thereby establishing a 700-foot transition area at Prague, OK. To enhance airport usage, a new instrument approach procedure is being developed for the Prague Municipal Airport, Prague, OK, utilizing the Prague NDB (GGU) as a navigational aid. This navigational aid will provide new navigational guidance for aircraft utilizing the airport. The establishment of a new instrument approach procedure based on this navigational aid entails amending the Shawnee, OK, transition area to encompass Prague Municipal Airport and the new SIAP at and above 700 feet above ground level within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and en route environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under IFR and other aircraft operating under VFR. This action will change the airport status from VFR to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.65.

2. Section 71.181 is amended as follows:

Shawnee, OK Amended

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Shawnee Municipal Airport (latitude 35°21'16" N., longitude 96°56'33" W.); within 3.5 miles each side of the 007-degree bearing from the Shawnee NDB (latitude 35°20'52" N., longitude 96°56'48" W.) extending from the 8.5-mile radius area to 11.5 miles north of the NDB; within an 8.5-mile radius of Seminole Municipal Airport (latitude 35°16'15" N., longitude 96°40'30" W.); and within 3.5 miles each side of the 353-degree bearing from the Seminole NDB (latitude 35°16'08" N., longitude 96°40'30" W.) extending from the 8.5-mile radius area to 11.5 miles north of the NDB; within an 8.5-mile radius of Prague Municipal Airport (latitude 35°28'45" N., longitude 96°43'03" W.); and within 4 miles each side of the 360-degree bearing from the Prague NDB (latitude 35°31'00" N., longitude 96°43'06" W.) extending from the 8.5-mile radius area to 14 miles north of the NDB, excluding the portion which overlies the chandler, OK, transition area.

Issued in Fort Worth, TX, on February 24, 1986.

Donald R. Guempel,

Acting Manager, Air Traffic Division, Southwest Region.

14 CFR Part 71

[Airspace Docket No. 86–ASW–4]

Transition Area: Mountain View, AR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the transition area at Mountain View, AR. The intended effect of the proposed action is to provide adequate controlled airspace for aircraft executing a new standard instrument approach procedure (SIAP) to the Wilcox Memorial Airport, Mountain View, AR. This action is necessary because the proposed new SIAP on which the existing transition area is based has been revised. This amendment will not change the volume of controlled airspace needed to accommodate instrument flight rules (IFR) activity, but will reorient the transition area extension approximately 60 degrees clockwise.

DATES: Comments must be received within April 7, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 86–ASW–4, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

The informal docket may also be examined during normal business hours at the Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Forth Worth, TX.

FOR FURTHER INFORMATION CONTACT: David J. Souder, Airspace and Procedures Branch, ASW–535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101; telephone: (617) 877–2822.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86–ASW–4." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, P.O. Box 1689, Fort Worth, TX 76101. Communications must identify the notice number of this NRPM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Mountain View, AR, transition area by reorienting that portion which extends beyond the 6.5-mile radius approximately 60 degrees clockwise. The intended effect of this action will ensure segregation of aircraft using the new SIAP under IFR and other aircraft operating under visual flight rules (VFR). Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.65.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Mountain View, AR

That airspace extending upwards from 700 feet above the surface within a 6.5-mile radius of the Wilcox Memorial Airport (latitude 35°51'52" N., longitude 92°05'33" W.) and within 3 miles each side of the 104-degree bearing of the NDB (latitude 35°52'05" N., longitude 92°04'40" W.) extending from the 6.5-mile radius area to 6.5 miles east of the NDB.

Issued in Fort Worth, TX, on February 25, 1986.

Donald R. Guempel,

Acting Manager, Air Traffic Division, Southwest Region.

[Airspace Docket No. 86-ASW-7]

Transition Area; Bonham, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the transition area at Bonham, TX. The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing a new standard instrument approach procedure (SIAP) to the Jones Field Airport, Bonham, TX. This action is necessary since the FAA has under consideration the proposed establishment of a nonfederal nondirectional radio beacon (NDB). The NDB will be located on the airport east of Runway 17/32 at (latitude 33°36′50″ N., longitude 96°10′33″ W.). This proposed action will benefit aircraft conducting instrument flight rules (IFR) activity at Jones Field Airport.

DATES: Comments must be received by April 21, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 86-ASW-7, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

The informal docket may also be examined during normal business hours at the Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to provide additional 700-foot transition area at Bonham, TX. To enhance airport usage, a new instrument approach procedure is being developed for the Jones Field Airport, Bonham, TX, utilizing the Bonham NDB as a navigational aid. This navigational aid will provide new navigational guidance for aircraft utilizing the airport. The establishment of a new instrument approach procedure based on this navigational aid entails designation of additional transition area at Bonham, TX, at and above 700 feet above ground level within which aircraft are provided air traffic control service.

Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and en route environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under IFR and other aircraft operating under VFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, etc.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.65.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Bonham, TX

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Jones Field Airport, Bonham, TX, (latitude 33°36′41″ N., longitude 96°10′45″ W.) and within 4.5 miles each side of the 025-degree radial of the Blue Ridge VORTAC extending from the 6.5-mile radius area to 42.5 miles northeast of the VORTAC, and within 2.5 miles each side of the 346-degree bearing from the Bonham NDB (latitude 33°36′50″ N., longitude 96°10′33″ W.) extending from the 6.5-mile radius to 8.5 miles north of the Bonham NDB.

Issued in Fort Worth, TX, on February 25, 1986.

Donald R. Guempel,

Acting Manager, Air Traffic Division, Southwest Region.

BILLING CODE 4910-13-M

INTERNATIONAL TRADE COMMISSION

19 CFR Part 213

Trade Remedy Assistance

AGENCY: International Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed rules would create a new section of the Rules, Part 213, entitled *Trade Remedy Assistance*. Part 213 covers trade remedy assistance to be provided by the Commission pursuant to new section 339 of the Tariff Act of 1930 (19 U.S.C. 1339), as added by section 221 of the Trade and Tariff Act of 1984. Section 339 of the Tariff Act of 1930 requires the Commission to establish a Trade Remedy Assistance Office to provide information to the public concerning remedies and benefits available under the trade laws, and the petition and application procedures, and the appropriate filing dates, with respect to such remedies and benefits. Section 339 further requires the Commission to provide technical assistance to eligible small businesses to enable them to prepare and file petitions and applications to obtain remedies and benefits that may be available under the trade remedy laws administered by the Commission.

The rules proposed herein establish guidelines for small business eligibility to receive technical assistance, the procedure for applying for such assistance and procedures governing the provision of such assistance by the Trade Remedy Assistance Center Members of the public seeking general information from the Center would not be subject to the application procedures set forth in these proposed rules.

DATE: The Commission will consider comments on these proposed rules received on or before April 21, 1986.

ADDRESS: Comments should conform with Commission rule § 201.8 (19 CFR 201.8) and should be addressed to Kenneth R. Mason, Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436.

FOR FURTHER INFORMATION CONTACT: Jeffrey L. Gertler, Esq., Trade Remedy Assistance Center, U.S. International Trade Commission, Room 130, 701 E Street, NW., Washington, DC 20436, telephone (202) 523-0686.

Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 724-0002.

SUPPLEMENTARY INFORMATION: Authority for this proposed rulemaking is contained in 19 U.S.C. 1335, which authorizes the Commission to adopt such reasonable procedures and rules and regulations as it deems necessary to carry out its functions and duties.

Explanation of Proposed rules

The rules being proposed are designed to fulfill the Congressional mandate set forth in section 339 of the Tariff Act of 1930 (19 U.S.C. 1339), as added by section 221 of the Trade and Tariff Act of 1984 (Pub. L. 98-573, approved Oct. 30, 1984, 98 Stat. 2989), which led to creation of the Trade Remedy Assistance Center ("the Center") to provide, in part, technical assistance to eligible small businesses petitioning the Commission for trade relief. The Center was established at the Commission on January 28, 1985 in accordance with section 339 of the Tariff Act of 1930. In providing technical assistance to an eligible small business, the Center operates independently of other Commission employees.

Congress determined that the technical assistance should be provided to those small businesses which because of their size have neither adequate internal resources nor financial ability to obtain qualified outside assistance. Congress further directed that the provision of technical assistance be limited to such assistance to enable an eligible small business to prepare and file petitions and complaints (other than those which, in the opinion of the Commission, are frivolous) to obtain the remedies and benefits that may be available under an applicable trade law.

In order to fulfill this Congressional mandate, the Commission proposes to adopt a procedure for determining eligibility based upon an applicant's certification that it is a small business (with reference to the Size Standards of the Small Business Administration) and to provide technical assistance up to the filing of the petition for trade remedy relief. Pursuant to new section 339 of the Tariff Act of 1930, the Commission's determination as to eligibility is not reviewable.

The proposed rules first set out definitions of, *inter alia*, technical assistance and eligible small business. Following this definitional section, the proposed rules set out the application procedure. Separate requirements are identified for joint applicants and applications filed by trade associations or unions. The proposed rules then set out the procedures for Commission determination and notification to the applicant and, where appropriate to the Department of Commerce as to the applicant's eligibility to receive technical assistance. Finally, the proposed rules set out a disclosure requirement and address the relationship created between eligible small businesses, the Center and the Commission.

These proposed rules describe the procedure for determining the eligibility of small businesses for purposes of receiving technical assistance only. The Center will of course provide general information on U.S. trade laws in response to every inquiry regardless of whether the inquirer is an eligible small business.

Basis for Referencing SBA Size Standards for Small Business

The Commission proposes to adopt the Small Business Size Standards of the Small Business Administration ("SBA") as the basis for determining the eligibility of business entities seeking technical assistance from the Center. The SBA's size standards are chosen because they offer an objective and readily measurable definition of small business developed from a comprehensive data base.

The SBA's criteria are referenced in section 339 of theTariff Act of 1930 which states in pertinent part that "[i]n determining whether a business concern is an 'eligible small business', the agency may consult with the Small Business Administration. . . . " As a result of discussions with the SBA, the Commission believes that the Small Business Size Standards provides reliable empirical data on what are generally considered to be small businesses.

The SBA's Standards, which classify industries on the basis of the number of employees and the dollar volume of business, among other criteria, are promulgated pursuant to the Small Business Investment Act of 1958, as amended. The applicable measure is the entire business entity, independently owned and operated. Divisions and subsidiaries are counted in determining whether the entity is a small business. Factors considered by the SBA in formulating its size standards include the maximum size of firms, average firm size, the extent of industry dominance by large firms, the number of firms, the distribution by firm size of sales and

VOL 51
ISS 45
MR 7
1986
UMI

employees in the industry, the presence of Federal procurement, and relation to other SBA programs 13 CFR 121.1(b)(3). SBA has promulgated size standards for a variety of programs. The general size standards set forth in 13 CFR 121.2 classify businesses on the basis of number of employees or dollar volume of business and are pertinent to determination of what is a small business under section 339. The size standards in 13 CFR 121.2 are comprehensive; they classify the entire field of economic activities covered by the Bureau of the Census Standard Industrial Classification ("SIC") code. Separate categories are provided for the following major divisions of industry; agriculture; mining; construction; manufacturing; transportation, communications, electric, gas and sanitary services; wholesale trade; retail trade; finance, insurance and real estate; and services. 13 CFR 121.2. In virtually all investigations under the trade statutes, manufacturing or agriculture is the relevant category. These size standards, based on employment or annual receipts, are easily measured and provide a simple, cost-effective definition of small business under section 339.

For most industries, the SBA size standards promulgated in 13 CFR 121.2 classify a business concern as small if it has an average of 500 employees or less in the most recent 12-month period. A few businesses are still classified as small with as many as 1500 employees. In addition, the SBA classifies service businesses as small based upon annual average gross receipts for the preceding three years.

These specific size standards are used for determinations of eligibility for most SBA financial assistance programs and for Government procurement programs. 13 CFR 121.4 and 121.5. Similar size standards are also used by other federal agencies. For example, the Patent and Trademark Office of the U.S. Department of Commerce defines a business concern as small for purposes of paying reduced fees to the Patent and Trademark Office if, *inter alia*, the number of employees does not exceed 500 persons. 13 U.S.C. 121.12. The International Trade Administration of the Department of Commerce proposes to provide technical assistance, pursuant to section 339 of the Tariff Act of 1930, to any business that applies, without reference to any particular size limitation. Proposed Rule 19 CFR 355(i) (50 FR 24220, June 10, 1985). The Commission believes that the SBA Size Standards provide an appropriate threshold for determining eligibility pursuant to these rules.

Certification

In order to apply for technical assistance, an applicant (which may be any entity that may file a petition or a complaint) must certify to the Center in a written application that it meets the SBA Size Standards for the appropriate SIC classification. The certification must be signed under oath by an officer or principal of the applicant. The certification shall include the SIC number and the number of employees or annual receipts of the business concern. An appropriate format for the certification is attached to the proposed rules as Exhibit A.

In the case of a business concern applying for technical assistance, the officer or principal must certify that the business concern is independently owned and operated. If several business concerns jointly or simultaneously from the same industry apply for technical assitance, each business concern must meet the appropriate SBA size standard(s) and so certify. If a trade association applies for technical assistance, an officer of the trade association must certify that each of the trade association's members meets the appropriate size standards. If a union applies for technical assistance, an officr of the union must certify that the union has less than 10,000 members within the industry for which trade relief is being sought.

Determination and Notification

Within ten (10) days of receiving a properly completed application, the Center will notify an applicant of its eligibility to receive technical assistance. The Center encourages all applicants to discuss their requests for technical assistance with the Center's staff prior to filing the application.

If an application is granted, the receipt of technical assistance by an eligible small business must be disclosed in any resulting petition or complaint filed with the Commission.

The Center will promptly notify the Department of Commerce of the Commission's determination to provide technical assistance to an eligible small business where that assistance relates to an antidumping or a countervailing duty investigation under Title VII of the Tariff Act of 1930. The Commission will then consult with the Department of Commerce with regard to the provision of technical assistance to that eligible small business.

A determination of the Commission that an applicant is eligible to receive technical assistance in accordance with these rules is not and shall not be construed as a determination on the merits of any request subsequently filed by an eligible small business. Nor will such a determination carry any other legal consequence. Eligibility to receive technical assistance from the Center will not give an eligible small business any special rights of access to Commission resources other than those of the Center itself.

Technical Assistance to Eligible Small Businesses

If a small business is determined to be eligible in accordance with the above-proposed criteria, the Center will provide appropriate technical assistance to that small business up to the date of filing of a petition or a complaint with the Commission.

The Commission's decision to limit the availability of technical assistance to the period prior to the filing of a petition or a complaint is based upon the language and legislative history of the Trade and Tariff Act of 1984. New section 339 of the Tariff Act of 1930, as added by section 221 of the 1984 Act, limits technical assistance to that enabling eligible small businesses "to prepare and file petitions and applications . . . ." Continuing assistance past the time of filing petitions and complaints is not contemplated. Moreover, the legislative history indicates that technical assistance from the Commission should not include advocacy services:

> [The Commission's Trade Remedy Assistance Center] would assist in the preparation and filing of the necessary petitions. This assistance would include the legal and economic information support (including any non-confidential data available to the agency) necessary to file, but would not include advocacy services. Since the agency must remain in the role of investigator and fact-finder, it would not be appropriate for it to take a partisan role in the dispute.

H. Rep. 98–725, 98th Cong., 2d. Sess. (1984), at 49.

In addition, the Commission believes that there is no need for continuing assistance to eligible small businesses once an investigation has been instituted and the Commission has assigned its investigative staff to the investigation.

Technical assistance may include informal advice and assistance, including legal advice, to enable eligible small businesses to prepare petitions and complaints to obtain the remedies and benefits under one or more trade remedy laws administered by the Commission.

It is contemplated that the Center will assist eligible small businesses at the pre-institution stage in organizing and assembling relevant background material and in preparing its petition or complaint. The Center's staff will work closely with the small business in reviewing drafts, advising as to compliance with the statute and the rules, and suggesting additions, deletions and possible alternative presentations of the relevant material in light of Commission precedent. The Center's staff will also discuss the eligible small business' further development of the case through the various stages of the investigation. Nevertheless, small business petitioners/complainants should be fully aware that the Center will only be providing assistance and will not be advocating on their behalf. Technical assistance to be provided by the Center is not the equivalent of representation by private counsel.

Foreign trade, Small businesses, Technical assistance.

Proposed Rules

19 CFR Chapter II is amended by adding a new Part 213, to Subchapter C to read as follows:

PART 213—TRADE REMEDY ASSISTANCE

Sec.
213.1 Purpose and applicability of part.
213.2 In general.
213.3 Definitions.
213.4 Determination of small business eligibility.
213.5 Disclosure of receipt of technical assistance.
213.6 Access to Commission resources.
213.7 Information concerning assistance.
Exhibit A—Application for Technical Assistance from the Trade Remedy Assistance Center of the U.S. International Trade Commission

Authority: Sec. 339 of the Tariff Act of 1930 (19 U.S.C. 1339), as added by sec. 221, Trade and Tariff Act of 1984 (Pub. L. 98–573, approved Oct. 30, 1984; 98 Stat. 2989); sec. 335, Tariff Act of 1930 (72 Stat. 680; 19 U.S.C. 1335).

§ 213.1 Purpose and applicability of part.

Section 339 of the Tariff Act of 1930 establishes a Trade Remedy Assistance Office in the Commission and directs the Comission to provide: (a) general information to the public concerning the remedies and benefits available under certain trade laws and the procedures followed in investigations under those trade laws; and (b) technical assistance to eligible small businesses seeking remedies and benefits under the trade remedy laws administered by the Commission.[1] The rules in this part govern the establishment of the Trade Remedy Assistance Center, its function, small business eligibility for technical assistance, and procedures for obtaining such assistance. Members of the public seeking general information from the Trade Remedy Assistance Center are not subject to the application procedures set forth in this Part.

§ 213.2 In General.

An eligible small business may receive appropriate technical assistance from the Trade Remedy Assistance Center in accordance with this Part if due to its small size it has neither adequate intenal resources nor the financial ability to obtain qualified outside assistance.

§ 213.3 Definitions.

(a) *Center.* The Trade Remedy Assistance Center shall be referred to as the Center. The Center provides (1) general information to the public concerning the remedies and benefits available under certain trade laws and the procedures followed in investigations undert those trade laws; and (2) technical assistance to elibible small businesses seeking remedies and benefits under the trade remedy laws administered by the Commission.

(b) *Trade Remedy Laws.* The trade remedy laws (with respect to which technical assistance is available) are defined as: Section 201 of the Trade Act of 1974, 19 U.S.C. 2251 ("escape clause" investigations); section 406 of the Trade Act of 1974, 19 U.S.C. 2436 (market disruption investigations); Title VII of the Tariff Act of 1930, 19 U.S.C. 1671 et seq. (countervailing and antidumping duty investigations); and section 337 of the Tariff Act of 1930, 19 U.S.C. 1337 (unfair practices in import trade).

(c) *Technical Assistance.* Technical assistance is informal advice and assistance, including legal advice, to enable eligible small business to prepare petitions and complaints (other than those which are frivolous) to obtain the remedies and benefits available under the trade remedy laws enumerated in § 213.3(b) of this Part. Technical assistance shall be available to eligible small businesses up to the date of the filing of a petition or complaint at the Commission. The Center provides such technical assistance independently of other Commission staff.

(d) *Applicant.* An applicant is any entity which may file a petition or a complaint, including but not limited to an individual, partnership, corporation, joint venture, trade or other association, cooperative, group of workers or certified or recognized union.

(e) *Eligible Small Business.* An eligible small business is an applicant that the Commission has determined to be entitled to technical assistance in accordance with the eligibility criteria and procedures set forth in this Part.

(f) *SBA Size Standards.* SBA size standards are the small business size standards of the Small Business Administration set forth in 13 CFR 121.2. The SBA size standards categorize business concerns according to the Standard Industrial Classification ("SIC") code of the Bureau of Census and base the size determination upon the number of employees or annual receipts of the business concern in the appropriate SIC category.

§ 213.4 Determination of small business eligibility.

(a) *Certification of Eligibility.* An applicant that qualifies under the SBA size standards shall be eligible for

---

[1] Section 339 of the Tariff Act of 1930 provides in pertinent part as follows:

"(a) There is established in the Commission a Trade Remedy Assistance Office which shall provide full information to the public, upon request, concerning—

"(1) remedies and benefits available under the trade laws, and

"(2) the petition and application procedures, and the appropriate filing dates, with respect to such remedies and benefits.

"(b) Each agency responsible for administering a trade law shall provide technical assistance to eligible small businesses to enable them to prepare and file petitions and applications (other than those which, in the opinion of the agency, are frivolous) to obtain the remedies and benefits that may be available under the law.

"(c) For purposes of this section—

"(1) The term 'eligible small business' means any business concern which, in the agency's judgment, due to its small size, has neither adequate internal resources nor financial ability to obtain qualified outside assistance in preparing and filing petitions and applications for remedies and benefits under trade laws. In determining whether a business concern is an 'eligible small business', the agency may consult with the Small Business Administration, and shall consult with any other agency that has provided assistance under subsection (b) to that business concern. An agency decision regarding whether a business concern is an eligible small business for purposes of this section is not reviewable by any other agency or by any court.

"(2) The term "trade laws" means—

"(A) chapter 1 of title II of the Trade Act of 1974 (19 U.S.C. 2251 et seq., relating to relief caused by import competition);

"(B) chapters 2 and 3 of such title II (relating to adjustment assistance for workers and firms);

"(C) chapter 1 of title III of the Trade Act of 1974 (19 U.S.C. 2411 et seq., relating to relief from foreign import restrictions and export subsidies);

"(D) title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq., relating to the imposition of countervailing duties and antidumping duties);

"(E) section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862, relating to the safeguarding of national security); and

"(F) section 337 of the Tariff Act of 1930 (19 U.S.C. 1337, relating to unfair practices in import trade).

VOL 51

1986
UMI

technical assistance from the Center. In order to apply, an applicant must certify to the Commission that it meets the appropriate SBA size standard and provide said certification to the Trade Remedy Assistance Center, U.S. International Trade Commission, 701 E Street, NW., Washington 20436. The certification shall be signed under oath by an officer or principal of the applicant in a form similar to that shown in Exhibit A.

(b) *Business Concerns, Joint Applications, Trade Associations, Unions.* A business concern applying for technical assistance must certify that it is independently owned and operated. If several business concerns jointly or simultaneously from the same industry apply for technical assistance, each business concern must meet the appropriate SBA size standard(s) and so certify. If a trade association applies for technical assistance, and officer of the trade association must certify that each of the trade association's members meets the appropriate size standards. If a union applies for technical assistance, an officer of the union must certify that the union has less than 10,000 members within the industry for which trade relief is being sought.

(c) *Notification of Determination.* The Center shall notify an applicant of that applicant's eligibility to receive technical assistance within ten (10) days of receipt of a properly completed application. Pursuant to 19 U.S.C. 1339(c)(1), the determination is not reviewable by any other agency or by any court.

(d) *Notification to Commerce.* Where an applicant seeks technical assistance on a trade matter involving Title VII of the Tariff Act of 1930, 19 U.S.C. 1671 et seq. (antidumping or countervailing duty investigations), the Center shall: (1) Promptly notify the U.S. Department of Commerce of the Commission's determinations as to the eligibility of the applicant to receive technical assistance; and (2) consult with the U.S. Department of Commerce as to the provision of technical assistance to that applicant.

§ 213.5 Disclosure of receipt of technical assistance.

The receipt of technical assistance from the Center by or on behalf of an eligible small business shall be disclosed in any resulting petition or complaint filed with the Commission.

§ 213.6 Access to Commission resources.

Commission resources other than those of the Center shall be available to eligible small businesses to the same extent that such resources are available to members of the general public. No special rights of access to Commission resources shall be accorded to eligible small businesses.

§ 213.7 Information concerning assistance.

Interested parties may contact the Center with any questions regarding eligibility. Summaries of the import relief statutes and the SBA Size Standards can be obtained by writing to the Trade Remedy Assistance Center, U.S. International Trade Commission, Room 130, 701 E Street NW., Washington, DC 20436.

DEPARTMENT OF STATE

22 CFR Part 7

[SD-197]

Board of Appellate Review; South Africa Fair Labor Standard Cases

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Board of Appellate Review proposes to revise its regulations to reflect jurisdiction acquired pursuant to 22 CFR 64.1(b), which entitles any U.S. national operating in South Africa, who, under 22 CFR 64.1(a), has been determined by the Department of State to have failed to comply with the Fair Labor Standards set forth in 22 CFR 61.2, to file a written appeal within 30 days of notification of the decision with the Board of Appellate Review.

DATE: Comments must be submitted on or before April 7, 1986.

ADDRESS: For mailing public comments: Board of Appellate Review, Department of State (L/BAR), SA-1, Room W-115, Washington, DC 20520.

For hand delivery of public comments: Board of Appellate Review, Columbia Plaza, 2401 E Street, NW., Room W-115, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Alan G. James (Chairman), Board of Appellate Review. (202) 663-1364.

SUPPLEMENTARY INFORMATION: 22 CFR Parts 60 through 65 implement the Fair Labor provisions of Executive Order 12532 of September 9, 1985 (50 FR 36861), which provide that no department or agency of the United States may intercede after December 31, 1985 with any foreign government regarding the export marketing activities of certain U.S. firms operating in South Africa unless they adhere to the Fair Labor Standards set forth in the Executive Order.

22 CFR 64.1(b), provides that any U.S. national who has been determined by the Department of State to have failed to adhere to the principles specified in 22 CFR 61.2 shall be entitled to appeal the determination to the Board of Appellate Review within 30 days of receipt of notification of the decision.

The Board of Appellate Review proposed to revise regulations to reflect this newly acquired jurisdiction.

In consideration of the foregoing, the Board of Appellate Review proposes that in Chapter I of Title 22, Code of Federal Regulations Part 7 be amended as follows:

PART 7—BOARD OF APPELLATE REVIEW

1. The authority citation for 22 CFR Part 7 is revised to read as follows:

Authority: Sec. 1, 44 Stat. 887, sec. 4, 63 Stat. 111, as amended, 22 U.S.C. 211a, 2658; secs. 104, 360, 66 Stat. 174, 273, 8 U.S.C. 1104, 1503; E.O. 11295, 36 FR 10603; 3 CFR 1966-1970 Comp., page 507; 22 CFR 60-65; E.O. 12532, 50 FR 36861, unless otherwise noted.

2. In § 73, paragraph (d) is redesignated as (e) and a new (d) is added as follows:

§ 7.3 Jurisdiction.

* * * * *

(d) Appeals from administrative determinations under 64.1(a) of this Chapter, denying U.S. Government assistance to U.S. nationals who do not comply with the Fair Labor Standards in 61.2 of this Chapter.

* * * * *

3. In § 7.5, paragraph (b)(3) is redesignated as (b)(4) and a new (b)(3) is added as follows:

§ 7.5 Procedures

* * * * *

(b) *Time limit on appeal.* * * *

(3) A national who has been subject of an adverse decision under 61.1(a) of this Chapter shall be entitled to appeal the decision to the Board within 30 days after receipt of notice of such decision.

* * * * *

4. Sections 7.8 through 7.11 are redesignated as §§ 7.9 through 7.12 and a new § 7.8 is added as follows:

§ 7.8 South African Fair Labor Standards Cases

(a) Scope of Review—With respect to appeals taken from the Assistant Secretary for African Affairs denying assistance to U.S. nationals operating in South Africa which do not comply with the Fair Labor Standards outlined in 61.2 of the Chapter, the Board's review except as provided in paragraph b of this section shall be limited to the record on which the Assistant Secretary's decision was based.

(b) Admissibility of Evidence—the Board shall not receive or consider evidence or testimony not presented pursuant to §§ 63.3(a) or 63.3(b) of this chapter unless it is satisfied that such evidence was not available or could not have been discovered by the exerciser of reasonable diligence prior to entry of the decision of the Assistant Secretary for African Affairs.

Dated: February 26, 1986.

Alan G. James,
Chairman, Board of Appellate Review.

40 CFR Part 52

[A-4-FRL-2980-4; NC-013-014]

Approval and Promulgation of Implementation Plans; North Carolina

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: In this action, EPA is proposing to approve revisions to the North Carolina State Implementation Plan for Air Quality which were submitted by the North Carolina Division of Environmental Management on March 18, 1985, and April 15, 1985. These revisions include: the addition of control standards for three Volatile Organic Compound (VOC) source categories; the addition of test methods for VOC sources; the deletion of mandatory source registration; a clarification of how to determine allowable particulate emissions from existing fuel and wood burning indirect heat exchangers when new boilers are added to a site; an explanation of how to correct to twelve percent oxygen when determining emissions from incinerators; a new regulation for controlling mercury emissions; and additional permit application provisions. Most of the regulation changes are minor in nature and serve merely to update the North Carolina code.

DATES: To be considered, comments must be received on or before April 7, 1986.

ADDRESSES: Copies of the State's submittals are available for review during normal business hours at the following locations:

Air Quality Section, Division of Environmental Management, North

Air Programs Branch, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, N.E., Atlanta, Georgia 30365.

FOR FURTHER INFORMATION CONTACT: Janet Hayward of the Region IV EPA Air Programs Branch, at the above address and following phone (404) 881–3286 or (FTS) 257–3286.

SUPPLEMENTARY INFORMATION: On March 18, 1985, and April 15, 1985, the North Carolina Division of Environmental Management submitted numerous regulation changes and nonregulatory revisions to the North Carolina State Implementation Plan (SIP). These submittals contained certification that the revisions were preceded by adequate notice and a public hearing. EPA is proposing to approve these revisions, as submitted on the above dates. All interested persons are invited to comment on this action; comments received within 30 days of the publication of this notice will be considered by EPA. A discussion of these revisions and the basis for EPA action now follows:

Submittal of March 18, 1985

- Regulation 15 NCAC 2D.0606 (Other Coal or Residual Oil Burners) was amended to correct a cross reference. The regulation previously referenced 15 NCAC 2D.0603 (Sources Covered by New Source Performance Standards), which has been repealed. Regulation 15 NCAC 2D.0524 (New Source Performance Standards) was substituted for the repealed 15 NCAC 2D.0603.
- Regulation 15 NCAC 2D.0939 (Determination of Volatile Organic Compound Emissions) was amended by adding three test methods for quantifying VOC emissions.
- Regulation 15 NCAC 2D.0943 (Synthetic Organic Chemical and Polymer Manufacturing); 2D.0944 (Manufacturing of Polyethylene, Polypropylene and Polystyrene); and 2D.0945 (Petroleum Dry Cleaning) are new regulations which were adopted to control additional sources of volatile organic compounds. The rules are consistent with the Group III Control Technology Guideline Documents for those source categories. The regulations in Section 2D.0900 are only mandatory for sources in Mecklenburg County (the State's only nonattainment area for ozone) which have the potential to emit 100 tons per year or more of VOCs. There are presently no sources in Mecklenburg County to which these three rules apply.
- Also included in the March 18, 1985, submittal were revisions to regulation 2D.0524 (New Source Performance Standards) and 2D.0525 (National Emission Standard for Hazardous Air Pollutants). North Carolina revised their rules by adding six New Source Performance Standards (NSPS) and two National Emission Standards for Hazardous Air Pollutants (NESHAP). They also requested delegation of authority for implementing and enforcing the NSPS and NESHAP for these source categories. A letter delegating this authority to the State was signed by Charles R. Jeter, Regional Administrator, on April 2, 1985. The delegation was announced in the **Federal Register** on August 1, 1985 (50 FR 31182).

Submittal of April 15, 1985

- Regulation 15 NCAC 2D.0202 (Registration of Air Pollution Sources) was amended to require sources to register only when requested to do so by the State. In the past, registration was mandatory for all sources of air pollution, but this procedure is no longer necessary because the State requires virtually all sources to have permits. Permit applications contain essentially the same information contained in the registration form. To eliminate this unnecessary duplication, North Carolina has eliminated the requirement for all sources to register.
- Regulation 15 NCAC 2D.0501 (Compliance with Emission Control Standards) was amended to remove the requirement for mandatory source registration and to correct a cross reference. Test methods for mercury and for VOC's were also added and updated.

Revisions to Subparagraph (f)(1)(A) of regulation 2D.0501 were also submitted on April 15, 1985. EPA will take action on the changes to 2D.0501(f)(1)(A) in a separate **Federal Register** notice.

- Regulation 15 NCAC 2D.0503 (Control of Particulates from Fuel Burning Indirect Heat Exchangers) and 2D.0504 (Particulates from Wood Burning Indirect Heat Exchangers) were amended to clarify how allowable particulate emissions from existing boilers are determined when a new boiler is added to the site.
- Regulation 15 NCAC 2D.0505 (Control of Particulates from Incinerators) was amended to explain how to correct to twelve percent carbon dioxide when determining the amount of particulate emissions from incinerators.
- Regulation 15 NCAC 2D.0537 (Control of Mercury Emissions) is a new regulation. It limits the emissions of mercury to 2300 grams per day from any plant site. It applies to all sources of mercury not covered by other regulations, and is identical to the national emission standard for mercury, which is found in 40 CFR 61.52.
- Regulation 15 NCAC 2D.0603 (Applications) was amended to allow the State to request information from a source (in addition to what is required on the permit application) when it is necessary to properly evaluate that source's application for a permit. New source impact analyses and permit applications, for sources proposed to be located in nonattainment areas, are now available for public inspection. The public also has the opportunity to request a public hearing on such permit applications and impact analyses.

Further details pertaining to these regulation changes are contained in the technical support document, which is available for public inspection at EPA's Regional Office in Atlanta, Georgia.

Proposed Action

EPA proposes to approve the above regulation changes which were submitted to EPA on March 18, 1985, and April 15, 1985.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

40 CFR Part 52

[A-10-FRL-2980-8]

Approval and Promulgation of State Implementation Plan; Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: By this Notice, EPA is proposing approval of the Alaska State Implementation Plan (SIP) revisions pertaining to the carbon monoxide attainment plan for the Fairbanks area. The SIP revisions were submitted by the Alaska Department of Environmental Conservation, (ADEC) September 29, 1982 and updated on May 31, 1985. The plan relies heavily on the aggressive implementation of a mandatory vehicle inspection and maintenance (I/M) program. In addition, EPA is proposing to approve the SIP elements dealing with reasonably available control measures (RACM), basic transportation needs, and conformity. Upon final approval by EPA, the CO plan will become a federally enforceable part of the SIP as required by the Clean Air Act.

EPA is also proposing to remove all conditions of approval on the 1979 Fairbanks CO Plan as published in the December 30, 1980 Federal Register (45 FR 85744).

DATE: Comments must be postmarked on or before April 7, 1986.

Comments should be addressed to: Laurie M. Kral, Air Programs Branch, M/S 532, Environmental Protection Agency 1200 Sixth Avenue, Seattle, Washington 98101.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:
Air Programs Branch (10A–82–17), Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101;
State of Alaska, Department of Environmental Conservation, 3220 Hospital Drive, Juneau, AK 99871.

FOR FURTHER INFORMATION CONTACT: Loren C. McPhillips, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101. Telephone: (206) 442–4233, FTS: 399–4233.

SUPPLEMENTARY INFORMATION:

I. Background

On December 30, 1980 (45 FR 85744), EPA conditionally approved the first phase of the Fairbanks carbon monoxide (CO) State Implementation Plan (SIP). At that time an extension of the attainment date for the CO standard to December 31, 1987, was also approved.

The second phase of the Fairbanks CO SIP was officially submitted to EPA on September 29, 1982, amd was further updated by the Alaska Department of Environmental Conservation (ADEC) on January 5, 1983 and November 15, 1983. The 1982 SIP revision indicated that a 45.2 percent reduction in 1979 baseline emissions is necessary in order to attain the eight-hour CO standard of 9 parts per million (ppm) prior to December 31, 1987. Part of this reduction would come from the Federal Motor Vehicle Emission Control Program, while another portion of the required reduction (21 percent) was to come from a tentative mandatory vehicle (I/M) program. The 1982 SIP revision noted that EPA would not take final action to approve the SIP until ADEC either fully committed to implement I/M or adopted other equally effective control measures.

However, on January 18, 1984 (49 FR 2119), EPA changed its original position, disapproving the Fairbanks plan because state and local officials failed to demonstrate adequate commitment to the I/M program. Since then, state and local officials have adopted appropriate I/M legal authority and have sufficiently committed to the I/M program which began July 1, 1985.

II. Plan Review

A. Approvable elements of the SIP

EPA is proposing to approve the transportation control strategies that were contained in the original SIP. The following is a list of control measures that still contain adequate commitments for implementation or continued implementation:

1. Federal Motor Vehicle Emission Control Program. (FMVECP).
2. Transit Improvements.
3. Traffic Improvements.
4. Vehicle Preheating.
5. District (Centralized) Heating System.
6. Inspection and Maintenance (I/M) program.

The commitment to these measures ensures that the requirements for basic transportation needs are satisfied and that improved mobility will be emphasized. Therefore, EPA is proposing to approve the element dealing with basic transportation needs as well as the six elements listed above.

Conformity will be determined in accordance with the procedures set forth in the SIP. After determining conformity of the plans and programs, all federal aid projects will still be evaluated in accordance with procedures specified in the National Environmental Policy Act. If the analysis indicates that the project will create new violations or exacerbate existing violations, then the project will not be constructed without modifications to the project or plan sufficient to maintain reasonable further progress toward attainment.

Therefore, EPA is also proposing to approve the element of the plan dealing with conformity of federal actions with the SIP. A detailed discussion of these approvable elements is contained in the February 3, 1983 (48 FR 5133) **Federal Register**.

B. Attainment Demonstration

As mentioned previously, the 1982 SIP revision indicated that a 45.2 percent reduction in 1979 baseline emissions is necessary in order to attain the eight-hour CO standard of 9 parts per million prior to December 31, 1987. That goal would be reached with the current plan. Since the original air quality analysis is somewhat dated, EPA also conducted an analysis based upon the most recent three years of monitoring data. That analysis also demonstrated attainment prior to December 31, 1987, based upon the aggressive implementation of a mandatory I/M program, the continuation of the head bolt heater program and the FMVECP, and partial credit from the anti-tampering program. Accordingly, EPA is proposing approval of the attainment demonstration contained in the original SIP. If attainment is not reached by the statutory deadline, re-analysis and additional controls may be required.

C. Inspection and Maintenance Program

Fairbanks began its I/M program on July 1, 1985. Owners of model year 1975 and newer cars and trucks are required to have their vehicles annually inspected for emissions problems, or upon initial registration in the state. The model year of vehicles subject to the program changes over time because inspections are not required for vehicles that are more than 15 years old. Vehicles determined to have excessive pollution levels are required to be repaired prior to renewal of registration by the Alaska Division of Motor Vehicles (DMV). A seasonal waiver is also available for those vehicles that are not driven during the CO season. Local officials have also adopted a tampering check as part of the I/M program. Basically, the tampering test includes a visual check for the catalytic converter, fuel restrictor, air pump, PCV valve, hose and wire connectors, and a plumbtesmo (lead) test.

Since the program is decentralized, inspections required under the I/M program must be made at a Certified I/M Station. Up to a $35.00 fee may be charged for the inspections, and vehicles which fail the inspection because of defects in their emission control system must be repaired and then retested by a Certified I/M Station. The program incorporates the use of Bar-84 analyzers which are calibrated on a regular basis.

VOL 51 ISS 45 MR 7 1986 UMI

Repairs required under the I/M Program may be performed by anyone, including vehicle owners. However, incentives are provided for the repair of vehicles by Certified I/M Mechanics working at Certified I/M Stations. Except for certain Fleet Operator owned vehicles, vehicle owners are guaranteed of either passing the retest or receiving a waiver if they have repairs performed at a Certified I/M Station. A cost waiver is available if repairs exceed $150.00 during the first year. The cost limit will gradually be increased to $500.00 by January 1, 1987. Work done or parts purchased and installed by vehicle owners or at uncertified facilities will not count toward this cost ceiling. It should be noted that since the cost waiver provisions apply to the required replacement of emissions control devices, the actual effectiveness of the tampering check is uncertain.

The Fairbanks North Star Borough (FNSB) is responsible for conducting quality assurance tests at the individual stations. Currently there are approximately 30 certified stations. The FNSB is also responsible for collecting data and ensuring program effectiveness.

D. Removal of Previous Conditions

In response to EPA's conditions of approval on the 1979 SIP (December 30, 1979 (45 FR 85744), FNSB has included in the 1982 SIP revision: (1) An expanded 1980 CO emission inventory to include emissions from off-street parking, (2) verification that population projections for air and water planning activities are consistent, and (3) a procedure for determining conformity of federal projects with the SIP.

III. Proposed Action

The EPA proposes (1) to approve the Fairbanks I/M program and the attainment demonstration portions of the plan; (2) to approve the SIP elements contained in the Fairbanks CO attainment plan which was submitted to EPA on September 29, 1982, and January 5, 1983, dealing with basic transportation needs conformity and other control measures including I/M; and (3) to remove the three conditions on the EPA approval of the 1979 Fairbanks CO SIP which EPA imposed on December 30, 1980 (45 FR 85744).

Interested parties are invited to comment on all aspects of this proposed approval of the Alaska SIP revision. Comments should be submitted in triplicate, to the address listed in the front of this Notice. Public comments postmarked by April 7, 1986 will be considered in any final action EPA takes on this proposal.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have significant economic impact on a substantial number of small entities (46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Authority: 42 U.S.C. 7401–7642.

40 CFR Part 81

[A-3-FRL-2980-6]

Designation of Areas for Air Quality Planning Purposes; Commonwealth of Pennsylvania; Section 107 Redesignation

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a request from the Commonwealth of Pennsylvania to redesignate the attainment status of two areas within Allegheny County with respect to the National Ambient Air Quality Standards (NAAQS) for Total Suspended Particulates (TSP) pursuant to section 107 of the Clean Air Act and the implementing regulations at 40 CFR Part 81.

The request is to revise the attainment status of one area from "Cannot Be Classifed" to "Better than National Standards," and for a second area the requested revision is from "Does Not Meet Primary Standards" to "Does Not Meet Secondary Standards." The requests for redesignation are based upon eight consecutive quarters of ambient air monitoring data.

The intent of this notice is to discuss the results of EPA's review of the redesignation request and to solicit public comment on the proposed actions.

DATE: Comments must be received on or before April 7, 1986.

ADDRESSES: Copies of the documents relevant to these proposed redesignations are available for public inspection during normal business hours at:

U.S. Environmental Protection Agency, Region III, Air Programs Branch, 841 Chestnut Building, Philadelphia, PA 19107, Attn: Denis Lohman;

Department of Environmental Resources, Bureau of Air Quality Control, 200 North 3rd Street, Harrisburg, PA 17120, Attn: Gary Triplett;

Allegheny County Health Department, Bureau of Air Pollution Control, 301 Thirty-ninth Street, Pittsburgh, PA 15201, Attn: Roger Westman.

All comments on the proposed redesignations submitted within 30 days of publication of this notice will be considered. Comments should be directed to Mr. Glenn Hanson, Chief PA/WV Section, EPA, Region III, 841 Chestnut Bldg., Philadelphia, PA 19107, EPA Docket Nos. 107–PA–25, 107–PA–26, and 107–PA–27.

FOR FURTHER INFORMATION CONTACT: Denis Lohman (3AM11) at the EPA, Region III address above or call (215) 597–8375.

SUPPLEMENTARY INFORMATION: Under Section 107(d) of the Clean Air Act, the Administrator of EPA has promulgated the NAAQS attainment Status for all areas within each State (*See* 43 FR 8962 (March 3, 1978)). These area designations are subject to revision whenever sufficient data become available to warrant a redesignation.

Background

The Pennsylvania Department of Environmental Resources (PaDER) endorsed and submitted to the U.S. Environmental Protection Agency (EPA) requests, initiated by the Allegheny County Bureau of Air Pollution Control (BAPC), to revise the Total Suspended Particulate (TSP) attainment status designation for two areas within Allegheny County under Section 107 of the Clean Air Act and 40 CFR Part 81. In this notice the review of each area will be discussed.

A. Area #1

Area #1 is a three-mile wide strip within a perpendicular distance two miles north and east of the Ohio river center line, and one mile south and west of the Ohio river center line, terminating at the I–79 highway bridge and at the Beaver County line. This area is now designated as "unclassifiable" with respect to the NAAQS for TSP.

At the time of the designation, there were no TSP monitors in this area. The only major source of TSP in the area—Philips Power Station—had an undetermined impact upon air quality. The Philips station has a stack height which, at 104 meters, is greater than the de minimis good engineering practice (GEP) height of 65 meters. However, the GEP stack height calculated by the formula of the EPA stack height regulation promulgated on July 8, 1985 (50 FR 72892) is 105 meters so the actual stack height is slightly less than the maximum creditable height. The TSP emission limit for the Philips station is the county established limit for fuel burning or cumbustion equipment (Section 402 of Allegheny County Article XX). The allowable emission rate of 0.08 lbs (TSP)/MMBtu is less than the new source performance standard of 0.10 lbs/MMBtu. There were, in addition, major sources upriver and downriver from the area, with uncertain impact upon the air quality.

The BAPC installed two special purpose monitors in the area to determine the existing air quality. One monitor was placed in Leetsdale and a second monitor was placed in Sewickley. The BAPC has certified that both sites are representative for the purpose of attainment designation.

A site description form for Sewickly was reviewed. It indicates that the station satisfies the requirements of 40 CFR Part 58.

No exceedance of any TSP standard has been recorded at either monitoring site. Sources in the area cannot significantly increase emissions under the existing rules and regulations which have been approved by EPA. Although the sources in adjacent areas could operate at higher levels of operation, their impact in Area #1 is expected to be minor because of their comparatively long distance from the area.

Therefore, after reviewing the data submitted and considering the information summarized above, EPA is proposing to approve this redesignation request.

B. Area #2

Area #2 is defined as the circular area within a 0.5 mile radius of the Greater Pittsburgh Airport monitor. This monitor is on the roof of the main terminal building.

This area is now designated as "Does Not Meet Primary Standards" with respect to the NAAQS for TSP. The nonattainment classification was requested because of high annual values of TSP recorded in 1979 and 1980. At that time, the airport terminal was undergoing a major construction project. The construction project was completed in 1980. The average TSP values since then have been well below the primary standard.

In both the first and second quarters of 1984 a daily value of TSP in excess of the secondary standard (150 micrograms per cubic meter) was recorded. Although these were the only exceedances since 1980, the second occurrence in one year constitutes a violation of the secondary standard. For this reason, the revised designation is requested to be "Does Not Meet Secondary Standards."

The site overlooks the central boarding and deplaning area and is probably affected by re-entrained dust caused by jet exhaust wash at loading gates. The nearest such gate is 35 feet below and 75 feet away from the monitor. The effect of the jet exhaust re-entrainment is considered to bias the TSP readings toward high values. Due to the very local influences at the Greater Pittsburgh Airport, the monitor is only representative at a middle scale (up to 0.5 km).

The airport is located in the western part of the county in an area of low population density. The area around the monitor site is generally level and is either devoted to airport operations or associated commercial and light industrial activities. There are no large point sources of TSP within a radius of 7500 feet. The largest sources of TSP near the monitor are Route 60, 1100 feet north of the monitor site; the driveways within the airport; and the reentrained dust from the movements of airplanes near the terminal.

Because there are no significant combustion or process sources generating particulate matter, the majority of the TSP, in excess of background, being measured at the monitor is attributed to re-entrained dust by the automotive and aviation traffic. At the present time the traffic is sufficiently great and constant enough that the roadways and runways are virtually in a perpetually stirred condition except for unusual events such as heavy rain or snowfall. Consequently the "source" for TSP is relatively insensitive to changes in traffic density. The principal reasons for day to day variations in TSP measurements are weather related. The wind direction determines the upwind "source" area and the wind speed determines the dilution factors. Therefore, increases in traffic are not expected to cause increases in monitored TSP.

After reviewing the data submitted and considering the information summarized above, EPA is proposing to approve the redesignation request.

Proposed Action

EPA is proposing to approve the two requests for redesignation of two areas within Allegheny County. The unclassifiable Area #1 would be designated as "Better Than National Standards" for TSP. The nonattainment Area #2 would be designated as "Does Not Meet Secondary Standards".

The public is invited to submit, to the EPA, Region III address stated above, comments on either of the proposed redesignations. The Administrator's decision to approve or disapprove the proposed redesignations will be based upon the comments received and on a determination of whether or not the requirements of section 107 of the Clean Air Act have been met.

Administrative Procedures

Under 5 U.S.C. 605(b), the Administrator has certified that redesignations do not have a significant economic impact on a substantial number of small entities (*See* 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Designation of Areas for Air Quality Planning Purposes; Redesignation of an Ozone Nonattainment Area in South Carolina

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA today proposes to approve the request by South Carolina to redesignate York County from nonattainment to attainment for ozone. The redesignation of York County to attainment is based on three years of ambient monitoring data showing a calculated expected exceedance of less than 1.0 and implementation of an EPA-approved control strategy.

The public is invited to submit written comments on this proposed action.

DATE: To be considered, comments must reach us on or before April 7, 1986.

VOL 51
ISS 45
MR 7
1986
UMI

ADDRESSES: Written comments should be addressed to Jill Thomas of EPA Region IV's Air Programs Branch (see EPA Region IV address below). Copies of the materials submitted by South Carolina may be examined during normal business hours at the following locations:

Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365
Bureau of Air Quality Control, South Carolina Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201.

FOR FURTHER INFORMATION CONTACT: Jill Thomas, Air Programs Branch, EPA Region IV, at the above address and telephone number 404/881–4253 or FTS 257–4253.

SUPPLEMENTARY INFORMATION: In the March 3, 1978, **Federal Register** (43 FR 8962), EPA designated York County, South Carolina as nonattainment for ozone. This designation was based on ambient air quality monitoring data which revealed that York County had experienced oxidant violations. Several areas in South Carolina were designated nonattainment for ozone and, therefore, the State was required to revise their state implementation plan (SIP) for ozone. South Carolina drafted and adopted statewide regulations for controlling volatile organic compound (VOC) emissions from stationary sources in nonattainment and unclassified areas. Through the Federal Motor Vehicle Control Program (FMVCP) and implementation of the VOC regulations, South Carolina demonstrated attainment of the ozone standard in the urban nonattainment areas. Because York County was a non-urban area, a demonstration of attainment of the ozone standard was not required. EPA approved South Carolina's accommodative ozone SIP on January 29, 1980.

South Carolina has requested that EPA change the attainment status of York County from nonattainment to attainment for ozone. In order to redesignate a nonattainment area, EPA policy requires that the most recent three years of ozone data show an expected exceedance calculation of less than or equal to 1.0. The most recent eight quarters of quality assured ambient air data may suffice provided that no exceedances have occurred. In addition, the data must be accompanied by a demonstration of implementation of an EPA-approved control strategy. South Carolina has submitted ambient air quality data collected at the Chester Airport monitoring site located in Chester County. This monitor was moved from York County on March 1, 1980, in order to conform to 40 CFR Part 58 siting criteria. The Chester County site is located approximately 16 miles southwest of the former York County site. The move was reviewed by EPA and determined to be representative of York County.

South Carolina's request for redesignation is based on three years of ambient ozone data. Specifically, the most recent three years of air quality data (1982, 1983, and 1984) show the number of expected exceedances to be less than or equal to 1.0, as is summarized below:

	Exceedances (ppm)	Number of expected exceedances[1]	NAAQS ozone (ppm)[2]
Chester Airport:			
1982	.125	0.67	12
1983	.143		
1984	None		
(Total: 2 exceedances)			

[1] Three year average.
[2] Not to be exceeded more than once a year

Furthermore, York County has experienced no ozone exceedances during the first three quarters of 1985.

For a more detailed discussion, please refer to the Technical Support Document which is available for inspection at the EPA Region IV office.

Therefore, on the basis of three years of air quality data showing attainment and evidence of an implemented EPA-approved control strategy, EPA proposes to approve the redesignation of York County from ozone nonattainment to attainment.

Proposed Action

EPA is today proposing to approve the redesignation of the York County ozone nonattainment area on the basis of three years of air quality data and an EPA-approved control strategy.

The public is invited to participate in this rulemaking by submitting written comments on these proposed actions.

Under 5 U.S.C. 605(b), I certify that area redesignations do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560-50-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 346 (Sub-20)]

Exemption From Regulation; Storage Leases

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rulemaking and Exemption.

SUMMARY: The Commission proposes to exempt from regulation under 49 U.S.C. 10505 the leasing of surplus railroad equipment for storage. This would enable rail carriers to compete more effectively with private car companies in the leasing of idle cars for storage purposes. In Ex Parte No. 346 (Sub-No. 12), *Petition to Exempt Storage Leases of Norfolk and Western* (not printed), served March 9, 1983, the Commission exempted the storage leases of covered hopper cars by Norfolk and Western Railway Company. This proposal would expand that exemption to cover storage leases for all surplus equipment for all carriers.

DATE: Comments are due April 7, 1986.

ADDRESS: Send an original and 10 copies of comments referring to Ex Parte No. 346 (Sub-No. 20) to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area) or toll free (800) 424–5403.

This action will not significantly affect either the quality of the human environment or energy conservation.

List of Subjects in 49 CFR Part 1039

Railroads, Exemption, Leases.

Dated: February 28, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,
Secretary.

Appendix

Title 49 of the CFR would be amended as follows:

PART 1039—[AMENDED]

1. The authority citation for 49 CFR Part 1039 would continue to read as follows:

Authority: 49 U.S.C. 10321, 10505, 10713, 10762, 11105; 5 U.S.C. 553.

2. A new § 1039.20 would be added to read as follows:

§ 1039.20 Storage leases.

Storage leases for all surplus equipment for all carriers are exempt from the provisions of 49 U.S.C. subtitle IV. Nothing in this exemption should be construed to affect our jurisdiction under section 10505 or our ability to enforce this decision or any subsequent decision made under authority of this exemption section. This exemption shall remain in effect, unless modified or revoked by a subsequent decision of this Commission.

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Reclassification of Ranched Nile Crocodile Populations in Zimbabwe From Endangered to Threatened by Similarity of Appearance

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The U.S. Fish and Wildlife Service proposes to reclassify ranched populations of the Nile crocodile in Zimbabwe from endangered to threatened by "similarity of appearance" status under section 4 of the Endangered Species Act, 16 U.S.C. 1531 *et seq.* (hereinafter the "Act" or "ESA"). This change is supported by available biological information on the status of these populations of the species and recent changes in its status from Appendix I to II on the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The wild population of Nile crocodiles in Zimbabwe would not be affected. If this proposal is made final, the Service would be concluding that the ranched populations of Nile crocodiles in Zimbabwe have biologically recovered; live animals or whole skins of ranched Nile crocodiles originating in Zimbabwe would then be imported, as long as the ESA regulations governing permits for species listed as threatened by similarity of appearance and the laws of Zimbabwe are satisfied, and CITES requirements are met for trade in Appendix II species.

DATES: Comments from the Government of Zimbabwe and all other interested parties must be received by May 6, 1986. Public hearing requests must be received by April 21, 1986.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Associate Director—Federal Assistance/Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, DC 20240. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the Service's Office of Endangered Species, 1000 North Glebe Road, Suite 500, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–2771).

SUPPLEMENTARY INFORMATION:

Background

The Nile crocodile, *Crocodylus niloticus*, is one of the largest crocodilians, second in six only to the slatwater crocodile, *Crocodylus porosus*. Adults may weight up to 1000 kg. and reach a length of 5 m (Pooley and Gans 1976). Like other crocodilians, the species is behaviorally sophisticated, and many aspects of its ecological requirements are reasonably well known as a result of studies in various parts of its range (see Cott 1961, Modha 1967, Watson *et al.* 1971). Historically, the species occurred along the Mediterranen coast as far west as Tunis and as far north as Syria (Pooley and Gans 1976), although today it is confined to the lower Nile, tropical and southern Africa, and Madagascar.

Throughout much of its range, the Nile crocodile has been eliminated, or populations have been seriously reduced, due to hunting for the hide industry, killing animals because of their potential threat to humans and livestock, a mistaken notion that crocodilians compete with fishermen for desired fish species, or habitat alteration. The Nile crocodile was listed as endangered in the **Federal Register** of June 2, 1970 (35 FR 8495) because of the wide spread decline of the species from overharvesting throughout its range. In some areas, including Zimbabwe, habitat alteration has increased available habitat through the creation of lakes and lagoons from damming swift flowing rivers. In Africa today, some populations are apparently increasing or at least stabilized, while others continue to decline (Pooly 1982). the most serious threat continues to come from the uncontrolled exploitation of wild populations for the hide industry.

A number of African countries, however, now recognize the Nile crocodile as a valuable part of their natural heritage, both in terms of the service it plays in its ecological role, as well as a source of economic benefit from the tourist industry and in the potential for ranching animals for a controlled harvest of hides. Various measures have been used, including complete protection, to conserve populations, and most countries now recognize the need for sound biological data prior to instituting management, even if their present resources restrict their ability to conduct the required studies. Of those countries that have started ranching operations, Zimbabwe appears to have the best data base on native populations. Other nations; particularly Zambia, Mozambique, South Africa, and Botswana are presently gathering data on their crocodilian populations in connection with established ranches or ranching proposals in those countries.

In Zimbabwe, the Nile crocodile inhabits streams and lakes, primarily under 1500 m in altitude, in the Zambezi River watershed (Pooley 1982). In addition, sizeable populations occur in Lake Kariba. Research has centered on the Lake Kariba population to determine numbers of animals, movement patterns, and ecological requirements; counts in this area alone estimate 29,000±4,000 animals. Additional surveys throughout the range of the Nile crocodile raise the estimate to 50,000 within the country (Convention of International Trade in Endangered Species of Wild Fauna and Flora, CITES 1983). Information on research within Zimbabwe may be found in CITES (1983) and Hutton (1982). The Zimbabwe Wildlife Department considers the species "out of danger" (CITES 1983).

At present, there are five crocodile ranches in Zimbabwe. These are: (1) Kariba Crocodile Farm (Pvt.) Ltd., at Kariba, established in 1965; (2) Binga Crocodile Rearing Station at Binga (on Lake Kariba), established in 1967; (3)

BEST COPY AVAILABLE

VOL 51 ISS 45 MR 7 1986 UMI

Spencer Creek Crocodile Ranch (Pvt.) Ltd., at Victoria Falls, established in 1971; (4) Sengwa River Mouth Rearing Station at Sengwa Mouth, Lake Kariba, established in 1977; and (5) Rokani Crocodile Ranch on Lake Kariba, established in 1981.

Ranches follows a set of general procedures to rear crocodiles to a size that produces marketable skins (CITES 1983). First, a ranch must obtain a permit from the Department of National Parks and Wildlife Management to collect eggs from wild crocodile nests. Although an entire clutch can be taken, the Department limits wild egg collection to designated areas; cumulatively, for all ranches, egg collection has been limited to under 10,000 per year.

Eggs are transported in styrofoam containers from wild nests to the ranch where they are incubated in boxes with moist vermiculite. Hatchlings are placed in holding pens for at least 24 hours and are then transferred into 10–15 m long x 1.5 m wide x 1 m deep concrete hatchling pens. Each pen has two ponds which house 200–300 hatchlings. When crocodiles become 9–10 months old, they are placed into 20 x 8 x .75 m rearing pens where they remain until their skins are harvested. Animals are cropped when they reach approximately 1.5 m in length. The skins are salted, rolled, and stored for dispatch to tanneries; heads and feet are sold as tourist curios, carcasses are used for food for other ranched crocodiles, and some meat is sold in restaurants.

In 1982, these ranches held 10,346 hatchlings, 12,742 slaughter stock, and 149 breeding stock. Although eggs collected under permit from wild nests supply the bulk of the animals for the ranches, attempts are being made to supply future needs for eggs from breeding stocks. In 1981, Kariba and Spencer ranches produced between 30–50 percent of the total eggs from captive breeding stocks (CITES 1983).

In 1981, Zimbabwe exported a total of 2,890 skins to France; it is expected that most future exports will continue to be made to European countries.

The Fourth Meeting of the Conference of the Parties to CITES occurred on April 19–30, 1983, in Gaborone, Botswana. At the meeting, the Parties considered proposals to amend the appendices. The proposals were listed in three **Federal Register** notices (47 FR 51772, November 17, 1982, and 47 FR 57524, December 27, 1982, for proposals by the United States, and 48 FR 9545, March 7, 1983, for proposals by other Parties). Included among the proposals was that of Zimbabwe to reclassify the ranched Nile crocodiles within that country from Appendix I to II. This proposal (Document 4.38; summary report considered at Plen. 4.10) was accepted by the Parties. The Service published notice of the change in CITES status for Zimbabwe's ranched population of Nile crocodiles in the Federal Register of July 5, 1983 (48 FR 30722). The change in CITES classification does not affect Zimbabwe's wild crocodiles, which remain on Appendix I.

After considering the documentation provided by Zimbabwe during the CITES meeting in Botswana, as well as the references provided in the "Literature Cited" section of this proposed rule, the Service no longer considers the ranched population of Nile crocodiles in Zimbabwe to be "in danger of extinction throughout all or a significant portion of its range" (i.e., endangered). This finding is based on substantial increases in the total number of breeding crocodiles on ranches and ranch egg production (see Pooley 1982, CITES 1983, and Caldwell 1983). The captive ranched populations of the species in Zimbabwe appear to have biologically recovered to the point where reclassification as threatened by similarity of appearance is warranted. This proposed rule recognizes the improved status of the ranched population, and will allow, if approved as a final rule, regulated trade of live animals and whole skins of Nile crocodiles ranched in Zimbabwe as long as CITES requirements are met and the laws of Zimbabwe are followed. It will not change protection given to the wild population of *C. niloticus* in Zimbabwe and elsewhere in Africa as endangered. However, this final rule will probably enhance wild populations by reducing illegal powching since a larger legal market will become available.

Regulations published at 50 CFR 424.11(d) state that a species may be delisted if it: (1) Becomes extinct, (2) recovers, or (3) if the original classificatin data were in error. The Service believes that the ranched population of *C. niloticus* has biologically recovered in Zimbabwe. Moreover, section 4(e) of the Endangered Species Act establishes the "similarity of appearance" concept by authorizing the treatment of a species (or subspecies or group of wildlife in common spatial arrangement) as an endangered or threatened species even though it is not otherwise biologically threatened with extinction if it is found:

(a) That the species so closely resembles in appearance an endangered or threatened species that enforcement personnel would have substantial difficulty in differentiating between listed and unlisted species;

(b) That the effect of this substantial difficulty is an additional threat to the endangered or threatened species; and

(c) That such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of the Act.

Although the Service believes the ranched population of the Nile crocodile in Zimbabwe to be fully recovered biologically, it is being retained under the reclassified status of threatened due to similarity of appearance because Zimbabwe Nile crocodiles are hard to distinguish from other populations of the species. Therefore, any commercial trade in legally harvested ranched Zimbabwe Nile crocodiles must be in conformance with the Service's permit requirements for species listed by similarity of appearance (see 50 CFR 17.52), CITES requirements for Appendix II species (see CITES 1983), and the laws of Zimbabwe (see CITES 1983).

Although data suggest that wild populations are increasing in Zimbabwe (see CITES 1983), the Service believes that threats, such as illegal commercialization, still exist to wild populations in Zimbabwe. Therefore, the Service has separated ranched from wild Nile crocodile populations, and recommends reclassification to threatened by similarity of appearance for ranched populations in Zimbabwe, only.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Act (16 U.S.C. 1531 *et. seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth five factors to be used in determining whether to add, reclassify, or remove a species from the list of endangered and threatened species. These factors, and their applicability to ranched populations of the Nile crocodile in Zimbabwe, are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Ranched populations of Nile crocodiles are dependent on manmade habitats consisting mostly of concrete ponds that are surrounded by artificially maintained areas of trees and shrubs (see Background). As ranches become more self-sufficient (i.e., more eggs produced from captive animals), facilities will likely grow, thus increasing the amount of habitat. Additionally, juvenile survival rates should increase with improvements in captive feeding schmes (i.e., dietary mix).

The number of ranches has remained relatively constant since 1971 (see CITES 1983). However, the number of ranches could increase if efficiency and profit in production of crocodile skins continue to improve. Increases in the number of ranches will increase the amount of habitat of ranched Nile crocodiles in Zimbabwe.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Commercial use of the ranched populations is strictly controlled (see section D. below), and ranched populations enhance populations in the wild by reducing illegal commercialization of wild animals. Overutilization, therefore, is not considered a threat to the ranched Nile crocodile in Zimbabwe. The prohibition of entry of animals, parts, or products from wild Nile crocodile populations in Zimbabwe will be unaffected if this rule is finalized.

C. *Disease or predation.* Not applicable to the status of ranched *C. niloticus* in Zimbabwe.

D. *The inadequacy of existing regulatory mechanisms.* Crocodiles in Zimbabwe are regulated through the development of an 11-point policy administered by the Department of National Parks and Wildlife Management (Zimbabwe Department of National Parks and Wildlife Management 1982, CITES 1983). Among the provisions of this policy are: (1) All crocodiles are fully protected in National Parks and conserved in all Safari Areas, (2) wild crocodiles will normally not be harvested for the skin industry, (3) wild eggs can be harvested only by permit, with the allowance for a 5 percent return of crocodiles to the wild, or for other conservation purposes, as appropriate, (4) problem crocodiles will be destroyed if relocation is not possible, (5) education is stressed about the importance and value of crocodiles, (6) strict control is maintained of the rearing stations, (7) permits are allowed for export only to persons who are managing and conserving the crocodile, and (8) live crocodiles can only be exported if the Department is satisfied that animals will be cared for under proper scientific and aesthetically acceptable conditions. Most of these regulations, with the exceptions of regulation of rearing stations and export of live animals, are internal management regulations designed to ensure that Nile crocodiles are managed and conserved as a renewable resource and valued part of Zimbabwe's wildlife heritage.

Zimbabwe, as a Party to CITES, is fully prepared to comply with Appendix II export requirements. All unworked skins legally exported by breeding/ranching operations are wet salted, cut in a specified manner, and are worked individually with a serially numbered plastic tag attached to the edge of the skin in a specified place. These tags are similar to those used in the U.S. on American alligator hides, and numbers are recorded on the export permit. Manufactured items will be identified through accompanying documentation which carries a security stamp. Samples of the export permit have been submitted to the CITES Secretariat, as well as copies of the security stamp to be affixed to all permits.

The Service believes that the regulations and policies of Zimbabwe are sufficient to ensure the survival of the ranched population and allow trade in live ranched Nile crocodiles and whole skins. The laws of Zimbabwe, coupled with CITES requirements, appear adequate to allow a change to threatened by similarity of appearance for ranched populations.

E. *Other natural or manmade factors affecting its continued existence.* Not applicable.

Effects of This Rule

If made final, this proposed rule will change the status of ranched populations of the Nile crocodile in Zimbabwe from its present endangered status to threatened by similarity of appearance. As such, those regulations specifically pertaining to threatened species (50 CFR 17.21 and 17.31) would be applicable; since endangered species regulations are already in effect, the proposed change has little additional effect with regard to permits. This is in accordance with regulations as specified in 50 CFR 17.51 ("Treatment as endangered or threatened"). The Service notes that 50 CFR 17.52 ("Permits—similarity of appearance") would now apply, and it is reprinted below in its entirety for reader convenience.

Section 17.52 Permits—similarity of appearance.

Upon recept of a complete application and unless otherwise indicated in special rule, the Director may issue permits for any activity otherwise prohibited with a species designated as endangered or threatened due to its similarity or appearance. Such a permit may authorize a single transaction, a series of transactions or a number of activities over a specified period of time.

(a) *Application requirements.* An application for a permit under this section must be submitted to the Director by the person who wishes to engage in the prohibited activity. The permit for activities involving interstate commerce of plants must be obtained by the seller; in the case of wildlife, the permit must be obtained by the buyer. The application must be submitted on an official application form (Form 3–200) provided by the Service, or must contain the general information and certification required by § 13.12(a) of this subchapter. It must include, as an attachment, all of the following information: documentary evidence, sworn affidavits, or other information to show species identification and the origin of the wildlife or plant in question. This information may be in the form of hunting licenses, hide seals, official stamps export documents, bills of sales, certification, expert opinion, or other appropriate information.

(b) *Issuance criteria.* Upon receiving an application completed in accordance with paragraph (a) of this section, the Director will decide whether or not a permit should be issued. In making his decision whether or not a permit should be issued. In making his decision, the Director shall consider, in addition to the general criteria, in § 13.21(b) of this subchapter, the following factors:

(1) Whether the information submitted by the applicant appears reliable;

(2) Whether the information submitted by the applicant adequately identifies the wildlife or plant in question so as to distinguish it from any endangered or threatened wildlife or plant.

(c) *Permit conditions.* In addition to the general conditions set forth in Part 13 of this subchapter, every permit issued under this section shall be subject to the following special conditions:

(1) If indicated in the permit, a special mark, to be specified in the permit, must be applied to the wildlife or plant.and remain for the time designated in the permit;

(2) A copy of the permit or an identification label, which includes the scientific name and the permit number, must accompany the wildlife or plant or its container during the course of any activity subject to these regulations.

(d) *Duration of permits.* The duration of a permit issued under this section shall be designated on the "face of the permit.

Questions concerning permit applications for animals listed by similarity of appearance should be directed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–1903). Such permits are information collections that have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1018–0022. The information collection is necessary to determine the eligibility of applicants for permits.

The Service notes that the proposed change in the status of the ranched population of the Nile crocodile in Zimbabwe, if made final, will not affect the wild population, which remains on the List of Endangered and Threatened Wildlife as endangered.

In addition, all requirements of CITES with respect to Appendix II species, as well as the laws of Zimbabwe, must be

VOL 51 ISS 45 MR 7 1986 UMI

met prior to allowing the importation of live ranched crocodile or whole skins into the United States. These requirements are already in effect.

Public Comments Solicited

The Service intends that any final rule adopted will be as accurate and as effective as possible in the conservation of the species in question. Therefore, any comments or suggestions from the public, other concerned governmental agencies including those in Zimbabwe, the scientific community, industry, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments are particulary sought concerning biological commercial trade impacts on other crocodiles, or other relevant data concerning any threat (or lack thereof) to the ranched population of the Nile crocodile in Zimbabwe.

Final promulgation of the regulation on the ranched population of the Nile crocodile in Zimbabwe will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of final regulations that differ from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of proposal. Such requests must be made in writing and addressed to the Director, U.S. Fish and Wildlife Service, Department of the Interior, Washington, DC 20240.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the Authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to Section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244)

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the U.S. Code of Federal Regulations, as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–362, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 et. seq.).

2. It is proposed to amend § 17.11(h) by revising the entry for the Nile crocodile under "Reptiles" on the List of Endangered and Threatened Wildlife to read as follows:

§ 17.11 Endangered and threatened wildlife.

* * * * *

Vol. 51, No. 45
Friday, March 7, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Regulation; Public Meeting

The Committee on Regulation of the Administrative Conference of the United States will meet at 9:30 a.m., March 14, 1986, at 1330 Connecticut Avenue NW (Offices of Steptoe and Johnson, 9th Floor Conference Room) Washington, DC. The committee will discuss a report and proposed recommendation by Zona Hostetler on the topic of representation by non-lawyers in federal agency proceedings. For further information contact William C. Bush at 202–254–7065.

Attendance is open to the public, but limited to the space available. Persons wishing to attend should notify the contact person at least one day in advance. The committee chairman may permit members of the public to make oral statements at the meeting. Written statements may be submitted to the committee at any time. Minutes of the meeting will be available on request.

Dated: March 4, 1986.

Richard K. Berg,

Genreal Counsel.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Privacy Act; System of Records

AGENCY: Office of the Secretary, USDA.

ACTION: Notice of revision of Privacy Act System of Records.

SUMMARY: Notice is hereby given that USDA is revising one of its Privacy Act Systems of records maintained by the Farmers Home Administration, USDA/FmHA–3, "Credit Report File, USDA/FmHA." This action is necessary to recognize organizational changes involving custodianship of FmHA records and to permit release of information to Congressional officers, collection or servicing contractors, and local, State, or Federal Agencies. The intended effect is to enable FmHA to provide information from borrower's, grantee's, or applicant's Credit Report file to effectively make, collect, and service loans.

EFFECTIVE DATE: April 7, 1986. Comments must be received by the contact person listed below on or before April 7, 1986.

FOR FURTHER INFORMATION CONTACT: Virgle L. Cunningham, Jr., Freedom of Information Officer, Directives and Administrative Services Division, Farmers Home Administration, USDA, Room 6865, South Building, Washington, D.C. 20250, telephone (202) 382–9638.

SUPPLEMENTARY INFORMATION: USDA hereby amends its system of records, USDA/FmHA–3, by: recognizing that District Directors are custodians of USDA/FmHA–3 Credit Report files administered by District Offices; amending the "Routine uses of records maintained in the system, including categories of users and the purposes of such uses" to permit referral of information to other Government agencies, courts, magistrates, Administrative tribunals, opposing counsels, and servicing contractors; and making other minor revisions.

By this action FmHA will (1) clarify its authority to turn borrower, grantee, or applicant Credit Report Files over to servicing contractors; and (2) be able to use such information in effectively making, collecting, and servicing loans. Accordingly, USDA revises the full text of FmHA's systems of records, USDA/FmHA–3, "Credit Report File, USDA/FmHA" (Privacy Act issuances, 1984 Compilation, Volume I, pages 24–25), to read as printed below.

Signed at Washington, D.C., on March 3, 1986.

Frank W. Naylor,

Acting Secretary of Agriculture.

USDA/FmHA–3

SYSTEM NAME:

Credit Report File, USDA/FmHA.

SYSTEM LOCATION:

Each borrower's, grantee's, or applicant's credit report file is located in the County, District, or State Office through which the financial assistance is sought or was obtained. The addresses of State, District, and County offices are listed in the telephone directory of the appropriate city or town under the heading "United States Government, Department of Agriculture, Farmers Home Administration." Correspondence about borrower's, grantees, or applicant's credit reports and personal reference are located in the National, State, District, and County Offices Applicant/Borrower or Grantee file. A list of State Offices is included under the system titled "USDA/FmHA Applicant/Borrower or Grantee file."

The National Office is located at 14th and Independence Avenue, SW, Washington, D.C. 20250.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All FmHA borrowers, grantees, and recent applicants are included in the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system consist of credit reports and personal references from credit agencies, lenders, and individuals.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

7 U.S.C. 1921 et. seq., 42 U.S.C. 1471 et. seq., and 5 U.S.C. 301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Referral to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting a violation of law, or of enforcing or implementing the statute, rule, regulation or order issued pursuant thereto, of any record within this system when information available indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by rule, regulation, or order pursuant thereto.

Referral to employers, businesses, landlords, creditors and others in order for FmHA to validate information and otherwise determine repayment ability and eligibility for FmHA programs.

Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry

VOL 51 ISS 45 MR 7 1986 UMI

from the Congressional office made at the request of that individual.

Referral to a collection or servicing contractor, or a local, State, or Federal agency, when FmHA determines such referral is appropriate for making or servicing loans, collecting the borrowers's account or as provided for in contracts with servicing or collection agencies.

Referral to a court, magistrate, or administrative tribunal, or to opposing counsel in a proceeding before any of the above, of any records within the system which constitutes evidence in that proceeding, or which is sought in the course of discovery.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in the Applicant/Borrower or Grantee file folders at the State, District, and County Offices.

RETRIEVABILITY:

Records are indexed by name and identification number.

SAFEGUARDS:

Records are kept in locked offices at the State, District, and County Office. Access is restricted to authorized FmHA personnel.

RETENTION AND DISPOSAL:

Records are maintained subject to the Federal Records Disposal Act of 1943 (44 U.S.C. 366–380) and in accordance with FmHA's disposal schedules. Disposal of records at the State, District, and County Office is accomplished through deposit in office waste containers. Credit reports and personal references relating to applications which are rejected, withdrawn, or otherwise terminated are retained in the County, District, or State Office 1 full fiscal year after the fiscal year in which final action was taken on the application.

Credit reports concerning borrowers who have paid or otherwise satisfied their obligation are retained in the County, District, or State Office 1 full fiscal year. Correspondence records at the National Office which concern borrowers, grantees, or applicants are retained 3 fiscal years after the last year in which there was correspondence.

SYSTEM MANAGER(S) AND ADDRESS:

The County Supervisor at the County Office, District Director at the District Office, State Director at the State Office, and the Administrator, FmHA, for the National Office file.

NOTIFICATION PROCEDURE:

Any individual may request information regarding this system of records, or information as to whether the system contains records pertaining to him/her from the appropriate System Manager. If the specific location of the record is not know, the individual should address his/her request to the Administrator (Attention: Freedom of Information Officer), USDA/FmHA, Washington, D.C. 20250. A request for information pertaining to an individual should contain: Name, address, FmHA Office where loan/grant was applied for/approved, and particulars involved (i.e., date of request/approval; which FmHA program, etc.).

RECORD ACCESS PROCEDURES:

Any individual may obtain information as to the procedures for gaining access to a record in the system which pertains to him/her by submitting a written request to one of the Systems Managers referred to in the preceding paragraph.

CONTESTING RECORD PROCEDURES:

Same as Record access procedures.

RECORD SOURCE CATEGORIES:

Information in this system comes primarily from credit agencies and creditors.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Information contained in this system which would reveal the identity of a source who furnised information under an expressed or implied promise of confidentiality prior to May 1, 1979, and an expressed promise of confidentiality after May 1, 1979, is exempt from the provisions of 5 U.S.C. 522a(d)(1) on the basis of 5 U.S.C. 552a.(k)(5).

BILLING CODE 3410-07-M

Agricultural Stabilization and Conservation Service

List of Warehouses and Availability of List of Cancellations and/or Terminations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice of publication of list of warehouses licensed under the U.S. Warehouse Act and availability of list of cancellations and/or terminations occurring during calendar year 1985.

Notice is hereby given that the Agricultural Stabilization and Conservation Service has published a list of warehouses licensed under the U.S. Warehouse Act (7 U.S.C. 241 *et. seq.*) as of December 31, 1985, as required by section 26 of that Act. Also available is a list of cancellations and/or terminations that occurred during calendar year 1985. A copy of the list of warehouses as of December 31, 1985, will be distributed to all licensed warehousemen. Other interested parties may obtain a copy of either list from: Mrs. Judy Fry, ASCS, Warehouse Division, Warehouse Licensing Branch, U.S. Department of Agriculture, P.O. Box 2415, Room 5966, South Agriculture Bldg., Washington, DC 20013, Telephone: 202-447-3822.

Dated: March 4, 1986.

Signed at Washington, DC.

Milton J. Hertz,

Acting Administrator, Agricultural Stabilization and Conservation Service (ASCS).

CIVIL RIGHTS COMMISSION

Montana Advisory Committee; Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Montana Advisory Committee to the Commission will convene at 10:00 a.m. and adjourn at 2:00 p.m., on April 4, 1986, at the Northern Hotel, First & Broadway, Billings, Montana. The purpose of the meeting is to review a briefing memorandum on the Harlem School District and plan future activities.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Betty Babcock or William Muldrow, Acting Director of the Rocky Mountain Regional Office at (303) 844-2211, (TDD 303/844-3031). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission

Dated at Washington, DC, March 3, 1986.

Ann Goode,

Program Specialist for Regional Programs.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 7-86]

Foreign Trade Zone 124—Gramercy, LA; Application for Subzone at TransAmerican Natural Gas Refinery

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the South Louisiana Port Commission, grantee of Foreign-Trade Zone 124, requesting special-purpose subzone status for the crude oil refinery of TransAmerican Natural Gas Corporation (formerly GHR Energy Corp.) located in Destrehan, Louisiana, adjacent to the Gramercy Customs port of entry. TransAmerican is currently negotiating with prospective purchasers or operators of the refinery and indicates that subzone status would be a factor in these transactions. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on February 21, 1986.

The proposed subzone would encompass the 600-acre oil refinery located on the east bank of the Mississippi River at River Mile Point 126, in Destrehan, 20 miles northwest of New Orleans. The facility, which has been closed since 1983, has the capacity to refine 300,000 barrels per day of crude oil, gas oil, and residual fuel oil, employing 1,000 persons. It is anticipated that mostly foreign inputs would be used and that some of the finished products would be exported.

Zone procedures would exempt the refinery from Customs duty payments on the foreign products used in its exports. On its domestic sales it would be able to take advantage of the same duty rate available to importers of refined products. Motor fuel has a duty rate of 1.25¢/gal., crude oil's rate varies from 0.125¢ to 0.25¢/gal., and butane and kerosene are duty free. The savings from zone status would encourage reactivation of the facility.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consist of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Joel Mish, District Director, U.S. Customs Service, South Central Region, 423 Canal St., New Orleans, LA 70130; and Colonel Eugene S. Witherspoon, District Engineer, U.S. Army Engineer District New Orleans, P.O. Box 60267, New Orleans, LA 70160.

Comments concerning the proposed subzone are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before April 10, 1986.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

U.S. Department of Commerce, 423 International Trade Mart, No. 2 Canal Street, New Orleans, LA 70130;
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th and Pennsylvania, NW., Washington, DC 20230.

Dated: March 3, 1986.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[C-614-504]

Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Carbon Steel Wire Rod From New Zealand

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that certain benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in New Zealand of carbon steel wire rod. We are not including New Zealand Steel Ltd. (NZS) in our countervailing duty order because benefits received by NZS are *de minimis*. The estimated net bounty or grant for Pacific Steel Ltd. (PSL) and for all other manufacturers, producers, or exporters in New Zealand of carbon steel wire rod, except for NZS, is 25.69 percent *ad valorem*.

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of carbon steel wire rod from New Zealand, except that exported by NZS, that are entered, or withdrawn from warehouse, for consumption, and to require a cash deposit on such entries equal to the estimated net bounty or grant.

EFFECTIVE DATE: March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Alain Letort, Ellie Shea, or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-0186 (Letort), 377-0184 (Shea), or 377-2438 (Tillman).

SUPPLEMENTARY INFORMATION:

FINAL DETERMINATION AND ORDER

Based on our investigation, we determine that certain benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in New Zealand of carbon steel wire rod. For purposes of this investigation, the following programs are found to confer bounties or grants:

- Export Performance Taxation Incentive (EPTI)
- Export Market Development Taxation Incentive (EMDTI)
- Sales Tax Exemptions or Refunds on Imported Capital Equipment and Machinery
- Crown Loan to New Zealand Steel Ltd.

We determine the estimated net bounty or grant for the review period to be 25.69 percent *ad valorem* for Pacific Steel Ltd. (PSL) and for all other manufacturers, producers, or exporters in New Zealand of carbon steel wire rod. New Zealand Steel Ltd. (NZS) is not included in this countervailing duty order because benefits received by NZS are *de minimis*.

Case History

On September 23, 1985, we received a petition in proper form from Atlantic Steel Co., Georgetown Steel Corp., North Star Steel Texas, Inc., and Raritan River Steel Co., filed on behalf of the U.S. industry producing carbon steel wire rod. In compliance with the filing requirements of section 355.26 of our regulations (19 CFR 355.26), the petition alleges that manufacturers, producers, or exporters in New Zealand of carbon steel wire rod, directly or indirectly, receive benefits which constitute bounties or grants within the meaning of section 303 of the Act.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on October 15, 1985, we initiated such an investigation (50 FR 43590). We stated that we expected to issue our preliminary determination on or before December 17, 1985.

Since New Zealand is not a "country under the Agreement" within the meaning of section 701(b) of the Act, sections 303(a)(1) and 303(b) of the Act apply to this investigation. Accordingly, petitioners are not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of the subject merchandise materially injure, or threaten material injury to, a U.S. industry.

On October 25, 1985, we presented a questionnaire to the Embassy of New Zealand in Washington, DC concerning the petitioners' allegations. On November 25, 1985, we received responses to our questionnaire from New Zealand Steel Ltd. (NZS), Pacific Steel Ltd. (PSL), and the government of New Zealand. We received supplementary responses from NZS on December 4, 1985, December 12, 1985, and December 13, 1985, and from PSL on December 13, 1985, and December 17, 1985. On the basis of the information contained in these responses, we made our preliminary determination on December 17, 1985 (50 FR 52351). From January 27 to February 3, 1986, we verified the responses submitted by the government of New Zealand, NZS and PSL.

We received supplemental submissions from NZS on January 16, 1986, and from PSL on January 14, 1986, February 12, 1986, and February 25, 1986. We afforded interested parties an opportunity to present oral views in accordance with our regulations (19 CFR 355.35). No public hearing was requested. On February 7, 1986, we received initial briefs from petitioners and respondents. On February 20, 1986, we received written comments on the verification reports and rebuttal briefs.

Scope of Investigation

For purposes of this investigation, the term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.20 inch in diameter, nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured or partly manufactured, and valued over or under 4 cents per pound. Wire rod is currently classifiable under items 607.14, 607.17, 607.22, and 607.23 of the *Tariff Schedules of the United States (TSUS)*.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published in the April 26, 1984, issue of the **Federal Register** (49 FR 18006).

For purposes of this final determination, the period for which we are measuring bounties or grants (the review period) is April 1, 1984 through March 31, 1985. Pacific Steel Ltd. (PSL) is the only known producer of carbon steel wire rod in New Zealand. Both NZS and PSL exported wire rod to the United States during the review period. Based upon our analysis of the petition, the responses to our questionnaire submitted by the government of New Zealand, NZS, and PSL, our verification, and written comments submitted by interested parties, we determine the following:

I. Programs Determined to Confer Bounties or Grants

We determine that bounties or grants are being provided to manufacturers, producers, or exporters in New Zealand of carbon steel wire rod under the following programs:

A. Export Performance Taxation Incentive

Petitioners allege that, under section 156A of the Income Tax Act of 1976, as amended, the New Zealand wire rod industry receives tax credits under the Export Performance Taxation Incentive (EPTI) program, based on the f.o.b. value of qualifying goods exported.

In its response, the government of New Zealand stated that an EPTI tax credit can be taken as a deduction against income tax payable. If the tax credit exceeds the income tax payable, the taxpayer receives a cash payment for the difference. The rate of the tax credit depends on the value-added category or "band" into which a product falls. The amount of the tax credit is calculated by multiplying the rate corresponding to the value-added band into which a product falls by the f.o.b. value of export sales of that product. At verification, we ascertained that carbon steel wire rod falls into value-added band B, for which the EPTI tax credit rate is 10.5 percent. We also found that the rates specified under this program will be progressively reduced in the 1986 and 1987 fiscal years, and that EPTI tax credits will no longer be available starting with the 1988 fiscal year. We verified that NZS claimed EPTI tax credits on the income tax return it filed during the review period, but not on its exported carbon steel wire rod. PSL did claim and EPTI tax credit with respect to exported carbon steel wire rod on the tax return filed during the review period.

Because eligibility for this program is limited to exporters, we determine that it provides a bounty or grant within the meaning of the countervailing duty law to manufacturers, producers and exporters of carbon steel wire rod, except NZS.

Under our tax methodology, we calculate the benefit from this program by dividing the EPTI tax credit claimed by PSL during the review period on exports of wire rod to the United States by the value of PSL's exports of wire rod to the United States during the review period. On this basis, we calculate an estimated net bounty or grant of 24.95 percent *ad valorem* for PSL.

B. Export Market Development Taxation Incentive

Petitioners allege that the New Zealand wire rod industry receives EMDTI tax credits for certain qualifying export expenditures under the Export Market Development Taxation Incentive (EMDTI) program, pursuant to section 156F of the New Zealand Income Tax Act of 1976, as amended.

Under the 1979 Amendment of the Income Tax Act of 1976, export market development expenditures, such as expenses incurred principally for seeking and developing markets, retaining existing markets, and obtaining market information, qualify for a tax credit of 67.5 percent of the total expenditure. Any company that has such expenditures may claim them in calculating taxable income. However, an exporter who takes advantage of this tax credit may not deduct the qualifying expenditures as ordinary business expenses in calculating the taxable income. Because the normal corporate tax rate in New Zeland is 45 percent, and exporters may claim a tax credit of 67.5 percent, the net benefit to the exporters under this program is 22.5 percent of the qualifying expenditure amount.

Because eligibility for this program is limited to exporters, we determine that it confers a bounty or grant within the meaning of the countervailing duty law.

We verified that both NZS and PSL claimed EMDTI on their tax returns filed during the review period. To calculate the benefit from this program, we divided 22.5 percent of the qualifying expenditures which were calimed by each company on their tax returns filed during the review period by the total f.o.b. value of each company's export sales during the review period. On this basis, we find an estimated net bounty or grant amount of 0.25 percent *ad valorem* for NZS and 0.02 percent *ad valorem* for PSL.

C. Sales Tax Exemptions or Refunds on Imported Capital Equipment and Machinery

Petitioners alleged that the New Zeland wire rod industry receives sales tax exemptions or refunds on machinery and equipment used in the production of goods for export.

At verification, we ascertained that New Zeland exporters may receive sales tax remissions (exemptions) or refunds on imported machinery and equipment used principally in the production of export goods. At the company level, we verified that NZS had been exempted from sales tax on some imported machinery and equipment used in its pipe mill. Because NZS did not receive during the review period any sales tax exemptions or refunds on imported machinery and equipment used to produce wire rod, we determine that no benefit accrues to exports of wire rod by NZS. Although PSL had stated in its responses that it did not receive sales tax exemptions or refunds during the review period, we verified that it had, in fact, received a number of these exemptions and refunds, which it was unable to quantity.

Because information on the record indicates that sales tax exemptions or refunds are available only on machinery and equipment used principally in export production, we determine that this program provides a bounty or grant to manufacturers, producers, and exporters of carbon steel wire rod within the meaning of the countervailing duty law.

To calculate the benefit, we used the best information available and multiplied the net increase in the value of PSL's plant and equipment from 1984 to 1985, as reported in the company's 1985 financial statement, by the sales tax rate for machinery as listed in Chapter 84 of the New Zealand Customs Tariff. We then divided the benefit by the value of PSL's export sales during the review period. On this basis, we calculate an estimated net bounty or grant of 0.72 percent *ad valorem* for PSL.

D. Crown Loan to New Zealand Steel Ltd.

At verificiation, we found that NZS had received a direct loan from the Crown in 1974. This loan was divided into two parts: "Mode A," which was earmarked for the expansion of the company's steel-making activities, and "Mode B," which was expressly provided for the construction of worker housing. NZS used Mode B funds to build housing units which it rents out to its workers.

The terms of the Mode A portion of the loan specify that the interest rate is variable. From its initial 1974 level, the interest rate was increased in 1977. Pursuant to an agreement between the Crown and NZS, NZS repaid the principal and all interest accrued during the life of the loan in July 1985, subsequent to the review period but prior to our preliminary determination. The interest on the Mode B portion of the loan, which is not due to be repaid until 1999, has been increased several times since 1974. We verified that NZS has been paying interest at regular intervals on this portion of the loan.

Given the dual nature of this Crown loan to NZS, we are examining Mode A and Mode B separately.

With respect to Mode A, neither the government of New Zealand nor NZS has denied that the Crown loan was limited to a single enterprise or industry, nor has any evidence been provided that such loans are available to a broad range of enterprise or industries in New Zealand. Accordingly, we determine that this loan was provided to a specific enterprise, and is countervailable to the extent that it was given on terms inconsistent with commercial considerations.

To determine whether this loan was made on terms inconsistent with commercial considerations, we compared the interest rate on the Mode A portion of the loan for each year in which the loan was outstanding with the national average short-term commercial interest rate, as published by the Reserve Bank of New Zealand and quoted in the government response. We used short-term commercial interest rates as our benchmark because this is a variable-rate loan, and we have no information on commercial interest rates for variable-rate long-term loans in New Zealand. Because commercial interest rates were higher than the interest rates on Mode A, we determine that this portion of the Crown loan was made on terms inconsistent with commercial considerations, and confers a countervailable benefit. Using our loan methodology for variable-rate long-term loans, we calculate a benefit of 0.13 percent *ad valorem* for NZS.

Because the principal amount of this loan was repaid, along with all interest accrued during the life of the loan, on July 31, 1985, which is subsequent to the review period but prior to our preliminary determination, we determine that any benefits to the company from this loan are not accruing to current exports of wire rod to the United States. Therefore, we are not including this benefit amount in the cash deposit rate.

With respect to Mode B, the potential countervailability of this portion of the loan raises the complex issue of whether the loan benefits accrue to NZS or to its workers. Since any potential benefit to NZS would be 0.02 percent *ad valorem*, and since this rate, when combined with the rate found for NZS in the EMDTI program, yields an overall rate which is *de minimis*, we believe that it is inappropriate at this time to determine whether, in fact, this portion of the loan would be countervailable.

II. Programs Determined not to Confer Bounties or Grants

A. Import Duty Exemptions or Refunds

Petitioners allege that the New Zealand wire rod industry receives import duty exemptions or refunds on machinery and equipment used in the production of goods for export.

At verification, we found that import duty exemptions and refunds are available to all importers when no equivalent local product is available on commercially reasonable terms, and that such import duty exemptions are not contingent upon export performance. We saw no evidence that such exemptions or refunds were limited to a specific enterprise or industry, or group of enterprises or industries. Therefore, we determine that import duty exemptions or refunds do not confer a countervailable benefit.

B. Technical Assistance from the Department of Scientific and Industrial Research

Petitioners allege that the Department of Scientific and Industrial Research (DSIR) provides facilities for testing international standards and advice on implementation and mangement of quality assurance systems to the wire rod industry in New Zealand.

At verification, we found that DSIR conducts studies and research for a wide variety of enterprises and industries, the results of which are publicly available. We also ascertained that such assistance is not contingent upon export performance. Because such assistance is not limited to a specific enterprise or industry or group of enterprises or industries, we determine that DSIR technical assistance does not confer a countervailable benefit.

C. Technical Assistance From the Testing Laboratory Registration Council

Petitioners allege that the Testing Laboratory Registration Council (TELARC) provides audits of export manufacturers' quality assurance systems.

VOL
51
ISS
45
MR
7
1986
UMI

At verification, we ascertained that TELARC's services to its members are unrelated to their export perofrmance. Further, we ascertained that any enterprise in New Zealand may become a member of TELARC on a fee-paying basis in order to use its services. Because TELACR's services are not limited to a specific enterprise or industry, or group of enterprises or industries, we determine that TELARC assistance does not confer a countervailable benefit.

III. Programs Determined not to be Used

Based on our verification of the repsonses of the government of New Zealand, NZS, and PSL, we determine that manufacturers, producers, and exporters in New Zeland of carbon steel wire rod did not use the following programs:

A. Export Credits and Development Financing from the Development Finance Corporation

Petitioners allege that the Development Finance Corporation (DFC) provides export credits and development financing on preferential terms. At verification, we ascertained that neither of the respondents had any DFC loans outstanding during the review period.

B. Export Suspensory Loan Scheme

Petitioners allege that the Development Finance Corporation provides financing under the Export Suspensory Loan Scheme (ESLS) for up to 40 percent of actual expenditures on plant and machinery used in the manufacture of designated products. The export suspensory loans are repayable at commercial rates but can become grants if the exporter meets predetermined export sales targets. At verification, we ascertained that neither of the respondents had any ESLS loans outstanding during the review period.

C. Export Programme Grants Scheme

The Export Programme Grants Scheme (EPGS) was superseded by the EPSLS in June 1982. However, petitioners allege that grants under EPGS could continue until June 1985. Grants under EPCS were given to exporters to encourage marketing research in targeted foreign markets. The grants, amounting to 64 percent of budgeted expenditures, were available for up to three years. At verification, we ascertained that neither of the respondents participated in this program.

D. Export Programme Suspensory Loan Scheme

Petitioners allege that loans are available under the Export Programme Suspensory Loan Scheme (EPSLS) for up to 40 percent of eligible expenditures to established exporters who increase their net foreign exchange earnings through the marketing of specific goods or services in a designated foreign market. If a predetermined export sales forecast is met, the suspensory loan is converted to a grant; if the forecast is not met, the exporter must repay the loan with interest. At verification, we ascertained that neither of the respondents had received any EPSLS loans or grants.

E. Export Marketing Assistance from the New Zealand Export-Import Corporation

Petitions allege that the New Zealand Export-Import Corporation (EIC) provides export marketing assistance such as the arrangement of overseas promotion displays, negotiations of overseas sales, and assistance to smaller companies that lack the resources or skills to export. At verification, we ascertained that neither of the respondents used EIC's services in exporting carbon steel wire rod to the United States during the review period.

F. Technical Assistance from the Standards Association of New Zealand

Petitioners allege that the Standards Association of New Zealand (SANZ) provides service which include translation of technical documents and assistance in obtaining foreign standards, regulations, and testing requirements. At verification, we found that SANZ provides such assistance to companies in New Zealand on a fee-paying basis. However, SANZ also receives operating assistance in the form of a government grant.

We ascertained that neither NZS nor PSL purchased standards, specifications, or other services from SANZ pertaining to carbon steel wire rod during the review period.

G. Technical Help to Exporters

Petitioners allege that SANZ also provides information often free of charges, regarding technical specifications incident to overseas marketing under the Technical Help to Exporters (T*H*E) program. At verification, we ascertained that neither of the respondents had participated in this program during the review period.

H. Technical Assistance from the Building Research Association of New Zealand

Petitioners allege that the Buidling Research Assocation of New Zealand (BRANZ) provides research and testing assistance to New Zealand exporters. At verification, we learned that BRANZ, a private research organization, provides research and testing services on a fee-paying basis to members of the building industry. These services are not contingent upon export performance. We ascertained that neither NZS nor PSL used the services offered by BRANZ during the review period.

I. Export Marketing Assistance from the Department of Trade and Industry

Petitioners allege that the Department of Trade and Industry (DTI) provides financial and organizational support for participation in overseas trade fairs, advice on foreign market conditions, advice and assistance on transportation to foreign markets, and help in placing advertisements free of charge in overseas trade publications. At verification, we ascertained that neither of the respondents participated in this program during the review period.

J. Preferential Treatment to Exporters in Granting Import Licenses

Petitioners allege that import licensing concessions are provided to companies which import materials for incorporation in goods to be exported. Such concessions may include additional availability of import licenses on components for incorporation in goods to be exported. At verifications, we ascertained that neither of the respondents participated in this program.

K. Research and Development Incentives

Petitioners allege that the New Zealand wire rod industry receives research and development incentives under the Applied Technology Program (ATP) administered by the DFC and under the previous Industrial Research and Development Grants Advisory Committee of the Department of Trade and Industry. At verification, we ascertained that neither of the respondents participated in this program.

L. Regional Development Investment Incentives

Petitioners allege that New Zealand wire rod producers receive a variety of regional development incentives based on their location in regions classified as either priority or slow-growth.

Petitioners also allege that the wire rod industry recieves concessions on electricity, water rights, and rail freight for any facilities located on the South Island. At verification, we ascertained that neither company has any facilities in the classified regions or on the South Island.

M. Special Industrial Development Allowances

Petitioners allege that the New Zealand wire rod industry receives tax benefits from the Industrial Develoment Plan Investment Allowance (IDPIA) under section 121 or the High Priority Investment Allowance (HPIA) under section 121A of the New Zealand Income Tax Act of 1976, as amended. At verification, we ascertained that neither of the respondents had claimed any tax benefits under these programs on the tax return filed during the review period.

N. Goverment Loan Guarantees to New Zealand Steel Develoment Ltd.

At verification, we discovered that New Zealand Steel Development Ltd. (NZSD), a joint venture in which the government of New Zealand owns 60 percent of the stock and NZS 40 percent, had received guarantees from the New Zealand Treasury on a number of loans and bond issues denominated in foreign currencies. The proceeds from these loans and bond issues are being used to finance the expansion of NZS's steel-making facilities. We verified that the expanded steel mill is not scheduled to come on stream until 1988 and is intended to produce flat-rolled steel products, rather than round steel products such as carbon steel wire rod.

IV. Programs Determined to be Terminated

Based on our verification of the responses of the New Zealand Government, New Zealand Steel Ltd. and Pacific Steel Ltd., we determine that the following programs have been terminated:

A. Increased Exports Taxation Incentive

Under the Increased Exports Taxation Incentive (IETI) program, an exporter can claim an income tax deduction proportionate to the exporter's increased export earnings. We verified that the IETI program was terminated on March 31, 1983, and that neither NZS nor PSL claimed IETI tax credits on their tax returns filed during the review period.

B. New Markets Increased Exports Taxation Incentive

Petitioners allege that the New Zealand wire rod industry is eligible to receive tax benefits under the New Markets Increased Exports Taxation Incentive (NMIETI) program, pursuant to section 157 of the New Zealand Income Tax Act of 1976, as amended. We verified that the NMIETI program was terminated on March 31, 1983, and that neither NZS nor PSL claimed tax benefits under this program on their tax returns filed during the review period.

C. Export Investment Allowances

Petitioners allege that the New Zealand wire rod industry receives tax benefits under the Export Investment Allowance program, which was terminated on March 31, 1983, and the Export Manufacturing Investment Allowance program. We verified that these tax programs were terminated on March 31, 1983, and that neither NZS nor PSL claimed tax benefits under these programs on their tax returns filed during the review period.

D. Research and Development Incentives from the Industrial Research Grants Advisory Committee

Petitioners allege that the Industrial Research Grants Advisory Committee on the Department of Trade and Industry provides research and development incentives to the wire rod industry in New Zealand. At verification, we ascertained that this program was terminated in 1974.

Petitioners' Comments

Comment 1: Petitioners contend that, in calculating the value of the benefit to the respondents from the EPTI program, the Department should divide total EPTI credits taken by the respondents by the value of exports that are eligible for this program, rather than by the value of total exports.

DOC Position: We believe that the most accurate way to calculate the benefit accruing to exports of wire rod to the United States under the EPTI program is to divide the value of the EPTI credits claimed by PSL on the tax return filed during the review period for its exports of wire rod to the United States by the value of it wire rod exports to the United States during the review period.

Comment 2: Petitioners contend that the Department should countervail EPTI tax credits taken by NZS on exported products other than carbon steel wire rod.

DOC Position: We disagree. We verified that NZS did not claim EPTI credits on exports of carbon steel wire rod. Therefore, no countervailable benefit accrues to carbon steel wire rod exported by NZS.

Comment 3: Petitoners suggest that the Department should compute separate benefit rates for each respondent with respect to the EPTI and EMDTI programs or, alternatively, use PSL's rate as the country-wide rate since PSL is the only manufacturer, and the only regular exporter, of carbon steel wire rod in New Zealand.

DOC Position: We have, in fact, calculated separate rates for each company. Because benefits provided to NZS are *de minimis*, NZS is excluded from this determination. Therefore, PSL's rate is the countrywide rate.

Comment 4: Petitioners claim that the discrepancy between the amount of EMDTI benefit received by PSL as reported in the questionnaire response and in the company's financial statement has not adequately been explained.

DOC Position: As stated in the verification report, although the tax benefit is calculated by taking 67.5 percent of total qualifying expenditures, the actual benefit from the EMDTI program is 22.5 percent of total qualifying expenditures. The corporate tax rate in New Zealand is 45 percent. Absent EMDTI, these expenditures would qualify as normal business deductions at the 45 percent rate. Thus, PSL's annual report for fiscal 1984 shows the total export tax savings which includes EPTI tax credits and the 67.5 percent of the total qualifying expenditures. In PSL's questionnaire response, however, the benefit under EMDTI is appropriately reported as 22.5 percent of the qualifying expenditures.

Comment 5: Petitioners argue that, in calculating the benefits received from sales tax exemptions or refunds on imported machinery and capital equipment, the Department should include all such exemptions and refunds received by NZS and discovered at verification.

DOC Position: We excluded sales tax exemptions and refunds received by NZS because NZS was able to demonstrate at verification that all sales tax exemptions and refunds it received were tied to its pipe mill, so that no such benefits were tied to exports of carbon steel wire rod.

Comment 6: Petitioners argue that sales tax exemptions and refunds received by PSL and discovered at verification should be multiplied by two to reflect the fact that records for the first six months of the review period were unavailable.

DOC Position: Because PSL could not provide complete and accurate data on the sales tax exemptions or refunds it received, as best information available

VOL
51
ISS
45
MR
7
1986
UMI

we are assuming that all machinery and capital equipment purchased during the review period were imported and were exempted from sales tax (see section I.C above).

Comment 7: Petitioners contend that the Crown loan received by NZS was made on terms inconsistent with commercial considerations, and that, although the interest rate on Mode A increased, the increase was merely partial compensation for the time value of the interest payments which were deferred over the span of the loan without compounding or penalty. Petitioners contend that this deferral of interest payments confers an additional benefit to the company.

DOC Position: Although we agree with petitioners that this loan confers a bounty or grant and that the deferral of interest payments confers an additional benefit upon NZS, we determine that any benefits to the company from the Mode A portion of this loan are not accruing to current exports of wire rod to the United States because this portion of the loan was repaid prior to our preliminary determination.

Respondents' Comments

Comment 1: Respondents argue that the Department should not calculate the EPTI benefit on the basis of EPTI tax credits received for exports made prior to the review period, since the government of New Zealand has reduced the level of EPTI benefits subsequent to the review period. Rather, the Department should calculate the value of the EPTI benefit received by the respondents based on the EPTI credit rate for exports made during the review period.

DOC Position: We disagree. We believe that benefits from tax programs accrue when a company actually receives the benefits, rather than when a company becomes eligible to receive them. Tax law changes, such as the EPTI phase-out schedule, cannot be considered to be in effect until fully implemented by the government and used by the respondent. We verified that PSL claimed and received a 10.5 percent EPTI tax credit on carbon steel wire rod in its most recently completed tax return, filed in March 1985 and covering the company's 1984 tax year. NZS did not claim an EPTI tax credit for its exports of carbon steel wire rod on its tax return filed during the review period. We also verified that NZS and PSL will be eligible to claim a 10.5 percent EPTI credit on their 1986 tax returns, which are scheduled to be filed later this year.

The EPTI tax credit rate will not be lowered until the company's 1986 fiscal year, and, under our tax methodology, these benefits are not effectively realized until the year in which the 1986 tax return is filed. If the scheduled EPTI changes are claimed in future tax returns, we will consider these changes in any future administrative review requested under section 751 of the Act.

Comment 2: Respondents contend that the Department erroneously excluded export sales of NZS from its denominator in calculating the EPTI benefit received by the respondents during the review period.

DOC Position: To calculate the EPTI benefit received by PSL, we have divided the EPTI tax credit claimed by PSL on its tax return filed during the review period for its exports of wire rod to the United States by the value of such exports during the review period. Since NZS did not claim any EPTI benefits on exports of carbon steel wire rod, and since NZS and PSL received materially different benefits, we have calculated company-specific rates for each program. Because the overall rate for NZS is *de minimis*, PSL's company-specific rate becomes the country-wide rate and NZS is not included in the countervailing duty order.

Comment 3: Respondents contend that no bounty or grant should be calculated as a result of sales tax exemptions received by NZS, as none of the sales tax exemptions were for goods used to make wire rod or billets, which are the major input into wire rod.

DOC Position: We agree. Because sales tax exemptions received by NZS were for machinery and equipment not used to produce wire rod or billet, we do not find this program to confer a bounty or grant on the subject merchandise sold by NZS.

Comment 4: Respondents contend that no bounty or grant should be calculated as a result of sales tax exemptions received by PSL since all items purchased for which sales tax exemptions and refunds were available fall under specific codes of the Schedule of Goods Exempt from Sales Tax in New Zealand Customs Tariff, and were not dependent upon actual or projected export performance.

DOD Position: We disagree. At verification, we were unable to examine PSL's complete records on sales tax exemptions and refunds on imported capital equipment and machinery. Files were available for the last six months of the review period only. At the Sales Tax Division of the Auckland Customs office, we were unable to verify that items purchased by PSL for which sales tax exemptions and refunds were received fall under specific codes of the Schedule of Goods Exempt from Sales Tax. Furthermore, the laws on sales tax exemptions and refunds clearly tie such exemptions and refunds to export performance.

Verification

In accordance with section 776(a) of the Act, we verified the information and data used in making our final determination. During verification, we followed normal verification procedures, including meetings with government officials and inspection of documents, as well as on-site inspection of the accounting records of NZS and PSL, the companies producing and exporting the merchandise under investigation to the United States.

Administrative Procedures

We afforded interested parties an opportunity to present oral views in accordance with our regulations (19 CFR 355.35). No public hearing was requested. In accordance with the Department's regulations [19 CFR 355.34(a)], written views were received on February 7 and 20, 1986, and were considered in this determination.

Suspension of Liquidation

Suspension of liquidation ordered in our preliminary affirmative countervailing duty determination will remain in effect until further notice, except with respect to carbon steel wire rod exported by NZS. The estimated net bounty or grant for PSL and for all other manufacturers, producers, or exporters in New Zeland of carbon steel wire rod, except for NZS, is 25.69 percent ad *valorem.*

In accordance with section 706(a)(3) of the Act, we are directing the U.S. Customs Service to require a cash deposit in the amount indicated above for each entry of the subject merchandise from New Zealand, other than that exported by NZS, which is entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register** and to assess countervailing duties in accordance with sections 706(a)(1) and 751 of the Act.

This notice is published pursuant to section 705(d) of the Act [19 U.S.C. 1671d(d)].

Dated: March 3, 1986.

Paul Freedenberg,

Assistant Secretary for Trade Administration.

Extension of Final Countervailing Duty Determination; Oil Country Tubular Goods From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On February 7, 1986, we received a letter from counsel for petitioners requesting that we extend the final countervailing duty determination on oil country tubular goods from Canada to coincide with the final antidumping duty determination on a simultaneously initiated investigation of the same merchandise from the same country. This request was made pursuant to section 705(a)(1) of the Tariff Act of 1930, as amended.

Pursuant to petitioners' request, we are extending the date of the final countervailing duty determination on oil country tubular goods from Canada until not later than April 16, 1986, to correspond to the date of the final antidumping duty determination.

Under Article 5.3 of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (1979), we would have to terminate suspension of liquidation of countervailing duties if the final injury determination date, as extended, was more than four months after the date of publication of the preliminary affirmative countervailing duty determination, December 30, 1985 (50 FR 53172). Therefore, if our final determination is affirmative, we will terminate the suspension of liquidation of countervailing duties for all oil country tubular goods from Canada entered, or withdrawn from warehouse, for consumption on or after May 1, 1986, and before the date on which the International Trade Commission (ITC) makes a final affirmative injury determination in this investigation. If our final determination or that of the ITC is negative, the investigation will be terminated.

Dated: February 27, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-357-501]

Postponement of Final Antidumping Duty Determination; Oil Country Tubular Goods from Argentina

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On February 11, 1986, we received a request from counsel for the respondent Dalmine Siderca S.A.I.C. (Dalsid) in the antidumping duty investigation of oil country tubular goods from Argentina that the final determination be postponed as provided for in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)(2)(A)). Pursuant to this request, we are postponing our final antidumping duty determination as to whether sales of oil country tubular goods from Argentina have been made at less than fair value until not later than May 21, 1986.

EFFECTIVE DATE: March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Mary Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-1769.

SUPPLEMENTARY INFORMATION: On August 12, 1985, we published a notice in the **Federal Register** that we were initiating, under section 732(b) of the Act (19 U.S.C. 1673a(b)), an antidumping duty investigation to determine whether imports of oil country tubular goods from Argentina are being, or are likely to be sold at less than fair value (50 FR 33386). We issued our preliminary affirmative determination on January 27, 1986 (50 FR 3387). This notice stated that we would issue a final determination on or before Aoril 8, 1986. On February 11, 1986, counsel for the respondent requested that we extend the period for the final determination until not later than the 135th day after the date of our preliminary determination in accordance with section 735(a)(2)(A) of the Act. This respondent accounts for a significant proportion of exports of the subject merchandise to the United States, and thus is qualified to make this request. In order that this investigation may proceed concurrently with that of oil country tubular goods from Taiwan, we are postponing the date of the final determination until May 21, 1986. Accordingly we grant the request and postpone our final determination until not later than May 21, 1986.

The public hearing is also being postponed until 10:00 a.m. on April 9, 1986, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Accordingly, prehearing briefs must be submitted to the Deputy Assistant Secretary by April 2, 1986.

This notice is published pursuant to section 735(d) of the Act.

John Evans,

Acting Deputy Assistant Secretary for Import Administration.

March 3, 1986.

Petroleum Wax Candles From the People's Republic of China; Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have amended our preliminary determination that petroleum wax candles from the People's Republic of China (PRC) are being, or are likely to be, sold in the United States at less than fair value. The corrected weighted-average margin applicable to all exporters is 135.73 percent.

EFFECTIVE DATE: March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Michael Ready or Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-2613 or 377-1769.

SUPPLEMENTARY INFORMATION: On February 19, 1986, we published our preliminary determination that petroleum wax candles from the PRC are being, or are likely to be sold in the United States at less than fair value (51 F.R. 6016). We have subsequently learned of errors in the import statistics upon which we based our calculation of foreign market value. Specifically, the value recorded for a shipment from Malaysia was understated. Also the country of origin of a shipment of candles from the PRC was erroneously recorded as being Guinea. In fact there were no imports of the subject merchandise from Guinea during the period of investigation. Using corrected statistics regarding imports of candles from Malaysia, we recalculated foreign

VOL 51 ISS 45 MR 7 1986 UMI

market value and the weighted-average dumping margin. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the corrected estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below.

Manufacturer/producer/exporter	Weighted-average margin percentage
China National Native Produce & Animal By-Products Import & Export Corporation	136.73
All others	136.73

Preliminary Affirmative Countervailing Duty Determination; Porcelain-on-Steel Cooking Ware From Mexico

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Mexico of porcelain-on-steel cooking ware. The estimated net subsidy is 2.29 percent *ad valorem.*

We have notified the United States International Trade Commission (ITC) of our determination. We are directing the U.S. Customs Service to suspend liquidation of all entries of porcelain-on-steel cooking ware from Mexico that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and to require a cash deposit or bond on entries of these products in an amount equal to the estimated net subsidy.

If this investigation proceeds normally, we will make our final determination by May 13, 1986.

EFFECTIVE DATE: March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Betsy Killian or Mary Martin, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-1673 or 377-2830.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon the questionnaire responses, we preliminarily determine that there is reason to believe or suspect that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Mexico of porcelain-on-steel cooking ware. For purposes of this investigation, the following programs are preliminarily found to confer subsidies:

- Fund for the Promotion of Exportation of Mexican Manufactured Products (FOMEX).
- Fund for Industrial Development (FONEI).
- Foreign Currency Financing of Imports (PROFIDE).

We preliminarily determine the estimated net subsidy to be 2.29 percent *ad valorem* for all manufacturers, producers, or exporters of porcelain-on-steel cooking ware in Mexico.

Case History

On December 4, 1985, we received a petition in proper form filed by the Porcelain-On-Steel Committee of the Cookware Manufacturers Association and the General Housewares Corporation. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleged that manufacturers, producers, or exporters of porcelain-on-steel cooking ware in Mexico receive, directly or indirectly, subsidies within the meaning of section 701 of the Act and that these imports materially injure, or threaten material injury to, a U.S. industry.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on December 24, 1985, we initiated this investigation (50 FR 53355). We stated that we expected to issue a preliminary determination by February 27, 1986.

On April 23, 1985, the Office of the United States Trade Representative announced that Mexico is a "country under the Agreement," within the meaning of section 701(b)(2) of the Act. Consequently, Title VII of the Act applies to this investigation, and the ITC is required to determine whether imports of the subject merchandise from Mexico materially injure, or threaten material injury to, a U.S. industry. Therefore, we notified the ITC of our initiation. On January 16, 1986, the ITC determined that there is a reasonable indication that imports of porcelain-on-steel cooking ware from Mexico materially injure a U.S. industry (51 FR 3862).

On January 3, 1986, we presented questionnaires concerning the petitioners' allegations to the government of Mexico in Washington, DC. The government of Mexico, Cinsa, S.A., and Troqueles y Esmaltes, S.A., provided responses to our questionnaires on February 3, 1986.

Scope of the Investigation

The products covered by this investigation are porcelain-on-steel cooking ware, including teakettles, which do not have self-contained electric heating elements. All of the foregoing are constructed of steel, and are enameled or glazed with vitreous glasses. These products are provided for in items 654.0815, 654.0824 and 654.0827 of the *Tariff Schedules of the United States Annotated* (TSUSA). Kitchen ware, currently reported under item 654.0828 of the TSUSA, is not subject to this investigation.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of this investigation. These principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published in the April 26, 1984, issue of the **Federal Register** (49 F.R. 18006).

Consistent with our practice in preliminary determinations, where a response to an allegation denies the existence of a program, receipt of benefits, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a subsidy in the final determination.

In establishing a rate of cash or bond deposit, the Department normally considers program-wide changes that occur before a preliminary determination. On January 1, 1986, the Mexican government raised the interest rate on the Fund for Promotion of Exportation of Manufactured Products (FOMEX) pre-export financing to 44.8 percent and on FOMEX export financing

to 7.4 percent. The Mexican government made these changes in observance of the stipulation in the Understanding, reached between the United States and Mexico regarding subsidies and countervailing duties, that two-thirds of the subsidy element of such financing would be eliminated as of January 1, 1986. If this were a program-wide change, to calculate the cash deposit or bond the Department would compare the January 1986 FOMEX rates to a benchmark based on commercial interest rates as of January 1, 1986. However, because the Department has reason to believe or suspect that the FOMEX rates established as of January 1, 1986 may be effective for only one month and has no information on FOMEX rates after January 1986, we have used the actual rates for FOMEX loans during the review period for purposes of this determination. At verification, we intend to seek clarification of the Mexican government's export financing rates on FOMEX loans.

For purposes of this preliminary determination, the period for which we are measuring subsidies (the review period) is calendar year 1985. Based upon analysis of the petition and the responses to our questionnaries, we preliminarily determine the following:

I. Programs Preliminarily Determined To Confer Subsidies

We preliminarily determine that the following programs provide countervailable subsidies to manufacturers, producers, or exporters of porcelain-on-steel cooking ware in Mexico:

A. FOMEX

FOMEX is a trust of the Secretaria de Hacienda y Credito Publico to promote the manufacture and sale of exported products with the Bank of Mexico acting as the trustee. On July 27, 1983, FOMEX was formally incorporated into the National Bank for Foreign Trade. The National Bank for Foreign Trade administers the financing of FOMEX pre-export and export loans through financial institutions that establish contracts for lines of credit with manufacturers and exporters.

During the review period, exporters could obtain FOMEX pre-export loans denominated in pesos with a maximum nominal annual interest rate of 39.6 percent, or export loans denominated in dollars with a maximum annual interest rate of 6.9 percent. According to the responses, during the review period, both companies under investigation received pre-export peso-denominated FOMEX loans to finance exports to the United States. In addition, Troqueles y Esmaltes, S.A. received expert dollar-denominated FOMEX loans.

Because the FOMEX pre-export financing program provides loans for export-related purposes at interest rates significantly lower than those for comparable commercially available loans, we preliminarily determine that this program confers a subsidy upon the exportation of porcelain-on-steel cooking ware.

In prior Mexican countervailing duty cases, we chose as our benchmark the average of the nominal rates published monthly by the Banco de Mexico in the *Indicadores Economicos* (the "IE" rate), which the weighted average for the rates charged by commercial banks on peso loans. However, as of January, 1985, the Banco de Mexico no longer publishes these rates. Therefore, we consider the most appropriate benchmark to be the Banco de Mexico's Costo Porcentual Promedio ("CPP"), the average cost of funds to Mexican banks, plus a spread equal to the average differential between the CPP and the nominal IE rate from 1981 to 1984, the only period for which we have nominal IE rates. Using this information, we have calculated a comparable peso-denominated average loan rate of 61.10 percent for the review period.

With respect to FOMEX export loans, because exporters may obtain dollar-denominated loans from export-related purposes at interest rates lower than those for comparable commercially available loans, we preliminarily determine that this program confers a subsidy upon the exportation of the products under investigation. In the past, to calculate the benefit from the short-term dollar-denominated FOMEX export loans, we used as the benchmark the weighted average of the interest rates for commercial and industrial loans of less than one million dollars from table 1.34 of the *Federal Reserve Bulletin.* The Federal Reserve no longer publishes this table, but includes similar information in table 4.23. The main difference, for our purposes, is that table 4.23 differentiates between fixed-rate and floating-rate loans. Since FOMEX loans carry fixed rates, we have considered only the fixed-rate section of the commercial and industrial loans reported in table 4.23. We continue to exclude loans of greater than one million dollars. Using that information, we conclude that comparable dollar-denominated loans were available commercially at an average rate of 12.93 percent during the review period.

We determined the amount of the benefit from these pre-export and export loans based on the interest rate differentials between the FOMEX financing rates and the applicable aforementioned benchmarks. Because these loans are export-related, we allocated the benefit over the companies' total exports of the products under investigation during the review period. On this basis, we calculated an estimated net subsidy of 1.90 percent *ad valorem.*

B. Fund for Industrial Development (FONEI)

FONEI is a specialized financial development fund administered by the Bank of Mexico, which grants long-term credit at below-market rates for the creation, expansion, or modernization of enterprises in order to foster industrial decentralization and promote the efficient production of goods capable of competition in the international market. FONEI loans are available under various programs having different eligibility requirements.

The responses stated that Troqueles y Esmaltes, S.A. received FONEI loans for investment in equipment. FONEI loans for investment in equipment are only available to companies located outside of Zone IIIA (Mexico City and environs). Because such loans are limited to companies in particular geographic regions and are made at below-market rates, we preliminarily determine that FONEI lonas for investment in equipment confer a subsidy upon the subject merchandise.

Because the interest rates on the FONEI loans under review have changed over the life of the loans, we treated these loans as a series of short-term loans. To evaluate the benefit of these loans, we compared the rates of the FONEI loans to our benchmark, which is equal to the Banco de Mexico's CPP rate plus a spread equal to the average differential between the CPP and the nominal IE rates from 1981 to 1984. We then divided the amount of the benefit (i.e., the difference in the rates of the two loans) by the total sales of all products of the companies under investigation during the review period. In this manner, we calculated an estimated net subsidy of 0.28 percent *ad valorem.*

C. Foreign Currency Financing of Imports (PROFIDE)

PROFIDE, under the auspices of FOMEX, provides exporters with access to dollar-denominated loans with variable interest rates to finance the importation of inputs. These inputs can be used for the production of merchandise for sale in domestic or foreign markets.

VOL
51
ISS
45
MR
7
1986
UMI

The responses stated that only Troqueles y Esmaltes, S.A. received short-term PROFIDE loans during the review period. These loans were used for the production of a variety of products, not only the products under investigation.

Since this loan program is only available to exporters and because the rates of interest on these loans are below our commercial dollar-denominated short-term benchmark (from the *Federal Reserve Bulletin*), we preliminarily determine this program to be countervailable.

To calculate the benefit conferred by these loans, we took the interest rate differential between Troqueles y Esmaltes, S.A.'s PROFIDE loans and our dollar-denominated short-term benchmark. Because these loans are export-related, we allocated the benefit over the total exports of all products by the companies under investigation. On this basis, we calculated an estimated net subsidy of 0.11 percent *ad valorem*.

II. Programs Preliminarily Determined Not To Be Used

We preliminarily determine that the following programs have not been used by the companies that manufacture, produce, or export porcelain-on-steel cooking ware in Mexico:

A. Export Credit Insurance

Under this FOMEX program, exporters may be granted insurance credit against expropriations, defaults and other political risks. Petitioners allege that FOMEX premiums are inadequate to cover the long-term operating risks of the program and that these programs may offer subsidies to exporters. Because the responses stated that both of the companies under investigation did not receive preferential export credit insurance, we preliminarily determine that this program was not used.

B. Accelerated Depreciation

Companies may benefit from accelerated depreciation at preferential rates based on their status as a priority industry or their location in specific regions of the country. The response stated that neither company claimed accelerated depreciation on its tax return filed during the review period; therefore, we preliminarily determine that this program was not used.

C. NAFINSA

Companies in priority areas may receive certain countervailable loans at preferential interest rates through NAFINSA. The responses stated that neither company under investigation received NAFINSA loans, therefore we preliminarily determine that this program was not used.

D. Energy Subsidies

The Mexican government provides subsidies for electrical, fuel and petrochemical purchases of firms locating or expanding in certain zones of the country. The responses stated that the porcelain-on-steel cooking ware companies did not apply to participate in this program. For this reason, we preliminarily determine that this program was not used.

E. Import Duty Reductions and Exemptions

Producers of export products may receive import duty reductions or exemptions on imported machinery and equipment to be used in manufacturing exported products, based on export performance and location within priority zones. The two companies under investigation stated in their responses that they did not use this program. We preliminarily determine, therefore, that this program was not used.

f. Bancomext

Bancomext provides financing for capital investment, production costs, and importation of raw materials for the manufacture of exports. The responses stated that no Bancomext funds were given to the companies under investigation. We preliminarily determine, therefore, that this program was not used.

G. Preferential State Investment Incentives

Certain Mexican states may offer Mexican industries partial or total exemption from state taxes, free or low cost land, or certain local infrastructure improvements as incentives for establishing or expanding industrial facilities, or as incentives for exporting. Since the responses stated that neither company benefitted from state investment incentives, we preliminarily determine that this program was not used.

H. Article 94 Loans

Under section II of Article 94 of the General Law of Credit Institutions and Auxiliary Organizations, the Bank of Mexico provides preferential loans to exporters for the financing of manufactured products and the production and/or inventory of goods produced in Mexico for export. Based on the responses to our questionnaire, we preliminarily determine that this program was not used.

I. Fondo Nacional de Fomento Industrial (FOMIN)

FOMIN operates as a trust fund, providing funding to certain small- and medium-sized companies by either buying stock or providing loans at below-market rates. Since the responses stated this program has not been used by the companies under investigation, we preliminarily determine that it was not used.

J. Guarantee and Development Fund for Medium and Small Industries (FOGAIN)

FOGAIN is a program that provides financing at interest rates below prevailing commercial rates to all small- and medium-sized firms in Mexico. Interest rates vary depending upon whether a small- or medium-sized business has been granted priority status, and whether a business is located in a zone targeted for industrial growth. Since the responses stated that neither company under investigation is eligible to participate in this program, we preliminarily determine that this program was not used.

K. Preferential Federal Tax Credits (CEPROFI)

CEPROFIs are tax credits used to promote National Development Plan (NDP) goals, which include increased employment, encouragement of regional decentralization, and industrial development, particularly of small- and medium-sized firms. CEPROFI tax credits are also granted for investments in plant and equipment and for certain payments relating to increased employment and wages. According to the responses to our questionnaire, this program was not used by the companies under investigation during the review period. Therefore, we preliminarily determine that this program was not used.

L. New Exchange Risks Trust Program (FICORCA II)

Ficorca II, established on February 15, 1984, is a trust fund set up by the Mexican government and the Bank of Mexico operating through the country's credit institutions. The responses stated that this program is similar to Ficorca I (which was terminated on December 20, 1982) and is available to Mexican firms with registered debt in foreign currency as of December 20, 1982 and payable abroad to Mexican credit institutions or foreign financial entities. Such firms may purchase, at a controlled rate, the amount in dollars necessary to pay principal on these loans. Ficorca II also allows companies to receive credit in pesos equal to the amount of dollars

obtained [to pay the principal on their foreign currency loans]. According to the responses, neither company under investigation received benefits under the Ficorca II program. Therefore, we preliminarily determine that this program was not used.

M. Government-Financed Technology Development

Under the Industrial Development Plan 1979–1982–1990, certain Mexican companies may receive grants to purchase technological services for new plants. Based upon the responses to our questionnaire, we preliminarily determine that this program was not used.

N. The Mexican Institute of Foreign Trade (IMCE)

Certain Mexican companies may receive benefits from IMCE, which was created in 1970 to promote Mexican foreign trade by organizing foreign trade fairs, promoting visits of foreign trade missions to Mexico, and providing exporters with technical assistance. On December 20, 1985, the law establishing IMCE was repealed and ICME is currently being dismantled. Because the response stated that neither company received benefits from this program, we preliminarily determine that this program was not used.

O. Trust for Industrial Parks, Cities and Commercial Centers (FIDEIN)

Companies in priority areas may receive low-interest loans or other benefits from FIDEIN, a program aimed at developing industrial parks and cities. The responses stated that neither company under investigation is located in an industrial park. Therefore, we preliminarily determine that this program was not used.

P. Port Facilities

The Mexican porcelain-on-steel cooking ware manufacturers, producers and/or exporters were alleged to have benefitted from preferential rates at Mexican port facilities. The questionnaire responses stated that the companies under investigation did not receive any benefits for the use of port facilities. Thus, we preliminarily determine that this program was not used.

Q. Preferential Vessel, Freight, Terminal, and Insurance Benefits

Certain Mexican companies may benefit from rebates or other discounts on transportation, storage, and insurance expenses involved in exporting products to the United States. Since both companies under investigation stated that they did not receive preferential vessel, freight, terminal, or insurance charges, we preliminarily determine that this program was not used.

IV. Programs for Which Additional Information Is Needed

We preliminarily determine that additional information is needed on the following programs:

A. Drawback Adjusted for Changes in Exchange Rates

The Mexican government may provide an overrebate of import duties. A recent decree published in the *Diario Official* on April 24, 1985, provides that the drawback of import duties may be adjusted by the changing relationship of the peso to the dollar, thus rebating import duties in pesos, but in terms of constant dollars. Since, in recent years, there has been a consistent devaluation of the peso against the dollar, this program may result in the rebate of more duties than were paid. The government's response stated that none of the companies under investigation received drawbacks of import duties for non-physically incorporated inputs, while the companies' responses stated that they did not use this program.

Because the questionnaire responses contained insufficient information with respect to this program (i.e., how the program operates, whether a substitution drawback provision exists, etc.), we preliminarily determine that more information is needed.

B. Temporary Importation Scheme

This scheme exempts exporters from the payment of import duties on inputs physically incorporated into exported products. It also exempts exporters and domestic producers from import duties on non-physically incorporated inputs so long as the imported items remain in Mexico for a defined period of time (as established by the Mexican Customs Law). The response of the government of Mexico states that the firms under investigation have used the temporary importation scheme under the general terms of the Mexican Customs Law. Because the responses of the government of Mexico as well as the companies under investigation are unclear (i.e., how the program operates, the *de facto* and *de jure* availability, what is meant by the "general terms" of the Customs Law, etc.), we preliminarily determine that additional information is needed.

Verification

In accordance with section 776(a) of the Act, we will verify the data used in making our final determination. As previously stated, we will not accept for our final determination any statement in the responses that cannot be verified.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, providing the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry 120 days after the Department makes its preliminary affirmative determination or 45 days after its final affirmative determination, whichever is later.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of porcelain-on-steel cooking ware from Mexico which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**, and to require a cash deposit or bond for each such entry of this merchandise equal to 2.29 percent *ad valorem. This suspension will remain in effect until further notice.*

Public Comment

In accordance with § 355.35 of our regulations, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on April 3, 1986, at the U.S. Department of Commerce, Room 1413, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, at the above address within ten (10) days of the publication of this notice.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, pre-hearings in at least ten (10) copies must be submitted to the Deputy Assistant Secretary by March 13, 1986.

BILLING CODE 3510-DS-M

[C-583-509]

Preliminary Negative Countervailing Duty Determination; Porcelain-on-Steel Cooking Ware from Taiwan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminary determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters of porcelain-on-steel cooking ware in Taiwan. The estimated net subsidy is 0.005 percent *ad valorem.* This rate is *de minimis,* and therefore our preliminary countervailing duty determination is negative. We have notified the United States International Trade Commission (ITC) of our determination.

If this investigation proceeds normally, we will make our final determination by May 13, 1986.

EFFECTIVE DATE: March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Laurel LaCivita or Mary Martin, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–0189 or (202) 377–2830.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon the questionnaire responses, we preliminarily determine that the following program is countervailable:

- Export Loss Reserves.

We preliminarily determine the estimated net subsidy to be 0.005 percent *ad valorem.* Although we have determined this program to be countervailable, the respondents received *de minimis* benefits during the review period. Therefore, we determine that no benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters of porcelain-on-steel cooking ware in Taiwan.

Case History

On December 4, 1985, we received a petition in proper form filed by the Porcelain-on-Steet Committee of the Cookware Manufacturers Association and the General Housewares Corporation. In compliance with the filing requirements of § 355.26 of our Regulations (19 CFR 355.26), the petition alleged that manufacturers, producers, or exporters of porcelain-on-steel cooking ware in Taiwan receive, directly or indirectly, subsidies within the meaning of section 701 of the Act, and that these imports materially injure, or threaten material injury to, a U.S. industry.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on December 24, 1985, we initiated the investigation (50 FR 53354). We stated that we expect to issue a preliminary determination by February 27, 1986.

Since Taiwan is entitled to an injury determination under section 701(b) of the Act, the ITC is required to determine whether imports of the subject merchandise from Taiwan materially injure, or threaten material injury to, a U.S. industry. Therefore, we notified the ITC of our initiation. On January 16, 1986, the ITC determined that there is a reasonable indication that imports of porcelain-on-steel cooking ware from Taiwan materially injure a U.S. industry (51 FR 3862).

We received a timely request for exclusion from any countervailing duty order from Four Star International Trading Company (Four Star), an exporter of porcelain-on-steel cooking ware from Taiwan, who indicated that they receive no benefits under the countervailing duty law. On February 14, 1986, the Department requested that the authorities on Taiwan certify whether Four Star received any benefits from the programs under investigation.

On January 3, 1986, we presented questionnaires concerning the petitioners' allegations to the American Institute in Taiwan in Washington, D.C. Responses to the questionnaires were received on February 6, 1986 and February 18, 1986.

Scope of Investigation

The products covered by this investigation are porcelain-on-steel cooking ware, including teakettles, which do not have self-contained electric heating elements. All of the foregoing are constructed of steel, and are enameled or glazed with vitreous glasses. These products are provided for in items 654.0815, 654.0824 and 654.0827 of the *Tariff Schedules of the United States, Annotated (TSUSA).* Kitchen ware, currently provided for under item 654.0828 of the *TSUSA,* is not subject to this investigation.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina; Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published in the April 26, 1984, issue of the **Federal Register** (49 FR 18006).

Consistent with our practice in preliminary determinations, where a response to an allegation denies the existence of a program, receipt of benefits, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a subsidy in the final determination.

For purposes of this preliminary determination, the period for which we are measuring subsidies (the review period) is calendar year 1985. Based upon our analysis of the petition and the responses to our questionnaires, we preliminarily determine the following:

I. Program Preliminarily Determined to be Counterviable

We preliminarily determine that the following program provides countervailable benefits to manufacturers, producers, or exporters of porcelain-on-steel cooking ware in Taiwan.

A. Export Loss Reserves

Article 31 of the Statute for Encouragement of Investment (SEI) permits exporters to establish an export loss reserve of up to one percent of the previous year's export exchange settlement to be used exclusively for compensating export losses. Companies treat the export loss reserve as a business expense and deduct it from taxable income in one year, then balance the account and carry the reserve funds forward as taxable income for the next year. Tian Shine Enterprise Co., Ltd. (Tian Shine), a producer of porcelain-on-steel cooking ware, reported that it used this program during the review period.

Because export loss reserves are contingent on export sales, we preliminarily determine that it confers a benefit which constitutes an export subsidy. To calculate the benefit, we treated tax savings from the export loss reserve as a one-year interest-free loan. We compared the interest-free rate with the maximum lending rate set by the Central Bank, multiplied the difference by the amount of the tax savings, then allocated the benefit over the value of Tian Shine's 1985 exports of porcelain-on-steel cooking ware. The estimated net subsidy is 0.005 percent *ad valorem.*

II. Programs Preliminarily Determined Not to be Used

We preliminarily determine that the following programs are not used by the manufacturers, producers, or exporters of porcelain-on-steel cooking ware in Taiwan:

A. Preferential Export Financing

The Export Loan Discount Regulations of the Central Bank of China permit registered exporters to apply for low-cost export loans upon presentation of a letter of credit. Authorized commercial banks provide export loans at normal commercial rates, then apply for interest-rate reductions from the Central Bank. If the Central Bank approves the reduction, commercial banks correspondingly reduce the lending rate to the exporters.

The responses stated that none of the companies under investigation obtained export financing under the Export Loan Discount Regulations of the Central Bank of China. Therefore, we preliminarily determine this program was not used.

B. Preferential Income Tax Ceiling—22 Percent

Article 15 of the SEI permits capital-intensive and/or technology-intensive enterprises engaged in the basic metal production industry, heavy machinery industry, or petrochemical industry to use a marginal tax rate of 22 percent instead of the 25- or 35-percent rate required by Taiwan's graduated income tax law.

The responses stated that none of the companies under investigation claimed the 22-percent income tax rate. Therefore, we preliminarily determine this program was not used.

C. Accelerated Depreciation and Tax Holiday

Article 6 of the SEI allows newly established "productive enterprises" to accelerate depreciation on fixed assets, machinery and equipment or to select a five-year holiday on corporate income taxes. In addition, expanding firms may participate in a four-year tax holiday on increased profits from expansion or a rapid depreciation of newly purchased buildings or equipment.

The responses stated that none of the companies under investigation received benefits under Article 6 of the SEI. Therefore, we preliminarily determine this program was not used.

D. Duty Exemptions and Deferrals on Imported Equipment

Article 21 of the SEI allows productive enterprises to pay import duties and dues on selected capital equipment in a series of installments beginning one year from the date of importation. In addition, qualified enterprises are exempt from import duties on selected machinery and equipment used for the establishment or expansion of an approved project or for research and development.

The responses stated that none of the companies under investigation used dtuy exemptions or deferrals on imported equipment. Therefore, we preliminarily determine this program was not used.

E. Preferential Long-Term Loans

Article 84 of the SEI permits the Executive Yuan to establish and administer a special development fund to promote investments of interest to national economic development. The response stated that none of the companies under investigation obtained Article 84 loans. Therefore, we preliminarily determine this program was not used.

Verification

In accordance with section 776(a) of the Act, we will verify all data used in making our final determination. As previously stated, we will not accept for our final determination any statement in the responses that cannot be verified.

ITC notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 75 days after the Department makes its final affirmative determination.

Public Comment

In accordance with § 355.35 of our regulations, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination at 10 a.m. on April 14, 1986, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participtate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, at the above address within 10 days of the publication of this notice.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, pre-hearing briefs with at least 10 copies must be submitted to the Deputy Assitant Secretary by April 7, 1986. Oral presentations will be limited to issues raised in the briefs.

In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, written views will be considered if received not less than 30 days before the final determination or, if a hearing is held, within 10 days after the hearing transcript is available.

This notice is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

Dated: February 27, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

VOL 51 ISS 45 MR 7 1986 UMI

[C-489-502]

Countervailing Duty Order; Certain Welded Carbon Steel Pipe and Tube Products from Turkey

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: In its investigation, the United States Department of Commerce (the Department) determined that certain welded carbon steel pipe and tube products (standard pipe and tube, and line pipe) from Turkey are receiving benefits which constitute subsidies within the meaning of the countervailing duty law. In a separate investigation, the United States International Trade Commission (ITC) determined that an industry in the United States is materially injured, or threatened with material injury, by reason of imports of standard pipe and tube from Turkey, and that an industry in the United States is threatened with material injury by reason of imports of line pipe from Turkey.

Therefore, based on these findings, all entries, or withdrawals from warehouse, for consumption of standard pipe and tube from Turkey, on or after October 28, 1985, the date on which the Department published its preliminary countervailing duty determinations in the **Federal Register**, will be liable for the possible assessment of countervailing duties. In addition, all entries, or withdrawals from warehouse, for consumption of line pipe from Turkey, on or after March 3, 1986, the date on which the ITC published its final affirmative injury determination in the **Federal Register**, will be liable for the possible assessment of countervailing duties.

EFFECTIVE DATE: March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Peter Sultan or Mary Martin, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, telephone: (202) 377-1439 (Sultan) or (202) 377-2830 (Martin).

SUPPLEMENTARY INFORMATION: The products covered by this order are:

(1) Welded carbon steel pipe and tube, with an outside diameter of .375 inch or more, but not over 16 inches, of any wall thickness, currently classifiable in the *Tariff Schedules of the United States, Annotated* (TSUSA), under items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258, and 610.4925. These products, commonly referred to in the industry as standard pipe or tube, are produced to various ASTM specifications, most notably A-120, A-53 or A-135; and

(2) Welded carbon steel line pipe with an outside diameter of .375 inch or more, but not over 16 inches, and with a wall thickness of not less than .065 inch, currently classifiable in the TSUSA, under items 610.3208 and 610.3209. These products are produced to various American Petroleum Institute (API) specifications for line pipe, most notably API-L or API-LX.

In accordance with section 703 of the Act (19 U.S.C. 1671b), on October 28, 1985, the Department published preliminary determinations which stated that there was reason to believe or suspect that imports of certain welded carbon steel pipe and tube products from Turkey received benefits which constitute subsidies within the meaning of the countervailing duty law (50 FR 43597). In accordance with section 705 of the Act (19 U.S.C. 1671b), on January 6, 1986, the Department published its final determinations that these imports are being subsidized (51 FR 1268).

On February 21, 1986, in accordance with section 705(d) of the Act (19 U.S.C. 1671d), the ITC notified the Department of its determinations that imports of standard pipe and tube from Turkey materially injure a U.S. industry, or threaten a U.S. industry with material injury, and that imports of line pipe from Turkey threaten a U.S. industry with material injury.

Therefore, in accordance with section 706 of the Act (19 U.S.C. 1671e), the Department directs the United States Customs Service to assess, upon further advice by the administering authority pursuant to section 706(a)(1) and 751 of the Act [19 U.S.C. 1671e(a)(1) and 1675], countervailing duties equal to the amount of the estimated net subsidy for all entries of certain welded carbon steel pipe and tube products from Turkey. These countervailing duties will be assessed on all unliquidated entries of standard pipe and tube from Turkey entered, or withdrawn from warehouse, for consumption, on or after October 28, 1985, the date on which the Department published its notice of "Preliminary Affirmative Countervailing Duty Determinations" in the **Federal Register**. In accordance with section 706(b)(2) of the Act [19 U.S.C. 1671e(b)(2)], countervailing duties will be assessed on all unliquidated entries of line pipe from Turkey entered, or withdrawn from warehouse, for consumption, on or after March 3, 1986, the date on which the ITC published notice of its final affirmative injury determinations. The Department also directs that suspension of liquidation be lifted for all entries of line pipe from Turkey entered, or withdrawn from warehouse, for consumption, before March 3, 1986, and that all estimated countervailing duties deposited on such entries be refunded and the appropriate bonds or other security be released.

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated customs duties on this merchandise, a cash deposit of 17.80 percent *ad valorem* on all entries of certain welded carbon steel pipe and tube products from Turkey. This determination constitutes a countervailing duty order with respect to certain welded carbon steel pipe and tube products from Turkey pursuant to section 706 of the Act (19 U.S.C. 1671e) and § 355.36 of the Commerce Regulations (19 CFR 355.36).

We have deleted from the Commerce Regulations Annex III to 19 CFR Part 355, which listed countervailing duty orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration, for copies of an updated list of orders currently in effect.

Notice of Review

In accordance with section 751(a)(1) of the Act [19 U.S.C. 1675(a)(1)], the Department hereby gives notice that, if requested, it will commence an administrative review of this order. For further information regarding this review, contact Mr. Richard Moreland at (202) 377-2786.

This notice is published in accordance with section 706 of the Act (19 U.S.C. 1671e) and § 355.36 of the Commerce Regulations (19 CFR 355.36).

Dated February 28, 1986.

John L. Evans,

Acting Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes; State University of New York et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301).

Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-028. Applicant: State University of New York at Buffalo, Buffalo, NY 14214. Instrument: Electron Microscope, Model JEM-100CXII with Accessories (Side Entry Type). Manufacturer: JEOL, Ltd., Japan. Intended use: See notice at 50 FR 46806. Instrument ordered: April 15, 1986.

Docket No. 86-030. Applicant: California State University, Dominquez Hills, Carson, CA 90747. Instrument: Electron Microscope, Model EM 109 with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use: See notice at 50 FR 48450. Instrument ordered: September 6, 1985.

Docket No. 86-035. Applicant: Mount Sinai School of Medicine of the City of New York, New York, NY 10029. Instrument: Electron Microscope, Model EM 10CA/C/CR with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use: See notice at 50 FR 48451. Application received by Commissioner of Customs: November 1, 1985.

Docket No. 86-040. Applicant: Good Samaritan Hospital and Medical Center, Portland, OR 97210. Instrument: Electron Microscope, Model EM 10CA with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use: See notice at 50 FR 48451. Application received by Commissioner of Customs: October 31, 1985.

Docket No. 86-018. Applicant: Rutgers University, Piscataway, NJ 08854. Instrument: Electron Microscope, Model JEM-100CX. Manufacturer: JEOL, Ltd., Japan. Intended use: See notice at 51 FR 3486. Instrument Ordered: May 13, 1985.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered.

Reasons: Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

BILLING CODE 3510-DS-M

University of Arizona Foundation; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No. 86-061. Applicant: University of Arizona Foundation, Tucson, AZ 85721. Instrument: ICP Quadrupole Mass Spectrometer. Manufacturer: VG instruments Inc., United Kingdom. Intended use: See notice at 51 FR 667.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides simultaneous qualitative and quantitative data for trace metal and major cations and abundance sensitivity of at least 10^{-8} for both high and low mass. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

BILLING CODE 3510-DS-M

University of Illinois Urbana-Champaign Campus; Consolidated Decision on Applications for Duty-Free Entry of Accessories for Foreign Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-048. Applicant: University of Illinois Urbana-Champaign Campus, Urbana, IL 61801. Instrument: Electron Energy Analyzer, Model EA10/100 with Accessories. Manufacturer: Leybold-Heraeus Vacuum Products Inc., West Germany. Intended Use: See notice at 50 FR 52821.

Comments: none received.

Decision: Approved. No instrument of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: This application relates to an accessory for an existing instrument. The accessory is pertinent to the applicant's intended use.

We know of no similar accessory manufactured in the United States scientifically equivalent to the foreign article for the intended use.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Marine Sanctuaries; Weeks Bay, AL

AGENCY: National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: NOAA is announcing that on February 19, 1986 the Assistant Administrator for NOS (NOAA) designated Weeks Bay, Alabama as a National Estuarine Sanctuary under authority of section 315 of the Coastal Zone Management Act, 16 U.S.C. 1461(1), and the National Estuarine Sanctuary Program Regulations, 15 CFR Part 921.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Lindelof, Sanctuary Programs Division, 3300 Whitehaven Street NW., Washington, DC 20235, 202/634-4236 or Mr. Sherman Shores, Alabama Department of Economic and Community Affairs, Montgomery, Alabama 36105, 205/284-8764.

SUPPLEMENTARY INFORMATION: Section 315 of the Coastal Zone Mangement Act, 16 U.S.C. 1461(1), and implementing regulations at 15 CFR Part 921 established the National Estuarine Sanctuary Program (NESP). The purpose of the NESP is for ". . . acquiring,

developing, or operating estuarine sanctuaries to serve as natural field laboratories in which to study and gather data on the natural and human processes occurring within the estuaries of the coastal zone . . ."

NOAA provides financial assistance to States on a fifty percent matching basis for land acquisition and development of research, education, and resource protection programs for the estuarine sanctuary.

A Draft Environmental Impact Statement and Management Plan for an Estuarine Sanctuary at Weeks Bay, Alabama was distributed to Federal and State agencies and the general public for review in September 1984. During the comment period, a public hearing was held in Fairhope, Alabama, to receive input on the proposed designation by NOAA and/or the plan proposed by the State to manage the site. Based on the written comments received and testimony presented during the public hearing, NOAA prepared a Final Environmental Impact Statement/Management Plan. The FEIS was distributed December 6, 1985. The 30 day comment period ended January 6, 1986. On February 19, 1986, Weeks Bay, Alabama, and portions of adjacent wetlands and fastlands were designated as a National Estuarine Sanctuary.

The boundary of the Sanctuary consists of the 1,718 acres of the waters constituting Weeks Bay up to mean high water (mhw), including the tidal reaches of the rivers and tributaries which drain into the embayment. The boundaries of the estuarine sanctuary also include 335 acres of fastland (property above mhw) within an "ecological core" between the mouths of the Fish and Magnolia Rivers and a 615-acre parcel possessing nearly 3 miles of shoreline frontage lying immediately south of Weeks Bay. The designation will result in the implementation of a plan which will establish a comprehensive management framework for carrying out surveillance and enforcement, resource studies, and interpretive programs.

Under the management scheme no new regulations have been proposed. The Interpretive Program provides a broad-based public education agenda that includes on-site and off-site activities geared to all visitors and users of the Sanctuary's resources. A Resource Studies Plan proposes to gather baseline data, monitor and assess water quality, and conduct comparative estuarine studies and wildlife research projects. Data from these studies will be used as the basis for improving coastal resource management decisions by the State and providing for the long-term protection of the Weeks Bay ecosystem.

DEPARTMENT OF DEFENSE

Army Department

Army Science Board (ASB); Partially Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: Monday-Wednesday, 24-26 March 1986.

Place: Ft. McNair, Washington, DC 20319.

Time:

24 March 1986, 1300–1700, C³I FSG, Pentagon, Closed Mtg
24 March 1986, 0900–1200, Weapons FSG, Pentagon, Closed Mtg
25 March 1986, 0730–1730, General Membership Mtg, Open Mtg
26 March 1986, 0830–1630, Log FSG, Pentagon, Closed Mtg
26 March 1986, 0815–1645, Human Capabilities & Resources FSG, Pentagon, Open Mtg.

Agenda: The 1986 Army Science Board General Membership Meeting program will include briefings of all Ad Hoc Subgroups and Summer Studies, and will include four Functional Subgroup meetings. The open portions of the meeting are open to the public. Any person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The closed portions of the meeting are closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters to be discussed in this portion of the meeting are so inextricably intertwined so as to preclude opening them to the public. The Army Science Board Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Education Appeal Board Hearings; Intent To Compromise Claim; California Department of Education

AGENCY: Department of Education.

ACTION: Notice of Intent to Compromise Claim.

SUMMARY: Notice is given that the Department intends to compromise a claim against the California Department of Education now pending before the Education Appeal Board (EAB), Docket No. 39-(171)-84 (20 U.S.C. 1234a(f)).

DATE: Interested persons may comment on the proposed action by submitting written data, views, or arguments on or before April 21, 1986.

ADDRESS: Comments should be addressed to Effie Forde-Williamson, Esq., Office of the General Counsel, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 4091, FOB-6), Washington, DC 20202.

SUPPLEMENTARY INFORMATION: The claim in question arose from an audit conducted by the Office of Inspector General in the U.S. Department of Education. The auditors examined programs funded under Title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2701 *et seq.*) (Title I) as administered by the California Department of Education (SEA) and as implemented by the Richmond Unified School District during the period from July 1, 1980 through June 30, 1982.

Under Title I, Federal funds were provided to local educational agencies (LEAs) through SEAs such as the California Department of Education, for programs "which contribute[d] particularly to meeting the special educational needs of educationally deprived children" in areas with high concentrations of children from low-income families (20 U.S.C. 2701). Title I funds could be used only to provide supplemental educational services to children who were both educationally deprived and resided in specified low-income areas. SEAs had the responsibility for administering the Title I program. In order to participate in Title I, an SEA had to provide assurances that Title I funds would be used only for projects that met all the Title I requirements and that had been approved by the SEA.

During the course of the audit, the auditors discovered that the Richmond Unified School District had charged to its Title I project costs for certain expenses which were not directly related to the Title I program. For example, the auditors found that certain State Board Meetings and training conferences were either not directly related to the Title I program, not for the primary purpose of disseminating technical information related to the Title I program, or not necessary for the efficient operation of the program. Therefore, the auditors concluded that these costs were not allowable. Based on these findings, the Assistant Secretary for Elementary and Secondary Education notified the SEA in a final determination letter dated August 15, 1984 that the SEA had to repay $21,255 for the misexpenditure of Title I funds by the Richmond Unified School District.

The SEA did not contest $3,046 of the $21,255, leaving a balance of $18,209 in dispute. The SEA appealed the remaining amount to the EAB.

The Department proposes to compromise the full amount of the claim of $21,255 for $12,150. This $12,150 includes the $3,046 which the SEA did not contest, plus an additional $9,104. Given the percentage of the amount being repaid and the cost of litigating the claim through the appeal process, the Department has determined that it would not be practical or in the public interest to continue this proceeding. Moreover, the Department is satisfied that the practice which resulted in the claim has been corrected and will not recqr

The public is invited to comment on the Department's intent to compromise this claim. Additional information may be obtained by writing to Effie Forde-Williamson, Esq. at the address given at the beginning of this notice.

(20 U.S.C. 1234a(f))

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Proposed Amendment of Rate Schedule NF-85 and Opportunity for Public Review and Comment

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice; Request for Comments. *BPA File No:* NF-85.

SUMMARY: Pursuant to section 7(i) of the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act), 16 U.S.C. 839e(i), the Bonneville Power Administration (BPA) proposes to modify nonfirm energy rate schedule NF-85.

Responsible Official: Shirley Melton is the responsible official.

DATE: Deadline for filing comments is 5 p.m., March 18, 1986.

ADDRESSES: Written comments should be submitted to Ms. Donna L. Geiger, Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212. BPA File No. NF-85 should be referenced in all comments.

FOR FURTHER INFORMATION CONTACT: Kathleen S. Johnson, Public Involvement office, at the address listed above, 503-230-3478. Oregon callers outside Portland may use 800-452-8429; callers in California, Idaho, Montana, Nevada, Utah, Wyoming, and Washington may use 800-547-6048. Information may also be obtained from:

SUPPLEMENTARY INFORMATION

I. Background

BPA sells nonfirm energy under its NF-85 rate schedule, which specifies several prices. The NF-85 rate became effective July 1, 1985, and will remain in place through September 30, 1987.

The majority of BPA's nonfirm energy is sold to utilities in California, which generally use this energy in place of generating resources that run on natural gas and oil. In the past, relatively high gas and oil prices have allowed BPA to successfully sell its nonfirm energy in California at a price approximating BPA's costs of production and transmission. Currently that price is 23.4 mills per kilowatthour, which is the sum of the NF-85 Standard rate (22.2 mills per kilowatthour) and an adder for transmission over the Pacific Northwest-Pacific Southwest Intertie (1.2 mills per kilowatthour).

The recent and continuing decline in oil and gas prices in Calfornia has severely jeopardized BPA's ability to market its nonfirm energy in Calfornia at 23.4 mills per kilowatthour. In many cases the cost of generating electricity with oil and gas is now below the NF-85 Standard rate, making energy priced at the Standard rate, making energy priced at the Standard rate uneconomic to California utiltiies. Therefore, BPA proposes to increase the marketability of its nonfirm energy by selling at a lower-priced rate available in the NF-85

VOL
51
ISS
45
MR
7
1986
UMI

schedule: The 18.1 mill per kilowatthour Contract rate.

II. Proposed Amendment to NF–85 Rate Schedule

The current NF–85 rate schedule indicates that the Contract rate is applicable to contracts that refer to the Contract rate. The schedule does not state that the Contract rate, like other NF–85 rate components, is available for marketing on an hourly basis. BPA therefore proposes to amend Section V. E. of the schedule by adding the following paragraph:

> In order to increase the marketability of Nonfirm Energy, the Contract Rate may be used in lieu of the Standard Rate for sales on an hourly basis, notwithstanding whether BPA and a purchaser have executed a contract that refers to the Contract Rate. Hourly Contract Rate sales for delivery over the Pacific Northwest-Pacific Southwest Intertie shall not include the Intertie Service charge specified in Section III. B. Hourly Contract Rate sales may be offered on a guaranteed basis as specified under Section VI. B., in which case the guaranteed delivery surcharge specified in Section III A. 1. will apply.

Use of the Contract rate in this manner will give BPA the flexibility to collect as much of the costs of nonfirm energy as possible and will yield revenues that enhance BPA's ability to meet its repayment obligations to the U.S. Treasury.

III. Reopening of the Record

BPA developed the NF–85 rate through a lengthy hearing process undertaken in 1984 and 1985 pursuant to section 7(i) of the Northwest Power Act. 16 U.S.C. 839e(i). This process culminated in the Administrator's Record of Decision (ROD), the decisionmaking document containing BPA's final rate determinations. The ROD together with the entire hearing record was filed with the Federal Energy Regulatory Commission (FERC) pursuant to section 7(i)(6) of the Northwest Power Act. 16 U.S.C. 839e(i)(6). FERC ordered the NF–85 rate to become effective as of July 1, 1985. 31 FERC ¶ 61,388 (1985).

BPA proposes to reopen the record compiled under section 7(i) for the sole purpose of amending application of the NF–85 Contract rate, as described above. BPA proposes to take official notice of the fact of declining gas and oil prices in California. This fact, together with the evidence contained in the existing record, fully supports the proposed rate amendment.

On or about March 4, 1986, BPA will issue a Draft ROD containing the facts proposed to be officially noticed and a discussion of the rationale and evidence in the existing record supporting the proposed rate amendment. Parties to BPA's 1985 rate case will be given an opportunity to file Briefs on Exception to the Draft ROD on or about March 18, 1986. Participants in BPA's 1985 rate case will be given an opportunity to submit comments on or about March 18, 1986. After consideration of all comments received, BPA proposes to issue a final ROD on or about March 25, 1986. At the same time BPA will file its ROD with the FERC and seek rate approval effective on or about April 16.

Authority: Section 7(i) of the Northwest Power Act. 16 U.S.C. 839e(i).

In consideration of the foregoing, BPA solicits comments regarding the proposed modification of rate schedule NF–85.

Issued in Portland, Oregon, February 28, 1986.

Peter T. Johnson,

Administrator, Bonneville Power Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ER86–313–000]

Central Louisiana Electric Co., Inc.; Notice of Filing

February 28, 1986.

Take notice that on February 21, 1986, Central Louisiana Electric Company, Inc. (CLECO) submitted for filing a copy of an executed contract for the sale of Replacement Energy by CLECO to the City of Alexandria.

CLECO requests an effective date of January 1, 1986 and therefore request waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest the application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before March 10, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–4966 Filed 3–6–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP78–024

Columbia Gas Transmission Corp.; Declaratory Order February 28, 1986.

Take notice that on February 13, 1986, Corning Glass Works (Corning), Shenandoah Gas Company (Shenandoah) and West Virginia Public Service Commission (PSC) jointly filed pursuant to Rule 207(a)(2) [1] a petition for a declaratory order.[2] Petitioners request the Commission to issue an order declaring that the Cost Verification Committee (CVC) established by the Commission in Opinion No. 101 [3] has the authority to receive and consider Corning's claims for reimbursement of costs Corning incurred to convert its facilities to receive and use LNG supplied by Columbia through shenandoah. Petitioners further request the Commission to order Columbia to pay Corning all amounts approved by the CVC.

Petitioners allege that Opinion No. 101 does not state whether any particular from of state proceeding or order is a condition precedent to Columbia's obligation to reimburse Corning through Shenandoah. Petitioners assert that the joining of the PSC and Shenandoah with Corning in the instant petition satisfies the substantive concerns of comity with the state and the avoidance of windfall to Shenandoah that gave rise to the Commission's initial refusal to require direct reimbursement of indirect customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825

---

[1] 18 C.F.R. 385.207(a)(2)(1985).

[2] Although the joint petition was physically filed on January 24, 1986, according to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until February 13, 1986.

[3] Columbia Gas Transmission Corp., 13 FERC ¶ 61,102 (1980), *reh'g denied*, 14 FERC ¶ 61,073 (1981). *Aff'd sub nom.* Corning Glass Works v. FERC, 675 F.2d 392 (D.C. Cir. 1982). Petitioners claim that in Opinion No. 101 the Commission found that direct wholesale customers of Columbia could recover for costs incurred in adjusting their facilities to use LNG upon verification of such costs by the CVC, but that an indirect customer such as Corning could not recover such costs unless and until the proper state authority first decided that the indirect customer should recover through or from the direct customer.

North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and procedure (18 CFR 385.214, 385.211 (1985)) All such motions or protest should be filed on or before March 21, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–4967 Filed 3–6–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER86–230–000 and ER86–76–001]

Commonwealth Edison Co.; Order Summarily Rejecting Filing in Part and Ordering New Filing, Granting Waiver, Granting Interventions, Establishing Hearing Procedures, and Granting Motion To Consolidate

Issued February 28, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On January 3, 1986, Commonwealth Edison Company (Edison) filed a proposed rate for transmission service (Rate 81) to the City of Rock Falls, Illinois (Rock Falls).[1] The rate was filed pursuant to a settlement approved by the Commission in Docket No. ER83–437–000.[2] Rock Falls presently receives full requirements service from Edison. However, under the terms of the settlement agreement, Rock Falls, as well as Edison's other full requirements customers, may obtain transmission and/or partial requirements service upon one year notice. In that event, Edison is required to file a rate for the service requested no later than 180 days prior to termination of full requirements service. In 1984, Rock Falls began to explore the possibility of purchasing its power and energy requirements from a source other than Edison, and thereafter, entered into an agreement with the Illinois Municipal Electric Agency (IMEA), a municipal corporation formed to provide a mechanism by which its members jointly plan, finance, own, and operate facilities for the generation and transmission of electric power and energy. Rock Falls intends to become a full requirements customer of IMEA on July 3, 1986. On July 1, 1985, Rock Falls issued to Edison a notice of termination and request for transmission service. Accordingly, Edison has submitted this filing which, as discussed below, mirrors a similar filing for the City of Geneva in Docket No. ER86–76–000. Edison proposes an effective date for Rate 81 of July 2, 1986. Edison therefore requests waiver of the advance filing requirements. The company has characterized its filing as an initial rate.

Notice of Edison's filing was published in the **Federal Register**,[3] with comments due on or before January 21, 1986. Timely motions to intervene were filed jointly by the Cities of Rock Falls, Batavia, Geneva, and Naperville, Illinois (Cities), the Illinois Commerce Commission (ICC), and IMEA.

The Cities request that the Commission: (1) Find Edison's proposed rate to be a change in rate rather than an initial rate and suspend the filing for one day; (2) find Edison's submittal to be deficient and order Edison to file all information required by section 35.13 of the Commission's regulations, including a cost of service study based on fully-distributed costs; (3) require Edison to place in effect and collect on a subject-to-refund basis commencing July 3, 1986, a transmission rate based on Edison's fully-distributed embedded costs; (4) summarily reject the proposed stand-by charge and Edison's alternative justification for Rate 81; and (5) set the matter for expedited hearing. In support of its requests, the Cities contend that the proposed rate is anticompetitive and constitutes an unlawful attempt by Edison to retain monopoly power in its service area. The Cities further argue that the filing is unduly discriminatory in that it is much higher than the transmission component of Edison's firm wholesale and retail rates, and therefore, will result in price squeeze. As to the proposed stand-by charge, Rock Falls states that it does not want or need standby service, and did not request it from Edison. The Cities also filed a separate motion requesting the consolidation of this docket with the proceedings in Docket No. ER86–76–000, due to the similarity of the two proposals.[4]

IMEA seeks rejection of Edison's filing, alleging that the company has not justified pricing its transmission rate on marginal costs, that it has not justified including generation capacity costs in Rate 81, and that the stand-by charge included in the proposed rate schedule is discriminatory.

The ICC requests to be made a party to the proceedings, but raises no specific issues.

On February 5, 1985, Edison filed a response to the pleadings on the Cities and IMEA. Edison contends that only Rock Falls should be permitted to intervene, as it is the only movant with an interest in this proceeding. The company denies that its filing is deficient or a change in rate. However, Edison volunteers to hold all amounts collected under Rate 81 subject to refund if the Commission decides that a lower rate should be charged. As to the motions for summary disposition, Edison first argues that the facts relied upon by Rock Falls in support of its request for summary disposition differ from those presented by Geneva, and relied upon by the Commission, in Docket No. ER86–76–000, in one significant respect: that Rock Falls has no contract with an alternative supplier. Thus, according to Edison, there is no need for summary rejection of Rate 81 in order to preserve an existing relationship with another power supplier or avert potentially anticompetitive consequences. Second, Edison argues that the motions raise disputed questions of material fact. Edison opposes the Cities' motion for consolidation, contending that while there is an overlap with in issues with regard to the theoretical basis for the calculation of rates for service to Rock Falls and Geneva, the factual circumstances are different. Finally, Edison concurs in the request that the Commission set the matter for hearing on an expedited schedule.

On January 30, 1986, IMEA filed an answer in support of the Cities' motion to consolidate the instant proceeding with Docket No. ER86–76–000.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 285.214), the timely, unopposed motions to intervene of Rock Falls and the ICC serve to make them parties to these proceedings. Notwithstanding Edison's opposition to the interventions of Batavia, Geneva, Naperville, and IMEA, we find that good cause exists to grant their motions. We are satisfied that they have expressed interests in the outcome of this proceeding that may not be represented by any other party, and that their participation may be in the public interest. Accordingly, we shall grant their motions to intervene.

We shall grant Edison's motion for waiver of the 120-day advance filing limitation in section 35.3 of our

---

regulations. inasmuch as none of the intervenors objects to the request, and the timing of Edison's filing is in accordance with the terms of the settlement agreement previously approved by the Commission.

The rate proposed here is virtually identifical to the one addressed in our order of January 30, 1986, in Docket No. ER86-76-000.[5] In that order, we determined that Edison's proposed rate for transmission service to Geneva, presently a full requirements customer, constituted a change in service and a change in rate schedule for that customer. Furthermore, we stated our disagreement with Edison's characterization of its filing as a rate decrease, finding that the proposed charge for transmission service, when compared to an unbundled transmission component of its present service to Geneva, would necessarily reflect a rate increase. We declined to find Edison's filing deficient, however, in light of the affected customer's desire to effectuate the modified form of service; instead, we directed Edison to submit full cost of service data and testimony in order to proceed to hearing. For the reasons set forth in that order, we find that Edison's filing here constitutes a change in rate, and a rate increase as well. Further, given Edison's obligation to make the filing and Rock Fall's desire to implement transmission service by July 3, 1986, we shall not reject the filing as deficient. As in Docket No. ER86-76-000, we shall direct Edison to submit cost of service data and testimony prior to hearing.

In Docket No. ER86-76-000, we stated that, in the circumstances surrounding the filing, Edison's proposed transmission rate to Geneva presented a clear potential for substantial anticompetitive effects that would immediately subject Geneva to an observable and irremediable prejudice or disadvantage in the power supply market. We further found that no material issues of fact required resolution in order to reach this determination or to conclude that operation of the rate, subject to refund, would be contrary to the public interest. While we did not go so far as to foreclose Edison outright from attempting to show that a form of marginal cost pricing might be supported, we were not prepared to allow the filed rate to take effect under circumstances where the potential harm could not be remedied. Thus, we summarily rejected Edison's proposed rate and directed Edison to file a rate which excluded stand-by charges and reflected Edison's average transmission costs.

In this case, Rock Falls, like Geneva, was a signatory to the settlement which resulted in a commitment by Edison that full requirements customers could obtain transmission service from Edison so that they could satisfy their power needs through purchases from alternative power suppliers. Having considered the pleadings, the purposes of the prior settlement and the current filing, and the bases advanced by Edison to support its rates, we conclude that the proposed rate now before us raises the same concerns as those we expressed with regard to the rate filed in Docket No. ER86-76-000. We are not persuaded by Edison's attempt to distinguish the facts now before us from those in Docket No. ER86-76-000 on the basis that Rock Falls apparently has no formal purchase contract with IMEA. As we noted above, IMEA was created to provide its members with the means of satisfying their own energy requirements. Rock Falls is among the members of IMEA and has given Edison express notice of its desire to convert from full requirements service to transmission-only. Thus, there is no less of a relationship between Rock Falls and IMEA than exists between Geneva and its potential supplier, and we perceive no less of a potential for a direct irremediable prejudice or disadvantage in the power supply market. Accordingly, for the same reasons enunciated in our order entered in Docket No. ER86-76-000, we shall summarily reject Edison's proposed Rate 81 to Rock Falls and require Edison to file a rate which reflects its average embedded system transmission costs and excludes Edison's proposed stand-by component. As in the prior docket, however, we shall permit the company to adduce additional evidence in an effort to seek prospective application of its transmission pricing proposal and its proposed stand-by charge. Because Edison has not yet filed this revised rate, we must conclude that it has not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept Edison's revised rate as specified above to become effective on July 3, 1986, subject to refund.

We shall, further, grant the Cities' motion to consolidate the proceedings in the instant docket with those in Docket No. ER86-76-000. The rates proposed by Edison in the two dockets are developed in a similar manner and are proposed for the same type of service. The filing of the rates in both instances arises out of the same settlement agreement. Consequently, the rate submittals in the two dockets present common questions of law or fact. Furthermore, Geneva and Rock falls are represented by the same counsel and consultants. Consolidation of the two dockets at this time is particularly appropriate and will avoid unnecessary duplication of effort by all the parties and the Commission staff.

In accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, 8 FERC ¶ 61,131 (1979), we shall phase the price squeeze issue raised by the intervenors to the extent that it may continue to exist following Edison's submission of revised rates.

The Commission orders:

(A) Batavia's, Geneva's, Naperville's, and IMEA's motions to intervene are hereby granted, subject to the Commission's Rules of Practice and Procedure.

(B) Edison's request for waiver of the 120-day advance filing requirement is hereby granted.

(C) Edison's proposed rate is summarily rejected, and Edison is directed to file, within thirty (30) days of the date of this order, a rate based on its average system transmission costs and excluding a stand-by component.

(D) Edison's transmission rate, as amended by summary disposition in Ordering Paragraph (C), is accepted for filing and suspended to become effective on July 3, 1986, subject to refund.

(E) All other requests for rejection or summary disposition not specifically granted herein are denied.

(F) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of Edison's rates and charges.

(G) Subdocket 000 of Docket No. ER86-230 is hereby terminated Docket No. ER86-230-001 is assigned to the evidentiary proceeding ordered herein.

(H) Docket Nos. ER86-76-001 and ER86-230-001 are hereby consolidated for purposes of hearing and decision.

(I) The administrative law judge designated to preside in Docket No. ER86-76-001 shall determine procedures, including the submission of a case-in-chief by Edison, best suited to accommodate consolidation of this docket with the pending proceeding.

(J) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may modify this schedule for good cause. The price squeeze portion of this case shall be governed by the procedures set forth in § 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(K) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission. Commissioner Stalon concurred with a separate statement to be issued later.

Kenneth F. Plumb,

Secretary.

[Docket No. RA86-2-000]

Commonwealth Oil Refining Company, Inc.; Filing of Petition for Review Under 42 U.S.C. 7194

March 3, 1986.

Take notice that Commonwealth Oil Refining Company, Inc. on February 24, 1986, filed a Petition for Review under 42 U.S. 7194(b) from an order of the Secretary of Energy (Secretary).

Copies of the petition for review have been served on the Secretary and all participants in prior proceedings before the Secretary.

Any person who participated in the prior proceedings before the Secretary may be a participant in the proceeding before the Commission without filing a motion to intervene. However, any such person wishing to be a participant must file a notice of participation on or before March 18, 1986, with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC. 20426. Any other person who was denied the opportunity to participate in the prior proceedings before the Secretary or who is aggrieved or adversely affected by the contested order, and who wishes to be a participant in the Commission proceeding, must file a motion to intervene on or before March 18, 1986, in accordance with the Commission's Rules of practice and procedure (18 CFR 385.214 and 385.1005(c)).

A notice of participation or motion to intervene filed with the Commission must also be served on the parties of record in this proceeding and on the Secretary of Energy through the Office of General Counsel, the Assistant General Counsel for Regulatory Litigation, Department of Energy, Room 6H-025, 1000 Independence Avenue, SW., Washington, DC. 20585.

Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, 825 North Capitol Street NE., Washington, DC 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA86-12-000]

Connecticut Natural Gas Corp.; Petition for Exemption From Incremental Pricing and for Interim Relief

Issued: February 27, 1986.

Take notice that on February 3, 1986, Connecticut Natural Gas Corporation (Connecticut) filed with the Director, Office of Pipeline and Producer Regulation, pursuant to section 206(d) of the Natural Gas Policy Act of 1978 (NGPA) a petition for interim and permanent exemptions from the Commission's incremental pricing regulations which impose a surcharge on its natural gas sales to four non-exempt industrial boiler fuel customers located in the State of Connecticut.

In support of its petition, Connecticut states that without exemption relief the incremental pricing surcharge will cause the price of its natural gas to exceed the actual cost of alternative fuel in the area and that such increased costs will likely cause its four non-exempt industrial customers to switch to less expensive alternative fuel and that such a switch will result in its high-priority customers paying a larger portion of its fixed costs. Connecticut requests interim relief from the incremental pricing regulations pending Commission action for its petition for a permanent exemption.

The procedures applicable to the conduct of this proceeding are set forth in Rules 1101-1117 (Subpart K) of the Commission's rules of practice and procedure. Any person desiring to participate in this proceeding must file a motion to intervene in accordance with Rule 1105. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register**.

Kenneth F. Plumb,

Secretary.

[Docket No. CI80-59-003, et al.]

Exxon Corp.; Applications for Limited-Term Abandonment and Limited-Term Certificates of Public Convenience and Necessity With Pre-Granted Abandonment

March 3, 1986.

Take notice that the Applicant listed herein has filed applications pursuant to section 7 of the Natural Gas Act for authorization to sell gas in interstate commerce or to abandon service as described herein.

The circumstances presented in the applications appear to meet the criteria for consideration on an expedited basis, pursuant to § 2.77 of the Commission's rules as promulgated by Order Nos. 436 and 436-A, issued October 9, and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protests with reference to said applications should on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and

Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

Docket No. and date filed	Applicant	Purchaser and location	Price per 1,000 ft^3	Pressure Base
CI80-59-003, Feb. 24, 1986	Exxon Corporation, P.O. Box 2180, Houston, Texas 77252-2180.	Transcontinental Gas Pipe Line Corporation, High Island 193 Area, Offshore Texas.	(¹)	
CI86-214-000 Feb. 24, 1986	do	Columbia Gas of Ohio, Inc., West Cameron Block 630, Offshore Louisiana.	(²)	
CI86-216-000, Feb. 25, 1986	do	Transco Energy Marketing Company, High Island 193 Area, Offshore Texas.	(³)	

[1] Pursuant to the expedited procedures set forth in § 2.77 of the Commission's rules, Applicant requests partial abandonment authorization for its sale to Transco of NGPA section 102(d) gas for a limited-term of three years from the date of authorization. Applicant states that the gas has has been shut-in by Transco due to lack of demand and that Applicant is subject to substantially reduced takes without pay. Applicant and Transco have entered into a release agreement dated February 21, 1986, in which Transco agrees to release that portion of applicant's delivery capacity which is in excess of Transco's daily requirements and Applicant agrees that volumes released and sold under the agreement will be considered as having been purchased by Transco for take-or-pay, minimum takes, or other quantity provisions set forth in the subject contract. Applicant states that this application is being filed to provide for abandonment authority to extend beyond March 31, 1986, the date of expiration of Applicant's blanket certificate and limited-term abandonment authorization in Docket No. CI85-685-000. Applicant filed a related application for authorization to sell the subject gas in Docket No. CI86-216-000.

[2] Pursuant to the expedited procedures set forth in § 2.77 of the Commission's rules, Applicant requests that it be issued a limited-term certificate with pre-granted abandonment authorizing it to sell NGPA section 102(d) gas under a Gas Purchase Contract dated November 1, 1984, as amended, for a term of three years. Applicant filed related applications for limited-term partial abandonment authorization under § 2.77 in Docket Nos. CI78-223-003 and CI78-226-003 which have already been noticed.

[3] Pursuant to the expedited procedures set forth in § 2.77 of the Commission's rules, Applicant requests that it be issued a limited-term certificate with pre-granted abandonment authorizing it to sell NGPA section 102(d) gas under a Gas Purchase Contract dated December 5, 1985, for a term of three years. Applicant filed its related application for limited-term partial abandonment authorization udner § 2.77 in Docket No. CI80-59-003.

Filing Code: A—Initial service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

BILLING CODE 6717-01-M

[Docket No. CI85-685-001]

Exxon Corp; Application for Extension of Limited-Term Partial Abandonments and Blanket Limited-Term Certificate Authorization for Sales for Resale

February 28, 1986)

Take notice that on February 18, 1986. Exxon Corporation (Exxon) of P.O. Box 2180, Houston, Texas 77001, filed an application requesting the Federal Energy Regulatory Commission (Commission) to extend, until March 31, 1987, its authority to (a) abandon temporarily sales for resale of Natural Gas Act (NGA) gas for which the maximum lawful price is higher than the NGPA section 109 price and which were previously certificated by the Commission, to the extent that such gas in released by Exxon pursuant to such conditions as may be imposed by the Commission, and (b) make sales for resale in intersate commerce of NGA gas for which the maximum lawful price is higher than the NGPA section 109 price.

The extensions herein sought would (1) extend for a period of one year the authorizations granted on October 29, 1985, in Docket No. C185-685-000; (2) provide pipelines with take-or-pay relief; (3) provide lower-cost gas to consumers; and (4) provide Exxon with additional market outlets for certain higher-priced NGPA categories of gas.

Any person desiring to be heard or to make any protests with reference to said application should on or before March 17, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TA86-4-51-000, 001]

Great Lakes Gas Transmission Co.; Proposed Changes in FERC Gas Tariff Under Purchased Gas Adjustment Clause Provisions

March 3, 1986.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes"), on February 24, 1986, tendered for filing Fifty-Fifth-B Revised Sheet No. 57 and Second Substitute Fifty Sixth Revised Sheet No. 57 to its FERC Gas Tariff, First Revised Volume No. 1.

Great Lakes states that the filing provides for a new pricing arrangement related to gas purchased from Great Lakes by ANR Pipeline Company ("ANR"). Under the new proposed arrangement, the monthly demand component of the gas cost component of the gas price will be reduced from the current $15.21 per Mcf (of contract quantity) per month to $12.35 per Mcf per month. The commodity component will be reduced from a rate that varied between $2.50 and $4.25 per MMBtu to a single rate of $2.09 per MMBtu. The estimated annual savings to ANR based on full contract volumes would be approximately $5 million. Prices are subject to monthly adjustment by application of an index designed to create prices competitive in the markets than ANR serves.

Great Lakes is requesting an effective date of December 19, 1985, for Fifty-Fifth-B Revised Sheet No. 57. In aid thereof, Great Lakes requests waiver of the 30-day notice requirement of the provisions of § 154.38(d)(4)(iv)(a) of the Commission's Regulations so as to permit this out-of-period PGA filing to implement the foregoing substantial reduction in purchased gas cost as soon as possible.

On January 21, 1986 Great Lakes filed Substitute Fifty-Sixth Revised Sheet No. 57 to its FERC Gas Tariff, First Revised Volume No. 1 to reflect the GRI Adjustment related to the Gas Research Institute's 1986 Research and Devlopment Program which superseded Fifty-Sixth Revised Sheet No. 57 filed by Great Lakes on December 13 1985 and was approved by the Commission on December 27, 1985. Fifty-Fifty-B Revised Sheet No. 57, was filed to implement the pricing arrangements for ANR effective December 19, 1985, requiring a further change to the GRI Tariff Sheet to be effective January 1, 1986. Accordingly Great Lakes filed Second Substitute Fifty-Sixth Revised Sheet No. 57 to be effective January 1, 1986 which reflected the appropriate PGA rates.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1985)). All such motions or protests should be filed on or before March 10, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86-4975 Filed 3-6-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER86-238-000 and ER86-239-000]

New England Power Co.; Order Accepting for Filing and Suspending Rates, Noting Intervention, Granting Requests for Waiver, Terminating Docket, and Establishing Hearing Procedures

Issued February 28, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On January 29, 1986, New England Power Company (NEP) completed the filing, in Docket No. ER86-238-000, of an interim fuel and purchased economic power adjustment clause in compliance with a waiver of the fuel clause regulations granted by the Commission in Docket No. EL86-4-000.[1] That waiver permits NEP to defer billing, through the fuel clause, replacement power costs related to the forced outage of Brayton Point Unit No. 3 to the extent that those costs may be reimbursed by insurance proceeds. NEP proposes that its revised fuel clause become effective on September 25, 1985, the first date as of which the company may be reimbursed for the costs under the terms of its insurance policy.

On January 9, 1986, NEP submitted for filing, in Docket No. ER86-239-000, a proposed modification to its fuel adjustment clause to account for fuel cost savings anticipated from the generation of test energy from units under construction, including the Millstone Nuclear Generating Station Unit No. 3 (Millstone 3), in which NEP has a twelve percent ownership interest.[2] NEP alleges that the amendment would conform to the Commission's treatment of similar costs in *Pennsylvania Power & Light Company*, Opinion No. 176, 23 FERC ¶ 61,395 (1983) (*PP&L*), and to the Commission's Uniform System of Accounts, Electric Plant Instructions, Section 3, Paragraph 18 (18 CFR Part 101). That procedure, according to NEP, requires a utility to treat the value of its share of the test energy from a unit under construction as a reduction in plant investment rather than as a reduction in the fuel costs to be flowed through to customers under the fuel clause, thus preserving the benefits of this power for future ratepayers who will ultimately bear the cost of the project.

NEP's filing states that Millstone 3 was expected to begin producing test energy on or about January 20, 1986. By its filing in Docket No. ER86-239-000, NEP seeks to calculate its fuel costs as if there were no test energy being generated and to reduce its investment cost in Millstone 3. In order to accomplish this, NEP requests a waiver

---

[1] 33 FERC ¶ 61,274 (1985). The Commission's order granting the waiver directed NEP to file an interim fuel clause within 30 days.

[2] *See* Attachment for rate schedule designations.

of § 35.14 of the Commission's regulations (18 CFR 35.14). The company proposes that its revised fuel clause become effective on January 20, 1986, or the actual date on which test energy commences, whichever is sooner. Accordingly, NEP requests waiver of the notice requirements.

NEP plans to value the test energy at an amount equal to its avoided cost, *i.e.*, the cost to NEP to produce the same amount of energy from its system as if it had not received any test energy. The company contends that this will result in valuing test energy at its "fair value" as required by the Uniform System of Accounts. NEP acknowledges, however, that its current wholesale customers have already paid a portion of the carrying costs of Millstone 3 in their current rates [3] and should, therefore, receive credit for a portion of the test energy generated from the unit. The company requests that the question of what portion should be passed on to customers be set for hearing. NEP further requests waiver of the Commission's accounting rules to the extent that they would require NEP to credit the cost of construction with the fair value of test energy savings flowed through to customers. Under the Uniform System of Accounts, Electric Plant Instructions, Section 3, Paragraph 18, a utility is required to credit and charge Account 107 with all revenues and expenses related to test energy generation. NEP submits that to the extent the savings of test energy are passed on to its customers on a current basis, NEP should only be required to credit Account 107 with the actual revenues received. Otherwise, NEP alleges, it would be required to credit its CWIP account with an amount greater than revenues received for test energy. This would have the effect of giving current customers a portion of the savings from test energy and, at the same time, reducing the cost of construction by the amount of the fair value of that portion of test energy.

Notices of NEP's filings were published in the **Federal Register**,[4] with comments due on or before January 27, 1986, in Docket No. ER86–239–000, and on or before February 12, 1986, in Docket No. ER86–238–000. No comments were filed in Docket No. ER86–238–000. An untimely motion to intervene was filed in Docket No. ER 86–239–000 by the Attorney General of the State of Rhode Island and the Rhode Island Division of Public Utilities and Carriers (Rhode Island). Rhode Island does not object to NEP's filing, so long as all aspects of test energy allocation are resolved in a hearing.

Discussion

We shall grant Rhode Island's late-filed motion to intervene in Docket No. ER86–239–000. We are satisfied that Rhode Island has expressed an interest in the outcome of this proceeding that is not represented by any other party, that its participation may be in the public interest, and that, because of the early stage of this proceeding, no undue prejudice or delay should occur.

We have reviewed the revised fuel clause filed in Docket No. ER86–238–000 and have determined that it appropriately implements the waiver previously granted in Docket No. ER86–4–000. Given the purposes of the filing and the absence of any objection to the proposed effective date, we find that good cause exists to waive the notice requirements. We shall therefore accept NEP's filing in Docket No. ER86–238–000 without suspension or hearing, to become effective on September 25, 1985.

With respect to NEP's proposed treatment of test energy submitted in Docket No. ER86–239–000, we have previously accepted several similar applications. In *PP&L, supra,* we granted the company's request for waiver and approved the modifications to its fuel adjustment clauses. In that case, we found that, absent waiver of the fuel clause regulations, current ratepayers would receive the benefits of the test energy in the form of decreased fuel costs. Future ratepayers would, however, incur all the costs associated with the test energy through higher rates which result from inclusion of such costs in the CWIP account and ultimately in rate base. We concluded that, by allowing waiver of the regulations and crediting the fair value of test energy to the plant account, future ratepayers who ultimately bear the costs associated with the facility undergoing testing will receive benefits through lower rates. We determined that this ratemaking treatment would avoid problems of intergenerational inequity.

In this proceeding, NEP's wholesale customers have been paying for some, but not all, of the total carrying costs associated with the Millstone 3 through CWIP charges. Therefore, some retention of test energy savings by NEP is appropriate. Unlike *PP&L,* however, it appears that retention of all the benefits by NEP is inappropriate in light of its recovery of some CWIP-related amounts. Accordingly, we shall grant waiver of § 35.14 of the regulations, accept NEP's proposed modification to its fuel clause for filing, but set for hearing the question regarding the portion of the savings that should be passed on to the wholesale customers.[5]

Pending such hearing and a determination as to the just and reasonable apportionment of test energy savings, we shall impose a nominal suspension in order to afford refund protection, while allowing implementation of the proposed fuel clause to coincide with the period of testing for Millstone 3. Under the circumstances presented, including the lack of any adverse interventions, we find that good cause exists to waive the notice requirements and allow NEP's submittal to take effect, subject to refund, as of the initiation of testing at Millstone 3.

We shall also grant NEP's request for waiver of the Commission's accounting rules. As in *PP&L, supra,* if the utility were required to flow through to current customers savings from test energy and to reduce the cost of construction at the same time with those savings, ratepayers would unfairly benefit twice from the same cost savings. 23 FERC at 61,844.

The Commission orders:

(A) The untimely motion to intervene of Rhode Island in Docket No. ER86–239–000 is hereby granted, subject to the Commission's Rules of Practice and Procedure.

(B) NEP's requests for waiver of the notice requirements are hereby granted.

(C) NEP's submittal in Docket No. ER86–238–000 is hereby accepted for filing, to become effective without suspension or hearing on September 25, 1985.

(D) NEP's requests for waiver of section 35.14 of the Commission's regulations and the Commission's accounting rules in Docket No. ER86–239–000 are hereby granted.

(E) NEP's proposed fuel adjustment clause submitted in Docket No. ER86–239–000 is hereby accepted for filing and suspended, to become effective on the date test energy from Millstone 3 commences, subject to refund.

(F) NEP shall file a report with the Commission of the Commencement of generation of test energy from Millstone 3, within ten (10) days of such date.

---

[3] NEP's currently effective rates, which include some construction work in progress (CWIP) associated with the plants that will generate test energy, have been collected, subject to refund, since January 1, 1984 (Docket Nos. ER83–647–000, *et al.*, 24 FERC ¶ 61,330 (1983)).

[4] 51 FR 2,753 (Docket No. ER86–239–000); 51 FR (1986) (Docket No. ER86–238–000).

[5] *See Gulf States Utilities Co.*, 32 FERC ¶ 61,231 (1985), where the Commission similarly set for hearing the question of what portion of the test energy savings should be retained where the affected customers have contributed to CWIP-related costs.

(g) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held in Docket No. ER86–239–000 to determine the appropriate portion of fuel savings to be immediately passed on to NEP's customers in recognition of their prior contributions to CWIP.

(H) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) day of the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. The presiding judge is authorized to establish procedural dates, including the submission of a case-in-chief by NEP, and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(I) Docket Nos. ER86–238–000 and ER86–239–000 are hereby terminated. The evidentiary proceeding established herein is designated as Docket No. ER86–239–001.

(J) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,
Secretary.

[Docket No. SA86–11–000]

Phelps Dodge Corp.; Petition for Exemption From Incremental Pricing and for Interim Relief

Mrach 3, 1986.

On January 29, 1986, petitioner Phelps Dodge Corporation (Phelps Dodge) filed with the Federal Energy Regulatory Commission a petition for adjustment under sections 206(d) and 502(c) of the Natural Gas Policy Act of 1978,[1] and §§ 385.1104 and 385.1113 of the Federal Energy Regulatory Commission's Rules of Practive and Procedure.[2]

Phelps Dodge seeks temporary adjustment relief from the Commission's incremental pricing rules with respect to non-exempt natural gas which it purchases from El Paso Natural Gas Company for use at petitioner's copper mining facility at Bisbee, Arizona, and its copper mining and smelting facility at Ajo, Arizona. Petitioner also seeks interim relief pending Commission action on its request for temporary relief. By order issued January 28, 1985, in Docket No. SA84–25–000,[3] the Director of the Office of Pipeline and Producer Regulation (Director) granted Phelps Dodge temporary relief from incremental pricing for a 12-month period beginning with the billing month of February 1985. In the instant filing Phelps Dodge seeks a 12-month extension of that relief with regard to the Bisbee and Ajo facilities.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure.[4] Any person desiring to participate in this adjustment proceeding must file a motion to intervene under Subpart K within 15 days after publication of this notice in the **Federal Register**.

Kenneth F. Plumb,
Secretary.

[Docket No. CI85–633–003]

Tenneco Oil Co., et al.; Application

March 3, 1986.

Take notice that on February 25, 1986, Tenneco Oil Company, Houston Oil Minerals Corporation, Tenneco Exploration, Ltd., Tenneco Exploration II, Ltd., TINCO, Ltd., and Tenneco West Inc., (hereinafter referred to collectively as Tenneco Oil), filed an application in accordane with sections 4 and 7 of the Natural Gas Act (NGA), 15 U.S.C. 717–717z, and Part 157 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission (Commission), requesting that the Commission amend its Order Permitting and Approving Limited-term Abandonments and Granting Certificates, issued on October 29, 1985, in Docket Nos. CI85–633–000, *et al.* (October 29th Order), to extend the term thereof through March 31, 1987. Absent such extension, Tenneco Oil will be without authority, as of March 31, 1986, to make self-implementing spot market sales of gas that remains subject to the NGA's certificate and abandonment requirements. The temporary extension requested herein will prevent a possible hiatus in spot market sales and will be consistent with the transitional rationale contained in Order No. 436.

Any person desiring to be heard or to make any protests with reference to said application should on or before March 18, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717–01–M

[Docket No. CI85–632–002]

Tenngasco Corp. and Tenngasco Exchange Corp.; Petition of Tenngasco Corp. and Tenngasco Exchange Corp. for Blanket Certificate of Public Convenience and Necessity and for an Order Permitting and Approving Pre-Granted Abandonment

March 3, 1986.

Take notice that on February 24, 1986, Tenngasco Corporation and Tenngasco Exchange Corporation (hereinafter referred to collectively as "Tenngasco")

VOL 51
ISS 45
MR 7
1986
UMI

pursuant to Sections 4 and 7 of the Natural Gas Act, 15 U.S.C. 717–717z (1982)(NGA) and Part 157 of the regulations of the Federal Energy Regulatory Commission (Commission), 18 CFR Part 157 (1984), applied for a one (1) year extension of the limited-term sales and abandonment authority granted in this proceeding. Tenngasco states that such an extension is in the public interest as it will allow a smooth transition into the abandonment procedures established in Order No. 436.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 18, 1986, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–4979 Filed 3–6–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI86–218–000]

Transco Energy Marketing Co.; Application

February 28, 1986.

Take notice that on February 25, 1986. Transco Energy Marketing Company (TEMCO), P.O. Box 1396, Houston, Texas 77251, filed in this proceeding an application, pursuant to sections 4 and 7 of the Natural Gas Act and Part 157 of the Commission's regulation, requesting a blanket certificate of public convenience and necessity to be effective or or before April 1, 1986, authorizing (1) sales for resale of certain natural gas in interstate commerce, without market restriction, by TEMCO and the producers from which TEMCO purchases such gas, (2) sales for resale of certain natural gas in interstate commerce, without market restriction, by producers through TEMCO acting as their agent, and (3) blanket pre-granted abandonment of the sales described in TEMCO's application, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

TEMCO states that the purpose of its application is to enable TEMCO to resell in the spot market natural gas which it purchases from producers who have received abandonment authorization from the Commission in separate proceedings, including those authorizations granted pursuant to the Commission expedited abandonment procedures now codified at 18 CFR 2.77, and will permit TEMCO to act as agent for such producers in the sale for resale of their gas in the spot market. TEMCO in this proceeding is requesting no abandonment of producer-pipeline commitments, nor any transportation authority, and states that any transportation necessary to effect the sales for which authorization is sought in this proceeding will be implemented pursuant to order No. 436 and the Commission's rules and regulations. TEMCO further states that since the Commission has stated that it will consider requests for abandonment of natural gas irrespective of the NGPA category of such gas, all gas subject to the Commission's NGA jurisdiction would be potentral sources, of gas under the authorizations sought in its application. TEMCO also states that to the extent that the abandonment authority granted to a producer in a separate proceeding is not a permanent release of reserves or is restricted in some other way, the sales and pregranted abandonment authorizations requested would likewise be restricted. TEMCO requests that, in any order approving its application, the Commission expressly find that with respect to TEMCO and its operations, the Commission's NGA jurisdiction is limited to the specific non-exempt activities for which TEMCO is seeking authorization.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protests with reference to said application should on or before March 12, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–4980 Filed 3–6–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI86–210–000]

TXP Operating Co.; Application

February 28, 1986.

Take notice that on February 20, 1986, TXP Operating Company (TXPO), P.O. Box 1396, Houston Texas 77251 filed an application requesting that the Commission issue an order that grants TXPO the necessary authorizations for a limited term (1) to abandon temporarily sales for resale of certain NGA-gas listed on Exhibit "A" of the application that is produced by TXPO and its joint interest owners, to the extent that such joint interest owners agree to same, which were previously certificated by the Commission, and to the extent that such gas is released by the interest pipeline purchasers, (2) to make sales for resale in interstate commerce of such NGA-gas; and (3) to abandon (pre-granted abandonment) any sale for such limited term. In that regard TXPO requests the authorizations described in said application for a limited term beginning on April 1, 1986 and ending on March 31, 1987. TXPO further requests that the Commission handle the application on an expedited basis in accordance with Order No. 436 in Docket No. RM85–1–000.

TXPO states that the authorizations requested in its application are necessary so that it can continue to make spot sales at market responsive prices from certain offshore blocks that qualify for the NGPA Section 102 ceiling price. TXPO reports that it is experiencing substantially reduced takes from those blocks without payment under its long-term contract with its purchaser(s).

Any person desiring to be heard or to make any protests with reference to said application should on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and

Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unncessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ER86–317–000, et al.]

Electric Rate and Corporate Regulation Filings; York Haven Power Co., et al.

February 28, 1986.

Take notice that the following filings have been made with the Commission:

1. York Haven Power Company

Docket No. ER86–317–000]

Take notice that the York Haven Power Company, Reading, Pennsylvania, on February 24, 1986, tendered for filing a proposed change in its rate schedule for the sale of power to its parent, Metropolitan Edison Company, from FPC licensed Project No. 1888. This change in rates is proposed to be effective for deliveries of power and energy on or after May 1, 1986. the proposed changes would increase revenues from jurisdictional sales and service by $3,478 based on the 12-month period ending April 30, 1986.

York Haven states that under the affected rate schedule, all of the power and energy from Project No. 1888 is sold to Metropolitan Edison on a rate based upon York Haven's cost and expenses in generating and transmitting such power and energy. Under its agreement with Metropolitan Edison, York Haven is entitled to the same return on net investment as was most recently allowed Metropolitan Edison by the Pennsylvania Public Utility Commission. That Commission on October 25, 1985 allowed a rate of return to Metropolitan Edison of 11.03 percent. This filing is submitted to reflect that rate of return. York Haven indicates that its current rate of return is 10.97 percent under its rate schedule. Copies of the filing have been mailed to Metropolitan Edison and the Pennsylvania Public Utility Commission.

Comment date: March 13, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Southern California Edison Company

[Docket No. ER86–316–000]

Take notice that, on February 24, 1986, Southern California Edison Company ("Edison") tendered for filing two agreements entitled (1) "Edison-Vernon Palo Verde Nuclear Generating Station ("PVNGS") Firm Transmission Service Agreement" as a rate schedule and (2) "Supplemental Agreement to the Integrated Operations Agrement ("IOA") Between the City of Vernon and the Southern California Edison Company, Dated August 25, 1982, for the Integration in the Palo Verde Nuclear Generating Station" as a supplement to the IOA.

The Supplemental Agreement to the IOA provides for certain specific details relating to the integration of Vernon's PVNGS entitelment as required by the IOA.

Under the terms and conditions of the Firm Transmission Service Agreement, Edison will make available to Vernon transmission service for its entitlements in the capacity and energy from PVNGS to the Point of Delivery at Vernon, California.

The Agreements are proposed to become effective when executed by the Parties and accepted for filing by the Commission and as such, Edison requests, to the extent necessary, waiver of notice requirements.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the City of Vernon, California.

Comment date: March 13, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Ohio Edison Company

[Docket No. ER86–318–000]

Take notice that Ohio Edison Company (Ohio Edison) on February 24, 1986 tendered for filing proposed changes in its FERC Electric Tariff Schedule No. 150 and Supplements 1 through 5 applicable to sales and service to American Muncipal Power-Ohio (AMP-Ohio). The proposed changes would increase revenues for jurisdictional sales and service as the result of an increase in the transmission charge by $768,389.96 but would decrease those revenues by $19,671.57 based on the twelve months ending December 31, 1986 due to changes in the charges for Regulation Capacity and Regulation Energy.

Ohio Edison proposed an effective date of January 2, 1986 for the decrease in charges for Regulation Capacity and Regulation Energy and October 1, 1985 for the transmission charge increase.

Ohio Edison states that the reason for the proposed decrease for Regulation Capacity and Regulation Energy charges is to conform them with the retail General Service Large Customers tariffs as approved by The Public Utilities Commission of Ohio in the manner provided for and as described in Schedule 150 and its Supplements.

For the increase in transmission charge, Ohio Edison states that it is to reflect the mutual agreement of the parties and to provide a recovery of increased costs of service and to increase the rate of return of its facilities to an acceptable level.

Comment date: March 13, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Consumers Power Company

[Docket No. ER86–320–000]

Take notice that Consumers Power Company ("Consumers Power") on February 24, 1986 tendered for filing Consumers' Supplemental Agreement No. 4 to the Coordianated Operating Agreement with the City of Lansing, Michigan dated as of January 1, 1986.

VOL 51 ISS 45 MR 7 1986 UMI

Supplemental Agreement No. 4 increases the rate charged for transmission service to 30¢/kW/week and 6¢/kW/day. Supplemental Agreement No. 4 also increases the rate for transfers of Emergency Energy to 2.5 mills/kWh.

The extent and use of transmission service and transfers of Emergency Energy among the parties for the next twelve months is not known at the present time, as such transactions will only be scheduled from time to time as load and capacity conditions on either system dictate. Accordingly, it is not possible to estimate the transactions for such period.

Consumers Power states that copies of the filing were served on the City of Lansing, Michigan and on the Michigan Public Service Commission.

Comment date. March 13, 1986, in accordance with Standard Paragraph E at the end of this document.

5. The Connecticut Light and Power Company

[Docket No. ER86-315-000]

Take notice that on February 24, 1986, The Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule pertaining to a Purchase Agreement with Respect to Various Gas Turbine Units between CL&P and Vermont Electric Generation and Transmission Cooperative (VEG&T) dated as of November 1, 1985.

CL&P states that the Purchase Agreement provides for a sale to VEG&T of capacity and energy from four CL&P gas turbine units (the Units), together with related transmission service, starting on November 1, 1985 and terminating thirty days after either party gives written notice of termination. The percentage of capacity and related energy will be determined on a monthly basis by mutual agreement prior to each transaction.

CL&P requests that the Commission permit the rate schedule filed to become effective on November 1, 1985. CL&P states that the capacity charge rate for the proposed service is a cost-of-service rate based upon the fixed costs of the units. The monthly transmission charge rate is equal to one-twelfth of the annual average costs of transmission service on the transmission systems of CL&P and its affiliated Northeast Utilities companies at the time that the Purchase Agreement was executed and is determined in accordance with Section 13.9 of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee. The monthly Transmission Charge is determined by the product of (i) the appropriate monthly transmission charge rate ($/kW/month) and (ii) the number of kilowatts of winter capability which VEG&T's is entitled to receive during such month. The Energy Variable, and Additional Maintenance Charges are based on VEG&T's portion of the applicable fuel expenses and hours of operation related to the Units and no special cost-of-service studies were made to derive these charges.

CL&P states that the services to be provided under the Purchase Agreement are the same as services provided by CL&P and WMECO pursuant to purchase agreements with City of Chicopee Municipal Lighting Plant (FERC Rate Schedule Nos. CL&P 331, WMECO 267), and with the Village of Hyde Park Electric Department (FERC Rate Schedule No. WMECO 215).

CL&P states that a copy of the rate schedules have been mailed or delivered to CL&P, Hartford, Connecticut and to VEG&T, Johnson, Vermont.

CL&P further states that the filing is in accordance with Part 35 of the Commission's Regulations.

Comment date: March 13, 1986, in accordance with Standard paragraph E at the end of this notice.

6. The Connecticut Light and Power Company

[Docket No. ER86-319-000]

Take notice that on February 24, 1986, The Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule pertaining to a Purchase Agreement with respect to Various Gas Turbine Units between CL&P and Newport Electric Corporation (Newport) dated as of December 1, 1985.

CL&P states that the Purchase Agreement provides for a sale to Newport of a specified percentage of capacity and energy from CL&P's South Meadow Units Nos. 11, 12, 13, and 14 (the Units) during the period December 1, 1985 through October 31, 1991.

CL&P requests that the Commission permit the rate schedule filed to become effective on December 1, 1985.

CL&P states that the capacity charge rate for the first eleven months for the proposed service is a negotiated rate, based on the market price for this capacity, and less than the cost-of-service rate. The capacity charge for the remainder of the term is determined on a cost-of-service basis at the time that the Purchase Agreement was executed. The monthly transmission charge is equal to one-twelfth of the annual average cost of transmission service on the transmission systems of CL&P and its affiliated Northeast Utilities companies at the time that the Purchase Agreement was executed and is determined in accordance with Section 13.9 of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee. The monthly Transmission Charge is determined by the product of (i) the appropriate monthly transmission charge rate ($/kW-month) and (ii) the number of kilowatts of winter capability which Newport is entitled to receive during such month. The Energy Charge, Variable, and Additional Maintenance Charges are based on Newport's portion of the applicable fuel expenses and hours of operation related to the Units and no special cost-of-service studies were made to derive these charges.

CL&P states that the services to be provided under the Purchase Agreement are the same as services by CL&P and WMECO pursuant to purchase agreements with City of Chicopee Municipal Lighting Plant (FERC Rate Schedule Nos. CL&P 331, WMECO 267), and with the Village of Hyde Park Electric Department (FERC Rate Schedule No. WMECO 215).

CL&P states that a copy of the rate schedules have been mailed or delivered to CL&P, Hartford, Connecticut and to Newport, Middletown, RI.

CL&P further states that the filing is in accordance with Part 35 of the Commission's Regulations.

Comment date: March 13, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protests said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 9134-000, 8627-000]

D & D Stauffer, Inc., City of Ithaca; Availability of Environmental Assessment and Finding of No Significant Impact

February 27, 1986.

In accordance with the National Environmental Policy Act of 1969, the Office of Hydropower Licensing, Federal Energy Regulatory Commission (Commission), has reviewed the applications for major and minor licenses (or exemptions) listed below and has assessed the environmental impacts of the proposed developments.

EXEMPTIONS

Project No.	Project name	State	Water body	Nearest town	Applicant
9134-000	Dry Creek Hydroelectric	ID	Dry and Wet Creeks	Howe	D&D Stauffer, Inc.
8627-000	Van Natta	NY	Six Mile Creek	Ithaca	City of Ithaca.

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's, the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared.

Copies of the EA's are available for review in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-4971 Filed 3-6-86; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4349-003, 2548-002]

Long Lake Energy Corp., and Georgia-Pacific Corp.; Availability of Environmental Assessment and Finding of No Significant Impact

February 27, 1986.

In accordance with the National Environmental Policy Act of 1969, the Office of Hydropower Licensing, Federal Energy Regulatory Commission (Commission), has reviewed the applications for major and minor licenses (or exemptions) listed below and has assessed the environmental impacts of the proposed developments.

Project No.	Project name	State	Water body	Nearest town	Applicant
4349-003	Moose River	NY	Moose River	Lyonsdale	Long Lake Energy Corp.
2548-002	Lyons Falls	NY	Black River	Lyonsdale & West Turin.	Georgia-Pacific Corp.

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's, the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared.

Copies of the EA's are available for review in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426.

BILLING CODE 6717-01-M

[Project No. 9648-000, et al.]

Hydroelectric Applications; Westinghouse Electric Corp., et al.

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1a. Type of Application: Minor License.

b. Project No.: 9648-000.

c. Date Filed: November 22, 1985.

d. Applicant: Westinghouse Electric Corporation and the Town of Springfield, Vermont.

e. Name of Project: Fellows Dam.

f. Location: On the Black River in Windsor County, Vermont.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: John F. Andreas, Plant Manager, Westinghouse Electric Corporation, 169 Tapley Street, Springfield, MA 01104, (413) 734-3197.

i. Comment Date: May 5, 1986.

j. Description of Project: The Applicants propose to refurbish the existing project which consists of: (1) The 10-foot-high and 200-foot-long concrete Fellows Dam with a crest elevation of 435 feet mean sea level owned by the town of Springfield; (2) an impoundment with a surface area of 21 acres; (3) an intake structure; (4) a 4-foot by 8-foot reinforced concrete open flume, 30-feet long; (5) a powerhouse with a turbine generator unit with an installed capacity of 150 kW; (6) a 4.16-kV and 100-foot-long transmission line; and (7) other appurtenances. Applicants estimate an average annual generation of 700,000 kWh.

k. Purpose of Project: Project energy would be sold to a local utility.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C and D1.

2a. Type of Application: Preliminary Permit.

b. Project No.: 9810-000.

c. Date Filed: December 30, 1985.

d. Applicant: CON-REL Corporation.

e. Name of Project: Gunpowder No. 1.

f. Location: Gunpowder Creek, Caldwell County, North Carolina.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r)

h. Contact Person: Mr. Charles B. Mierek, CON-REL Corporation, Route 2, Box 302A, One Clifton-Glendale Road, Spartanburg, SC 29302, (803) 579-4405.

i. Comment Date: May 1, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing concrete dam structure, 56 feet high and 271 feet long; (2) an existing reservoir with a surface area of approximately 150 acres and a gross storage capacity of about 1,200 acre-feet at normal pool elevation; (3) an existing penstock, 42" in diameter and approximately 300 feet long; (4) a proposed powerhouse containing two generating units with a total capacity of 500 kW; (5) a proposed, 1000-foot-long transmission line to interconnect with the existing power grid; and (6) appurtenant facilities. The estimated average annual generation is 1.6 GWh.

k. Purpose of Project: The project power would be sold to Duke Power Company or to Carolina Power and Light Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C & D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued,

VOL 51 ISS 45 MR 7 1986 UMI

does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $45,000.

3a. Type of Application: Preliminary Permit.

b. Project No.: 9637–000.

c. Date Filed: November 22, 1985.

d. Applicant: Johnson/Iowa Associates.

e. Name of Project: Coralville Dam.

f. Location: Iowa River, Johnson County, Iowa.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Jordan Walker, Great Western Power & Light Inc., 484 East 300 North, Manti, UT 84642, (801) 835–0202

i. Comment Date: May 1, 1986.

j. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers Coralville Dam and would consist of: (1) A proposed penstock, approximately 450 feet long and 6 feet in diameter; (2) a proposed powerhouse located on the east bank of the river below the dam, and containing a single generating unit with a capacity of 6.3 MW; (3) a proposed 250-foot-long, 12.5 kV transmission line to interconnect with the existing power grid; and (4) appurtenant facilities. The estimated average annual generation is 27.5 GWh.

k. Purpose of Project: The Applicant intends to sell the project power to a local utility or power company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C & D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $35,000.

4a. Type of Application: Preliminary Permit.

b. Project No: 9620–000.

c. Date Filed: December 31, 1985.

d. Applicant: Cross Flow Hydroelectric, Inc.

e. Name of Project: Cabazon Hydroelectric Power Project.

f. Location: On domestic water supply conduit of Cabazon County Water District in Riverside County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Neal F. Dunlevy, P.E., Stetson-Dale, Architects & Engineers, 185 Genesee Street, Utica, NY 13501.

i. Comment Date: May 5, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing upper intake structure collecting water from springs located at elevation 3,500 feet above msl; (2) 1 15-inch-diameter, 17,000-foot-long water supply pipeline; (3) an upper powerhouse containing a single 560 kW generating unit; (4) an existing lower intake structure at located elevation 2,580 feet msl; (5) an 18-inch-diameter, 10,000-foot-long water supply pipeline; (6) a lower powerhouse containing a single 375 kW generating unit; and (7) a 14,000-foot-long 13.2-kV transmission line interconnecting the project to Southern California Edison Company's (SEC) existing transmission line. The estimated 1.89 GWh generated annually would be sold to SCE.

k. Purpose of Project: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $9,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

5a. Type of Applicant: Preliminary Permit.

b. Project No: 9478–000.

c. Date Filed: September 25, 1985.

d. Application: Pan Pacific Hydro, Inc.

e. Name of Project: Weber Flat #2.

f. Location On Elk Gulch, a tributary to Stuart Fork, near Weaverville, within the Trinity National Forest, in Trinity County, California (In Sections 16, 21, and 28 of T35N, R9W, M.D.M.&B.).

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. James B. Tompkins, Pan Pacific Hydro, Inc., 215 Main Street, P.O. Box 2142, Weaverville, CA 96093, (916) 623–2914.

i. Comment Date: April 25, 1986.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) An intake structure located at a natural waterfall on Elk Gulch at elevation 4,200 feet msl; (2) a 16-inch-diameter, 12,000-foot-long penstock; (3) a powerhouse containing a single turbine-generator unit with a rated capacity of 400 kW and operating under a head of 900 feet; and (4) a 12-kV, 3,200-foot-long transmission line interconnecting the project to an existing Pacific Gas and Electric Company (PG&E) line. The project's estimated average annual generation of 1.5 GWh would be sold to PG&E.

A preliminary permit, if issued, does not authorize construction. Applicant seeks to investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for development. Applicant estimates that the cost of the studies under permit would be $20,000.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

6a. Type of Application: Preliminary Permit.

b. Project No.: 9737–000.

c. Date Filed: December 27, 1985.

d. Applicant: Taft Hydropower Inc.

e. Name of Project: Owego Hydropower Project.

f. Location: On Owego Creek near Owego, Tioga County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person:

Mr. Lawerence R. Taft, 10315 Caughdenoy Rd., Central Square, NY 13036, (315) 437–2547.

Mr. Neal F. Dunlevy, Stetson Dale, Engineering PC, 185 Genesse St., Utica, NY 13501, (315) 797–5800.

i. Comment Date: April 25, 1986.

j. Description of Project: The proposed project would consist of: (1) Rebuilding an existing breached concrete dam approximatly 120 feet long and 10 feet high; (2) an existing 6-acre reservoir with 30 acre-feet of storage at an elevation of 810 msl (breakaway wooden flashboards 3 feet high would be added to the dam); (3) an existing intake channel approximately 200 feet long; (4) rebuilding an existing concrete powerhouse approximately 60 feet by 15 feet which would house a 500 kW bulb turbine-generator; (5) an existing 60 foot wide by 2,000 foot long tailrace channel which would require cleaning and dredging; (6) a new 13.2 kV transmission line approximately 300 feet long; and (7) appurtenant facilities. The Applicant estimates that the average annual energy generation would be 2.2 GWh. The project energy would be sold to New York State Electric and Gas Company. The dam is owned by Cindy Rudin, Owego, New York.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, D2.

l. *Proposed Scope of Studies under Permit*—A preliminary permit, is issued does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $42,000.

7a. Type of Application: Preliminary Permit.

b. Project No.: 9677–000.

c. Date Filed: December 9, 1985.

d. Applicant: Georgia J. Ure.

e. Name of Project: Locustville Pond.

f. Location: Brushy Brook, Washington County, Rhode Island.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Georgia J. Ure, Prospect Square, P.O. Box 123, Wyoming, R.I. 02898, (401) 539–2160.

i. Comment Date: April 28, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing earthfill dam 18 feet high and 320 feet long; (2) an existing impoundment of 128 acre-feet at a normal maximum surface elevation of 95 feet mean sea level; (3) an existing sluiceway 124 feet long and 8 feet wide, (4) a proposed turbine/generator of 50 kW capacity in a proposed weatherproof enclosure; (5) a proposed 45-foot-long 480 volt transmission line; and (6) appurtenant facilities.

The estimated annual energy production is 186,000 kWh at a net hydraulic head of 16 feet. Project power would be sold to Narragansett Electric Company. The existing facilities are owned by the applicant.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, D2.

l. *Proposed Scope under Permit:*—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $7,000.

8a. Type of Application: Minor License.

b. Project No.: 7352–002.

c. Date Filed: July 2, 1985.

d. Applicant: Sven Elov Ericson.

e. Name of Project: Kings Falls.

f. Location: On the Deer River in Denmark Township, Lewis County, New York.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Sven Elov Ericson, 6 Harrison Rd. Willowdale, Ontario, M2L IV2, Canada, 416–361–4668.

i. Comment Date: April 25, 1986.

j. Description of Project: The project would consist of the following proposed facilities: (1) A concrete weir or dam, 100 feet long and a maximum of 6 feet high (The crest elevation of the dam will be 891 feet msl, with the addition of 3-foot-high flashboards, the effective crest will be 894 feet msl); (2) a 2.5-acre reservoir with a gross storage capacity of 10 acre-feet; (3) an intake channel 450 feet long and 12 feet wide; (4) a 7-foot-diameter penstock 120 feet long; (5) a concrete masonry powerhouse 40 feet in lenght and 20 feet in width, that will house a turbine-generator unit with a total installed capacity of 1,500 kW; (6) a 70-foot-long and 20-foot-wide tailrace channel; (7) a 4,000-foot-long 23-kV transmission line that will connect to the existing line of Niagara Mohawk Power Corporation; (8) a 12-foot-wide 3,000-foot-long access road; and (9) appurtenant facilities. The Applicant estimates that the average annual energy production would be approximately 4.0 GWh.

k. Purpose of Project: The Applicant anticipates that project energy will be sold to the Niagara Mohawk Power Corporation.

l. This notice consists of the following standard paragraphs: A3, A9, B, C and D1.

9a. Type of Application: Preliminary Permit.

b. Project No.: 9538–000.

c. Date Filed: October 9, 1985.

d. Applicant: Trafalgar Power, Inc.

e. Name of Project: Mill Point.

f. Location: Schoharie Creek, Montgomery County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Arthur H. Steckler, Trafalgar Power, Inc., Smith and Canal Streets, Franklin, NH 03035, (603) 934–4202 or (514) 273–8891.

i. Comment Date: April 25, 1986.

j. Description of Project: The proposed project would consist of (1) An existing stone masonry dam 380 feet long, 20 feet high, with a breached section 140 feet long to be repaired; (2) an existing intake structure and power canal, 4,100 feet long, to be repaired; (3) a proposed reservoir of surface area equal to 113 acres and storage volume of 712 acre-feet at a normal maximum surface elevation of 410 feet mean sea level; (4) an existing powerhouse to be repaired and to contain two proposed turbine/generators with a total capacity of 3.58 MW; (5) an existing tailrace to be cleared; (6) a proposed 13.2 kV, 2,100-foot-long transmission line; and (7) appurtenant facilities. The estimated annual energy production is 10,146,000 KWh. The net hydraulic head is 36 feet. Project power would be sold to Niagara Mohawk Power Corporation. The existing facilities are owned by George Pilicki and Stanley Korona Jr.

k. This notice consists of the following standard paragraphs: A5, A7, A9, B, C, D2.

l. *Proposed Scope of Studies under Permit.*—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $75,000.

10 a. Type of Application: Preliminary Permit.

b. Project No.: 9731–000.

c. Date Filed: December 26, 1985.

d. Applicant: Summit Hydropower.

e. Name of Project: Willimantic No. 3.

f. Location: On the Willimantic River in Windham County, Connecticut.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Duncan Broatch, Summit Hydropower, P.O. Box 122, Putnam, CT 06260, (203) 928–2002.

i. Comment Date: April 28, 1986.

j. Description of Project: The proposed run-of-river project would consist of: (1) An existing 10-foot-high and 100-foot-long granite block gravity dam; (2) a small impoundment with a surface

VOL 51
ISS 45
MR 7
1986
UMI

elevation of 227 feet mean sea level; (3) a new intake structure and powerhouse at the north side of the dam with a 390-kW turbine-generator unit; (4) a short tailrace; (5) a new 400-foot-long transmission line; and (6) other appurtenances. Applicant estimates an average annual generation of 1,755,000 kWh. Existing facilities and water rights are owned by the Boland Oil Company and the Northeast Utilities Company.

k. Purpose of Project: Project energy would be sold to the Northeast Utilities Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 3 years during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under the permit would be $10,000.

a. Type of Application: Minor License.

b. Project No.: 9650-000.

c. Date Filed: November 22, 1985.

d. Applicant: Westinghouse Electric Corporation and Factory Falls Associates.

e. Name of Project: Gilman Dam.

f. Location: On the Black River in Windsor County, Vermont.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: John F. Andreas, Plant Manager, Westinghouse Electric Corporation, 160 Tapley Street, Springfield, MA 01104, (413) 734–3197.

i. Comment Date: April 28, 1986.

j. Description of Project: The Applicants propose to refurbish the existing project which consists of: (1) The 7-foot-high and 190-foot-long concrete Gilman Dam with a crest elevation of 421 feet mean sea level owned by Factor Falls Associates; (2) a small impoundment with a surface area of 1 acre; (3) an intake structure; (4) a 4-foot-diameter and 175-foot-long steel penstock; (5) a powerhouse with one 125-kV unit; (6) a 4.16-kW and 50-foot-long transmission line; and (7) other appurtenances. Applicants estimate an average annual generation of 660,000 kWh.

k. Purpose of Project: Project energy would be sold to local utility.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D1.

12a. Type of Application: Minor License.

b. Project No: 9649-000.

c. Date Filed: November 22, 1985.

d. Applicant: Westinghouse Electric Corporation and Lovejoy Tool Company, Inc.

e. Name of Project: Lovejoy Dam.

f. Location: On the Black River in Windsor County, Vermont.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: John F. Andreas, Plant Manager, Westinghouse Electric Corporation, 160 Tapley Street, Springfield, MA 01104, (413) 734–3197.

i. Comment Date: April 28, 1986.

j. Description of Project: The Applicants propose to refurbish the existing project that consists of: (1) The 15-foot-high and 150-foot-long concrete Lovejoy Dam owned by the Lovejoy Tool Company, Inc.; (2) one-foot-high flashboards; (3) an impoundment with a surface area of 3.6 acres; (4) an intake structure; (5) a 4-foot by 6-foot reinforced concrete penstock, 5 feet long; (6) a powerhouse with 2 turbine-generator units with a total installed capacity of 150 kW; (7) a 4.16-kV and 100-foot-long transmission line; and (8) other appurtenances. Applicants estimate an average annual generation of 500,000 kWh.

k. Purpose of Project: Project energy would be sold to a local utility.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C and D1.

13a. Type of Application: Preliminary Permit.

b. Project No: 9692-000.

c. Date Filed: December 18, 1985.

d. Applicant: Pacific Sunshine Power, Inc.

e. Name of Project: White River—Mud Mountain Dam.

f. Location: On the White River at the U.S. Army Corps of Engineers Mud Mountain Dam in Sec. 9, 16, 17, 8, 7, 6 T.19N. R.7E. and Sec. 1 T.19N. R.6E. near Enumclaw and Buckley in King and Pierce Counties, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Michael D. Kuntz, 4100 Seafirst Fifth Avenue Plaza, 800 5th Avenue, Seattle, WA 98104, (206) 622–1818.

i. Comment Date: April 25, 1986.

j. Description of Project: The proposed project would involve constructing a powerplant at the existing Mud Mountain Dam. The project would consist of: (1) Three existing 2,000-foot-long, 8½-foot-diameter penstocks; (2) a proposed powerhouse containing one generating unit with a rated capacity of 11,000 kW; and (3) a 2½-mile-long transmission line. Applicant estimates the average annual energy production to be of 37 GWh.

A preliminary permit does not authorize construction. Applicant seeks issuance of a preliminary permit for a term of 36 months during which it would conduct engineering and environmental feasibility studies and prepare an FERC license application at a cost of $250,000. No new roads would be constructed or drilling conducted during the feasibility study.

k. Purpose of Project: The proposed power is to be sold to the local power company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C and D2.

14a. Type of Application: Major License.

b. Project No.: 8296-001.

c. Date Filed: June 7, 1985.

d. Applicant: Malacha Power Project, Inc.

e. Name of Project: Muck Valley Project.

f. Location: On Pit River, in Lassen County, California; partially within U.S Bureau of Land Management lands.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Thomas J. Vestal, President, Malacha Power Project, Inc., P.O. Box 250, Fall River Mills, CA 96028, (916) 336–5528.

i. Comment Date: April 25, 1986.

j. Description of Project: The proposed project would consist of: (1) A 4.5-foot-high, 300-foot-long diversion dam located at elevation 4,064 feet m.s.l. in the NE¼ of the SW¼ of Section 27, Township 37 North, Range 7 East of the Mount Diablo Meridian; (2) a 144-foot-long, 29.5-foot-high intake structure; (3) a 12-foot-diameter, 22,200-foot-long lined diversion tunnel; (4) a 19-foot-diameter, 4,000-foot-long low-pressure conduit; (5) an 8-foot-diameter, 8,000-foot-long penstock; (6) a powerhouse located in the SW¼of the NW¼ of Section 11, Township 36 North, Range 6 East, containing a single 29,900 kW generating unit operating under a head of 664.5 feet; (7) a substation, adjacent to the powerhouse, containing a 12.47/115-kV power transformer; (8) a 16-mile-long, 115-kV transmission line interconnecting the project to the Pacific Gas and Electric Company's (PG&E) Pit No. 1 Powerhouse; (9) a 1-mile-long access road; and (10) appurtenant facilities.

The estimated 97 GWh generated annually by the project would be sold to PG&E. The estimated cost of

constructing the project is $36,306,480. No recreational facilities are proposed. The license application was filed pursuant to a 24-month preliminary permit issued to the Applicant on March 12, 1985, 30 FERC ¶ 62,271 (1985).

k. This notice also consists of the following standard paragraphs: A3, A9, B, C, and Dl.

15a. Type of Application: Minor License.

b. Project No.: 8391–001.

c. Date Filed: November 27, 1985.

d. Applicant: Prodek, Inc.

e. Name of Project: Silver Jack Dam.

f. Location: On the Cimarron River, near Montrose, in Gunnison County, Colorado.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Flake H. Wells, III, Prodek, Inc., 3314 E. 51st St., Suite B, Tulsa, OK 74135, (918) 749–7749.

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed run-of-the-river project would utilize the existing U.S. Bureau of Reclamation's Silver Jack Dam and would consist of: (1) A 24-inch-diameter, 160-foot-long penstock which would be connected to the existing 38-inch-diameter outlet pipe located inside the outlet tunnel, upstream from two existing high-pressure gates; (2) a 16 feet by 17 feet concrete powerhouse located adjacent to the existing low level outlet stilling basin, containing a single Francis turbine-generator unit with a rated capacity of 215 kW, and producing an estimated average annual generation of 1.19 GWh; (3) a 30-inch-diameter, 60-foot-long concrete pipe tailrace discharging water to the Cimarron River via the existing stilling basin; and, (4) a 7.2–kV, 190-foot-long underground transmission line interconnecting the project to an existing Delta-Montrose Electric Association, Inc. line. Applicant estimates project construction cost at $325,000 and intends to sell project power to the Colordo-Ute Electric Association, Inc.

The proposed project would utilize reservoir releases as ordered by the USBR and the Bostwick Park Water Conservancy District.

k. This notice also consists of the following standard paragraphs: A3, A9, B, C and Dl.

16a. Type of Application: Preliminary Permit.

b. Project No.: 9711–000.

c. Date Filed: December 23, 1985.

d. Applicant: Inghams Corporation.

e. Name of Project: Inghams Dam.

f. Location: East Canada Creek in Herkimer and Fulton Counties, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. C. William Carter, Inghams Corporation, 420 Lexington Avenue, Suite 440, New York, NY 10170, (212) 986–0440.

i. Comment Date: April 17, 1986.

j. Description of Project: The Applicant proposes to develop the presently unutilized capacity at the Inghams Dam owned by the Niagara Mohawk Power Corporation for the existing unlicensed East Canada Creek Project No. 2648. The proposed project would consist of Option #1 or Option #2.

Option #1 would consist of: (1) A concrete gravity dam consisting of: (a) a 125-foot-high, 400-foot-long section, and (b) a 28-foot-high, 205-foot-long section; (2) a reservoir with a surface area of 135 acres, a storage capacity of 3,500 acre-feet, and a water surface elevation of 661.8 feet m.s.l. with; (3) 4.5-foot-high wood flashboards; (4) a new concrete intake structure; (5) a new 12-foot-diameter steel penstock 520 feet long; (6) a new 30-foot-diameter steel surge tank; (7) a new powerhouse containing one generating unit with a capacity of 9,600 kW; (8) a new 80-foot-wide, 700-foot-long tailrace; (9) a new transmission line, 400 feet long; (10) a new 80-foot-long bridge; and (11) appurtenant facilities.

Option #2 would consist of the same as Option #1 except that: (1) the penstock would be 1,000 feet long; (2) the tailrace length would be reduced to 150 feet; and (3) a new 800-foot-long access road.

The Applicant estimates the average annual generation would be 10,000,000 kWh. The existing dam is owned by Niagara Mohawk Power Corporation.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard Paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $160,000.

17a. Type of Application: Preliminary Permit.

b. Project No.: 9747–000.

c. Date Filed: December 27, 1985.

d. Applicant: Taft Hydropower, Inc.

e. Name of Project: Spruce Creek Camp Power Project.

f. Location: On Spruce Creek near Salisbury, Herkimer County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Lawrence R. Taft P.E., 10315 Caughdenoy Rd., Central Square, NY 13036, (315) 437–2547.

Mr. Neal F. Dunlevy, P.E., Stetson Dale Engineering PC, 185 Genesee St., Utica, NY 13501, (315) 797–5800.

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed would consist of: (1) Reconstruction of an existing timber crib dam with concrete and stone-masonry abutments approximately 85 feet long; (2) a proposed one-acre reservoir with four acre-feet of storage at an elevation of 1,084 MSL; (3) reconstruction of the existing concrete power flume (10 feet wide and 15 feet long) containing a proposed submerged 125-kW generator; (4) an existing tailrace which would require dredging; (5) a proposed 13.2-kV transmission line 1,500 feet long; and (6) appurtenant facilities. The Applicant estimates that the average annual energy generation would be 600 MWh. The project energy would be sold to the Niagara Mohawk Power Company. The dam owner is Robert Geffken, Melville, New York.

k. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

l. Proposed Scope under this Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $7,000.

18a. Type of Application: Preliminary Permit.

b. Project No.: 9770–000.

c. Date Filed: December 30, 1985.

d. Applicant: Trafalgar Power, Inc.

e. Name of Project: Upper Stottville.

f. Location: On the Claverack Creek in Columbia County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 16-foot-high and 140-foot-long concrete dam with a spillway crest elevation of 82 feet msl; (2) an existing reservoir of negligible size and storage capacity at elevation 82 feet msl; (3) a new gated intake structure and flume approximately 18 feet long; (4) a proposed powerhouse to contain one turbine/generator for an installed capacity of 250 kW; (5) a proposed tailrace; (6) a new 4.8-kV transmission line approximately 100 feet long; and (7) appurtenant facilities. The estimated average annual energy produced by the project would be 1.1 million kWh operating under a hydraulic head of 12 feet. The existing facilities are owned by John Fiorillo and East Coast Pulp Sales, Inc.

k. Purpose of Project: Project power will be sold to the Niagara Mohawk, Power Corporation.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. *Proposed Scope of Studies under Permit*—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $36,000.

i. Comment Date: April 14, 1986.

j. Description of Project: The proposed project would consist of: (1) An existing 30-foot-high, 100-foot-long concrete gravity dam; (2) a reservoir with a surface area of 12.8 acres, a storage capacity of 130-acre-feet, and a normal water surface elevation of 475 feet m.s.l.; (3) a new concrete intake structure; (4) a new 46-inch-diameter, 5,000-foot-long steel penstock; (5) a new concrete powerhouse containing one generating unit with a capacity of of 1,200 kW; (6) a new 8-foot-wide, 20-foot-long earth tailrace; (7) a new transmission line, 200 feet long; and (8) appurtenant facilities. The Applicant estimates the average annual generation would be 5,000,000 kWh. The existing dam is owned by Niagara Mohawk Power Corporation.

k. Purpose of Project: Project power would be sold to Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $40,000.

a. Type of Application: Preliminary Permit.

b. Project No.: 9843–000.

c. Date Filed: December 30, 1985.

d. Applicant: Bexar-Medina-Atascosa Counties Water Control and Improvement District No. 1 and Prodek, Inc.

e. Name of Project: Medina Dam Water Power Project.

f. Location: On the Medina River in Medina and Bandera Counties, Texas.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. §§ 791(a)–825(r).

h. Contact Person: Mr. Flake H. Wells, III, Vice President, Prodek, Inc., 3314 E. 51st Street, Suite B, Tulsa, OK 74135, (918) 749–7749.

i. Comment Date: April 28, 1986.

j. Description of Project: The proposed project would consist of: (1) the existing Medina Dam approximately 1,580 feet long and 164 feet high; (2) an existing 5,573-acre reservoir having a storage capacity of 254,000 acre-feet at an elevation of 1,072 feet (Medina Dam Datum); (3) an existing spillway 880 feet long; (4) three existing steel pipe irrigation conduits 60 inches in diameter with lift type gates; (5) a new penstock approximately 220 feet long and 54 inches in diameter leading to; (6) a new powerhouse containing six turbine/generator units having a total installed capacity of 1500 kW; (7) a new 12.47-kV transmission line approximately 500 feet long; and (8) appurtenant facilities. The Applicant estimates that the average annual energy would be 4,500,000 kWh. The Applicant proposes to sell all project energy to the Lower Colorado River Authority.

k. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would range from $60,000 to $90,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, & D2.

22a. Type of Application: Preliminary Permit.

b. Project No: 3493–007.

c. Date Filed: August 16, 1984.

d. Applicant: The Town of Summersville.

e. Name of Project: Summersville.

f. Location: At the U.S. Army Corps of Engineers' Summersville Dam, Gauley River in Nicholas County, West Virginia.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Carroll T. Lay, 717 Main Street, Summersville, West Virginia 26651.

i. Comment Date: April 25, 1986.

j. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers' Summersville Dam and Lake and would consist of: (1) 3 new 11-foot-diameter and 200-foot-long steel penstocks connected to the existing outlet works; (2) a new powerhouse with 3 turbine-generator units with a total installed capacity of 70,000 kW; (3) a new 138-kV and 8.5-mile-long transmission line; and (4) other appurtenances. Applicant estimates an average annual generation of 188,000,000 kWh.

k. Purpose of Project: Project energy would be sold to the Monogahela Power Company.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, B, C, D2.

m. Proposed Scope of Studies under Permit: A prelimianry permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the cost of the studies under permit would be $150,000.

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, any competing development applications or notices of intent to file competing development applications, must be filed in response to and in compliance with the public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later tha 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A8. Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing preliminary permit or development application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 C.F.R. §§ 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to inervene must be received on or before the specified date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "Comments", "Notice of Intent To File Competing Application", "Competing Application," "Protest" or "Motion To Intervene", as applicable and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Keneneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB,

at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: March 4, 1986.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Natural Gas Companies; Texas American Bank/Fort Worth, N.A., Trustee of the Myron A. Smith Estate, Acct. 4312, (Myron A. Smith), et al.; Applications for "Small Producer" Certificates [1]

February 28, 1986.

Take notice that each of the applicants listed herein has filed an Application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make protest with reference to said applications should on or before March 17, 1986, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

Office of Energy Research

DOE/NSF Nuclear Science Advisory Committee; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: DOE/NSF Nuclear Science Advisory Committee.

Date and Time: March 27, 1986 from 9:00 a.m. to 6:00 p.m.; March 28, 1986 from 9:00 a.m. to 12:00 noon.

Place: Department of Energy, 1000 Independence Avenue SW., Room 1E-245, Washington, DC 20585.

Contact: John R. Erskine, Division of Nuclear Physics, U.S. Department of Energy, Washington, DC 20545, (301) 353-3613.

Purpose of the Committee

To advise the Department of Energy and the National Science Foundation on the scientific priorties within the field of basic nuclear science research.

Tentative Agenda

March 27

- Briefings and discussions of FY 1986 and FY 1987 budgets for nuclear physics research and programmatic trends.
- Review status and activities of existing subcommittees, and discuss formation of new subcommittees.
- Brief presentations of proposals for upgrades or construction of new facilities at Brookhaven National Laboratory, University of Illinois, Lawrence Berkeley Laboratory, Los Alamos National Laboratory (physics presentation only), Massachusetts Institute of Technology, and Oak Ridge National Laboratory.
- Public comment.

March 28

- Complete presentation of facility proposals, if necessary.
- Discussion of procedure for full review of the facility proposals.
- Public comment.

Public Participation

The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact John Erskine at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts

Available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on March 4, 1986.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-2980-2]

Environmental Impact Statements; Availability Comments

Availability of EPA comments prepared February 17, 1986 through February 21, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 383-5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 FR 4804).

Draft EIS's

ERP No. D-BLM-J01006-CO, Rating EO2, James Creek Coal Preference Right Lease Application, Development and Leasing, CO. Summary: EPA identified significant environmental impacts related to water quality, wetlands and riparian areas, fisheries, and ground water, including potential violation of water quality standards, arising from the proposed coal mining activities.

ERP No. D-BLM-J70005-WY, Rating EC2, Lander Resource Area, Resource Mgmt. Plan, WY. Summary EPA is concerned that protection and improvement of air and water related values be more clearly described, and recommended several corrective actions. These include a better description of objectives consistent with water quality standards (WQS); further development of mineral activity constraints for riparian-wetland areas and WQS; more definitive standards for reparian-wetland restoration and improvement; requirements for quantifying and reporting sulfur dioxide emissions from oil and gas well flaring; and inclusion of a more specific comprehensive resource monitoring strategy.

ERP No. D-BPA-L04500-00, Rating EC2, Direct Service Industry Options on Reducing Load Fluctuations and Revenue Uncertainty, WA. Summary: EPA recommends that all the environmental tradeoffs among the options and the implementation steps which would lead to a selected option be concisely described in the final EIS. Additionally, EPA is concerned that all beneficial and adverse economic impacts of the proposed rate revisions be fully evaluated in the final EIS.

ERP No. D-COE-C36059-00, Rating EC2, Port Jervis Ice Related Flood Control Plan, Upper Delaware River Basin, NJ, NY, and PA. Summary: EPA is concerned that the proposed project may cause adverse impacts to the aquatic ecosystems and water quality. Accordingly, EPA requests that the mitigation plan be provided to EPA for review and comment prior to issuance of the final EIS. An agreed upon mitigation and compensation plan should then be incorporated into the final EIS.

ERP No. D-COE-E36157-TN, Rating LO, Mill Creek Basin Flood Damage Reduction Plan, Mill and Sevenmile Creeks Dry Dam Construction and Channel Widening, TN. Summary: EPA has reviewed the draft EIS and from the information provided has no objections to the project.

ERP No. D-MMS-K02003-CA, Rating EC2, San Miguel Project, Northern Santa Maria Basin Area Study, Lease OCS-P 0409, Outer Continental Shelf (OCS) Development Plan, Approval and Permits, CA. Summary: EPA is concerned that adequate mitigation measures to offset adverse air quality impacts, and impacts associated with dredge or fill activities, be adopted. EPA also requests more information on the predicted effects of discharges upon marine environment.

ERP No. DS-SFW-A86084-00, Rating EO1, Migratory Bird Hunting in the US, Use of Lead Shotgun Pellets, Regulations, US. Summary: EPA recommends that Alternative V, a four-year phase out of lead shot in migratory waterfowl flyways, be selected as the Preferred Alternative. The Preferred Alternative selected by the US Fish and Wildlife Service prohibits the use of lead shot only in areas where lead poisoning has been identified as a threat to waterfowl or Bald Eagles, but does not adequately protect these biological resources, and offers no economic advantage over Alternative V. The final supplement EIS should also address more completely the impact of the proposed action on Peregrine Falcons and the economic impact of new developments in non-toxic shot.

ERP No. D-UPS-C81011-NY, Rating LO, Manhattan General Mail Facility Development, NY. Summary: EPA anticipates that no significant environmental impacts would result from implementation of this project. However, EPA requests that additional

VOL 51 ISS 45 MR 7 1986 UMI

at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. *Agency Comments*—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L No. 89-29, and other applicable statutes. No formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 405 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: March 4, 1986.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Natural Gas Companies; Texas American Bank/Fort Worth, N.A., Trustee of the Myron A. Smith Estate, Acct. 4312, (Myron A. Smith), et al.; Applications for "Small Producer" Certificates [1]

February 28, 1986.

Take notice that each of the applicants listed herein has filed an Application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make protest with reference to said applications should on or before March 17, 1986, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

Office of Energy Research

DOE/NSF Nuclear Science Advisory Committee; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: DOE/NSF Nuclear Science Advisory Committee.

Date and Time: March 27, 1986 from 9:00 a.m. to 6:00 p.m.; March 28, 1986 from 9:00 a.m. to 12:00 noon.

Place: Department of Energy, 1000 Independence Avenue SW., Room 1E-245, Washington, DC 20585.

Contact: John R. Erskine, Division of Nuclear Physics, U.S. Department of Energy, Washington, DC 20545, (301) 353-3613.

Purpose of the Committee

To advise the Department of Energy and the National Science Foundation on the scientific priorties within the field of basic nuclear science research.

Tentative Agenda

March 27

- Briefings and discussions of FY 1986 and FY 1987 budgets for nuclear physics research and programmatic trends.
- Review status and activities of existing subcommittees, and discuss formation of new subcommittees.
- Brief presentations of proposals for upgrades or construction of new facilities at Brookhaven National Laboratory, University of Illinois, Lawrence Berkeley Laboratory, Los Alamos National Laboratory (physics presentation only), Massachusetts Institute of Technology, and Oak Ridge National Laboratory.
- Public comment.

March 28

- Complete presentation of facility proposals, if necessary.
- Discussion of procedure for full review of the facility proposals.
- Public comment.

Public Participation

The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact John Erskine at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-2980-2]

Environmental Impact Statements; Availability Comments

Availability of EPA comments prepared February 17, 1986 through February 21, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 383-5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 FR 4804).

Draft EIS's

ERP No. D-BLM-J01006-CO, Rating EO2, James Creek Coal Preference Right Lease Application, Development and Leasing, CO. Summary: EPA identified significant environmental impacts related to water quality, wetlands and riparian areas, fisheries, and ground water, including potential violation of water quality standards, arising from the proposed coal mining activities.

ERP No. D-BLM-J70005-WY, Rating EC2, Lander Resource Area, Resource Mgmt. Plan, WY. Summary EPA is concerned that protection and improvement of air and water related values be more clearly described, and recommended several corrective actions. These include a better description of objectives consistent with water quality standards (WQS); further development of mineral activity constraints for riparian-wetland areas and WQS; more definitive standards for reparian-wetland restoration and improvement; requirements for quantifying and reporting sulfur dioxide emissions from oil and gas well flaring; and inclusion of a more specific comprehensive resource monitoring strategy.

ERP No. D-BPA-L04500-00, Rating EC2, Direct Service Industry Options on Reducing Load Fluctuations and Revenue Uncertainty, WA. Summary: EPA recommends that all the environmental tradeoffs among the options and the implementation steps which would lead to a selected option be concisely described in the final EIS. Additionally, EPA is concerned that all beneficial and adverse economic impacts of the proposed rate revisions be fully evaluated in the final EIS.

ERP No. D-COE-C36059-00, Rating EC2, Port Jervis Ice Related Flood Control Plan, Upper Delaware River Basin, NJ, NY, and PA. Summary: EPA is concerned that the proposed project may cause adverse impacts to the aquatic ecosystems and water quality. Accordingly, EPA requests that the mitigation plan be provided to EPA for review and comment prior to issuance of the final EIS. An agreed upon mitigation and compensation plan should then be incorporated into the final EIS.

ERP No. D-COE-E36157-TN, Rating LO, Mill Creek Basin Flood Damage Reduction Plan, Mill and Sevenmile Creeks Dry Dam Construction and Channel Widening, TN. Summary: EPA has reviewed the draft EIS and from the information provided has no objections to the project.

ERP No. D-MMS-K02003-CA, Rating EC2, San Miguel Project, Northern Santa Maria Basin Area Study, Lease OCS-P 0409, Outer Continental Shelf (OCS) Development Plan, Approval and Permits, CA. Summary: EPA is concerned that adequate mitigation measures to offset adverse air quality impacts, and impacts associated with dredge or fill activities, be adopted. EPA also requests more information on the predicted effects of discharges upon marine environment.

ERP No. DS-SFW-A86084-00, Rating EO1, Migratory Bird Hunting in the US, Use of Lead Shotgun Pellets, Regulations, US. Summary: EPA recommends that Alternative V, a four-year phase out of lead shot in migratory waterfowl flyways, be selected as the Preferred Alternative. The Preferred Alternative selected by the US Fish and Wildlife Service prohibits the use of lead shot only in areas where lead poisoning has been identified as a threat to waterfowl or Bald Eagles, but does not adequately protect these biological resources, and offers no economic advantage over Alternative V. The final supplement EIS should also address more completely the impact of the proposed action on Peregrine Falcons and the economic impact of new developments in non-toxic shot.

ERP No. D-UPS-C81011-NY, Rating LO, Manhattan General Mail Facility Development, NY. Summary: EPA anticipates that no significant environmental impacts would result from implementation of this project. However, EPA requests that additional

VOL
51
ISS
45
MR
7
1986
UMI

information on air quality impacts be provided in the final EIS.

Final EIS's

ERP No. FA-COE-K36014-CA, Upper Santa Ana River Main Stem and Santiago Creek Flood Control Project, Mentone Dam Upstream Flood Storage Alternative, CA. Summary: The final EIS included analysis which adequately addessed EPA's prior concerns. EPA has no objections to the project.

Amended Notice

The following review was completed during the week of January 20, 1986 through January 24, 1986 and should have appeared in the Federal Register Notice published on February 7, 1986.

ERP No. DS-FHW-F40207-MI, Rating LO, MI-59 Reconstruction, Mound Rd. to I-94, New One-Pair and Boulevard Alternate Alignment, Right-of-Way Acquisition, 404 Permit, MI. Summary: EPA's review concluded that air quality, noise, water quality, and wetland impacts were adequately addressed. EPA has no objection to the project.

Dated: March 3, 1986.

Science Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92-463 of a change in the date of the Environmental Health Committee meeting of the Science Advisory Board (SAB) to be held March 25, 1986. Publication of the original agenda appeared in the Federal Register on Monday, February 24, 1986, page 6467. The amended notice is to inform the public that the one-day meeting of the Metals Subcommittee of the Environmental Health Committee of the Science Advisory Board will be held on March 25, 1986. For further information, contact Dr. Daniel Byrd, Executive Secretary, Science Advisory Board (202) 382-2552.

Dated: February 27, 1986.

Terry F. Yosie,

Director, Science Advisory Board.

BILLING CODE 6560-50-M

[OPTS-59213, FRL-2979-1]

Monohydric Alcohol Ester of Tall Oil Fatty Acids, Oxidized Certain Chemical Test Marketing Exemption Application; Werner G. Smith, Inc., et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's final rule published in the Federal Register of May 13, 1983 (48 FR 21722. This notice, issued under section 5(h)(6) of TSCA, announces receipt of one application for an exemption, provides a summary, and requests comments on the appropriateness of granting the exemption.

DATE: Written comments by: March 24, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS-59213]" and the specific TME number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances,

Environmental Protection Agency, Rm. E-201, 401 M Street, SW, Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW, Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

T 86-29

Close of Review Period. April 6, 1986.

Manufacturer. Werner G. Smith, Inc.

Chemical. (G) Monohydric alcohol ester of tall oil fatty acids, oxidized.

Use Production. (G) Confidential. Prod. range: 135,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: a total of 3 workers.

Environmental Release/Disposal. Disposal by public water treatment.

Dated: March 1, 1986.

Denise Devoe,

Acting Director, Information Management Division.

BILLING CODE 6560-50-M

[OPTS-59755, FRL-2979-2]

Certain Chemicals Premanufacture Notices; NL Industries, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). In the Federal Register of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of three such PMNs and provides a summary of each.

DATES: Close of Review Period:

Y 86-83—March 13, 1986;

Y 86-84 and 86-85—March 17, 1986.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemptions received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Y 86-83

Manufacturer. NL Industries, Inc.

Chemical. (G) Alkyd copolymer.

Use/Production. (G) A copolymer resin to be used in an open, non-dispersive manner. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted.

Y 86-84

Manufacturer. Confidential.

Chemical. (G) Acrylic modified alkyd.

Use-Production. (G) Resin in coatings. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted.

Y 86-85

Manufacturer. Sicpa Industries of Virginia, Inc.

Chemical. (G) Alkyd resin.

Use/Production. (S) Site-limited and commercial manufacture of printing inks. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: a total of 5 workers, up to 6 hrs/da, up to 220 da/yr.

Environmental Release/Disposal. 0.01 to 1 kg/batch released to land. Disposal in accordance with government regulations.

Dated: February 28, 1986.

Denise Devoe,

Acting Director, Information Management Division.

[OW-FRL-2979-6]

Bacteriological Ambient Water Quality Criteria; Availability

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of bacteriological ambient water quality criteria document.

SUMMARY: Environmental Protection Agency (EPA) announces the availability of a bacteriological criteria document. This document provides guidance on ambient indicator bacterial densities which provide protection from risk of gastro-intestinal disease from swimming in bacteriologically contaminated waters. These criteria are intended to form the basis for enforceable State water quality standards and are published pursuant to section 304(a)(1) of the Clean Water Act.

FOR FURTHER INFORMATION CONTACT: Mr. Kent Ballentine, Environmental Protection Agency, Standards Branch (WH-585), Washington, DC 20460, (202) 245-3030.

SUPPLEMENTARY INFORMATION: Section 304(a)(1) of the Clean Water Act (33 U.S.C. 1314(a)(1)) requires EPA to publish and periodically update ambient water quality criteria. These criteria are to reflect the latest scientific knowledge on the identifiable effects of pollutants on public health and welfare, aquatic life, and recreation.

EPA has periodically issued ambient water quality criteria, beginning in 1973 with the publication of the "Blue Book" (*Water Quality Criteria, 1972*). In 1976 the "Red Book" (*Quality Criteria for Water*) was published. On November 28, 1980 (45 FR 79318), EPA announced the publication of 64 individual ambient water quality criteria documents for pollutants listed as toxic under section 307(a)(1) of the Clean Water Act; a criterion for the 65th pollutant, dioxin, was published on February 15, 1984 (49 FR 583). On July 29, 1985 (50 FR 30784) EPA announced the availability of water quality criteria documents for Ammonia, Arsenic, Cadmium, Chlorine, Chromium, Copper, Cyanide, Lead, Mercury, and Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses.

Today EPA is announcing the availability of a water quality criteria document that updates and revises the bacteriological criteria previously published in, *Quality Criteria for Water.* The Criteria document entitled, *Bacteriological Ambient Water Quality Criteria for Marine and Fresh Recreational Waters,* may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161 (phone number (703) 487-4650). The order number of the NTIS publication is PB 86-158-045 (cost $9.95). This revision is based on the relationship between swimming-associated gastrointestinal illness and ambient densities of indicator bacteria. The enumeration of the recommended indicators is based on analytical procedures which have recently been approved by the Agency and described in the report, EPA 600/4-85/076. The research upon which the criteria are based was conducted on beaches officially designated for swimming and which had well defined sources of human fecal pollution. EPA concluded from these studies that the indicator organism group recommended in *Quality Criteria for Water,* the fecal coliforms, is inadequate. The EPA studies demonstrated that the enterococci have a far better correlation with swimming associated gastrointestinal illness in both marine and fresh waters than fecal coliform; and that *E. coli,* a specific bacterial species included in the fecal coliform group, has a correlation with gastro-intestinal illness in fresh waters equal to the enterococci, but does not correlate as well in marine waters.

Although the waters and pollution sources, of necessity, were rigorously defined in the research, EPA believes that the criteria can be applied to a broader range of waters and conditions than those defined in the research. The State water quality standards currently use the fecal coliform criterion for waters in which incidental swimming may occur and are classified for primary contact. With the exception of shellfish harvesting waters which must relate to shellfish sanitation guidelines and FDA marketplace requirements, EPA believes that all other waters that are classified for primary contact could benefit from the application of the revised and updated criteria.

In response to the request for comments, EPA received fifty one comments from a wide range of private individuals and organizations. About one-half of the responses were from public health officials, approximately one fourth from treatment plant officials and allied engineering firms and the remaining one-fourth from university and government scientists. The comments from the public health sector were generally supportative of the need for an improved criteria but many felt that the criteria proposed on May 24, 1984 (49 FR 21987) did not reflect accepted levels of protection. Those associated with water pollution treatment generally felt that the proposed change offered no significant improvement over the existing fecal coliform criteria and that careful monitoring of the treatment plants, coupled with sanitary surveys, could provide the adequate protection. Increased cost was also cited as a concern. The comments from scientists pointed out technical factors that should be addressed. In addition to the written responses, verbal comments were expressed by those attending the 13 workshops conducted by EPA on the laboratory methodology. These comments, as would be expected, were of the same tenor as those from other public health officials. The interest shown and the depth of the comments, which are sumarized in Appendix A, gives assurance that the general public and those specifically affected have a good understanding of the issues involved. EPA believes that all germane comments have been addressed and that the basic concept upon which the criteria were proposed remains valid. EPA, therefore, recommends that criteria based on *E. coli* and the enterococci organisms be included in State water quality standards for the protection of primary water contact recreation in place of fecal coliforms or the more general total coliforms.

The recommended densities of indicator organisms (*E. coli* and enterococci), upon which the criteria are based, were calculated to approximate the degree of protection now accepted with the currently used indicator organisms (fecal coliforms). The new criteria recommendations by EPA are:

Fresh water: *E. coli*—not to exceed 126/100ml, or enterococci—not to exceed 33/100ml;

Marine water: enterococci—not to exceed 35/100ml;

These criteria are calculated as the geometric mean of a statistically sufficient number of samples, generally not less than five samples equally spaced over a thirty day period.

Different confidence intervals for these criteria are recommended for four levels of swimming use described in the criteria document.

EPA expects a gradual transition from the fecal coliform criteria to the new indicator bacteria by the States. The transition would first involve the inclusion of the updated criteria in the well defined bathing beach waters where the greatest potential for illness exists. Inclusion of the criteria for other primary contact waters would follow on a priority basis for waters with less swimming or full body contact use. The Agency expects the States to include the criteria for applicable waters as soon as practicable.

Dated: February 21, 1986.

Lawrence J. Jensen,

Assistant Administrator for Water.

Appendix A—Response to Public Comments on the Proposed Bacteriological Ambient Water Quality Criteria

Introduction

On May 24, 1984, the U.S. Environmental Protection Agency (EPA) announced the availability of the proposed bacteriological ambient water quality criteria for public comment. In response the Agency received fifty one letters of comment. Technical aspects of the public comments were reviewed by the Agency's Research and Development staff who performed the research leading to the proposed criteria and those responsible for criteria publication. The Agency herein summarizes those comments and addresses the issues raised.

Comment—A number of public health officials felt that the criteria proposed on May 24, 1984 (FR 21987) was more stringent than that now accepted as protective of swimmers and should more closely approximate the level recommended in *Quality criteria for Water.*

Response—A recalculation of the data was made to make the final criteria more closely approximate the currently accepted level.

Comment—Most commenters associated with treatment plants offered the opinion that there was general agreement that the current recommended fecal coliform criterial for full body contact recreational waters was based on inadequate and flawed technical data. They further suggested that the proposed indicators suffer from similar flaws.

Response—Because the proposed indicators, as well as the current indicator species, are comprised of non-pathogenic organisms that are consistently found in the feces of warm blooded animals, the basic problems of using surrogates for expected pathogens remain. The problem include: (1) limited epidemiological data to relate indicator organism densities and illness rates, and (2) a variation in the ratio of indicator organisms to pathogens that can be due to the natural variation of illness in human populations (especially prevalent in areas of small populations). The Agency recognizes that problems associated with non-human indicator organisms and differences due to population variations are not completely solved by the proposed criteria but believes that there is sufficient evidence of the epidemiological relationship between illness and indicator species to warrant use of the proposed criteria. The establishment of indicator species is not intended to replace the use of sanittary surveys to determine unsafe conditions caused by improperly treated sewage discharges or other overt contaminating events.

Comment—A number of commenters were critical of various aspects of the experimental data base. Concern was expressed about the adequacy of the definition of the pollution sources in the study area, the variation of illness between the high and low polluted beaches studied, variation in analytical methods, variation in rate of illness and bacterial levels, and lack of studies on a fecal coliform to illness ratio.

Response—The pollution sources for marine beaches were described as diffuse and most were raw sewage. The freshwater beaches were within ¾ miles to five miles from sewage treatment plants outfalls.

In experimental work of a biological nature it is expected that results will vary and reliance on statistical analysis

VOL
51
ISS
45
MR
7
1986
UMI

is needed to ascertain the overall effect. The Agency believes that the data and the analysis warrant the conclusion that the proposed criteria provide a reasonable degree of improvement in relating bacterial indicator densities to the potential of contracting gastrointestinal illness from swimming in polluted waters. It was determined that the relationship correlating fecal coliform and illness was poor relative to that found for enterococci in marine waters and with *E. coli* and enterococci in fresh waters. One commenter indicated that his statistical evaluation of the data showed a good correlation between fecal coliform and swimmers' illness rate at on location. It would be expected that at individual locations a reasonable correlation between fecal coliforms *E. coli* and swimmer illness would occur. However, the EPA studies demonstrated that such correlation does not exist in general, and were not useful for prediction at other locations. Thus, relative to enterococci and *E. coli*, the fecal coliform relationship to swimming-associated disease was not a good one in general and, therefore, fecal coliforms were not considered an appropriate predictor of disease potential.

Comment—One commenter stated that his statistical analysis indicated that the data collected from the swimming beach studies provided no evidence which warrants the replacement of fecal coliform with *E. coli* and enterococci as a measure of the suitability of beach waters for recreational purposes.

Response—It is EPA's judgment that the variations shown by statistical analyses do not affect the overall results of the EPA studies. EPA's studies confirm that even though bacterial parameters are highly variable, proper statistical analysis yields predictable results. However, because the bacterial densities were low and the disease incidence low, occasional anomalous results may occur. Seldom in comparative studies did the control population disease rate exceed the swimmers disease rate.

Comment—A few commenters were concerned that the use of enterococci to monitor water quality would not measure the risk due to contamination by animal feces.

Response—This concern is not considered a serious problem since the two enterococci that grow best on the recommended medium are *S. faecalis* and *S. faecium* which are found together or singly in most animals. Thus, the Agency believes that any risk associated with contact with water contaminated with animal fecal material will be indexed by the recommended analytical procedures.

Comment—Commenters in areas where non-point animal fecal material runoff was a source of contamination of waters designated for recreational swimming were concerned that runoff associated organisms may cause indicator densities to exceed the recommended criteria.

Response—It has been the Agency's policy to consider waters polluted by animal fecal material to be as hazardous as waters polluted by human fecal contamination. There is, however, no direct evidence that swimming-associated disease, other than leptospirosis, can be traced to animal sources. EPA has ongoing research aimed at determining the impacts on gastroenteritis in humans from non-point source pollution. At the present time, there is no reason to change the Agency's policy.

Comment—Some commenters noted that only gastroenteritis was considered in the data leading to the recommended criteria.

Response—Many other symptomatic illnesses were observed during the Agency's recreational water quality studies, however none showed a functional relationship to bacteriological quality of the water. In general, swimmers appeared to have more eye, ear, and nose infections, respiratory infections and skin infections than nonswimmers, but these differences were seldom statistically significant. Gastrointestinal illnesses, on the other hand, were significantly associated with polluted water and did show a functional relationship to water quality measured with bacterial indicators of fecal contamination. Since non-gastrointestinal illnesses are associated with polluted and non-polluted waters, no form of intervention is available to prevent them. Thus, these illnesses were not addressed. The Agency has supported other research on *otitis externa* in swimmers to evaluate the effect of water quality on this disease and these studies found that there was no association between abnormal ear flora and bacterial indicators of water quality, such as *E. coli*, enterococci and *Pseudomonas aeruginosa*.

Comment—Many of those involved in laboratory analysis expressed concern about the length of time needed for the enterococci test.

Response—The method for enumerating enterococci in water samples does require 48 hours to complete. This added time is not considered vital because these criteria are not intended to be used for daily decisions on closures, but rather more general assesaments of the suitability of water quality for the use. The day-to-day evaluation of the suitability of a beach for swimming would be a local health department consideration. Health Departments, for instance, may develop a relationship between rainfall and microbiological quality of water at beaches so that daily decisions could be made on beach closure. These daily decisions must be made with knowledge of the adequacy of impacting sewage plants or other known containment discharges. Timely reports must be made to health authorities on the bypassing of sewage and breakdown of disinfection procedures.

Comment—Most commenters associated with microbiological laboratories indicated that laboratory workers had little or no handson experience with the analytical methodology described in the criteria document for *E. coli* and enterococci. Additionally, these commenters were concerned about the formal publication of the methods and the commercial availibility of the bacteriological media for the analytical procedures.

Response—Recognizing that many of the State and municipal laboratory staff had no direct experience with the methods, the Agency conducted 13 analytical methodology workshops throughout the United States and Canada during 1985. Over two hundred people associated with laboratories attended these workshops, giving the Agency good assurance that experience with the procedures was well distributed. Additionally the Agency conducted extensive precision and bias testing on the methods in eleven different laboratories to assure users of the procedures that results were accurate and reproducible. The results of the precision and bias testing provide the justification to include the method in the Agency's methods manual. The EPA report, EPA-600/485/076, entitled *Test methods for Escherichia coli and Enterococci In Water By The Membrane Filter Procedure*, outlines the procedures. This document may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161, (phone number (703) 487-4650). The order number of the NTIS publication is PB 86-158-052 (cost $6.95). The Agency also received assurance from a major commercial distributor of bacteriological media that the special media would be placed on the market.

Comment—Some commenters were concerned that turbidity could interfere with the use of membrane filter methods.

Response—The use of the membrane filter procedures during the course of ther EPA recreational water quality studies was not compromised because of turbidity. The MPN procedure for fecal coliform was used during the first year of the studies and abandoned when it became obvious that membrane filter procedures would be adequate.

Comment—Several commenters asked why there was a poor correlation of *E. coli* to illness at marine water beaches.

Response—The poor correlation between swimming-associated gastroenteritis and *E. coli* or fecal coliforms at marine beaches was most likely due to the injurious effects of seawater on coliform bacteria causing high die-off rates. The variability of the response of coliforms to seawater probably is more evident for *E. coli* than for fecal or total coliforms because of the heterogeneity of the fecal or total coliform groups.

Comment—One commenter asked if *Streptococcus faecalis var. liquifaciens* species would affect risk determinations, when using enterococci.

Response—The effect of these species on the relationship between water quality and swimming-associated illiness apparently is not great, at least with bathing beach waters contaminated by point sources of pollution. Despite the probable presence of *S. faecalis var. liquifaciens*, the Density of the enterococci indicator group in seawater showed the best relationship to swimming-associated gastroenteritis. This would probably not occur if there was significant interference from this enterococci which is not a species normally inhabiting the intestines of warm blooded animals.

Comment—Concern was expressed that the use of the proposed criteria will result in increased capital and operating expenses for municipal sewage treatment disinfection facilities.

Response—In most cases the risk currently being accepted at swimming beaches will continue to be accepted. Since currently accepted levels of protection will continue EPA does not believe that State adoption of the recommended criteria will generate a widespread need for improved treatment nor a general increase in cost of treatment.

Comment—The point was made that the adoption of the proposed national bacterial bathing beach criteria for *E. coli* and enterococci will result in confusing and overlapping environmental regulations for protecting drinking water and shellfish harvesting waters which are based on fecal coliform or total coliforms. For example, marine bathing beaches, drinking water supply intakes, and shellfish harvesting areas will be required to comply with two conflicting and overlapping sets of bacterial water quality criteria.

Response—The recommended criteria are aimed at waters classified for recreational swimming. Where the criteria can be advantageously used for this and other ambient water uses, they will replace existing criteria through the States' water quality standards review and revision process. Regulations pertaining to drinking waters and shellllfish harvesting are not affected by this criteria recommendation. It is true that some overlap will occur but EPA believes that risk prediction capability of the new indicators justifies their adoption into State Water Quality Standards.

Comment—Several respondents made the point that no evidence was offered to show that *E. coli* and enterococci are indicators of viral enteritis, postulated as the probable cause of most cases of swimming contracted gastroenteritis.

Response—There is no practical way to confirm that enteric viruses were the cause of the illiness reported. Based on the best medical and epidemiological information, viruses were assumed to be the most likely causes. The indicator procedure is designed to detect feces associated organisms contained in sewage and cannot differentiate between causes of illness.

Comment—Some commenters indicated that the statistical model used in the criteria document cannot be used to obtain a single value for *E. coli*, enteroccocci, or any other bacterial indicator systems. Rather the model can only be used to obtain a possible range of values for such use.

Response—EPA recognizes that the criterion is based on a statistical model and that there will be variation around the prediction. These variations should be considered in the monitoring approach.

Comment—A question was raised concerning the nomenclature for *E. coli*. A commenter offered the opinion that the proposed protocol for identifying the bacterial species, *E. coli*. in fresh water is based on counting colonies differentiated on a new membrane filter MF medium (M-TEC) which does not fully define *E. coli*. Therefore, the use of a nomenclature that is species specific is not defensible in the scientific community.

Response—The use of a minimal number of biochemical or physical tests to identify an indicator bacterium species is a well established procedure. Bacteriologists in England have been doing it for many years. Report No. 71 on Public Health and Medical Subjects, The Bacteriological Examination of Water Supplies, which contains standard methods followed in England states that the indole test carried out on colonies which ferment lactose at 44° C provides a means of distinguishing *E. coli*. from other coliforms that ferment lactose at that temperature. Unlike the European bacteriologists who use the term "fecal coli", the British bacteriologists use the term *E. coli*. The nomenclature associated with the mTEC method uses the same reasoning to identify the organisms isolated by this procedure. Colonies that ferment lactose at 44.5° C on the mTEC medium are, in fact, fecal coliforms which generally include *E. coli*., *Klesiella* sp. and sometimes *Enterobacter* and *Citrobacter* species. The latter three species can be differentiated with an *in situ* test for the enzyme urease which they possess. *E. coli*. comprise about 87% of the total organism enumerated. Although some few may be erroneously named, the density of this indicator bacterium and its correlation to the rate of swimming-associated illness is not affected.

Comment—Some commenters expressed concern about the implied correlation of *E. coli*. and the traditional fecal coliform to risk of illness in the draft criteria document.

Response—In the final document a direct mathematical calculation was used to determine equivalent stringency between fecal coliform and the new indicators. The calculations were based on all data collected by Dufour and Cabelli.

Comment—A question was raised about why current and past fecal coliform data were not used.

Response—Current and past fecal coliform data would not provide meaningful information about potential health effects associated with any particular body of water since this indicator group did not show a direct relationship to swimming associated illness in the EPA recreational water quality studies. *E. coli*. densities were shown to be directly related to the swimming associated illness rate in fresh water environments. In general, this means that, relative to swimming associated illness, fecal coliform and *E. coli*. are poorly related.

Comment—A number of those associated with laboratories were concerned about increased cost of performing the analysis.

Response—The additional cost for materials alone, i.e., the medium, is negligible. For the *E. coli*. method, there is no difference. For the enterococci

VOL 51 ISS 45 MR 7 1986 UMI

method, the cost of the medium is approximately 50% more. The actual time spent assaying each sample is somewhat longer for the new methods because of the need to physically transfer the membrane, but even this part of the procedure does not significantly increase the time needed to complete the test.

Comment—Commenters involved with shellfish harvesting asked if the criteria would be applicable to shellfish harvesting waters.

Response—No, it is not applicable to shellfish waters. However, the Agency is currently examining the relationship between shellfish harvesting water quality and health effects in shellfish consumers. Future plans call for the examination of the relationship between bacterial indicator systems and health effects with water consumption.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-758-DR]

California; Amendment to Notice of a Major-Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of California (FEMA-758-DR), dated February 21, 1986, and related determinations.

DATED: February 27, 1986.

FOR FURTHER INFORMATION CONTACT: Sewall H.E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3616.

Notice

The notice of a major disaster for the State of California, dated February 21, 1986, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of February 21, 1986:

Calaveras, El Dorado, Mendocino, Placer, Plumas, and San Joaquin Counties for Individual Assistance
Alpine, Amador, Butte, Colusa, Lassen, Sierra, Sutter, Tehama, Tuolumne, and Yolo Counties as adjacent areas for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Samuel W. Speck,

Associate Director, State and Local Programs and Support Federal Emergency Management Agency.

FEDERAL HOME LOAN BANK BOARD

Sierra Federal Savings & Loan Association, Denver, CO; Replacement of Conservator With Receiver

Notice is hereby given that pursuant to the authority contained in section 5(d)(6)(D) of the Home Owners Loan Act of 1933, as amended, 12 U.S.C. 1464(d)(6)(D) (1982), the Federal Home Loan Bank Board replaced D. J. Fair as conservator for Sierra Federal Savings and Loan Association, Denver, Colorado ("Association") with the Federal Savings and Loan Insurance Corporation as sole receiver for Sierra Federal Savings and Loan Association on February 28, 1986.

Dated: March 4, 1986.

Jeff Sconyers,

Secretary.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in section 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203-009735-015.

Title: Steamship Operators Intermodal Committee Agreement.

Parties:

Associated Container Transportation (Australia Ltd.)
Atlantic Container Line G.I.E.
Barber Blue Sea Line
Companhia de Navegacao Maritima Netumar
Coordinated Caribbean Transport, Inc.
Evergreen Marine Corp., Ltd.
Farrell Lines, Inc.
Flota Mercante Grancolombiana
Columbus Line
Japan Line, Ltd.
Kawasaki Kisen Kaisha, Ltd.
Lykes Bros. Steamship Co., Inc.
A. P. Moller-Maersk Line

FEDERAL RESERVE SYSTEM

Bank South Corp. et al., Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than March 27, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Bank South Corporation*, Atlanta, Georgia; to engage *de novo* through its subsidiary, Bank South Services Corporation, Atlanta, Georgia, to own, install, and operate electronic fund transfer (EFT) terminals and equipment in retail locations owned and operated by unaffiliated entities, and to provide data processing and transmission of financial, banking and economic data, pursuant to § 225.25(b)(7) of Regulation Y; and to engage in management consulting to depository institutions, pursuant to § 225.25(b)(11) of Regulation Y. These activities would be conducted throughout the State of Georgia.

B. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Ameritex Bancshares Corporation*, Dallas, Texas; to engage *de novo* through its subsidiary, Ameritex Service Corporation, Dallas, Texas, in providing to others financially related data processing, data transmission services, facilities and data bases or access to them, pursuant to § 225.25(b)(7) of Regulation Y.

Board of Governors of the Federal Reserve System, March 3, 1986.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 86-4961 Filed 3-6-86; 8:45 am]

BILLING CODE 6210-01-M

Champlain Bank Corp., et al.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and §§ 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on

UMI

an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than March 29, 1986.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Champlain Bank Corporation*, Willsboro, New York; to become a bank holding company by acquiring 100 percent of the voting shares of Essex County-Champlain National Bank, Willsboro, New York.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Dominion Bankshares Corporation*, Roanoke, Virginia; to acquire 100 percent of the voting shares of National Bank of Commerce, Washington, D.C. Comments on this application must be received not later than March 31, 1986.

C. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *SouthTrust Corporation*, Birmingham, Alabama; to acquire 60 percent of the voting shares of The Bank of Ozark, Ozark, Alabama.

2. *Union Bancshares of Campbell County, Inc.*, Jellico, Tennessee; to become a bank holding company by acquiring 80 percent of the voting shares of Union Bank, Jellico, Tennessee.

D. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Polk County Bancorporation, Inc.*, Polk County, Iowa; to become a bank holding company by acquiring 84.90 percent of the voting shares of The Polk City Savings Bank, Polk City, Iowa.

E. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *First FSB Bancshares, Inc.*, Italy, Texas; to become a bank holding company by acquiring 100 percent of the FSB Bancshares, Inc., Waco, Texas, thereby indirectly acquiring First State Bank, Coolidge, Texas; First State Bank, Italy, Texas; and First State Bank, Mount Calm, Texas.

Board of Governors of the Federal Reserve System, March 3, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Creditanstalt-Bankverein et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) of (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than March 29, 1985.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Creditanstalt-Bankverein*, Vienna, Austria; to acquire Pacific Overseas Finance Corporation, San Francisco, California, and thereby engage in trade financing services for exporters and importers, pursuant to section 225.25(b)(1), including: the arranging of buyer credit, supplier and distributor credit, and trade related preexport and inventory financing; the issuing of confirmations of payment in connection with international trade transactions in favor of United States suppliers of goods; and the provision of such other servicing of trade financing transactions as may be agreed upon between Pacific Overseas Finance Corporation and the financial institutions providing the trade financing. Comments on this application must be received not later than March 26, 1986.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Central Wisconsin Bancshares, Inc.*, Wausau; to acquire First American Investment, Incorporated, Wausau, Wisconsin, and thereby engage in securities brokerage activities, pursuant to § 225.25(b)(15) of Regulation Y.

Board of Governors of the Federal Reserve System, March 3, 1986.

James McAfee,

Associate Secretary of the Board.

The First of Long Island Corp. et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased

competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than March 27, 1986.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *The First of Long Island Corporation*, Glen Head, New York; to engage *de novo* through its subsidiary, Island Computer Corporation, Bohemia, New York, in the processing of incoming and outgoing cash letters, DDA checking (which includes deposit sorting and posting) and account reconciliation, time deposit accounting, club accounting, and certain certificate of deposit accounting, which includes the computation and posting of interest, pursuant to § 225.25(b)(7) of the Board's Regulation Y.

2. *Suffolk Bancorp*, Riverhead, New York; to engage *de novo* through its subsidiary, Island Computer Corporation, Bohemia, New York, in processing of incoming and outgoing cash letters, DDA checking (which includes deposit sorting and posting) and account reconciliation, time deposit accounting, club accounting, and certain certificate of deposit accounting, which includes computation and posting of interest, pursuant to § 225.25(b)(7) of the Board's Regulation Y

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Sovran Financial corporation*, Norfolk, Virginia; to acquire 5.4 percent of the voting shares of Internet, Inc., Reston, virginia and thereby engage in electronic funds transfer activities, pursuant to § 225.25(b)(1) and (7) of the Board's Regulation Y. These activities would be conducted in Washington, DC, Maryland, and Virginia. Comments on this application must be received not later than March 20, 1986.

2. *Sovran Financial corporation*, Norfolk, Virginia; to acquire Suburban Service Corporation, Bethesda, Maryland, a wholly-owned subsidiary of Suburban Bancorp, Bethesda, Maryland, and thereby engage in electronic funds transfer activities through a joint venture with giant automatic Money Systems, Inc., a wholly-owned subsidiary of Giant Foods, Inc., Landover, Maryland. The joint venture will provide support services to cash dispensing machines including managing a computerized electronic transfer switch, pursuant to § 225.25(b)(7) of the Board's Regulation Y. These activities would be conducted in Maryland and Washington, DC. Comments on this application must be received not later than March 20, 1986.

Board of Governors of the Federal Reserve System, March 3, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Statements of General Policy or Interpretation Proposed Official Staff Commentary on Fair Debt Collection Practices Act

AGENCY: Federal Trade Commission.

ACTION: Proposed official staff commentary.

SUMMARY: The Commission staff is seeking comment on its proposal for a commentary on the Fair Debt Collection Practices Act that will supersede all previously issued staff interpretations of the Act. The purpose of the commentary is to clarify and codify these interpretations.

DATE: The Commission staff is requesting public comment on the proposed official staff commentary until May 6, 1986.

ADDRESS: Comments on the commentary should be sent to: Secretary, Federal Trade Commission, Attention: FDCPA Commentary, Washington, DC. 20580.

FOR FURTHER INFORMATION CONTACT: Clarke Brinckerhoff, Attorney, John F. LeFevre, Program Advisor, General Credit Program, Division of Credit Practices, Federal Trade Commission, Washington, DC. 20580, (202) 724-1143 or 724-1185.

SUPPLEMENTARY INFORMATION:

Background

The Fair Debt Collection Practices Act (15 USC 1692 et seq.) was enacted on September 20, 1977, and became effective on March 20, 1978. The Act regulates the collection activities of independent debt collectors and specifically proscribes certain practices found by Congress to be deceptive, unfair, or abusive to consumers. It also requires debt collectors to disclose certain information to consumers about the debts being collected, as well as about consumers' rights to dispute and obtain verification of their debts. Finally, it requires debt collectors to abide by consumers' written requests to cease all further communication about their debts.

Section 814 (15 USC 1692l(1)) gives the Federal Trade Commission primary responsibility for the Act's administration and enforcement, using all the functions and powers that it has under the Federal Trade Commission Act. Although the Commission has initiated a number of formal actions against debt collectors in the eight years since the Fair Debt Collection Practices Act became effective, a significant part of its activity has involved informal staff interpretations issued by the staff of the Bureau of Consumer Protection's Division of Credit Practices in response to hundreds of requests from consumers and industry. There are now approximately 210 interpretations totally more than 1,000 pages. Although many interpretations have been published in three volumes as official staff interpretations, they are inadequately indexed and are only occasionally cross-referenced. Some have been superseded or overruled by court opinions, by subsequent interpretations, or by consent judgments obtained in the Commission's enforcement program. Others reflect a reading of the statute that is either inconsistent with the Act's language or purpose, or is inappropriate in light of subsequent experience. As a result, these informal staff letters appear to be of little assistance to debt collectors, consumers, or their respective counsel, in interpreting the Act.

The Bureau of Consumer Protection staff believes that this system of interpreting the Act needs to be streamlined and brought up-to-date. For this reason, the staff has prepared a "commentary" on the Act. The staff reviewed all the interpretations, resolved inconsistencies, and discarded those that it believes are not supported by the Act or that merely paraphrase the Act without clarifying its meaning. The Consumer Protection staff summarized the remaining interpretations that the staff believes need clarification in one document that comments upon each

provision of the statute that has given rise to questions.

Changing the current system will offer three benefits. First, modifying and simplifying the format of the staff interpretations will make it easier for interested parties to find answers to their questions. Currently, the interpretations are voluminous and difficult to handle and, in their present format, cannot effectively communicate staff's views about the Act to the public.

Second, the commentary will present a more comprehensive view of the statute. Previously, a particular interpretation might have been useful only for parties whose specific problems were similar to the factual situation addressed in the interpretation, since the interpretations did not provide a rationale that could be more generally applied, when appropriate, to a larger number of factually related cases. Additionally, there are portions of the statute that may need clarification but have not been interpreted at all. The staff has addressed these problems in the proposed commentary by (1) expanding the discussion of certain portions of the statute, where appropriate, and (2) providing views on some portions of the statute that have not been the subject of previous interpretations.

Third, the commentary's pre-emption of inconsistent and inaccurate advice in some prior interpretations should increase compliance with the Act. Members of the debt collection industry are more likely to rely on staff interpretations for guidance if the interpretations consistently offer sound advice.

The proposed commentary presents the most helpful of the existing interpretations and interprets other portions of the statute, where needed, in a clear and comprehensible format. Some previous interpretations have been eliminated, some have been recast, and some remain as originally published. All have been drafted to include only the essential elements of the principle involved to make them easy to understand. Since they are only interpretations, however, they are not trade regulation rules or regulations, and therefore have no binding effect on the Commission or the public.

The following paragraphs highlight some subjects where the views expressed in the commentary are different either in substance or emphasis from those expressed in prior informal staff interpretations. This list is not all-inclusive.

1. *Inclusion of Taxes and Fines in the Definition of "Debt"* (section 803(5)). The commentary overrules interpretations that taxes and fines may be "debts" within the meaning of the Act, because they do not result from a transaction involving purchase of a property or service. It is in accord with the well-reasoned opinion of the Court of Appeals in *Staub* v. *Harris*, 626 F.2d 275 (3d Cir. 1980), which specifically rejected the prior staff opinions that taxes are debts.

2. *Scope ofthe exemption for attorneys* (section 803(6)(F)). The meaning of the phrase "collecting a debt as an attorney on behalf of and in the name of a client" has been the subject of much discussion and confusion. The commentary eliminates all previous interpretations and substitutes the standards outlined in the Commission's statement accompanying its recent consent judgment in *United States* v. *Shaffner*, Civil Action No. 83–C–3130 (N.D. Ill. 1983). It includes within the exemption attorneys conducting professional legal services, but excludes attorneys operating traditional debt collection agencies.

3. *Calls at Inconvenient Times* (section 805(a)(1)). Some previous staff interpretations stated that Sunday calls by a collector to a consumer are illegal *per se*. The commentary overrules these opinions, which are inconsistent with the Act's flexible treatment of this issue.

4. *Incidental Contacts with Telephone Operators* (section 805(b)). Previously issued interpretations considered certain incidental collection contacts with telephone operators, which occurred in the course of calling a consumer, to be illegal third party contacts. The commentary overrules these opinions, and states that there is no violation where the sole purpose of the contact with an operator (or telegraph clerk) is transmission of a message, and the information conveyed is limited to that necessary to enable the debt collector to make contact with the consumer. It is staff's view that the communication is with the consumer, not the operator, and that this section was not intended to prohibit incidental contacts with intermediaries who are assisting a debt collector to communicate with the consumer.

5. *Reference to "Copy of a Judgment" in Validation Notice* (sections 807(2)(A); 809(a)(4)). Previous staff interpretations stated that there must be a judgment in existence if the words "copy of a judgment" are included in the validation notice sent out by a debt collector to comply with § 809(a)(4), or the notice including this phrase would violate § 807(2)(A) by misleading the consumer as to the legal status of the debt. Because the practical effect of these interpretations has made compliance with one section of the Act (section 809(a)(4)) a violation of another (section 807(2)(A)), the commentary overrules this position and states that the phrase may be used in the notice, whether or not a judgment in fact exists. The staff's current position is in accord with the decision in *Blackwell* v. *Professional Business Services of Georgia, Inc.*, 526 F. Supp. 535 (N.D. Ga. 1981), which specifically rejected the staff opinions to the contrary.

6. *Reference to Impending Action* (section 807(5)). A number of previous interpretations imposed differing, and sometimes inconsistent, standards concerning the circumstances under which a debt collector is permitted to represent that legal action or other action may or will occur. The commentary supersedes these interpretations and substitutes the more uniform standards imposed in the Commission's most recent consent judgments concerning this issue.

7. *Required Disclosures in Collection Communications* (section 807(11)). Some courts have required the designated disclosures in every single written and oral collection communication to the consumer and third parties. The commentary interprets the subsection less strictly, taking into account situations where the disclosures do not appear necessary, in accordance with the Commission's Sixth and Seventh Annual Reports to Congress and with the most recent Court of Appeals decision in *Pressley* v. *Capital Credit and Collection Service, Inc.*, 760 F.2d 922 (9th Cir. 1985).

8. *General Elements of Unfairness* (section 808). Previous staff interpretations have not addressed what criteria will be used in determining whether an act or practice violates the basic requirements of § 808. The commentary addresses these issues, stating that an act by a debt collector will be deemed "unfair" if it causes injury to a consumer that is substantial, not reasonably avoidable, and is not outweighed by countervailing benefits.

9. *Surcharges* (Section 808(1)). A number of early interpretations have attempted to prescribe varying standards concerning (1) when a "surcharge" is permitted and (2) how much it should be. The commentary overrules these interpretations and establishes that state law will determine the result, because this approach is consistent with the specific language of the Act.

10. *Form of Validation Notice* (Section 809(a)). Several staff interpretations have indicated that the statement of consumer rights required by section

809(a)(3–5) may be on a separate piece of paper from (or the reverse side of) the disclosure of the debt required by section 809(a)(1–2) only if there is clear notice on the first piece (or in front of) the disclosure. The commentary overrules these opinions, because the Act contains no requirements as to particular form, sequence, or location for such a statement.

Requests for Information

The staff of the Bureau of Consumer Protection's Division of Credit Practices will accept written comments on the proposed staff commentary for a period of sixty days. The Commission staff is interested in receiving comments to aid in its consideration of the commentary, because it recognizes that it may have a substantial impact on the debt collection industry and the consuming public. Comments may be addressed to any aspect of the commentary, including the following:

(1) Is a commentary and acceptable format in which to communicate staff views on the FDCPA? Are members of the public (including the debt collection industry, consumers, and others) more likely to rely on the commentary than on existing staff interpretations of the Act? Why or why not?

(2) The proposed commentary (A) eliminates interpretations that are considered to be relatively unimportant, (B) recasts or overrules other interpretations that appear inaccurate, or inconsistent with other more recent interpretations, and (C) restates the remaining interpretations in a more understandable format. Are the modifications made by the proposed commentary beneficial to the industry and members of the public?

(13) Are there any changes from prior staff interpretations reflected in the commentary that you think are particularly valuable? If so, which one(s) and why?

(4) Will any part of the commentary as presently drafted impose unnecessary burdens on industry or cause unnecessary injury to consumers?

By direction of the Commission.

Emily H. Rock,

Secretary.

Federal Trade Commission Staff Commentary on the Fair Debt Collection Practices Act

Introduction

This Commentary is the vehicle by which the staff of the Bureau of Consumer Protection publishes its interpretations of the Fair Debt Collection Practices Act (FDCPA). It is a guideline intended to clarify the staff interpretations of the statute, but does not have the force on effect of statutory provisions. It is not a formal trade regulation rule or advisory opinion of the Commission, and thus is not binding on the Commission or the public.

The Commentary is based primarily on issues discussed in informal staff letters responding to public requests for interpretations and on the Commission's enforcement program, subsequent to the FDCPA's enactment. It is intended to synthesize staff views on important issues and to give clear advice where inconsistencies have been discovered among staff letters. In some cases, reflection on the issues posed or relevant court decisions have resulted in a different interpretation from that expressed by staff in those informal letters. Therefore, the Commentary supersedes the staff views expressed in such correspondence. However, the Bureau of Consumer Protection staff will not recommend an enforcement action for prior conduct in reliance upon previous staff advice that we now overrule or otherwise modify.

In many cases several different sections or subsections of the FDCPA may apply to a given factual situation. This results from the effort by Congress in drafting the FDCPA to be both explicit and comprehensive, in order to limit the opportunities for debt collectors to evade the underlying legislative intention. Although it may be of only technical interest whether a given act violates one, two, or three sections of the FDCPA, the staff has attempted to refer to all applicable sections so that the Commentary may serve as a comprehensive reference for its users. The Commentary contains discussions of the most common overlapping references (usually under the heading "Relation to other sections"), and deals with issues raised by each factual situation under the section or subsection that staff deems most directly applicable to it.

The Commentary will be revised and updated by the staff as needed, based on the experience of the Commission in responding to public inquiries about, and enforcing, the FDCPA. The Commission welcomes input from interested industry consumer, and other public parties on the Commentary and on issues discussed in it.

Staff will continue to repond to requests for informal interpretations. Updates of the Commentary will consider and, where appropriate, incorporate issues raised in correspondence and other public contacts, as well as the Commission's enforcement efforts. Therefore, a party who is interested in raising an issue for inclusion in future editions of the Commentary does not need to make any formal submission or request to that effect. However, requests for formal advisory opinions of the Commission must still be made in accordance with Commission rules [16 CFR 1.2].

The Commentary should be used in conjunction with the statute. The abbreviated description of each section or subsection in the Commentary is designed only as a preamble to discussion of issues pertaining to each section, and is not intended as a substitute for the statutory text.

The Commentary should not be considered as a reflection of all court rulings under the FDCPA. Indeed, the staff's enforcement position may not be in accord with some judicial interpretations of the statute, particularly on issues that have been addressed only by lower courts or that have been addressed by the courts in ways that are not consistent with one another.

Section 801—Short Title

Section 801 names the statute the "Fair Debt Collection Practices Act."

The Fair Debt Collection Practices Act (FDCPA) is Title VIII of the Consumer Credit Protection Act, which also includes other federal statutes relating to consumer credit, such as the Truth in Lending Act (Title I), the Fair Credit Reporting Act (Title VI), and the Equal Credit Opportunity Act (Title VII).

Section 802—Findings and Purpose

Section 802 recites the Congressional findings that serve as the basis for the legislation.

Section 803—Definitions

Section 803(1) defines "Commission" as the Federal Trade Commission.

1. *General.* The definition includes only the Federal Trade Commission, not necessarily the staff acting on its behalf.

Section 803(2) defines "communication" as the "conveying of infoirmation regarding a debt directly or indirectly to any person through any medium."

1. *General.* The definition includes oral and written transmission of messages which refer to a debt.

2. *Exclusions.* The term does not include situations where the debt collector does not convey information regarding the debt, such as:

- A request to a third party for a consumer to return a telephone call to the debt collector, if the debt collector does not refer to the debt or the caller's status as (or affiliation with) a debt collector.

VOL 51 ISS 45 MR 7 1986 UMI

- A request to a third party for information about the consumer's assets, if the debt collector does not reveal the existence of a debt.

Section 803(3) defines "consumer" as "any natural person obligated or allegedly obligated to pay any debt."

1. *General.* The definition includes only a "natural person" and not an artificial person such as a corporation or other entity created by statute.

Section 803(4) defines "creditor" as "any person who offers or extends credit creating a debt or to whom a debt is owed." However, the definition excludes a party who "receives an assignment or transfer of a debt in default solely for the purpose of facilitating collection of such debt for another."

1. *General.* The definition includes the party that actually extended credit or became the obligee on an account in the normal course of business, and excludes a party that was assigned the debt only for collection purposes.

Section 803(5) defines "debt" as a consumer's monetary obligation "arising out of a transaction in which the money, property, insurance, or services (being purchased) are primarily for personal, family, or household purposes . . ."

1. *Examples.* The term includes:

- Overdue obligations such as medical bills that were originally payable in full within a certain time period (e.g., 30 days).
- A dishonored check that was tendered in payment for goods or services acquired or used primarily for personal, family, or household purposes.

2. *Exclusions.* The term does not include:

- Unpaid taxes and fines, because they are not debts incurred from a "transaction (involving purchase of) property . . . or services . . . for personal, family or household purposes."
- A credit care that a cardholder retains after the card issuer has demanded its return. The cardholder's account balance is the debt.

Section 803(6) defines "debt collector" as a party "who uses any instrumentality of interstate commerce or the mails in [connection with] . . . any debt owed . . . another."

1. *Examples.* The term includes:

- Employees of a debt collection business, including a corporation, partnership, or other entity whose business is the collection of debts owed another.
- A management firm that regularly collects overdue rent on behalf of real estate owners, because it "regularly collects . . . debts owed or due another.
- A party based in the United States who collects debts owed by consumers residing outside the United States, because he "uses . . . the mails" in a collection business. The residence of the debtor is irrelevant.
- A firm that collects debts for a creditor solely by mechanical techniques, such as (1) placing phone calls with pre-recorded messages and recording consumer responses, or (2) making computer-generated mailings.

2. *Exclusions.* The term does not include:

- Any person who collects debts (or attempts to do so) only in isolated instances, because the definition includes only those who "regularly" collect debts.
- A credit card issuer that collects its cardholder's account, even when the account is based upon purchases from participating merchants, because the issuer is collecting its own debts, not those "owed or due another."

3. *Application of definition to creditor using another name.* Creditors are generally excluded from the definition of "debt collector" to the extent that they collect their own debts in their own name. However, the term specifically applies to "any creditor who, in the process of collecting his own debts, uses any name other than his own which would indicate that a third person is" involved in the collection.

A creditor is a debt collector for purposes of this Act if:

- He uses a name other than his own to collect his debts, including a fictitious name.
- His salaried attorney employees who collect debts use stationery that indicates the attorneys are employed by someone other than the creditor or are independent or separate from the creditor.
- He regularly collects debts for another creditor; however, he is a debt collector only for purposes of collecting these debts, not when he collects his own debt in his own name.
- The creditor's collection division is not clearly designatedas being affiliated with the creditor; however, the creditor is not a debt collector if the creditor's correspondence is clearly labeled as being from the "collection unit of the (creditor's name)," since the creditor is not using a "name other than his own" in that instance.

Relation to other sections. A creditor who is covered by the FDCPA because he uses a "name other than his own" also may violate § 807(14), which prohibits using a false business name. When he uses an attorney's name, he violates section 807(3).

4. *Specific exemptions from definition of debt collector.*

(a) *Creditor employees.* Section 803(6)(A) provides that "debt collector" does not include "any officer or employee of a creditor while, in the name of the creditor, collecting debts for such creditor."

The exemption includes a collection agency employee, who works for a creditor to collect in the creditor's name at the creditor's office under the creditor's supervision, because he has become the *de facto* employee of the creditor.

The exemption does not include a creditor's former employee who continues to collect accounts on the creditor's behalf, if he acts under his own name rather than the creditor's.

(b) *Creditor-controlled collector.* Section 803(6)(B) provides that "debt collector" does not include a party collecting for another, where they are both "related by common ownership or affiliated by corporate control, if the (party collects) only for persons to whom it is so related or affiliated and if the principal business of such person is not the collection of debts."

The exemption applies where the collector and creditor have "common ownership or . . . corporate control." For example, a company is exempt when it attempts to collect debts of another company after the two entities have merged.

The exemption does not apply to an entity whose principal activity is debt collection, even if it is under common ownership with a differently-named creditor and collects debts only for that party.

The exemption does not apply to a party related to a creditor if it also collects debts for others in addition to the related creditors.

(c) *State and federal officials.* Section 803(6)(C) provides that "debt collector" does not include any state or federal employee "to the extent that collecting or attempting to collect any debt is in the performance of his official duties."

The exemption applies only to such governmental employees in the performance of their "official duties" and, therefore, does not apply to an attorney employed by a county government who also collects bad checks for local merchants where that activity is outside his official duties.

(d) *Process servers.* Section 803(6)(D) provides that "debt collector" does not include "any person while serving or attempting to serve legal process on any other person in connection with the judicial enforcement of any debt."

The exemption covers marshals, sheriffs, and any other process servers while conducting their normal duties relating to serving legal papers.

(e) *Non-profit counselors.* Section 803(6)(E) provides that "debt collector" does not

include "any nonprofit organization which, at the request of consumers, performs bona fide consumer credit counseling and assists consumers in the liquidation of their debts by receiving payments from such consumers and distributing such amounts to creditors."

This exemption applies only to non-profit organizations; it does not apply to for-profit credit counseling services that accept fees from debtors and regularly transmit such funds to creditors.

(f) *Attorneys.* Section 803(6)(F) provides that "debt collector" does not include "any attorney-at-law collecting a debt as an attorney on behalf of and in the name of a client."

The exemption includes attorneys who collect debts in the course of providing professional legal services to either a creditor or debt collector.

The exemption includes an attorney's non-attorney employees only when they are participating in the provision of legal services by attorneys.

The exemption includes firms that are engaged primarily in the provision of professional legal services. For example, it includes a firm whose clientele includes merchants who expect their attorneys to handle delinquent accounts, among other legal chores (e.g., leases, licenses, contract negotiations).

The exemption does not include firms that are engaged primarily in the collection of debts rather than the provision of professional legal services, even if they are owned by attorneys. For example, firms that primarily collect debts and typically delegate primary or exclusive responsibility to their non-attorney employees to handle all aspects of collection work, such as evaluating consumer files, handling mail and telephone contracts, negotiating settlements, making payment arrangements and the like, are not within the exemption.

Whether or not an attorney or law firm is providing professional legal services to a creditor is a question of fact that will turn on a number of factors including the nature of the attorney-creditor relationship, the type and variety of legal work done by the attorney for the creditor, and the degree to which such work requires the unique exertise, training, and background of an attorney.

(g) *Miscellaneous.* Section 803(6)(G) provides that "debt collector" does n ot include collection activity by a party about a debt that "(i) is incidental to a bona fide fiduciary obligation or . . . escrow arrangement; (ii) . . . was originated by such person; (iii) . . . was n ot in default at the time it was obtained by such person; or (iv) (was) obtained by such person as a secured party in a commercial credit transaction involving the creditor."

The exemption (i) for bona fide fiduciary obligations or escrow arrangements applies to entities such as trust departments of banks, and escrow companies.

The exemption (ii) for a party that originated the debt applies to the original creditor collecting his own debts in his own name. It also applies when a creditor assigns a debt originally owed to him, but retains the authority to collect the obligation on behalf of the assignee to whom the debt becomes owed. For example, the exemption applies to a creditor who makes a mortgage or school loan and continues to handle the account after assigning it to a third party. However, it does not apply to a party that takes assignment of retail installment contracts from the original creditor and then reassigns them to another creditor but continues to collect the debt arising from the contracts, becaust the debt was not "originated by" the collector/first assignee.

The exception (iii) for debts not in default when obtained applies to parties such as mortgage service companies whose business is servicing current accounts.

The exemption (iv) for a secured party in a commercial transaction applies to a commercial lender who acquires a consumer account that was used as collateral, following default on a loan from the commercial lender to the original creditor.

Section 803(7) defines "location information" as "a consumer's place of abode and his telephone number at such place, or his place of employment."

This definition includes only residence, home phone number, and place of employment. It does not cover work phone numbers, names of supervisors and their telephone numbers, salaries or dates of paydays.

Section 803(8) defines "state" as "any State territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing."

Section 804—Acquisition of Location Information

Section 804 requires a debt collector, when communicating with third parties for the purpose of acquiring information about the consumer's location to "(1) identify himself, state that he is confirming or correcting location information concerning the consumer, and, only if expressly requested identify his employer," (2) not refer to the debt, (3) usually make only a single contact with each third party, (4) not communicate by post card, (5) not indicate the collection nature of his business purpose in any written communication, and (6) normally limit communications to the consumer's attorney, where the collector knows of the attorney.

1. *General.* Although the FDCPA generally protects the consumer's privacy by limiting debt collector communications about personal affairs to third parties, it recognizes the need for some third party contact by collectors to seek the whereabouts of the consumer.

2. *Identification of debt collector [section 804(1)].* An individual employed by a debt collector seeking location information must identify himself, but must not identify his employer unless asked. When asked, however, he must give the true and full name of the employer, to comply with this provision and avoid a violation of section 807(14).

An individual debt collector may use an alias if it is used consistently and if it does not interfere with another party's ability to identify him (e.g., the true identity can be ascertained from the employer).

3. *Referral to debt [section 804(2)].* A debt collector may not refer to the consumer's debt in any third party communication seeking location information, including those with other creditors.

4. *Reference to debt collector's business [section 804(5)].* A debt collector may not use his actual name in his letterhead or elsewhere in a written communication seeking location information, if the name indicates collection activity, such as a name containing the word "debt", "collector", or "collection."

5. *Communication with consumer's attorney [section 804(6)].* Once a debt collector learns a consumer is represented by an attorney, he must limit his request for location information to the attorney. [See also comments on section 805(a)(2)].

Section 805—Communication in Connection With Debt Collection

Section 805(a)—Communication with the consumer. Unless the consumer has consented or a court order permits, a debt collector may not communicate with a consumer to collect a debt (1) at any time or place which is unusual or known to be inconvenient to the consumer (8AM–9PM is presumed to be convenient), (2) where he knows the consumer is represented by an attorney with respect to the debt, or (3) at work if he knows the consumer's employer prohibits such contacts.

1. *Scope.* For purposes of this section, the term "communicate" is given its commonly accepted meaning. Thus, the section applies to contacts with the consumer related to the collection of the

VOL 51
ISS 45
MR 7
1986
UMI

debt, whether or not the debt is specifically mentioned.

2. *Inconvenient or unusual times or places [section 805(a)(1)].* A debt collector may not call the consumer at any time, or on any particular day, if he has credible information (from the consumer or elsewhere) that it is inconvenient. If the debt collector does not have such information, a call on Sunday is not *per se* illegal.

3. *Consumer represented by attorney [section 805(a)(2)].* If a debt collector learns that a consumer is represented by an attorney, even if not formally notified of this fact, the debt collector must contact only the attorney and must not contact the consumer.

A debt collector who knows a consumer is represented by an attorney with respect to a debt is not required to assume similar representation on other debts; however, if a consumer notifies the debt collector that the attorney has been retained to represent him for all current and future debts that may be placed with the debt collector, the debt collector must deal only with that attorney.

The creditor's knowledge that the consumer has an attorney is not automatically imputed to the debt collector.

4. *Calls at work [section 805(a)(3).* A debt collector may not call the consumer at work if he has reason to know the employer forbids such communication.

Section 805(b)—Communication with third parties. Unless the consumer consents, or a court order or § 804 permits, "or as reasonably necessary to effectuate a postjudgment judicial remedy," a debt collector "may not communicate, in connection with the collection of any debt, with any person other than the consumer, his attorney, a consumer reporting agency if otherwise permitted by law, the creditor, the attorney of the creditor, or the attorney of the debt collector."

1. *Consumer consent to the third party contact.* The consumer's consent need not be in writing. It may be presumed from circumstances, such as if a third party volunteers that a consumer has authorized him to pay the consumer's account. However, consent may not be inferred only from a consumer's reaction when the debt collector requests such consent.

2. *Location information.* Although a debt collector's search for information concerning the consumer's location (provided for in § 804) is expressly excepted from the ban on third party contacts, a debt collector may not call third parties under the pretense of gaining information already in his possession.

3. *Incidental contacts with telephone operator or telegraph clerk.* A debt collector may contact an employee of a telephone or telegraph company in order to contact the consumer, without violating the prohibition on communication to third parties, if the only information given is that necessary to enable the collector to transmit the message to, or make the contact with the consumer.

4. *Accessibility by third party.* A debt collector may not send a written message that is easily accessible to third parties. For example, he may not use a computerized billing statement that can be seen on the envelope itself.

A debt collector may use an "in care of" letter only if the consumer lives at, or accepts mail at, the other party's address.

A debt collector does not violate this provision when an eavesdropper overhears a conversation with the consumer, unless the debt collector has reason to anticipate the conversation will be overheard.

5. *Non-excepted parties.* A debt collector may contact only the parties specified in this section (consumer, creditor, a party's attorney, or credit bureau). For example, a collector may not contact a bank about a dishonored check, or (without the consumer's consent) make a report on a consumer to a non-profit counseling service.

6. *Judicial remedy.* The words "as reasonably necessary to effectuate a postjudgment judicial remedy" mean a communication necessary for execution or enforcement of the remedy. A debt collector may not send a copy of the judgment to an employer, except as part of a formal service of papers to achieve a garnishment or other remedy.

7. *Audits or inquiries.* A debt collector may disclose his files to a government official or an auditor, to respond to an inquiry or conduct an audit, because the disclosure would not be "in connection with the collection of any debt."

8. *Receipt to third party.* A debt collector does not violate this section when he gives a receipt to a consumer's friend or relative who makes a payment on a debt, as long as the collector does not convey information about the details of the debt to the payer.

Section 804(c)—Ceasing communication. Once a debt collector receives written notice from a consumer that he or she refuses to pay the debt or wants the collector to stop further collection efforts, the debt collector must cease any further communication with the consumer except "(1) to advise the consumer that the debt collector's further efforts are being terminated; (2) to notify the consumer that the debt collector or creditor may invoke specified remedies which are ordinarily invoked by such debt collector or creditor; or (3) where applicable, to notify the consumer that the debt collector or creditor intends to invoke a specified remedy."

1. *Scope.* For purposes of this section, the term "communicate" is given its commonly accepted meaning. Thus, the section applies to any contact with the consumer related to the collection the debt, whether or not the debt is specifically mentioned.

2. *Request for payment.* A debt collector's response to a "cease communication" notice from the consumer may not include a demand for payment, but is limited to the three statutory exceptions.

Section 805(d)—"consumer" definition. For Section 805 purposes, the term "consumer" includes the "consumer's spouse, parent (if the consumer is a minor), guardian, executor, or administrator."

1. *Broad "consumer" definition.* Because of the broad statutory definition of "consumer" for the purposes of this section, many of its protections extend to parties close to the consumer. For example, the debt collector may not call the consumer's spouse at work, or a time known to be an inconvenient time. Conversely, he may call the spouse (guardian, executor, etc.) whenever he could call the consumer.

Section 806—Harassment or Abuse

Section 806 prohibits a debt collector from any conduct that would "harass, oppress, or abuse any person in connection with the collection of a debt." It provides six examples of harassment or abuse.

1. *Scope.* Prohibited actions are not limited to the six subsections listed as examples of activities that violate this provision.

2. *Unnecessary calls to third parties.* A debt collector may not leave telephone messages with many different neighbors when the debt collector knows the consumer's name and telephone number and could have reached him directly.

3. *Multiple contacts with consumer.* A debt collector may not engage in repeated personal contacts with a consumer with such frequency as to harass him. For example, the debt collector may not follow the consumer, or contact him six times in one day. Subsection (5) deals specifically with harassment by multiple phone calls.

4. *Abusive conduct.* A debt collector may not pose a lengthy series of questions or comments to the consumer without giving the consumer a chance to reply. Subsection (2) deals specifically

with harassment involving obscene, profane, or abusive language.

Section 806(1) prohibits "the use or threat of use of violence or other criminal means to harm . . . any person."

1. *Implied threat.* A debt collector may violate this section by an implied threat of violence. For example, a debt collector may not pressure a consumer with statements such as "We're not playing around here—we can play tough" or "We're going to send somebody to collect for us one way or the other."

Section 806(2) prohibits the use of obscene, profane, or abusive language.

1. *Abusive language.* Abusive language includes religious slurs, profanity, obscenity, calling the consumer a liar or a deadbeat, and the use of racial or sexual epithets.

Section 806(3) prohibits "the publication of a list of consumers who allegedly refuse to pay debts," except to report the items to a "consumer reporting agency," as defined in the Fair Credit Reporting Act.

Section 806(4) prohibits "the advertisement for sale of any debt to coerce payment of the debt."

1. *Shaming prohibited.* These provisions are designed to prohibit debt collectors from "shaming" a customer into payment, by publicizing the debt.

2. *Exchange of lists.* Debt collectors may not exchange lists of consumers who allegedly refuse to pay their debts.

3. *Informtion to creditor subscribers.* A debt collector may not distribute a list of alleged debtors to its creditor subscribers, because the statute permits it to provide such information only to consumer reporting agencies.

Section 806(5) prohibits contacting the consumer by telphone "repeatedly or continuously with intent to annoy, abuse, or harass any person at the called number."

1. *Multiple phone calls.* "Continuously" means making a series of telephone calls, one right after the other. "Repeatedly" means calling with excessive frequency, such as six phone calls in an hour.

Section 806(6) prohibits, except where section 804 applies, "the placement of telephone calls without meaningful disclosure of the caller's identify."

1. *Aliases.* A debt collector employee's use of an alias that permits identification of the debt collector (i.e., where he uses the alias consistently, and his true identify can be ascertained by contact with the employer) constitutes a "meaningful disclosure of the caller's identity."

2. *Identification of caller.* An individual debt collector must disclose his employer's identity, when contacting consumers or third parties permitted by section 805(b).

3. *Relation to other sections.* A debt collector who uses a false business name in a phone call to conceal his identity violates section 807 (14), as well as this section.

Section 807—False or misleading representation

Section 807 prohibits a debt collecter from using any "false, deceptive, or misleading representation or means in connection with the collection of any debt." It provides sixteen examples of false or misleading representations.

1. *Scope.* Prohibited actions are not limited to the sixteen subsections listed as examples of activities that violate this provision. In addition, section 807(10), which prohibits the "use of any false representation or deceptive means" by a debt collector, is particularly broad and encompasses virtually every violation, including those not covered by the other subsections.

Section 807(1) prohibits "the false representation or implication that the debt collector is vouched for, bonded by, or affiliated with the Untied States or any State . . . "

1. *Symbol on dunning notice.* A debt collecter may not use a symbol in correspondence that make him appear to be a government official. For example, a collection letter depicting a police badge, a judge, or the scales of justice, violates this section.

Section 807(2) prohibits falsely representing either "(A) the character, amount, or legal status of any debt; or (B) any services rendered or compensation which may be lawfully received by" the collector.

1. *Legal status of debt.* A debt collector may not falsely imply that legal action has begun.

2. *Amount of debt.* A debt collector may not claim an amount more than actually owed, or falsely assert that the debt has matured or that it is immediately due and payable, when it is not.

3 *Judgment.* When a debt collector provides the validation notice required by section 809(a)(4), the notice may include the words "copy of a judgment" whether or not a judgment exists, because section 809(a)(4) provides for a statement including these words. This information avoids making compliance with section 809(a)(4) a violation of section 807(2)(A)

Section 807(3) prohibits falsely representing or implying that "any individual is an attorney or that any communication is from an attorney."

1. *Form of legal correspondence.* A debt collector may not send a collection letter from a "pre-Legal department," where no legal department exists. An attorney may use a computer service to send letters on his own behalf, but a debt collector may not send a computer-generated letter using an attorney's name.

2. *Names individual.* A debt collector may not falsely represent that a person named in a letter is his attorney.

3. *Relation to other sections.* If a creditor uses an attorney's name rather than his own in his collection communications, he both loses his exemption from the FDCPA's definition of "debt collector" (section 803(6)) and violates this provision.

Section 807(4) prohibits falsely representing or implying to the consumer that nonpayment "will result in the arrest or imprisonment of any person or the seizure, garnishment, attachment, or sale of any property or wages of any person . . ."

Section 807(5) prohibits "the threat to take any action that cannot legally be taken or that is not intended to be taken."

1. *Debt collector's statement of his own definite action.* A debt collector may not state that he will take any action unless he intends to take the action when the statement was made, or ordinarily takes the action in similar circumstances.

2. *Debt collector's statement of definite action by third party.* A debt collector may not state that a third party will take any action unless he has reason to believe, at the time the statement is made, that such action will be taken.

3. *Statement of possible action.* A debt collector may not state or imply that he or any third party may take any action unless such action is legal and there is a reasonable likelihood, at the time the statement is made, that such action will be taken. A debt collector may state that certain action is possible, if it is true that such action is legal and is frequently taken by the collector or creditor with respect to similar debts; however, if the creditor has reason to know there are facts that make the action unlikely in the particular case, a statement the action was possible would be misleading.

4. *Threat of criminal action.* A debt collector may not threaten to report a dishonored check or other fact to the police, unless he actually intends to take this action.

5. *Threat of attachment.* A debt collector may not threaten to attach a consumer's tax refund, when he has no authority to do so.

6. *Threat of legal or other action.* Section 807(5) refers not only to a false threat of legal action, but also a false

BEST COPY AVAILABLE

VOL 51 ISS 45 MR 7 1986 UMI

threat by a debt collector that he will report a debt to a credit bureau, assess a collection fee, or undertake any other action if the debt is not paid. A debt collector may also not misrepresent the imminence of such action.

A debt collector's implication, as well as a direct statement, of planned legal action may be an unlawful deception. For example, reference to an attorney or to legal proceedings may mislead the debtor as to the likelihood or imminence of legal action.

A debt collector's statement that legal action has been recommended is a representation that legal action may be taken, since such a recommendation implies that the creditor will act on it at least some of the time.

Lack of intent may be inferred when the amount of the debt is so small as to make the action totally unfeasible or when the debt collector is unable to take the action because the creditor has not authorized him to do so.

7. *Illegality of threatened act.* A debt collector may not threaten that he will illegally contact an employer, or other third party, or take some other "action that cannot legally be taken" (such as advising the creditor to sue where such advice would violate state rules governing the unauthorized practice of law). If state law forbids a debt collector from suing in his own name (or from doing so without first obtaining a formal assignment and that has not been done), the debt collector may not represent that he will sue in that state.

Section 807(6) prohibits falsely representing or implying that a transfer of the debt will cause the consumer to (A) lose any claim or defense, or (B) become subject to any practice prohibited by the FDCPA.

1. *Referral to creditor.* A debt collector may not falsely state that the consumer's account will be referred back to the original creditor, who would not be bound by the FDCPA.

Section 807(7) prohibits falsely representing or implying that the "consumer committed any crime or other (disgraceful) conduct."

1. *False allegation of fraud.* A debt collector may not falsely allege that the consumer has committed fraud.

2. *Misrepresentation of criminal law.* A debt collector may not make a misleading statement of law, falsely implying that the consumer has committed a crime, or mischaracterize what constitutes an offense by misstating or omitting significant elements of the offense. For example, a debt collector may not tell the consumer that he has committed a crime by issuing a check that is dishonored, when the statute applies only where there is a "scheme to defraud."

Section 807(8) prohibits "communicating or threatening to communicate to any person (false) credit information . . . , including the failure to commuicate that a disputed debt is disputed."

1. *Disputed debt.* If a debt collector knows that a debt is disputed by the consumer, either from receipt of written notice (§ 809) or other means, and reports it to a credit bureau, he must report it as disputed.

2. *Post-report dispute.* When a debt collector learns of a dispute after reporting the debt to a credit bureau, the dispute need not also be reported.

Section 807(9) prohibits "the use of any document designed to falsely imply that it issued from a state or federal source.

1. *Relation to other sections.* Most of the violations of this section involve simulated legal process, which is more specifically covered by § 807(13). However, this subsection is broader in that it also covers documents that fraudulently appear to be official government documents.

Section 807(10) prohibits "the use of any false representation or deceptive means to collect or attempt to collect any debt or to obtain information concerning a consumer."

1. *Relation to other sections.* The prohibition is so comprehensive that violation of any part of § 807 will usually also violate subsection (10). Actions that violate more specific provisions are discussed in those sections.

2. *Communcation format.* A debt collector may not communicate by a format or envelope that misrepresents the nature, purpose, or urgency of the message. It is a violation to send any communication that conveys to the consumer a false sense of urgency. However, it is usually permissible to send a letter generated by a machine, such as a computer or other printing device. A bona fide contest entry form, which provides a clearly optional location to enter employment information, enclosed with a request for payment, is not deceptive.

3. *False statement or implications.* A debt collector may not falsely state or imply that a consumer is required to assign his wages to his creditor when he is not, that the debt collector has counseled the creditor to sue when he has not, that adverse credit information has been entered on the consumer's credit record when it has not, that the entire amount is due when there is no acceleration clause, or that he cannot accept partial payments when in fact he is authorized to accept them.

4. *Misrepresentation of law.* A debt collector may not mislead the consumer as to the legal consequences of the consumer's action (e.g., by implying that a failure to respond is an admission of liability).

A debt collector may not state that federal law requires a notice of the debt collector's intent to contact third parties.

5. *Misleading letterhead.* A debt collector's employee who is an attorney may not use "attorney-at-law" stationery without referring to his employer, so as to falsely imply to the consumer that the debt collector had retained a private attorney to bring suit on the account.

Section 807(11) requires the debt collector to "disclose clearly in all communications made to collect a debt or to obtain information about a consumer, that the debt collector is attempting to collect a debt and that any information obtained will be used for that purpose," except where section 804 provides otherwise.

1. *Oral communications.* A debt collector must make the required disclosures in both oral and written communications.

2. *Disclosure to consumers.* When a debt collector contacts a consumer and clearly discloses that he is seeking payment of a debt, he need not state that all information will be used to collect a debt, since that should be apparent to the consumer. The debt collector need not repeat the required disclosure in subsequent contacts.

A debt collector may not send the consumer a note saying only "please call me right away" unless there has been prior contact between the parties and the collector is thus known to the consumer.

3. *Disclosures to third parties.* The debt collector must state in his first communication with a third party that he is attempting to collect the debt and that information will be used for that purpose, but need not do so in subsequent communications with that party.

Section 807(12) prohibits falsely representing or implying that "accounts have been turned over to innocent purchasers for value."

1. *Relation to other sections.* Section 807(6)(A) prohibits threatening to affect the consumer's rights by transferring the account; this subsection forbids falsely stating or implying that this has been done.

Section 807(13) prohibits falsely representing or implying that "documents are legal process."

1. *Simulated legal process.* A debt collector may not send written communications that deceptively resemble legal process forms. He may not send a form or a dunning letter that, taken as a whole, appears to simulate legal process. However, one legal phrase (such as "notice of legal action" or "show just cause why") alone will not result in a violation of this section unless it contributes to an erroneous impression that the document is a legal form.

Section 807(14) prohibits "the use of any business, company, or organization name other than the (collector's) true name."

1. *Permissible business name.* A debt collector may use a name that does not misrepresent his identity or deceive the consumer. Thus, a collector may use its full business name, the name under which it usually transacts business, or a commonly used acronym. When the collector uses multiple names in its various affairs, it does not violate this subsection if it consistently uses the same name when dealing with a particular consumer.

2. *Creditor misrepresentation of identity.* A creditor may not use any name that would falsely imply that a third party is involved in the collection. The in-house collection unit of "ABC Corp." may use the name "ABC Collection Division," but not the name "XYZ Collection Agency" or some other unrelated name.

A creditor violates this section if he uses the name of a collection bureau as a conduit for a collection process that the creditor controls in collecting his own accounts. Similarly, a creditor may not use a fictitious name or letterhead, or a "post office box address" name that implies someone else is collecting his debts.

A creditor does not violates this provision where an affiliated (and differently named) debt collector undertakes collection activity, if the debt collector does business separately from the creditor (e.g., where the debt collector in fact has other clients that he treats similarly to the creditor, has his own employees, deals at arms length with the creditor, and controls the process himself).

3. *All collection activities covered.* A debt collection business must use its real business name, commonly-used name, or acronym in both written and oral communications.

4. *Relation to other sections.* If a creditor uses a false business name, he both loses his exemption from the FDCPA's definition of "debt collector" [§ 803(6)] and violates this provision. If a debt collector falsely uses the name of an attorney rather than his true business name, he violates section 807(3) as well as this section. When a debt collector uses a fasle business name in a phone call, he violates section 806(6) as well as this section.

When using the mails to obtain location information, a debt collector may not use a name that indicates he is in the debt collection business, or he will violate § 804(5). When a debt collector's employee who is seeking location information replies to an inquiry about his employer's identity under § 804(1), he must give the true name of his employer.

Section 807(15) prohibits falsely representing or implying that documents are not legal process forms or do not require action by the consumer.

1. *Disguised legal process.* A debt collector may not deceive a consumer into failing to respond to legal process by concealing the import of the papers, thereby subjecting the consumer to a default judgment.

Section 807(16) prohibits falsely representing or implying that a debt collector operates or is employed by a "consumer reporting agency," as defined in the Fair Credit Reporting Act.

1. *Dual agencies.* The FDCPA does not prohibit a debt collector from operating a consumer reporting agency.

2. *Misleading names.* Only a bona fide consumer reporting agency may use names such as "Credit Bureau," "Credit Bureau Collection Agency," "General Credit Control," "Credit Bureau Rating, Inc.," or "National Debtors Rating." A debt collector's disclaimer in the text of a letter that the debt collector is not affiliated with (or employed by) a consumer reporting agency, will not necessarily avoid a violation if the collector uses a name that indicates otherwise.

3. *Factual issue.* Whether a debt collector that has called itself a credit bureau actually qualifies as such is a factual issue, to be decided according to the debt collector's actual operation.

Section 808—Unfair Practices

Section 808 prohibits a debt collector from using "unfair or unconscionable means" in his debt collection activity. It provides eight examples of unfair practices.

1. *Scope.* Prohibited actions are not limited to the eight subsections listed as examples of activities that violate this provision.

2. *Elements of unfairness.* A debt collector's act in collecting a debt is "unfair" if it causes injury to the consumer that is (1) substantial, (2) not outweighed by countervailing benefits to consumers or competition, and (3) not reasonably avoidable.

Section 808(1) prohibits collecting any amount unless the amount is expressly authorized by the agreement creating the debt or is permitted by law.

1. *Kinds of amounts covered.* For purposes of this section, "amount" includes not only the debt, but also any incidential charges, such as collection charges, interest, service charges, late fees, and bad check handling charges.

2. *Legality of charges.* A debt collector may attempt to collect a fee for charge in addition to the debt if either (A) the charge is expresaly provided for in the contract creating the debt and the charge is not prohibited by state law, or (B) the contract is silent but the charge is otherwise expressly permitted by state law. Conversely, a debt collector may not collect an additional amount if either (A) state law expressly prohibits collection of the amount or (B) the contract does not provide for collection of the amount and state law is silent.

3. *Legality of fee under state law.* If state law permits collection of reasonable fees, the reasonableness and consequential legality of these fees is determined by state law.

4. *Agreement not in writing.* A debt collector may establish an "agreement" without a written contract. For example, he may collect a service charge on a dishonored check based on a posted sign on the merchant's premises allowing such a charge, if he can demonstrate that the consumer knew of the charge.

Section 808(2) prohibits accepting a check postdated by more than five days unless timely written notice is given to the consumer prior to deposit.

Section 808(3) prohibits soliciting any postdated check for purposes of threatening or instituting criminal prosecution.

Section 808(4) prohibits depositing a postdated check prior to its date.

1. *Postdated checks.* These provisions do not totally prohibit debt collectors from accepting postdated checks from consumers, but rather prohibit debt collectors from misusing such instruments.

Section 808(5) prohibits causing any person to incur telephone or telegram charges by concealing the true purpose of the communication.

1. *Long distance calls to the debt collector.* A debt collector may not ask a consumer to call him long distance without disclosing the debt collector's identity and the communication's purpose.

2. *Relation to other section.* A debt collector who conceals his purpose in asking consumers to call long distance may also violate section 807(11), which requires the debt collector to disclose his purpose in some communications.

VOL 51
ISS 45
MR 7
1986
UMI

Section 808(6) prohibits enforcing a security interest on property, or threatening to do so, where (A) there is not present right to the collateral, (B) there is no present intent to exercise such rights, or (C) the property is exempt by law.

1. *Security enforcers.* Because the FDCPA's definition of "debt collector" includes parties whose principal business is enforcing security interests only for § 808(6) purposes, such parties are subject only to this provision and not to the rest of the FDCPA.

Section 808(7) prohibits "Communicating with a consumer regarding a debt by post card."

1. *Debt.* A debt collector does not violate this section if he sends a postcard to a consumer that does not communicate the existence of the debt. However, if he had not previously disclosed that he is attempting to collect a debt, he would violate Section 807(11), which requires this disclosure.

Section 808(8) prohibits showing anything other than the debt collector's address, on any envelope on any written communication to the consumer, except that a debt collector may use his business name if it does not indicate that he is in the debt collection business.

1. *Business names prohibited on envelopes.* A debt collector may not put on his envelope any business name with "debt" or "collector" in it, or any other name that indicates he is in the debt collection business. A debt collector may not use the American Collectors Association logo on an envelope.

2. *Collector's name.* Whether a debt collector/consumer reporting agency's use of his own "credit bureau" or other name indicates that he is in the collection business, and thus violates the section, is a factual issue to be determined in each individual case.

3. *Telegrams.* A debt collector does not violate this section by using an actual telegram or similar service, notwithstanding a Western Union (or other provider) logo and the word "telegram" (or similar word) on the envelope.

4. *Transparent envelopes.* A debt collector may not use a transparent envelope, which reveals language or symbols indicating his debt collection business, because it is the equivalent of putting information on an envelope.

Section 809—Validation of Debts

Section 809(a) requires a collector, within 5 days of the first communication, to send the consumer a written notice containing (1) the amount of the debt and (2) the name of the creditor, along with a statement that he will (3) assume the debt's validity unless the consumer disputes it within 30 days, (4) send a verification or copy of the judgment if the consumer timely disputes the debt, and (5) identify the original creditor upon written request.

1. *Who must send notice.* If the employer debt collection agency sends the required notice, employee debt collectors need not also send it. A debt collector's agent may send the notice, as long as it is clear that the information is being sent on behalf of the debt collector.

2. *Single notice required.* The debt collector is required to send only one notice for each debt. A notice need not offer to identify the original creditor unelss the name and address of the original creditor are different from the current creditor.

3. *Form of notices.* The FDCPA imposes no requirements as to the form, sequence, location, or typesize of the notice. However, an illegible notice does not comply with this provision.

4. *Alternate terminology.* A debt collector may condense and combine the required disclosures, as long as he provides all required information.

5. *Oral notice.* If a debt collector's first communication with the consumer is oral, he may make the disclosures orally at that time in which case he need not send a written notice.

6. *Legal action.* A debt collector's institution of formal legal action against a consumer is not a "communication in connection with collection of any debt," and thus does not confer section 809 notice-and-validation rights on the consumer.

Section 809(b) requires that, if the consumer disputes the debt or requests identification of the original creditor in writing, the collector must cease collection efforts until he verifies the debt and mails a response. Section 809(c) states that a consumer's failure to dispute the validity of a debt under this section is not an admission of liability.

1. *Pre-notice collection.* A debt collector need not cease normal collection activities within the consumer's 30-day period to give notice of a dispute until he receives a notice from the consumer.

A debt collector may report a debt to a credit bureau within the 30-day notice period, before he receives a request for validation or a dispute notice from the consumer.

Section 810—Multiple Debts

Section 810 provides that when a debt collector is collecting multiple debts and the consumer directs that a payment be applied to a certain debt or debts, the debt collector must honor those directions. A debt collector may not apply a payment to a disputed debt even if the consumer gives no direction in this regard.

Section 811—Legal Actions by Debt collectors

Section 811 provides that a debt collector may sue a consumer only in the judicial district where the consumer resides or signed the contract sued upon, except that an action to enforce a security interest in real property which secures the obligation must be brought where the property is located.

1. *Waiver.* Any waiver by the consumer must be provided to the debt collector, because the forum restriction applies to actions initiated by that party.

2. *Multiple defendants.* Since a debt collector may sue only where the consumer (1) lives or (2) signed the contract, the collector may not join an ex-husband as a defendant to a suit against the ex-wife in the district of her residence, unless he also lived there or signed the contract there. The existence of community property at her residence that is available to pay his debts does not alter the forum limitations on individual consumers.

3. *Real estate security.* A debt collector may sue based on the location of a consumer's real property only when he seeks to enforce an interest in such property that secures the debts.

4. *Services without written contract.* Where services were provided pursuant to an oral agreement, the debt collector may sue only where the consumer resides. He may not sue where services were perfomed (if that is different from the consumer's residence), because that is not included as a permissible forum location by this provision.

Section 812—Furnishing Certain Deceptive Forms

Section 812(a) prohibits any party from designing and furnishing forms, knowing they are or will be used to deceive a consumer to believe that someone other than his creditor is collecting the debt, and imposes FDCPA civil liability on parties who supply such forms.

Practice prohibited. This section prohibits the practice of selling to creditors dunning letters that falsely imply that a debt collector is collecting the debt, when in fact only the creditor is collecting.

2. *Coverage.* This section applies to anyone who designs, compiles, or furnishes the forms prohibited by this section.

3. *Pre-collection letters.* A form seller may not furnish a creditor with (1) a letter on a collector's letterhead to be used when the collector is not involved in collecting the creditor's debts, or (2) a letter indicating "copy to (the collector)" if the collector is not participating in collecting the creditor's debt. A form seller may not avoid liability by

including a statement in the text of a form letter that the sender has not yet been assigned the account for collection, if the communication as a whole, using the collector's letterhead, represents otherwise.

4. *Knowledge rquired.* A party does not violate this provision unless he has knowledge that his form letter will be used to mislead consumers into believing that someone other than the creditor is involved in collecting the debt.

5. *Participation by debt collector.* A debt collector that uses letters as his only collection tool does not violate this section, merely because he charges a flat rate per letter, if he is meaningfully "participating in the collection of a debt." The consumer is not misled in such cases, as he would be in the case of a party who supplied the creditor with form letters and provided little or no additional service in the collection process. The performance of other tasks associated with collection (e.g., handling verification requests, negotiating payment arrangements keeping individual records) is evidence that such a party is "participating in the collection."

Section 813—Civil Liability

Section 813 (A) imposes civil liability in the form of (1) actual damages, (2) discretionary penalties, and (3) costs and attorney's fees, (B) discusses relevant factors a court should consider in assessing damages, (C) exculpates a collector who maintains reasonable procedures form liability for an unintentional error, (D) permits actions to be brought in federal or state courts within one year from the violation, and (E) shields a defendant who relies on an advisory opinion of the Commission.

1. *Employee liability.* Since the employees of a debt collection agency are "debt collectors," they are liable for violations to the same extent as the agency.

2. *Damages.* The courts have awarded "actual damages" for FDCPA violations that were not just out-of-pocket expenses, but included damages for personal humiliation, embarrassment, mental anguish, or emotional distress.

3. *Application of statute of limitation period.* The section's one year statute of limitations applies only to private lawsuits, not to actions brought by a government agency.

4. *Advisory opinions.* A party may act in reliance on a formal advisory opinion of the Commission pursuant to 16 CFR §§ 1.1–1.4, without risk of civil liability. This protection does not extend to reliance on this Commentary or other informal staff interpretations.

Section 814—Administrative Enforcement

Section 814 provides that the principal federal enforcement agency for the FDCPA is the Federal Trade Commission, but assigns that power to other authorities empowered by certain federal statutes to regulate financial, agricultural, and transportation activities, where FDCPA violations relate to acts subject to those laws.

Section 815—Reports to Congress by Commission

Section 815 requires the Commission to submit an annual report to Congress which discusses its enforcement and other activities administering the FDCPA, assesses the degree of compliance, and makes recommendations.

Section 816—Relation to State laws

Section 816 provides that the FDCPA pre-empts state laws only to the extent that those laws are inconsistent with any provision of the FDCPA, and then only to the extent of the inconsistency. A State law is not inconsistent if it gives consumers greater protection than the FDCPA.

1. *Inconsistent laws.* Where a state law provides protection to the consumer equal to, or greater than, the FDCPA, it is not pre-empted by the federal statute.

Section 817—Exemption for State Regulation

Section 817 orders the Commission to exempt any class of debt collection practices from the FDCPA within any State if it determines that State laws regulating those practices are substantially similar to the FDCPA, and contain adequate provision for enforcement.

1. *State exemptions.* A state with a debt collection law may apply to the Commission for an exemption. The Commission must grant the exemption if the state's law is substantially similar to the FDCPA, and there is adequate provision for enforcement. The Commission has published procedures for processing such applications (16 CFR 901).

Section 818—Effective Date

Section 818 provides that the FDCPA took effect six months from the date of its enactment.

1. *Key dates.* The FDCPA was approved September 20, 1977, and became effective March 20, 1978.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on February 28, 1986

Social Security Administration

Subject: Statement for Determining Continuing Eligibility for Supplemental Security Income Payments—Revision—(0960–0131)
Respondents: Individuals or households

Subject: Chinese Custom Marriage Statement and Statement Regarding Chinese Custom Marriage—Revision—(0960–0086)
Respondents: Individuals or households
OMB Desk Officer: Judy A. McIntosh.

PUBLIC HEALTH SERVICE

Food and Drug Administration

Subject: Medical Device Reporting—Revision—(0910–0201)
Respondents: Medical Device Manufacturers
OMB Desk Officer: Bruce Artim.

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503, Attn: (name of OMB Desk Officer).

Dated: February 28, 1986.

K. Jacqueline Holz,

Deputy Assistant Secretary for Management Analysis and Systems.

Alcohol, Drug Abuse, and Mental Health Administration Request for Nominations for Members of the National Institute of Mental Health Initial Review Committees

AGENCY: Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA).

ACTION: Request for nominations for members of the National Institute of Mental Health initial review committees.

SUMMARY: This notice is to advise interested parties that the National Institute of Mental Health (NIMH) invites nominations for membership on its initial review committees. The initial review committees provide technical and scientific merit review of grant applications and contract proposals.

The primary requirement for serving on a scientific review group is competence as an independent investigator in a basic scientific or clinical discipline or research specialty. Assessment of such competence is based on the quality of research accomplished, publications in referred scientific journals, and other significant scientific activities, achievements, and honors. Usually a doctoral degree or its equivalent is required. Service also requires mature judgment, balanced perspective, objectivity, ability to work effectively in a group context, commitment to complete work assignments, and assurance that the confidentiality of applications will be protected.

Any person may nominate one or more qualified candidates for consideration on one or more specific committees. Self nominations are accepted. NIMH has a special interest in assuring that women and ethnic minority scientists are adequately represented on advisory committees and, therefore, encourages their nomination. Nominations must be received by April 1, 1986. Submit a curriculum vita for each nominee which includes a complete mailing address. The nominee must be aware of the nomination and be willing to serve. Nominations should be sent to the Committee Management Officer, NIMH, at the address below.

Although the NIMH will carefully consider all nominations, it reserves the right to make final selections.

FOR FURTHER INFORMATION CONTACT: Additional information about the functions of each committee and the expertise required may be obtained from Helen Garrett, Committee Management Officer NIMH, Parklawn Building, Room 9–94, 5600 Fishers Lane, Rockville, MD 20857.

SUPPLEMENTARY INFORMATION: Initial review committees for which nominations will be considered are listed below:

Basic Behavioral Processes Research Review Committee
Cognition, Emotion, and Personality Research Review Committee
Criminal and Violent Behavior Research Review Committee
Epidemiologic and Services Research Review Committee
Life Course and Prevention Research Review Committee
Mental Health Behavioral Sciences Research Review Committee
Mental Health Research Education Review Committee
Mental Health Small Grant Review Committee
Neurosciences Research Review Committee
Psychopathology and Clinical Biology Research Review Committee
Research Scientist Development Review Committee
Treatment Development and Assessment Research Review Committee.

Dated: March 4, 1985.

Brenda L. Williamson,

Acting Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160-20-M

Centers for Disease Control

Cooperative Agreement for a Project To Assess Fertility and Family Planning in Puerto Rico; Availability of Funds for Fiscal Year 1986

The Centers for Disease Control (CDC) announces the availability of funds for Fiscal Year 1986 to continue a cooperative agreement with the University of Puerto Rico School of Public Health to assess the fertility and family planning of reproductive aged women in Puerto Rico. The Catalog of Federal Domestic Assistance Number is 13.283.

Request for Application Not Available

This is not a formal request for application and other applications will not be accepted.

Avaiability of Funds

It is expected that approximately $38,000 will be available in Fiscal Year 1986 to fund this cooperative agreement. The award will be funded for 12-month budget and project period.

Authority

This program is authorized under section 301 of the Public Health Service Act, as amended. Regulations applicable to this program are in Title 42 of the Code of Federal Regulations, Part 52.

Information

FOR FURTHER INFORMATION CONTACT: Luther E. DeWeese, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 Paces Ferry Road, NE., Room 321, Atlanta, Georgia 30305, Telephone Number (404) 262–6275 or FTS 236–6575.

Dated: February 28, 1986.

William E. Muldoon,

Director, Office of Program Support, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 85N-0569]

Study of Certain Effects of Sugar Alcohols and Lactose Observed in Animal Experiments; Request for Additional Information; Meeting of Ad Hoc Expert Panel

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that the Ad Hoc Expert Panel on Sugar Alcohols and Lactose (the Expert Panel), which was formed by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology (FASEB) under a contract with FDA, will hold an open meeting. The purpose of this meeting is to obtain scientific data and information on the effects of sugar alcohols and lactose that have been observed in animal experiments. The questions that have been posed to FASEB by FDA, and that will be considered by the Expert Panel, are set forth in this notice. The Expert Panel will meet in closed executive session after the open meeting, on April 8 and 9, 1986, and on June 23 and 24, 1986, to discuss this subject.

DATES: The open meeting will be held on Monday, April 7, 1986, at 9 a.m. As stated at 51 FR 2577 (January 17, 1986), relevant scientific data and information may be submitted until March 15, 1986. Requests to make oral presentations at the open meeting must be in writing, be postmarked before March 15, 1986, and be received by March 22, 1986. The executive session will be held following the open meeting on April 7, 1986, resume at 9 a.m. on April 8, 1986, and conclude on April 9, 1986. The Expert Panel will also meet in executive session on June 23 and June 24, 1986, at 9 a.m.

ADDRESS: The open and executive session meetings will be held in the Milton O. Lee Bldg. at FASEB, 9650 Rockville Pike, Bethesda, MD 20814.

FOR FURTHER INFORMATION CONTACT:

F.R. Senti, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20814, 301–530–7030

or

Lester Borodinsky, Center for Food Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–426–8950.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of January 17, 1986 (51 FR 2577), FDA announced that FASEB, under its contract with FDA (No. 223–83–2020), is conducting a study, by means of the Expert Panel, of certain effects that have been observed in animal experiments in which the animals were fed sugar alcohols or lactose. (For complete information about this study, see 51 FR 2577). The notice advised that an open meeting of the Expert Panel would be announced in the **Federal Register**. The open meeting has now been scheduled and will be held on April 7, 1986, at the address given above. The Expert Panel will also meet at the same location in a closed executive session after the open meeting and on April 8 and 9, 1986, and on June 23 and 24, 1986, to discuss this subject.

The Expert Panel is conducting the open meeting to receive all relevant information on the following questions, which have been posed by FDA:

A. Questions Related to Sugar Alcohols and Adrenals

1. Are adrenal hyperplasia and pheochromocytoma characteristic responses of certain strains of rats to being fed high levels of sugar alcohols?
2. Do the lesions seen in the rat adrenal correlate physiologically or biochemically to adrenal lesions occurring in humans?
3. Is there a mechanistic explanation for the occurrence of the lesion in rats?
4. If the answer to question 3 is yes, is there evidence that this mechanism operates in the rat only? In other species?

B. Questions Specific to Xylitol and Mouse Bladder

1. Is there a physiologic or biochemical explanation for the occurrence of oxalate crystals in the bladder of mice fed high levels of xylitol?
2. Is there, in general, a correlation between bladder crystals (stones) and hyperplastic changes in bladder epithelium of rodents?
3. Is the urinary stone formation a reasonable explanation for the occurrence of bladder tumors in mice fed high levels of xylitol?

C. Questions Specific to Xylitol and Dog Liver

1. Are the physiological responses of the dog to high levels of xylitol different from those of other species?
2. If there are differences, are they sufficient to explain the liver histopathology as well as the clinical and biochemical changes noted in dogs fed high levels of xylitol?
3. Would the responses in dogs be sufficiently unique so as to expect that they would not be significant for humans?

D. Questions Specific to Lactitol and Lactose

1. Was there or is there now any information to suggest that lactitol or lactose would have induced testicular tumors in rats fed diets containing 10 percent lactitol or lactose?
2. Is there a mechanistic explanation for the occurrence of these lesions in rats?
3. What is the relevance of this lesion to humans?
4. Can lactose as it occurs in milk be considered differently from a toxicologic point of view than lactose as a generally recognized as safe substance in foods?

The conference room in which the open meeting will be held has limited seating. Advance registration is strongly encouraged (contact F.R. Senti—address above). Additionally, because parking space is limited, use of public transportation is encouraged.

The Expert Panel meetings are being announced as required by 21 CFR 14.15(b)(1).

Dated: March 5, 1986.

Adam J. Trujillo,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 86–5081 Filed 3–5–86; 10:06 am]

BILLING CODE 4160-01-M

Food and Drug Administration; Statement of Organization, Functions, and Delegations of Authority

Part H., Chapter HF (Food and Drug Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, as amended most recently in pertinent parts at 43 FR 16418, April 18, 1978; 47 FR 46142, October 15, 1982; and 50 FR 34759, August 27, 1985;) is amended to reflect the insertion of additional organizational functional statements.

Public Health Service (PHS) organizational guidelines, require that functional statements for oganizations that report directly to an Associate Commissioner or Center Director be published in the **Federal Register**.

Therefore, the Food and Drug Administration is publishing functional statements for staffs in the Office of Planning and Evaluation, the Office of Legislative Affairs, Office of Public Affairs, and the Office of Health Affairs.

Section HF–B, Organization and Functions is amended as follows:

1. Following paragraph (b) Office of Planning and Evaluation (HFAA) insert new subparagraphs (b–1) through (b–3) reading as follows:

(b–1) *Planning and Management Communications Staff (HFAA3).* Directs the agency long-range planning process, including strategic and program planning, and coordinates it with the HHS long-range planning process.

Prepares the FDA Forward Plan and Annual Report.

Assists and consults with agency components in their planning.

Analyzes base line data and determines importance of external factors, including consumer safety and regulatory expectations, which affect the agency.

Consults with and supports the Office of Management and Operations in preparation of the agency budget; consults with and supports the Office of Legislative Affairs in the preparation of legislative proposals.

Conducts special planning-related studies and critiques as requested.

Coordinates the agency functional (regulatory, research, etc.) planning processes and supports agency staff units in planning design, preparation, coordination, and execution.

Represents the agency in Department planning activities.

Conducts analysis of resource requests submitted by agency components in order to develop resource recommendations for the Commissioner,

VOL
51
ISS
45
MR
7
1986
UMI

to support the planning process, and to fulfill PHS and HHS requirements.

Designs and operates management communications systems.

Coordinates and presents an annual regulatory development plan.

Conducts the agency manpower management system.

(b–2) *Evaluation and Analysis Staff (HFAA4).* Performs agency program and policy evaluations. Recommend alternative courses of action to increase effectiveness of agency allocation of resources and to improve program and project performance.

Performs analyses of significantly broad agency issues identified in the planning process. Recommends and/or implements steps to resolve these issues.

Assures that appropriate program evaluation activities are taken in agency components. Monitors and coordinates these efforts to assure uniqueness and a contribution to agency program goals.

Develops the annual evaluation plan for the agency and coordinates with PHS/HHS.

Conducts special evaluation and economic-related studies in support of agency policy development and in resolution of broad agency problems.

Evaluates impact of external factors on agency programs, including industry impact, consumer expectations, and protective legislation.

Evaluates the impact of agency operations and policies on regulated industries and other agency constituents.

Evaluates Program Management System (PMS) projects to provide a basis for agency decisionmaking. Recommends PMS project selections for evaluation, conducts the evaluations, and provides written reports to the Commissioner.

Provides staff support to the agency Evaluation Review Board.

(b–3) *Economics Staff (HFAA8).* Provides economic analyses as input to and support for decisions regarding agency policy issues.

Serves as the agency focal point for economic analysis assistance and consultation; provides economic analysis assistance to agency components for regulatory and other program functions.

Advises and assists the Commissioner and other key officials on a day-to-day basis concerning economic factors relating to current and proposed agency activities.

Provides a resource of economic research material for use by agency officials in preparing testimony before congressional committees and in developing replies to inquiries directed to the agency.

Conducts economic studies of FDA-related industries as a basis for forecasting trends, needs, and major problems affecting the agency.

Provides agency representation to Congress, OMB, HHS, PHS, and others, as appropriate, on economic issues relating to agency regulatios and other current and proposed actions.

2. Following paragraph (d) Office of Legislative Affairs (HFAD) insert new subparagraph (d-1) reading as follows:

(d–1) *Legislative Affairs Staff (HFADB).* Serves as the agency focal point for legislative liaison activities within the agency and with the Department, PHS, and other agencies and for responding to congressional and priority inquiries and on proposed legislation which may affect the agency.

Initiates, coordinates, and/or provides in-depth analyses for the Commissioner, other agency officials, Congress, or OMB on agency legislative needs and legislation affecting the agency including problem-solving with other agencies, preparation of supporting documents for agency views on proposed or pending legislation, and the development of legislative proposals and position papers.

Develops and/or coordinates testimony and data for the agency and Department for presentation to congressional committees; monitors hearings, edits transcripts of agency testimony, and provides any requested additional information.

Provides information on the agency's legislative programs and proposals to consumers and regulated industry.

Initiates and conducts appraisals of Agency policies which may be subject to congressional investigation, in collaboration with center program managers; provides requested information, in cooperation with the General Counsel, to committees investigating agency activities, policies, and programs.

Prepares and signs responses to priority correspondence from Congress and consumers controlled by the Office. Controls and processes correspondence referred by Congress, the White House, and other sources.

3. Following paragraph (e) *Office of Public Affairs (HFAJ)* insert new subparagraphs (e–1) through (e–3) reading as follows:

(e–1) Press Relations Staff (HFAJA). Advises and assists agency officials on press and related matters involving mass media communications.

Plans, develops, and implements an agencywide media strategy for disseminating regulatory and educational material to the public through the mass media.

Serves as the agency focal point for preparing, clearing, and disseminating press releases and other media statements representing agency policy and responding to media inquiries; maintains liaison with the news media and pertinent publications.

Establishes policy for and coordinates all media information activities, including interviews and responses to inquiries, conducted through agency field and center operations; prepares position and policy statements for use by agency employees in responding to media questions.

Coordinates the research and drafting of major public statements by the Commissioner including transmittal documents and supportive statements for use in transactions with the Department, other agencies, and the White House; provides editorial consultation and review for manuscripts, articles, and speeches written by the staff offices serving the Commissioner to ensure consistency of information and policy interpretation and maintains mailing lists for these documents.

Compiles, publishes, and distributes the weekly FDA Enforcement Report and the FDA Public Calendar; maintains the FDA Daily Clipping Service.

(e–2) *Communications Staff (HFAJB).* Identifies consumer communication and educational requirements for the agency and creates, implements, and coordinates appropriate programs conducted through the media, agency consumer affairs officers, and other communication sources.

Plans, designs, produces, publishes, and disseminates audiovisual materials, exhibits, posters, publications, and periodicals, including *FDA Consumer, FDA Today*, and the *FDA Drug Bulletin*; participates in the planning and development of all publications and audiovisual aspects of communications programs directed at mass audiences.

Provides centralized agency graphic arts and editorial services for public information materials.

Acts as the public information liaison with the Department for all publications and audiovisual needs; provides prepublication clearance of publications, exhibits, and audiovisual materials in accordance with procedures established by the agency PHS, the Department, OMB, and the White House.

Provides Agencywide advice and consultation in the production of audiovisual materials; maintains centralized files of photographs and

audiovisual materials for use by all agency components.

(e–3) *Freedom of Information Staff (HFAJC).* Establishes agencywide policy and provides overall direction and leadership for the Freedom of Information (FOI) program and Privacy Act program.

Serves as the agency expert and focal point for Headquarters and field personnel in the development and implementation of effective policies and procedures in accordance with the Freedom of Information Act, the Privacy Act, FDA regulations, and other relevant statutes.

Receives, reviews, controls, coordinates, and routes all FOI requests to the proper action office; designs and implements control mechanisms to assure that FOI and Privacy Act inquiries are processed and responded to within established time frames.

Reviews all recommendations for denials submitted by Headquarters and field FOI Officers. Determines the need for supplemental information and/or changes in the denial recommendation and coordinates required action with the submitting office.

Analyzes, compiles, and prepares reports on privacy and FOI activities in the agency for the annual reports to the Department and for other reporting requirements.

Maintains copies of agency manuals, indexes, and other records required to be on public display.

4. Following paragraph (g) *Office of Health Affairs (HFA5)* insert new subparagraphs (g–1) through (g–3) reading as follows:

(g–1) *Medicine Staff (HFA51).* Provides leadership and direction on medical issues and stimulates medical effort and achievement for the agency.

Conducts hearings and provides medical reviews of hearing requests and proposed findings of fact and conclusions of law recommended by the Administrative Law Judge after evidentiary hearings.

Provides an agencywide focal point for communications with professional organizations and publications.

Maintains continual awareness of changing concepts in health care delivery and medical research. Evaluates their impact on medical programs and policies of the agency.

Advises the Commissioner on the impact of major medical policy initiatives of the Department and makes recommendations for agency implementation of these programs.

Represents the agency on task forces, committees, and before Congress on medical policies and long-term program direction and goals of the agency.

Initiates and coordinates liaison with medical, pharmacy, nursing, and related professions to promote understanding and support of agency programs.

(g–2) *Health Assessment Policy Staff (HFA52).* Provides staff support in conducting of evidentiary hearings. Provides reviews of hearing requests and proposed findings of fact and conclusions of law as recommended by the Administrative Law Judge after evidentiary hearings.

Serves as the agency focal point for the coordination of specific health issues, particularly those related to the approval of new products having significant impact on health care practices, activities of other Federal agencies, and costs.

Advises the Commissioner, Associate Commissioner, and other key agency officials, of human protection needs and of initiatives which will affect agency activities in regard to human protection. Provides staff support to the Research Involving Human Subjects Committee.

Proposes resolutions to intra-agency program problems related to FDA health policies. Evaluates the effectiveness of initiatives and actions affecting major health policies and conducts studies of health program activities.

Provides advice on identifying needs for and the development of new legislation which impacts on agency health policies and public health. Develops implementation plans for agency actions required by new legislation.

Reviews and participates in the preparation of congressional testimony which impacts upon agency health policies.

(g–3) *International Affairs Staff (HFA56).* Serves as the agency focal point for developing and maintaining international communications, policies, and programs, including the development of an agency international strategy plan.

Establishes and provides an agency liaison on international activities with the Department, PHS, other Federal agencies, foreign governments, and international organizations.

Represents the agency at meetings relating to international obligations and/or briefs agency participants in international conferences.

Establishes, identifies, interprets, and clarifies, in cooperation with appropriate agency components, the Agency's international obligations and needs, including the Special Foreign Currency Program. Initiates and monitors programs to meet these responsibilities, and provides policy guidance and advice to agency components.

Maintains an international information exchange program concerning agency policies and programs to provide interchange between FDA and counterpart agencies in foreign countries and international organizations.

Assists in the development, negotiation, and monitoring of agreements with foreign governments and international agencies in cooperation with appropriate agency components; and acts as the agency focal point for intergovernmental conferences.

Negotiates the preparation and implementation of technical assistance programs (including formal training programs and surveys) with foreign governments in areas related to the agency mission. Coordinates ongoing technical assistance operations with the HHS Office of International Affairs, the PHS Office of International Health, and appropriate agency components.

Directs the Agency Foreign Visitors and Foreign Officials Programs, providing participants with policy briefings, technical training, and/or assistance in response to specific needs.

Effective Date: February 25, 1986.

Dated: February 25, 1986.

Wilford J. Forbush,

Director, Office of Management.

Office of the Assistant Secretary for Health; Statement of Organization, Functions and Delegations of Authority

Part H, Public Health Service (PHS), Chapter HA (Office of the Assistant Secretary for Health) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (DHHS) (42 FR 61318, December 2, 1977, as amended most recently at 50 FR 50847, December 12, 1985), is amended to reflect a reorganization within the National Center for Health Services Research and Health Care Technology Assessment (NCHSR), Office of the Assistant Secretary for Health. Specifically, budget activities will be transferred from the Office of Management, Office of Resource Management, Division of Financial Management, OASH Financial Management Branch, to NCHSR, Office of Program Support.

Under Part H, Chapter HA, Office of the Assistant Secretary for Health (OASH), Section HA–20 Functions, under the heading for *the National Center for Health Services Research and Health Care Technology Assessment (HAR),* revise the functional statement for the *Office of Program Support (HAR13)* by deleting item #3 and inserting the following: "(3) serves as principal advisor in areas of financial management activities and manages a system of budgetary, expenditure and employment controls."

Effective Date: February 28, 1986.

Wilford J. Forbush,

Director, Office of Management.

BILLING CODE 4160-17-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N-86–1595]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ACTION: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: Robert Fishman, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, telephone (202) 755–6050. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Application for Approval as a Participating Lender (Commitment Correspondent/Coinsurance Lenders)
Office: Housing
Form Number: HUD–92001, 92001B, 92001C, 92001D, 92001E, and 92001K
Frequency of Submission: On Occasion
Affected Public: Businesses or Other For-Profit
Estimated Burden Hours: 3,380
Status: Revision
Contact: William Park, HUD, (202) 755–6700; Robert Fishman, OMB, (202) 395–6880.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 21, 1986.

Proposal: Consolidated Supply Program: Procurement Needs Survey
Office: Public and Indian Housing
Form Number: None
Frequency of Submission: Annually
Affected Public: State or Local Governments and Non-Profit Institutions
Estimated Burden Hours: 1,600
Status: New
Contact: Joyce Roberson, HUD, (202) 472–4703; Robert Fishman, OMB, (202) 395–6880.

Authority: Sec: 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 20, 1986.

Proposal: Consolidated Supply Program (CSP)—Reporting Requirements
1. Submission of Sales Reports by CSP Suppliers
2. Submission of Testing/Certification Reports by Potential CSP Suppliers
Office: Public and Indian Housing
Form Number: None
Frequency of Submission: On Occasion and Semi-annually
Affected Public: Businesses or Other For-Profit
Estimated Burden Hours: 4,860
Status: New
Contact: Joyce Roberson, HUD, (202) 472–4703; Robert Fishman, OMB, (202) 395–6880.

Authority: Sec: 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 20, 1986.

Proposal: Restriction on Use of Assisted Housing
Office: Housing
Form Number: None
Frequency of Submission: Annually
Affected Public: Individuals or Households and Business or Other For-Profit
Estimated Burden Hours: 167,220
Status: New
Contact: Judy Lemeshewsky, HUD, (202) 755–6870; Robert Fishman, OMB, (202) 395–6880.

Authority: Sec: 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: February 11, 1986.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Privacy Act of 1974—Revision of Notice of System of Records

Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a), notice is hereby given that the Department of the Interior proposes to revise a notice describing a system of records maintained by the Bureau of Mines. Except as noted below, all changes being published are editing corrections, updating and clarifying amendments, and other minor administrative revisions which have occurred since the previous publication of the notice in the **Federal Register** on October 4, 1983 (48 FR 45314). The notice being revised, which is published in the entirety below, is titled "Safety Management Information System—Interior, Mines–6".

The existing routine disclosure statement for litigation purposes is revised to incorporate the clarification on such disclosures prescribed by the Office of Management and Budget (OMB) in its supplementary guidelines dated May 24, 1985, for implementing the Privacy Act. The statements on storage and retrieval are revised to document the conversion of the records to magnetic media for desk top computer use. The conversion will not result in any new uses of the information or result in substantially greater access to the records in the system.

Since these changes do not involve any new or intended use of the information in the system of records, the notice shall be effective April 7, 1986. Additional information regarding these revisions may be obtained from the Department Privacy Act Officer, Office of the Secretary (PIR), Room 7357, Main Interior Building, U.S. Department of the Interior, Washington, D.C. 20240.

Oscar W. Mueller, Jr.,

Director, Office of Information Resources Management.

Dated: February 28, 1986.

INTERIOR/WBM–6

SYSTEM NAME:

Safety Management Information System—Interior, Mines–6.

SYSTEM LOCATION:

(1) Bureau of Mines, U.S. Department of the Interior, 2401 E Street, NW., Washington, D.C. 20241. (2) All field and headquarters organizations of the Bureau of Mines retain copies of source documents.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees, contractors, concessioners and public visitors to Bureau facilities who have been involved in an accident resulting in personal injury, illness, and/or property damage, or exposed to a health hazard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains the name, social security number (employees only), occupation, date and location of accident; data elements about the accident for analytical purposes; and descriptive narraive concerning the reason for the loss producing event.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(1) 5 U.S.C. 7901, (2) 28 U.S.C. 2671–2680, (3) 31 U.S.C. 3701, 3721, (4) Executive Order 12196, (5) 29 CFR Part 1960.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the automated and manual records are to (a) provide summary data of injury, illness, and property loss information to Bureau managment in a number of formats for analytical purposes in establishing programs to reduce or eliminate loss producing problem areas, (b) provide listings of individual cases to Bureau management to ensure that accidents occuring are reported through the Bureau Safety Management Information System for forwarding to the Department of the Interior Safety Management Information System, and (c) adjudicate tort and employee claims. Disclosures outside the Bureau of Mines may be met: (1) To a Federal, State, or local government agency that has partial or complete jurisdiction over the claim or related claims; (2) to provide the Department of Labor through the Department of the Interior quarterly summary listings of fatalities and disabling injuries and illnesses in compliance with 29 CFR 1960.66–.74; (3) to the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or when represented by the government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant to the litigation and is compatible with the purpose for which the records were compiled; (4) of information indicating a violation or potential violation of statute, regulation, rule, order, or license, to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license, and (5) to a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

(1) Automated records are maintained on flexible disks. (2) Source documents (manual records) are maintained at Bureau field and headquarters organizations from which the accident is reported. (3) Manual records are maintained in book format and/or file folders.

RETRIEVABILITY:

(1) Automated records are retrievable by name or document control number. (2) Manual records are retrievable by name or document control number.

SAFEGUARDS:

(1) Automated records are maintained with safeguards meeting the FIPS PUB 41, "Computer Security Guidelines for Implementing the Privacy Act of 1974." (2) Security is provided to meet the requirements of 43 CFR 2.51 for manual records.

RETENTION AND DISPOSAL:

(1) The retention and disposal determination for the automated records stored on flexible disks is pending approval of the Archivist of the United States. (2) Disposal determination for the manual records is suspended until further notice per GSA FPMR Bulletin G–136, March 21, 1984.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Safety Management Staff, Bureau of Mines, 2401 E Street, NW., Washington, D.C. 20241.

NOTIFICATION PROCEDURE:

To determine whether automated and/or manual records are maintained on you in this system, write to the System Manager or field or headquarters organizations in which the source document pertaining to yourself would be filed. A written and signed request stating that the requestor seeks information concerning records pertaining to him/her is required. See 43 CFR 2.60.

VOL 51
ISS 45
MR 7
1986
UMI

RECORDS ACCESS PROCEDURES:

A request for access should be addressed to the System Manager or the field or headquarters organization in which the source document for the individual would be filed. Describe as specifically as possible the records sought. If copies are desired indicate the maximum you are willing to pay. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

To request correction or the removal of material from your file(s), write the System Manager. See 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Supervisor of employees involved in accidents. Investigative reports by supervisors, safety and health professionals, other management officials, or any combination thereof

BILLING CODE 4310-53-M

Bureau of Land Management

1985 Amendments to the California Desert Plan and Eastern San Diego Draft Environmental Impact Statement

AGENCY: Bureau of Land Management.

ACTION: Notice of availability.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Bureau of Land Management has prepared Draft Environmental Impact Statement (DEIS) on the 1985 Amendment review of the California Desert Plan and Eastern San Diego County Managment Framework Plan..

DATE: Comments on the DEIS are being accepted for 90 days from the date of this notice.

ADDRESS: For further information contact Gerald E. Hillier, District Manager, California Desert District, 1696 Spruce Street, Riverside, California 92507.

SUPPLEMENTARY INFORMATION: Twenty amendments were accepted for consideration. The amendments propose changes in planning guidelines for waste disposal and agriculture, as well as site-specific measures. The latter include changes in vehicle access restrictions, Areas of Critical Environmental Concern (ACECs) and Special Areas, grazing allotments, wild horse and burro management, and multiple use class designation. Under the preferred alternative, 18 amendments would either be accepted or accepted with modification, and two would be rejected.

Comments on the DEIS should be submitted to the following address to assure timely processing: 1985 Plan Amendments, Bureau of Land Management, California Desert District, 1695 Spruce Street, Riverside, California 92507.

A limited number of copies of the Draft Environmental Impact Statement are available upon request at the address listed above for comments. Copies are also available for review at two other locations:

USDI, Bureau of Land Management, 2800 Cottage Way, Room E-2841, Sacramento, California 95825
USDI, Bureau of Land Management, 1725 I Street, N.W., Suite 906, Washington, D.C. 20240.

Dated: February 27, 1986.

Ed Hastey,

State Director.

Realty Action; Exchange of Federal Lands For State Lands in Mohave and Coconino Counties, AZ

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of realty action—Exchange of Federal lands for State lands in Mohave and Coconino Counties, AR.

SUMMARY: The following described public land has been determined to be available for disposal by state exchange under section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716:

Selected Public Lands

Gila and Salt River Meridian, Mohave County, Arizona—5,807.72 acres.

T. 39 N., R. 16 W.,
  Sec. 1, Lots 3 & 4, S½NW¼, SW¼;
  Sec. 3, NE¼SE¼, SW¼SE¼;
  Sec. 4, Lot 2;
  Sec. 5, Lots 2, 3 & 6, N½S½SE¼;
  Sec. 8, Lots, 2, 3 & 4, S½NE¼SE¼;
  Sec. 9, SW¼NE¼, NE¼NW¼, S½NW¼, S½;
  Sec. 10, W½NE¼, SE¼NW¼, NE¼SE¼;
  Sec. 12, W½;
  Sec. 13, N½NW¼;
  Sec. 14, SW¼SE¼;
  Sec. 17, Lots 1, 2, 3, & 4, W½E½;
  Sec. 22, W½NW¼.
T. 40 N., R. 15 W.,
  Sec. 3, SE¼NE¼, S½SW¼, SE¼;
  Sec. 4, S½SE¼;
T. 40 N., R. 16 W.,
  Sec. 33, SW¼SE¼;
  Sec. 34, NE¼, N½NW¼, N½SE¼, SE¼ SE¼.
T. 41 N., R. 12 W.,
  Sec. 5, Lots 3 & 4, S½NW¼;
  Sec. 6, Lots 1, 2, 3, 4, & 5, S½NE¼, SE¼ NW¼;
  Sec. 8, SW¼NW¼, W½SW¼.
T. 41 N., R. 13 W.,
  Sec. 1, Lots 1, 2, 3 & 4, S½N½S½.
41 N., R. 15 W.,
  Sec. 20, SW¼;
  Sec. 28, All;
  Sec. 33, Lots 1, 4 & 5, NE¼, SE¼SW¼, N½ SE¼, N½SW¼SE¼, SE¼SW¼SE¼, SE¼SE¼;
  Sec. 35, SE¼.

Gila and Salt River Meridian, Coconino County, Arizona—1,960.00 acres.

T. 41 N., R. 2 W.,
  Sec. 9, S½NE¼, SE¼NW¼, E½SW¼, SE¼;
  Sec. 21, Lots 1, 2, 3 & 4, NE¼,NE¼SE¼;
  Sec. 22, All;
  Sec. 27, All.

In exchange for the above described 5,807,72 acres in Mohave County and the 1,960.00 acres in Coconino County, the Federal Government will acquire scattered state-owned land of equal or greater value to that disposed of in each of the respective counties.

Under the provisions of 43 CFR 2201.1 this Notice of Realty Action shall segregate the lands from appropriation under the mining laws and mineral leasing laws subject to valid existing rights or leases. This segregation shall terminate upon publication in the **Federal Register** of a termination notice or after two years and the exchange is not consummated, whichever occurs first.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Arizona Strip District, 196 Tabernacle, St. George, Utah 84770.

G. William Lamb,

District Manager.

February 26, 1986.

BILLING CODE 4310-32-M

Fish and Wildlife Service

Receipt of Application for Permit; Monterey Bay Aquarium

The public is invited to comment on the following application for permits to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*), the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531 *et seq.*), and the regulations governing marine mammals and endangered species (50 CFR Parts 17 and 18).

Applicant: Monterey Bay Aquarium, 886 Cannery Row, Monterey, CA 93940.

File No.: PRT-703927.

Type of permit: Scientic research.

Name and number of animals: At least one adult female S. sea otter (*Enhydra lutra nereis*).

Summary of activity to be authorized: The applicant proposes to take this animal for scientific research.

Source of marine mammals for display: Monterey Peninsula.

Period of activity: 1 year.

Concurrent with the publication of this notice in the **Federal Register**, the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (FWPO), 1000 North Glebe Road, Room 611, Arlington, Virginia 22201, within 30 days of the publication of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such hearing is at the discretion of the Director.

Documents submitted in connection with the above application are available for review during normal business hours (7:45 am to 4:15 pm) in Room 601, 1000 W. Glebe Road, Arlington, Virginia.

Dated: March 4, 1986.

Larry LaRochelle,

Acting Chief, Branch of Permits, Federal Wildlife Permit Office.

[FR Doc. 86-5052 Filed 3-6-86; 8:45 am]

BILLING CODE 4310-55-M

Receipt of Application for Permit; Rio Grande Zoo, Albuquerque, NM

The public is invited to comment on the following application for a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals (50 CFR Part 18).

Applicant: Rio Grande Zoo, 903 Tenth Street, SW, Albuquerque, New Mexico 87102. *File No:* PRT-702986.

Type of permit: Scientific research.

Name and number of animals: 1.2 Polar bears (*Ursus maritimus*).

Summary of activity to be authorized: The applicant proposes to import these animals for the purpose of scientific research.

Source of marine mammals for display: Manitoba, Canada; one mother bear and her two cubs; taken as nuisance bears.

Period of activity: 1 year.

Concurrent with the publication of this notice in the **Federal Register**, the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (FWPO), 1000 North Glebe Road, Room 611, Arlington, Virginia 22201, within 30 days of the publication of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such hearing is at the discretion of the Director.

Documents submitted in connection with the above application are available for review during normal business hours (7:45 am to 4:14 pm) in Room 601, 1000 North Glebe Road, Arlington, Virginia.

Dated: March 4, 1986.

Minerals Management Service

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Interior Department Desk Officer, Washington, DC 20503, telephone 202-395-7313, with copies to David A. Schuenke; Chief, Rules, Orders, and Standards Branch; Offshore Rules and Operations Division; Minerals Management Service; 12203 Sunrise Valley Drive; Mail Stop 646; Room 6A110; Reston, Virginia 22091.

Title: Notice of Processing of Geological and Geophysical Information, 30 CFR 251.11 and 251.12

Abstract: Respondents conducting exploration for oil or gas provide the Minerals Management Service with geological and geophysical data, processed and analyzed information, and interpretations which are used to properly evaluate Federal Outer Continental Shelf (OCS) resources and environmental conditions as required by the OCS Lands Act.

Bureau Form Number: None.

Frequency: On occasion.

Description of Respondents: Federal OCS permittees.

Annual Responses: 620.

Annual Burden Hours: 32,240.

Bureau Clearance Officer: Dorothy Christopher, 703-435-6213.

Dated: January 27, 1986.

John B. Rigg,

Associate Director for Offshore Minerals Management.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 21215 (Sub-3)[1]]

Seaboard Air Line Railroad Co.; Merger; Atlantic Coast Line Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Proceeding reopened and modified procedure scheduled.

SUMMARY: Southern Railway Company (Southern) and Seaboard System Railroad, Inc. (Seaboard) have filed a petition to reopen this merger to consider removing or amending a condition. The condition requires Seaboard to "maintain and keep open all routes and channels of trade via existing junctions and gateways, unless and until otherwise authorized by the Commission." [2] Seaboard and Southern want to eliminate the Seaboard-Southern interchange at Lincolnton, NC that is required to be maintained and kept open under the condition. We are reopening this proceeding to consider removing this condition with regard to the Lincolnton interchange. Our analysis will be based on the criteria of 49 U.S.C. 11344(b)(1).

ADDRESSES: Send an original and 10 copes of all pleadings referring to Finance Docket No. 21215 (Sub-No. 3) to:

---

[1] This proceeding is given a new sub-number to distinguish it from earlier proceedings.

[2] *Seaboard Air Line R. Co.—Merger -Atlantic Coast Line,* 320 I.C.C. 122, 267 (1963).

VOL 51
ISS 45
MR 7
1986
UMI

Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

Send one copy of each pleading to petitioners' representatives:

William H. Teasley, Norfolk Southern Corp., 8 North Jefferson Street, Roanoke, VA 24042

R. Lyle Key, Jr., Seaboard Ssytem Railroad, Inc., 500 Water Street, Jacksonville, FL 32202

DATES: Comments are due April 7, 1986. Replies are due April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: The Lincolnton interchange is served by Seaboard three times per week, and by Southern two or three times per week, or as needed. Petitioners state that a minimal number of cars (65 loaded and 43 empty in 1984, and 38 loaded and 22 empty in the first 6 months of 1985) is interchanged at Lincolnton. Petitioners argue that these cars could be interchanged more efficiently and expeditiously at Charlotte, NC, 40 miles east of Lincolnton, where Seaboard and Southern interchange cars two or three times per day, seven days per week. Eliminating the Lincolnton interchange would also permit elimination of one main line turnout at Lincolnton..

Decided: February 27, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,

Secretary.

[FR Doc. 86–5044 Filed 3–6–86; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. AB–208 (Sub-1X)]

Wolfeboro Railroad Associates; Abandonment Exemption in Carroll County, NH; Exemption

Applicant has filed a notice of exemption under 49 CFR Part 1152 Subpart F—*Exempt Abandonments* to abandon its entire line of railroad extending from Wolfeboro to Sanbornville, a distance of 12 miles in Carroll County, NH.

Applicant has certified (1) that no local freight traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line, and (2) that no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

The Commission does not normally impose labor protective conditions in an entire line abandonment unless the evidence shows that the applicant has a corporate affiliate that will continue carrier operations or a corporate parent that will realize significant benefits as a result of the abandonment. *See Northampton and Bath R. Co.—Abandonment,* 354 I.C.C. 784 (1978). Because neither of these exceptions appear to apply, we will not impose employee protective conditions.

The exemption will be effective April 6, 1986, (unless stayed pending reconsideration). Petitions to stay must be filed by March 17, 1986, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by March 27, 1986, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: T.S.L. Perlman, 1401 New York Avenue, NW., Washington, DC 20005.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio.*

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: March 3, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

[FR Doc. 86–5043 Filed 3–6–86; 8:45 am]

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Proposed Consent Decree Pursuant to Clean Water Act

In accordance with Department policy, 28 CFR § 50.7, notice is hereby given that on February 24, 1986, a proposed consent decree in *United States of America* v. *Murfreesboro Water and Sewer Department of the City of Murfreesboro, Tennessee and The State of Tennessee,* Civil Action No. 3–85–0218 was lodged with the United States District Court for the Middle District of Tennessee. The proposed consent decree concerns discharge of pollutants from the City of Murfreesboro's sewage treatment plant. The proposed consent decree requires the defendant to comply with its Clean Water Act permit and pay civil penalties for past violations. The consent decree provides that defendant will undertake a program of construction and modifications to its sewage collection system in accordance with a schedule set forth in the decree, sets interim discharge limits, and requires defendant to achieve compliance with its permit no later than July 1, 1988. Stipulated penalties are mandated for failure to achieve interim discharge limits or meet compliance schedules. The City of Murfreesboro is required to pay a civil penalty of $10,000 in settlement of the government's civil panalty claims.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 50530, and should refer to *United States of America* v. *Murfreesboro Water and Sewer Department of the City of Murfreesboro,* D.J. Ref. 90–5–1–1–2255.

The proposed consent decree may be examined at the office of the United States Attorney, Middle District of Tennessee, 879 U.S. Courthouse, Nashville, Tennessee 37203 and at the Region IV Office of the Environmental Protection Agency, 345 Courtland Street NE., Atlanta, Georgia 30365. Copies of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.70 (10 cents per page reproduction costs) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Antitrust Division

United States v. S.p.A. Officine Maccaferri; Maccaferri Gabions Manufacturing Company, Inc.; and River and Sea Gabions (London) Limited: Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. section 16(b)–(h), that a complaint, proposed final judgment, stipulation, and competitive impact statement have been filed with the United States District Court for the District of Maryland in *United States of America* v. *S.p.A. Officine Maccaferri; Maccaferri Gabions Manufacturing Company, Inc.; and River and Sea Gabions (London) Limited.*

The complaint of the United States in this case alleges that the effect of the 1983 acquisition of Terra Aqua Inc. by River and Sea Gabions (London) Limited may be substantially to lessen competition in the United States market for the manufacture and sale of gabions, in violation of section 7 of the Clayton Act (15 U.S.C. 18).

Gabions are rectangular, wire mesh containers which are filled with hand-size stones and wired together to form large structures that are used in river training, flood control, landscaping, and erosion control. Gabions are used primarily in municipal, state and federal public works projects.

Officine Maccaferri, through its subsidiary, River and Sea Gabions (London) Limited, acquired Terra Aqua on February 15, 1983. River and Sea was named as a defendant in the complaint, as was Maccaferri Gabions Manufacturing Company, Inc. ("MGMC"). MGMC, which is also controlled by Maccaferri, manufactures gabions at its plant in Williamsport, Maryland and sells them throughout the United States. Prior to the acquisition in 1983, Terra Aqua and MGMC were the only two manufacturers of gabions in the United States. Officine Maccaferri now accounts for almost 99% of the approximately $12 million United States market for gabions.

The proposed final judgment required Officine Maccaferri and River and Sea to divest all of their interest in Terra Aqua, with the exception of certain proprietary equipment installed by Maccaferri, within six months of the date of entry of the proposed final judgment. If they fail to do so, the proposed final judgment provides that Terra Aqua shall be sold by a trustee to a purchaser acceptable to the United States.

The proposed final judgment also requires the defendants to maintain and make certain repairs and improvements to Terra Aqua's production equipment prior to divestiture. In addition, the proposed final judgment contains other provisions designed to protect Terra Aqua's ability to compete after its divestiture.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the court. Comments should be directed to John W. Clark, Chief, Professions and Intellectual Property Section, Antitrust Division, United States Department of Justice, Room 9120, Star Building, 414 11th St. NW., Washington, D.C. 20530 (telephone (202) 724–6335).

Joseph H. Widmar,

Director of Operations Antitrust Division.

U.S. District Court for the District of Maryland

[Civil Action No. B–86–612]

United States of America, Plaintiff, v. *S.p.A. Officine Maccaferri; Maccaferri Gabions Manufacturing Company, Inc.; and River and Sea Gabions (London) Limited,* Defendants.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

(1) The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalities Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendant and by filing that notice with the Court.

(2) The parties shall abide by and comply with the provisions of the Final Judgment pending entry of the Final Judgment.

(3) In the event plaintiff withdraws its consent or if the proposal Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated: February 24, 1986.

Douglas H. Ginsburg, *Assistant Attorney General.*

Mark Leddy, Joseph H. Widmar, John W. Clark, *Attorneys, Department of Justice.*

John F. Greaney, J. Robert Kramer, II, Phillip R. Malone, *Attorneys, Department of Justice, Antitrust Division,* Washington, DC 20530, Telephone: 202/724–7469.

U.S. District Court for the District of Maryland

Civil Action No. B–86–612

United States of America, Plaintiff, v. *S.p.A. Officine Maccaferri; Maccaferri Gabions Manufacturing Company, Inc.; and River and Sea Gabions (London) Limited,* Defendants.

Final Judgment

Whereas, plaintiff, United States of America, having filed its Complaint herein on February 24, 1986, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein, and without this final Judgment constituting any evidence against, or any admission by, any party with respect to any such issue;

And whereas, the defendants have agreed to be bound by the provisions of this Final Judgment pending its approval by the Court;

And whereas, prompt and certain divestiture is the essence of this agreement and the defendants have represented to the plaintiff that the divestiture required below can and will be made and that defendants will later raise no claims of hardship or difficulty as grounds for asking the Court to modify any of the provisions contained below;

Now, therefore, before the taking of any testimony, and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed as follows:

I

This Court has jurisdiction of the subject matter of this action and of each of the parties hereto. The Complaint states a claim upon which relief may be granted against defendants under

VOL 51
ISS 45
MR 7
1986
UMI

Section 7 of the Clayton Act, as amended (15 U.S.C. 18).

II

As used in this Final Judgment:

A. "Gabions" means rectangular, compartmented containers fabricated from a triple-twisted hexagonal mesh of heavily galvanized steel wire, sometimes with an additional polyvinyl chloride coating, designed to be filled with hand-size stones and wired together with other gabions of form flexible and permeable structures used in river training and flood control, soil erosion control and shore and coastal protectio applications.

B. "Defendants" means S.p.A. Officine Maccaferri, Maccaferri Gabions Manufacturing Company, Inc., River and Sea Gabions (London) Limited, each division, subsidiary or affilicate thereof and each officer, director, employer, attorney, agent or other person acting for or on behalf of any of them.

C. "Terra Aqua" means Terra Aqua, Inc., each division, subsidiary or affiliate thereof and each officer, director, employee, attorney, agent or other person acting for or on behalf of any of them. The term Terra Aqua shall exclude all Retained Assets.

D. "4930 Property" means the real property and structure owned by Terra Aqua located at 4950 Energy way, Reno, Nevada.

E. "Retained Assets" means the machinery, identified in Appendix A to this Final Judgment, which was installed by defendants at the 4930 Property in 1984 and has been used in the production of Maccaferri Gabions. If the buyer of Terra Aqua does not exercise its right to purchase the 4950 Property, the 4930 Property shall also be considered a Retained Asset.

F. "Person" means any natural person, corporation, association, firm, partnership or other business or legal entity.

III

A. The provisions of this Final Judgment shall apply to the defendants, to each of their divisions, subsidiaries, affiliates, successors and assigns, to each of their officers, directors, agents, attorneys and to all other persons in active concert or participation with any of them who receive actual notice of this final Judgment by personal service or otherwise.

B. Defendants shall require, as a condition of the sale or other disposition of all or substantially all of their assets involved in the production of gabions other than Terra Aqua, that the acquiring party agree to be bound by the provisions of this Final Judgment.

IV

A. Within six (6) months of the date of entry of this Final Judgement, defendants are hereby ordered and directed to divest to a purchaser or purchasers all of their direct and indirect ownership in and control over Terra Aqua.

B. Divestiture of Terra Aqua shall be accomplished in such a way as to ensure that, as of the time of divestiture, it can reasonably be anticipated that Terra Aqua can and will be operated by the purchaser or purchasers as a viable, ongoing business engaged in the manufacture and sale of gabions. Divestiture shall be made to a purchaser or purchasers who shall demonstrate to the plaintiff or, if plaintiff objects, to the Court that (i) the purchase is for the purpose of competing effectively in the manufacture and sale of gabions, and (ii) the purchaser or purchasers have the managerial, operational and financial capability to compete effectively in the manufacture and sale of gabions.

C. In accomplishing the divestiture ordered by this Final Judgment, the defendants shall make known, by usual and customary means, the availability of Terra Aqua for sale as an ongoing business. The defendants shall notify any person making an inquiry regarding the possible purchase of Terra Aqua that the sale is being made pursuant to this Final Judgment and provide such person with a copy of this Final Judgment. The defendants shall also furnish to all bona fide prospective purchasers who so request all pertinent information regarding Terra Aqua and shall permit them to make such inspection of physical facilities and any and all financial, operational, or other documents and information as may be relevant to the sale of Terra Aqua.

D. The purchaser or purchasers shall have the right, but not the obligation, to purchase the 4930 Property. If the purchaser or purchasers exercise their right to purchase such property, defendants shall remove all Retained Assets from the 4920 Property at their own expense. In the event the purchaser or purchasers elect not to purchase the 4930 Property, one or more of the defendants or an agent thereof will assume any mortgage liability appertaining to the 490 Property.

V.

A. If the defendants have not divested all of their ownership interest in Terra Aqua within the time period specified in Section IV(A) of this Final Judgment, the Court shall, on application of the plaintiff, appoint a trustee to effect the divestiture. Such appointment shall become effective not more than 45 days following the filing of the petition. The trustee shall dispose of Terra Aqua at such price and on such terms as are then obtainable upon a reasonable effort by the trustee, subject to the provisions of Section VI of this Final Judgement, and shall have such other powers as this Court shall deem appropriate. The trustee shall have the exclusive right and power to divest Terra Aqua, and defendants shall not object to a sale by the trustee on any grounds other than malfeasance.

B. If defendants have not divested all of their ownership interest in Terra Aqua within five (5) months of the date of entry of this Final Judgment, the plaintiff and the defendants (acting jointly) shall immediately notify each other in writing of the names and qualifications of not more than two (2) nominees for the position of trustee for the required divestiture. The parties shall attempt to agree upon one of the nominees to serve as the trustee. If the parties are able to agree on a trustee within thirty (30) days of the exchange of names, plaintiff shall notify this Court of the person upon whom the parties agreed and this Court shall appoint such person as the trustee. If the parties are unable to agree within that time period, plaintiff shall furnish this Court the names of each party's nominees. This Court may hear the parties as to the qualifications of the nominees and shall appoint one of the nominees as the trustee.

C. The trustee shall serve at the cost and expense of the defendants, on such terms and conditions as the Court may prescribe, and shall account for all monies derived from a sale of Terra Aqua and all costs and expenses so incurred. After approval by the Court of the trustee's accounting, including fees for its services, all remaining monies shall be paid to the defendants and the trust shall then be terminated. The compensation of such trustee shall be based on a fee arrangement providing the trustee with an incentive based on the price and terms of the divestiture and the speed with which it is accomplished.

D. Defendants shall use their best efforts to assist the trustee in accomplishing the required divestiture. The trustee shall have full and complete access to the facility, personnel, books and records of Terra Aqua, and defendants shall develop such financial or other information relevant to the assets to be divested as the trustee may request. Defendants shall take no actior to interfere with or impede the trustee's accomplishment of the divestiture.

E. After its appointment, the trustee shall file monthly reports with the parties and the Court setting forth the trustee's efforts to accomplish divestiture as contemplated under this Final Judgment. If the trustee has not accomplished such divestiture within six (6) months after its appointment, the trustee shall thereupon promptly file with the Court a report setting forth (i) the trustee's efforts to accomplish the required divestiture, (ii) the reasons, in the trustees' judgment, why the required divestiture has not been accomplished, and (iii) the trustee's recommendations. The trustee shall at the same time furnish such report to the parties, who shall each have the right to be heard and to make additional recommendations consistent with the purpose of the trust. The Court shall thereafter enter such orders as it shall deem appropriate in order to carry out the purpose of the trust, which shall, if necessary, include extending the trust and the term of the trustee's appointment.

VI

At least thirty (30) days prior to the scheduled closing date of any proposed divestiture pursuant to Section IV or V of this Final Judgment, defendants or the trustee, whichever is then responsible for effecting the divestiture required herein, shall notify the plaintiff of the proposed divestiture. If a trustee is responsible, it shall similarly notify the defendants. The notice shall set forth the details of the proposed transaction and list the name, address and telephone number of each person not previously identified who offered or expressed an interest or desire to acquire any ownership interest in Terra Aqua together with full details of same. Within fifteen (15) days of receipt by plaintiff of such notice, the plaintiff may request additional information concerning the proposed divestiture and the proposed purchaser. The defendants and, if applicable, the trustee shall furnish the additional information within twenty (20) days of the receipt of the request, unless the parties shall otherwise agree. Within thirty (30) days after receipt of the notice or within (15) days after receipt of the additional information, whichever is later, the plaintiff shall notify in writing the defendants and the trustee, if there is one, if it objects to the proposed divestiture. If the plaintiff fails to object within the periods specified, or if the plaintiff notifies in writing the defendants and the trustee, if there is one, that it does not object, then the divestiture may be consummated, subject only to defendants' limited right to object to the sale on the ground set forth in Section V(A). Upon objection by the plaintiff, or by the defendants on the ground set forth in section V(A), the proposed divestiture shall not be accomplished unless approved by the Court. The defendants shall have no right to object to any divestiture of Terra Aqua proposed by the trustee except on the ground set forth in Section V(A).

VII

Thirty (30) days from the date of entry of this Final Judgment and every thirty (30) days thereafter until the divestiture has been completed, the defendants shall deliver to plaintiff an affidavit as to the fact and manner of compliance with Section IV of this Final Judgment. Each such affidavit shall include the name, address and telephone number of each person who, during the preceding thirty (30) days, made an offer, expressed an interest or desire to acquire, or entered into negotiations to acquire, or made an inquiry about acquiring any ownership interest in, Terra Aqua, and shall describe in detail each contact with any such person during that period. The defendants shall maintain full records of all efforts made to divest Terral Aqua.

VIII

Before the divestiture required by this Final Judgment has been accomplished, the defendants shall make improvements and repairs sufficient to restore the gabion production machinery of Terra Aqua at least to its original design performance capability and to assure the sale of Terra Aqua as a viable competitor in the manufacture and sale of gabions. Such improvements and repairs shall include, but not be limited to, those specified in the March 19, 1985 quotation of Mecon Industries Limited, and shall be performed by Mecon Industries Limited or other contractor acceptable to plaintiff.

IX

Until the divestiture required by this Final Judgment has been accomplished, the defendants shall:

A. Maintain the gabion production machinery of Terra Aqua in good working order;

B. Upon completion of the improvements and repairs required in Section VIII above, refrain from producing gabions at Terra Aqua with the Retained Assets and commence gabion production at Terra Aqua using the gabion production machinery that is to be divested;

C. Refrain from altering or selling any assets of Terra Aqua, other than in the ordinary course of business or as required in Sections VIII or IX B above, or from taking any action that will have the effect of reducing the scope of Terra Aqua's manufacturing or sales operations or its product line from that existing at the time of the defendants' acquisition of Terra Aqua, without the prior approval of the plaintiff;

D. Maintain adequate inventories of Terra Aqua gabions to allow the purchase of Terra Aqua as a viable ongoing business;

E. Refrain from taking any action that would jeopardize the sale of Terra Aqua as a viable competitor in the manufacture and sale of gabions; and

F. Maintain the existing marketing organization for the sale of gabions by Terra Aqua separate and apart from the marketing organization of MGMC in the same manner and to the same extent as if Terra Aqua and MGMC were competitors, and there shall be no understanding, agreement, consultation, or other communication direct or indirect, between the two organizations or their members with regard to prices or terms of sale to customers of gabions or as to the allocation or division of trade or customers. Defendants shall forthwith advise in writing all their managerial employees having any responsibilities with regard to the marketing of gabions in the United States of the provisions of this paragraph.

X

For the purposes of determining or securing compliance with this Final Judgment and subject to any legally recognized privilege, from time to time:

A. Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to any defendant made to its principal office, be permitted:

1. Access during office hours of such defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

2. Subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview officers, employees and agents of such defendant, who may have counsel present, regarding any such matters.

B. Upon the written request of the Attorney General or of the Assistant Atttorney General in charge of the

VOL 51 ISS 45 MR 7 1986 UMI

Antitrust Division made to any defendant's principal office, such defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

No information or documents obtained by the means provided in this Section X shall be divulged by a representative of the Department of Justice to any person other than a duly authorized representatives of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

C. If at the time information or documents are furnished by any defendant to plaintiff, such defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and such defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten days' notice shall be given by plaintiff to defendants prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which the defendants are not a party.

XI

A. Defendants are hereby enjoined and restrained for a period of three (3) years from the date of divestiture of Terra Aqua from attempting to have any gabion product standard written in a way that would exclude gabions produced by Terra Aqua. Nothing herein, however, shall preclude defendants from recommending that potential customers use specific sizes or types of gabions on specific projects or from competing on the basis of quality.

B. Defendants are hereby enjoined and restrained for a period of one year from the date of divestiture from manufacturing gabions in the States of California, Oregon, Washington, Idaho, Montana, Nevada, Utah, Wyoming, Colorado, Arizona and New Mexico, provided, however, that such injunction shall terminate if the purchaser or purchasers of Terra Aqua manufacture gabions in a location in the United States outside the above states.

C. Defendants are hereby enjoined and restrained for a period of one year from the date of divestiture from offering any employment contract to any officer, director or employee of Terra Aqua who was not an officer, director or employee of the defendants prior to the acquisition of Terra Aqua and who has been offered employment by the purchaser on terms equivalent to or better than those in effect on July 1, 1985.

XII

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of any violations hereof.

XIII

This Final Judgment will expire on the tenth anniversary of the date of its entry or upon motion by plaintiff.

XIV

Entry of this Final Judgment is in the public interest.

Dated:

United States District Judge.

Appendix A

Maccaferri Gabion Production Line Components

I. Equipment Used in the Manufacture of Double Twist Hexagonal Wire Mesh

A. *Steel wire payoff frame* for 52 coil payoff, complete with unwinding (swinging) pressure roller pullies, wire guide combs and rollers, wire straighteners attached to connecting bar, electrical ground wiring, receptacle and wiring for butt welding machine, 200 custom-design wire stands and 149 wire stand "top hats", replacement parts, and two motorized hand pallet trucks (BT LIFT modified) for moving and handling wire coils on carriers.

B. *Double twist hexagonal wire mesh making machine* (4.2 m maximum wire mesh width), complete with elevated walkway, extra set of spiral holding tubes, two sets (one spare) of electrical motors and variable speed transmissions, electrical control panel (fully wired) and control sensors. (Custom tools and replacement parts).

C. Steel wire payoff frame for 6 coil payoff, complete with unwinding (swinging) pressure roller pullies, wire guide combs and rollers, wire straighteners attached to connecting bar, electrical ground wiring, receptacle and wiring for butt welding machine. (Replacement parts).

D. Automatic wire spiral making machine for producing spirals used in mesh making machine, complete with gear reducer motor and electrical control panel, various replacement parts, and 26 steel spiral containers (custom-designed) to hold spirals manufactured on the spiral making machine.

E. *butt welder machines* (two machines) for joining the ends of wire used in the mesh making machine, the spiral making machine, the take-up coiler and elsewhere.

F. *Take-Up Coiler* for reclaiming unused ends of wire spirals, complete with gear reducer motor and electrical control panel.

II. Equipment Used in the Production of Gabion Bodies (in Large Panels)

A. *Automatic mesh feeder and cutting machine* (4.2 m maximum wire mesh width) for measuring and cutting wire mesh into panels, complete with fully wired electrical control panel, control sensors, gear reducer motors and two waste wire trays.

B. *Steel conveyer line bench* (8 m x 4.8 m) for moving cut panels to edging machines, complete with electrical gear reducer motor rollers and belts (fully wired). (Replacement belts).

C. *Edging machines for Gabion mesh panels* (two machines) (4.2 m maximum mesh width) for attaching reinforcing selvage wires to two edges of the panels, complete with gear reducer motors and electrical control panels and lubricant tank with submerged pump. (Replacement parts).

III. Equipment Used in the Production of Diaphragm Panels

A. *Automatic mesh feeder and cutting machine* (1.2 m maximum wire mesh width) for measuring and cutting mesh into diaphragms, complete with fully wired electrical control panel, control sensors, gear reducer motors and wire waste tray.

B. *Steel conveyer line bench* (2.5 m x 1.4 m) for moving cut diaphragms to edging machines, complete with gear reducer motor, rollers and belts (fully wired).

C. *edging machine for diaphragm mesh panels* (two machines: 1.2 m maximum wire mesh width, located on-line; 2.1 m maximum wire mesh width, located off-line) for attaching reinforcing selvage wire to one edge of the diaphragm panels, complete with reducer motor, electrical control panel and lubricant tank with submerged pump. (Replacement parts).

D. *Steel diaphragm pallets* (69) (custom designed) to hold diaphragms in stacks.

IV. Equipment Used in the Assembly of Gabions

A. *Machines to open and shape diaphragm edge* (two machines), complete with gear reducer motor and electrical control panel.

B. *Machines to fasten side diaphragm to gabion Body* (two machines), complete with gear reducer motors and electrical control panel (two motors and one control panel for each), and transversal connecting bars. (Replacement parts).

C. *Machines to fasten center disphragms to Gabion body* (three machines), complete with motors and electrical control panel (two motors and one control panel for each), complete payoff stands (three). (Replacement parts).

D. *Wire rod straightener and cutting machine* for making wire reinforcing selvage rods of various lengths, complete with motor, electrical control panel and heavy duty payoff stand (custom made tools and various replacement parts), and 27 steel feed trays of various sizes to contain manufactured selvage wire rods.

V. Equipment Used in Folding, Stacking and Bundling of Finished Gabions

A. *Steel conveyer line benches* (two benches) (4 m x 2 m) for moving completed gabions to the folding station.

B. *Adjustable floor folding pins* (one unit) for holding gabions in position while they are folded.

C. *Calendar machine* for pressing folded gabions, complete with gear reducer motors and mechanical feed bench.

D. *Gabion stacker* for automatically stacking preset number of gabions, complete with gear reducer motors and electrical control panels.

E. *Steel gabion pallets* (10) custom designed to fit into gabion stacker and hold bundles of stacked gabions.

F. *Power stacker* (BT lift) custom built to fit notches on hydraulic press, for lifting and removing custom gabion pallets and gabions from gabion stacker and for moving gabions to hydraulic press, complete with battery charger.

G. *Hydraulic press* for compressing and banding gabion bundles, complete with hydraulic and electrical control panels.

VI. Equipment Used in Production of Wire Mesh in Rolls

A. *Steel wire mesh rolling machines* for accumulating in rolls the output of wire mesh making machine, complete with gear reducer motor, electrical control and payoff stand.

U.S. District Court for the District of Maryland

[Civil Action No. B-86-612]

S.p. A. Officine Maccaferri; Maccaferri Gabions Manufacturing Company, Inc.; and River and Sea Gabions (London) Limited, Defendants.

Competitive Impact Statement

The United States, pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act ("APPA"), 15 U.S.C. 16(b)–(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I—Nature and Purpose of the Proceeding

On February 24, 1986 the United States filed a civil antitrust complaint under Section 15 of the Clayton Act, 15 U.S.C. 25, challenging the February 15, 1983 acquisition of Terra Aqua Inc. ("Terra Aqua") by S.p.A. Officine Maccaferri ("Officine") through its subsidiary, River and Sea Gabions (London) Limited ("R&S"), as a violation of section 7 of the Clayton Act, 15 U.S.C. 18. Also named in the Complaint was Maccaferri Gabbions Manufacturing Company, Inc. ("MGMC"), which is also controlled by Officine. The Complaint alleges that the effect of the acquisition may be substantially to lessen competition in the United States market for the manufacture and sale of gabions. The Complaint seeks the divestiture of Terra Aqua and a permanent injunction preventing defendants from carrying out any future acquisition of Terra Aqua.

Plaintiff and defendants have stipulated that the proposed Final Judgment may be entered after compliance with the APPA. Entry of the proposed Final Judgment would terminate this action, except that the Court would retain jurisdiction to construe, modify and enforce the proposed Final Judgment and to punish violations of the proposed Final Judgment.

II—Events Giving Rise to the Alleged Violation

On or about February 15, 1983, Officine, through its subsidiary, R&S, acquired all of the capital stock of Terra Aqua for $2.46 million in cash and notes. Prior to its acquisition by R&S, Terra Aqua operated as a division of Bekaert Steel Wire Corporation ("BSWC") and was engaged in the manufacture and sale of gabions from a facility located in Reno, Nevada. At the time of the acquisition, Officine competed directly with Terra Aqua through its subsidiary, MGMC, which manufactures gabions in Williamsport, Maryland.

Gabions are rectangular, compartmented containers fabricated from a triple-twisted hexagonal mesh of heavily galvanized steel wire. Gabions are designed to be filled with hand-size stones and wired together with other gabions to form a monolithic, flexible and permeable structure used in soil conservation and ecology projects. Gabions are also available with an additional polyvinyl chloride coating when they are used in corrosive conditions, such as salt water.

Gabion structures are well suited to soil conservation and ecology projects. Their applications fall within three broad categories: river training and flood control; consolidation and protection from erosion on such projects as roads, railways, airports and parks; and, shore and coastal protection. Gabions have unique uses and characteristics, including flexibility, permeability, durability, versatility and economy which differentiate them from other methods of erosion control.

From 1976 until early 1981, MGMC and BSWC conspired to fix the prices at which they sold gabions in the United States. On March 6, 1985, MGMC pled guilty to a criminal Information charging it with conspiring to fix prices and divide the United States gabion market in violation of Section 1 of the Sherman Act, 15 U.S.C. 1. MGMC and the United States agreed, among other things, to recommend jointly that MGMC be sentenced to pay a $500,000 fine as punishment for that offense. Subsequently, MGMC paid the United States $115,340 in settlement of its claim for civil damages.

On March 6, 1985, BSWC and its Belgian parent company, N.V. Bekaert S.A. ("Bekaert"), were indicted for conspiring to fix prices and divide the United States gabion market in violation of Section 1 of the Sherman Act, 15 U.S.C. 1. On October 16, 1985, BSWC and Bekaert pled guility to the offense charged in the Indictment. Bekaert paid a $300,000 fine and BSWC paid a $325,000 fine. Thereafter, BSWC paid the United States $112,731 in settlement of its claim for civil damages.

Prior to the February 15, 1983 acquisition of Terra Aqua by R&S, the gabion market in the United States was highly concentrated. Officine, through its subsidiary, MGMC, had a market share of approximately 60 percent and Terra Aqua had a market share of approximately 40 percent. As a result of the acquisition of Terra Aqua by R&S, Terra Aqua and MGMC are under the common control of Officine and Officine has acquired a virtual monopoly in the United States gabion market. The

UMI

Herfindahl-Hirschman Index, a measure of market concentration calculated by squaring the market share of each firm competing in the market and then summing the resulting numbers, currently approaches 10,000.

Based upon the foregoing and other facts, the Complaint alleges that the manufacture and sale of gabions comprise a relevant market for antitrust purposes, and that the effect of the acquisition may be substantially to lessen competition in the manufacture and sale of gabions in the United States in violation of Section 7 of the Clayton Act.

III—Explanation of the Proposed Final Judgment

Plaintiff and defendants have stipulated that the proposed Final Judgment may be entered by the Court at any time after compliance with the APPA. The proposed Final Judgment constitutes no admission by any party as to any issue of fact or law. Under the provisions of section 2(e) of the APPA, entry of the proposed Final Judgment is conditioned upon a determination by the Court that the proposed Final Judgment is in the public interest.

The proposed Final Judgment requires defendants to divest their entire interest in Terra Aqua, with the exception of certain proprietary equipment installed by Maccaferri in late 1984, absolutely and unconditionally, by their own efforts within six months of the entry of the Final Judgment. If defendants cannot accomplish the required divestiture within the above time period, the proposed Final Judgment provides that, upon application by the plaintiff, the Court shall appoint a trustee who shall sell Terra Aqua.

Terra Aqua must be divested to a purchaser who can and will operate it as a viable, ongoing business that can compete effectively in the gabion market. The purchaser has the option to purchase Terra Aqua's plant in Reno or to remove the production equipment to a location of its choice. The defendants will take all reasonable steps necessary to accomplish divestiture and shall cooperate with bona fide prospective purchasers and the trustee.

If a trustee is appointed, the proposed Final Judgment provides that defendants will pay all costs and expenses of the trustee. The trustee's commission will be structured so as to provide an incentive for the trustee based on the price obtained and the speed with which divestitute is accomplished. If after six months from the date of the trustee's appointment the required divestiture has not been accomplished, the trustee and the parties shall make recommendations to the Court and the Court shall enter such orders as it deems appropriate to effect divestiture.

The proposed Final Judgment provides that before divestiture the defendants must make certain improvements to the machinery that would have been made had defendants not installed proprietary equipment at the plant. Until the required divestiture has been accomplished, the defendants must properly maintain Terra Aqua's production equipment. Defendants are also enjoined from taking any action that would reduce the scope of Terra Aqua's manufacturing or sales operations or product line or that would jeopardize the sale of Terra Aqua as a viable competitor in the manufacturing or sale of gabions. Also, the marketing organizations of Terra Aqua and defendants must be kept separate until divestiture of Terra Aqua is accomplished. Finally, there are post-divestiture restrictions on defendants' ability to manufacture in certain western states, to attempt to have gabion product standards written in such a way as to exclude gabions manufactured by Terra Aqua and to offer employment to Terra Aqua employees.

IV—Remedies Available To Potential Private Litigants

Section 4 of the Clayton Act (15 U.S.C. 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorney fees. Entry of the Final Judgment will neither impair nor assist the bringing of any private antitrust damages actions. Under the provisions of section 5(a) of the Clayton Act (15 U.S.C. 16(a)), the Final Judgment has no *prima facie* effect in any private lawsuit that may be brought against the defendants.

V—Procedures Available for Modification of the Proposed Final Judgment

As provided by the APPA, any person wishing to comment upon the Final Judgment may within the statutory 60-day comment period submit written comments to John W. Clark, Chief, Professions and Intellectual Property Section, Antitrust Division, United States Department of Justice, Washington, D.C. 20530. These comments and the Department's responses will be filed with the Court and published in the **Federal Register**. All comments will be given due consideration by the Department, which remains free to withdraw its consent to the Judgment at any time prior to entry. The Judgment provides that the Court retains jurisdiction over this action, and any party may apply to the Court for any order necessary or appropriate for its modification, interpretation, or enforcement.

VI—Alternatives to the Proposed Final Judgment

The Government's original divestiture plan included, in addition to what is included in the proposed Final Judgment, gabion production equipment installed by defendants in Reno in late 1984. During negotiations between the Department and defendants it became clear that defendants would not enter into a consent decree that included such a requirement because of the proprietary nature of the machinery. Defendants eventually convinced the Department that the machinery was in fact proprietary, that it was installed to allow defendants to produce a uniform "Maccaferri" gabion and that the Terra Aqua machinery, at the time of its acquisition by R&S, was competitive. To assure the continued competitiveness of the Terra Aqua machinery, however, the proposed Final Judgment provides that, before divestiture, the defendants must make certain improvements to the machinery that would have been made had defendants not installed proprietary equipment at the plant.

An alternative considered by the Department to granting the purchaser of Terra Aqua the option of purchasing the Reno, Nevada land and building in which Terra Aqua's manufacturing facility is located (hereinafter the "Reno Property") was to insist on their divestiture. It was clear to the Department, however, that the gabion production equipment in Reno was readily moveable. Since the gabion market is both small and not well known, the Department believed that there was probably a small group of prospective purchasers. We were, therefore, concerned that requiring the divestiture of the Reno Property, which is worth more than the production machinery, would further limit the number of prospective purchasers. We decided, therefore, not to require the divestiture of the Reno Property, but to give a prospective purchaser the flexibility of either purchasing it or moving the production machinery to a location of its choice.

The Department also considered whether to agree to the defendants' request that a minimum price be set on the Reno Property in the event the purchaser of Terra Aqua decides to

purchase it. The Department usually opposes such requests. In this case, because the value of the real estate is higher than the value of the gabion production machinery, we considered whether a minimum sales price would discourage potential purchasers not interested in producing gabions.

The defendants have subsequently informed the Department, however, that they plan to convert a portion of an existing Terra Aqua debt to a mortgage on the Reno Property. The Department believes that the existence of this assumed liability will effectively discourage a potential purchaser who is not interested in producing gabions from acquiring the Reno Property solely for the purpose of reselling its real property. We decided, therefore, not to accept, and defendants now have withdrawn, the request for a provision setting a minimum price on the Reno Property.

As the proposed decree will completely cure the anticompetitive consequences of the acquisition of Terra Aqua by R&S, the United States believes that entry of the proposed Final Judgment is in the public interest.

VII—Determinative Materials and Documents

There are no materials or documents that the United States considered determinative in formulating this proposed Final Judgment. Accordingly, none are being filed with this Competitive Impact Statement.

Dated: February 24, 1986.

Respectfully submitted,

John F. Greaney, J. Robert Kramer II,
Attorneys, Department of Justice, Antitrust Division, Washington, D.C. 20530, Telephone: 202/724–7469.

Certificate of Service

I hereby certify that I have served the foregoing Competitive Impact Statement upon the following counsel by causing copies thereof to be deposited in the United States mail, postage prepaid, on February 24, 1986:

Jeffrey E. Livingston, Pavia & Harcourt, 600 Madison Avenue, New York, New York 10022

Michael Malina, Kaye, Scholer, Fierman, Hays and Handler, 425 Park Avenue, New York, New York 10022

Phillip R. Malone,
Attorney, Department of Justice.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilites under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of recordkeeping/reporting requirements under review: On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extension, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202–523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW, Room N–1301, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Nancy Wentzler, Telephone 202–395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, D.C. 20503.

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Collection of Information in Current Rules

Occupational Safety and Health Administration, Coke Oven Emissions, OSHA–249, 1218–0010. On occasion; businesses and other for profit; small businesses or organizations; 25 respondents; 108,105 hours; 0 forms.

The purpose of this information collection requirement is to provide protection for employees against the health effects associated with occupational exposure to coke oven emissions. Employers must monitor employee exposure, keep employee exposures within permissible limits and provide employees with medical exams and training.

Signed at Washington, D.C., this 4th day of March 1986.

Harry Echols,
Acting Departmental Clearance Officer.

Employment and Training Administration

[TA-W-16, 228]

Stackpole Corp.; St. Marys, PA; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at the Stackpole Corporation, St. Marys, Pennsylvania. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 85–16]

Denial of Application; Michael Alva Marshall, M.D.

On February 22, 1985, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an order to show cause to Michael Alva Marshall, M.D., of 28509 River Crest drive, Southfield, Michigan 48075 (Respondent) proposing to deny his application for registration as a practitioner under 21 U.S.C. 823(f). The statutory predicate for the proposed action was Respondent's felony conviction on February 3, 1983, of distribution of Percodan, a controlled substance, in violation of 21 U.S.C. 841(a)(1). Respondent, acting *pro se*, requested a hearing on the issues raised in the order to show cause. Administrative Law Judge Francis L. Young thereafter issued an order for prehearing statements. Both sides submitted prehearing statements.

On October 21, 1985, Government counsel filed a motion for summary disposition on the ground that Respondent is not duly authorized to handle controlled substances in the State of Michigan. Respondent was given the opportunity to respond to this motion for summary disposition, but he has not done so. Upon expiration of Respondent's time to respond to the Motion, the Administrative Law Judge held that an evidentiary hearing was not necessary as there were no factual issues to be resolved.

On December 9, 1985, Administrative Law Judge Young issued his opinion and recommended findings of fact, conclusions of law, ruling and decision. No exceptions were filed, and on January 10, 1986, the Administrative Law Judge transmitted the record of these proceedings to the Administrator. The Administrator has considered this record in its entirely and, pursuant to 21 CFR 1316.67, hereby issues his final order in this matter, based upon findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that Government counsel learned by affadivit from Ann M. Keilen, Clerk of the Michigan Board of Pharmacy, Department of Licensing, that Michael Alva Marshall, M.D., was ordered to surrender his controlled substance license pursuant to a final order of the Michigan board of Medicine effective February 2, 1983, and that Respondent has not possessed a Michigan controlled substance license since that date. Further, as of October 10, 1985, no application for such a license had been submitted to the Michigan Board of Pharmacy by Respondent. Respondent, therefore, is without authority to manufacture, distribute, prescribe, dispense or possess controlled substances in the State of Michigan. This agency has consistently held that if a registrant or applicant is without authority to handle controlled substances under the laws of the state in which he practices, or proposes to practice, DEA is without statutory authority to issue or maintain a registration. See *Avner Kauffman, M.D.*, Docket No. 85–8, 50 FR 34208 (1985), *Leo M. Mullen, M.D.*, Docket No. 84–7, 50 FR 5827 (1985), *Floyd A. Santner, M.D.*, Docket No. 79–23, 47 FR 51831 (1982). The Controlled Substances Act of 1970 specifically provides that: "Practioners shall be registered to dispense or conduct research with controlled substances. . . if they are authorized to dispense or conduct research under the law of the state in which they practice." 21 U.S.C. 823(f). Since Respondent does not possess a controlled substance license in Michigan, he has no state authority to handle controlled substances. Therefore, a motion for summary disposition is properly entertained and granted.

The Administrative Law Judge notes that the order to show cause does not recite lack of state registration as a ground for the proposed denial of Respondent's application. However, this new ground was clearly set out in the motion for summary disposition and Respondent was given ample time to object to it or state a defense against it. Respondent has not done so. In the circumstances, it would be a needless exercise in formalism to require that the order to show cause be amended, or that a new one be issued.

Judge Young found that the record clearly shows that an evidentiary hearing is not necessary in this case. There is no lawful basis for DEA to grant a registration to Respondent since he has no state license to dispense controlled substances. Therefore, the Administrative Law Judge concluded that Respondent's application for registration should be denied.

The Administrator adopts the Administrative Law Judge's findings of fact, conclusions of law and recommendations in their entirety.

Having concluded that there is no lawful basis for granting Respondent's registration, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 28 CFR 0.100(b), hereby orders that the application for a DEA Certificate of Registration executed by Michael Alva Marshall, M.D., be, and hereby is, denied.

Dated: March 3, 1986.

John C. Lawn,

Administrator.

[FR Doc. 86–4967 Filed 3–6–86; 8:45 am]

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment and Training Administration

Federal-State Unemployment Compensation Program; Unemployment Insurance Program Letter Interpreting the Work-Training and Work-Relief Exemption

Section 3304(a)(6)(A) of the Federal Unemployment Tax Act (FUTA) requires, as one of several conditions for certain tax credits to employers, that employees of State and local government entities and certain nonprofit organizations be covered by State unemployment insurance (UI) laws. However, section 3309(b)(5), FUTA, permits exemptions from this mandatory coverage requirement for participants in unemployment work-relief and work-training programs.

Questions have arisen several times over the years as to what is and what is not a work-relief or work-training program. Those questions were addressed as they arose but it has become apparent that a more formal statement of the criteria for determining whether a program is work-relief or work-training is needed. Consequently, the Employment and Training Administration (ETA) published a proposed Unemployment Insurance Program Letter (UIPL) in the **Federal Register** July 24, 1985, 50 FR 30249. One of the possible characteristics of an exemptable program inadvertently omitted from the July 24 publication was published in the **Federal Register** on August 9, 1985, 50 FR 32328 and there was a commensurate extension of the 45 days within which written comments were requested and accepted. This final UIPL incorporates, wherever appropriate, changes and improvements submitted in those comments.

The ETA received 5 written responses, consisting of letters, listed below in the order received, from: (1) Illinois Department of Employment Security (IDES), (2) New York Department of Labor (NYDL), (3) Wisconsin Department of Industry, Labor and Human Relations (WDILHR),

(4) Maryland Department of Employment and Training (MDET), and (5) Wisconsin Department of Health and Social Services (WDHSS).

Illinois (IDES) commented that under the Job Training Partnership Act (JTPA) participants placed with governmental or nonprofit employers are exempt from UI coverage while participants placed with private employers are not exempt. A question is raised as to whether individuals placed with private (for-profit) employers may be exempted from coverage by interpretation of section 3309(b)(5), FUTA. Wisconsin (both WDILHR and WDHSS) letters also contained language indicating concerns with the problems of work-relief and work-training program employers.

These concerns are addressed here through a review of the basic considerations:

1. Section 3304(a)(6)(A) requires coverage of employees of State or local governmental entities and certain non-profit organizations, but

2. A State *may* at its option, exempt employees of such employers if the employees are employed only as participants in a work-relief or work-training program which is financed or assisted, in whole or in part, by a Federal, State, or local government agency.

Therefore, the answer to the Illinois question is no—neither section 3304(a)(6)(A), FUTA, nor section 3309(b)(5), FUTA, have any bearing upon UI coverage of employees of private, for-profit employers, either directly or by interpretation.

However, Illinois and Wisconsin comments on the problems of employers (especially JTPA employers) affected do highlight a possible source of some confusion—i.e., including characteristic A.(4.) in a list as though it were on a par with the other 3 characteristics listed. The characteristic stipulated that "the program is financed or assisted in whole or in part by a Federal agency or a State or a political subdivision thereof." This is merely a restatement of certain language in section 3309(b)(5), FUTA, while characteristics (1), (2) and (3) under 4.A. are all based upon a reasonable interpretation of that FUTA provision. Consequently, characteristic A.(4) is deleted and subsection A. is reworded as follows: "In order to qualify for the exemption provided by section 3309(b)(5), FUTA, an unemployment work-relief or work-training program that is financed or assisted in whole or in part by any Federal agency or an agency of a State or a political subdivision of a State, must have as a minimum the following characteristics."

Several other comments were concerned with the minimum characteristics of a work-relief or work-training program listed under Section 4.A. of the proposed UIPL.

Both New York (NYDL) and Wisconsin (WDILHR) are dissatisfied with the phrase "normal economic considerations" under A.(1). New York thinks a more explicit definition necessary and Wisconsin comments that an explanation of the meaning of those terms will probably eliminate misunderstandings about requirements. Accordingly, the paragraph is changed to read as follows: "the employer-employee relationship is based more on the participants' and the communities' needs than on normal economic considerations such as increased demand for a product or service or the filling of a bona fide job vacancy."

Wisconsin (WDILHR) asked for clarification of the phrase under A.(2) "taking into account as indispensable factors the economic and social status of the applicants." Accordingly, the paragraph is changed to read as follows: "(2) qualifications for the jobs take into account as indispensable factors the economic status (i.e., the standing conferred by income and assets) of the applicants." "Social" is deleted because it contributes nothing which cannot be inferred from the words "economic status," a term which is now defined.

Wisconsin (WDILHR) recommended that A.(3) be rewritten so as to require that the services performed by participants *provide* financial assistance, training or work experience. ETA disagrees with this comment because the criteria as stated is basic to distinguishing work-relief and work-training programs from other types of employment. Accordingly, no change has been made.

Some comments were directed to subsection B. which lists four characteristics, one of which must be present in a program for which employment may be exempted from coverage.

Wisconsin (WDILHR) commented that it should not be necessary for a work-training or work-relief program to have any of the characteristics stated under 4.B and the B should therefore, be rewritten to state that the category B. characteristics *may* be present, rather than that the least one will be present. ETA disagrees. We believe the criteria are broad enough the encompass any bona fide work-relief or work-training program. Accordingly, the requirement that such programs meet one or more of the characteristics has been retained.

Wisconsin (WDILHR) also commented that the meaning of B.(1) is unclear as to whether wages, hours and conditions of work need not be commensurate with those prevailing in the locality. ETA agrees. Accordingly, "necessarily" is deleted from the paragraph.

Wisconsin's (WDILHR) final comment urges discussion of the application of the interpretation of section 3309(b)(5), FUTA, to current Federally funded training and work-relief programs.

Since States under JTPA have considerable latitude in establishing programs, it is not possible to make a blanket statement that all JTPA-funded work-relief or work-training programs meet the criteria for exemption. But it is clear that the criteria apply to all government-assisted work-training or work-relief programs.

Mayland (MDET) commented that the following should be added to 4.B.(2) ". . . and there is little likelihood they will be continued when the program is discontinued." The final UIPL contains the suggesfed change.

Finally, Wisconsin's Department of Health and Social Services (WDHSS) stated that it shared the concerns of the State's Department of Industry, Labor, and Human Relations; those concerns have been addressed above. Another concern of the WDHSS is what constitutes public financing for work-relief and work-training programs. It is not appropriate here to do more than quote from section 3309(b)(5), FUTA: ". . . assisted or financed in whole or in part. . . ." What constitutes partial assistance or financing will have to be determined on a case-by-case basis, according to the facts of each case.

The UIPL published below takes effect upon publication.

Dated: February 26, 1986.

Roger D. Semerad,

Assistant Secretary of Labor.

Unemployment Insurance Program Letter No. 15–86—All State Employment Security Agencies

Barbara Ann Farmer, Acting Administrator for Regional Management

Interpretation of Section 3309(b)(5), FUTA, Work Relief or Work-Training Program Exceptions to Section 3304(a)(6)(A), FUTA, Coverage Requirement

1. *Purpose.* To provide an interpretation of Section 3309(b)(5) of the Federal Unemployment Tax Act (FUTA) which permits an exception to coverage requirements of section 3304(a)(6)(A), FUTA, for services performed as part of an unemployment

VOL 51
ISS 45
MR 7
1986
UMI

work-relief or work-training program by individuals receiving such work-relief or work-training.

2. *References.* Sections 3304(a)(6)(A), 3309(a), 3309(b)(5), 3306(c)(7), and 3306(c)(8) of the Federal Unemployment Tax Act (FUTA).

3. *Background.* Section 3304(a)(6)(A), FUTA, requires State unemployment insurance (UI) laws to provide for coverage of services to which section 3309(a)(1), FUTA, applies. Section 3309(a)(1), FUTA, applies to services performed for certain nonprofit organizations and to practically all services for State and local government entities, with certain permitted exceptions to both requirements. Section 3309(b)(5), FUTA, states one of those exceptions. If an unemployment work-relief or work-training program is assisted or financed in whole or in part by any Federal agency or an agency of a State or a political subdivision of a State, then services performed as part of such programs by individuals receiving work-relief or work-training *may* be exempted by State law from the mandatory UI coverage requirement. States are not precluded from covering such services; they are simply not required to provide such coverage in their laws as a condition for conformity with section 3304(a)(6)(A), FUTA. Over the years, questions have arisen many times about what constitutes a work-relief or work-training program for purposes of this exemption. State legislation has sometimes presented potential issues based on an incomplete understanding of the work-relief exemption. It is apparent that an interpretation of the exemption provided by section 3309(b)(5), FUTA, is needed.

4. *Interpretation.* As Federal law provides, an unemployment work-relief or work-training program must be assisted or financed in whole or in part by a Federal or State agency or a political subdivision of a State before services performed by individuals receiving such work relief or work training may be exempted from coverage.

A. In order to qualify for the exemption provided by section 3309(b)(5), FUTA, an unemployment work-relief or work-training program that is financed or assisted in whole or in part by any Federal agency or an agency of a State or a political subdivision of a State, must have as a minimum the following characteristics:

(1) The employer-employee relationship is based more on the participant's and communities' needs than normal economic considerations such as increased demand or the filling of a bona fide job vacancy;

(2) Qualifications for the jobs take into account as indispensable factors the economic status, i.e., the standing conferred by income and assets, of the applicants;

(3) The products or services are secondary to providing financial assistance, training, or work-experience to individuals to relieve them of their unemployment or poverty or to reduce their dependence upon various measures of relief, even though the work may be meaningful or serve a useful public purpose.

B. Such an unemployment work-relief or work-training program will also have one or more of the following characteristics:

(1) The wages, hours, and conditions of work are not commensurate with those prevailing in the locality for similar work;

(2) The jobs did not, or rarely did, exist before the program began (other than under similar programs) and there is little likelihood they will be continued when the program is discontinued;

(3) The services furnished, if any, are in the public interest and are not otherwise provided by the employer or its contractors; and

(4) The jobs do not displace regularly employed workers or impair existing contracts for services.

5. *Action Required.* State employment security agencies should take the actions appropriate to assure that the State's UI law is consistent with Federal requirements as interpreted herein.

6. *Inquiries.* Direct questions to the appropriate regional office.

[FR Doc. 86–5020 Filed 3–6–86; 8:45 am]

BILLING CODE 4510-30-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basis hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494), as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 80 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 28th day of February 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Occupational Safety and Health Administration

South Carolina Standards; Approval

I. Background.

Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On December 6, 1972, notice was published in the **Federal Register** (37 FR

VOL
51
ISS
45
MR
7
1986
UMI

25932) of the approval of the South Carolina plan and the adoption of Subpart C to Part 1952 containing the decision.

The South Carolina plan provides for the adoption of Federal standards as State standards after public hearing. Section 1953.20 of 29 CFR provides that "When . . . any alteration in the Federal program could have an adverse impact on the 'at least as effective as' status of the State program, a program change supplement to a State plan shall be required." By letter dated September 11, 1984 from Edgar L. McGowan, Commissioner, South Carolina Department of Labor, to Alan C. McMillan, Regional Administrator, and incorporated as part of the plan, the State submitted the following amended State standards comparable to Federal Standards: 29 CFR 1910.1047, Ethylene Oxide (49 FR 25738), dated June 22, 1984; 29 CFR 1910.19(h), Special Provisions for Air Contaminants, Ethylene Oxide (49 FR 25738), dated June 22, 1984; Deletion in Table Z–1 of 29 CFR 1910.1000, Ethylene Oxide (49 FR 25738), dated June 22, 1984.

These standards were promulgated after public hearings held on August 14, 1984 and filed with the South Carolina Secretary of State August 14, 1984, pursuant to Act 379, South Carolina Acts and Joint Resolutions, 1971 (sections 40–261 through 40–274 South Carolina Code of Laws, 1962).

By letter dated October 23, 1985 from Edgar L. McGowan, Commissioner, South Carolina Department of Labor, to Alan C. McMillan, Regional Administrator, and incorporated as a part of the plan, the State submitted the following amended State standards comparable to Federal Standards: 29 CFR 1910.243(e)(1)(i), (e)(3)(vii), and (e)(4)(vi), Guarding of Portable Powered Tools, Power Lawnmowers (50 FR 4649), dated February 1, 1985; 29 CFR 1910.1047(m), Ethylene Oxide, dates (50 FR 9801), dated March 12, 1985; 29 CFR 1910.1047(j)(1)(iii), Ethylene Oxide (50 FR 12828), dated April 1, 1985; Appendix B to Subpart T, 29 CFR Part 1910, Guidelines for Scientific Diving (50 FR 1050), dated January 9, 1985.

These standards were promulgated after public hearings held on September 10, 1985 and filed with the South Carolina Secretary of State October 17, 1985 pursuant to Act 379, South Carolina Acts and Joint Resolutions, 1971 (sections 40–261 through 40–274 South Carolina Code of Laws, 1962).

2. Decision

Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards.

The state standards are hereby approved.

3. Location of Supplement For Inspection And Copying

A copy of the standards supplement along with the approved plan may be inspected and copied during normal business hours at the following locations: Office of the Commissioner of Labor, South Carolina Department of Labor, 3600 Forest Drive, Columbia, South Carolina 29211; Office of the Regional Administrator, Suite 587, 1375 Peachtree Street, NE., Atlanta, Georgia 30367; and Director of Federal State Operations, Room N3700, 200 Constitution Avenue, NW., Washington, DC 20210.

4. Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds good cause exists for not publishing the supplement to the South Carolina State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are essentially identical to the comparable Federal standards and are deemed to be at least as effective.
2. The standards were adopted in accordance with procedural requirements of State Law and further participation would be unnecessary.

This decision is effective March 7, 1986.

(Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Atlanta, Georgia, this 16th day of January, 1986.

Alan C. McMillan,

Regional Administrator.

[FR Doc. 86–5016 Filed 3–6–86; 8:45 am]

BILLING CODE 4510-26-M

Wyoming State Standards; Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State Plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On May 3, 1974, notice was published in the **Federal Register** (39 FR 15394) of the approval of the Wyoming Plan and adoption of Subpart BB to Part 1952 containing the decision.

The Plan provides for the adoption of Federal Standards as State Standards by:

1. Advisory Committee coordination.
2. Publication in newspapers of general/major circulation with a 45-day waiting period for public comment and hearings.
3. Adoption by the Wyoming Health and Safety Commission.
4. Review and approval by the Governor.
5. Filing with Secretary of State and designation of an effective date.

OSHA regulations (29 CFR 1943.22 and 1953.23) require that States respond to the adoption of new or revised permanent Federal standards by State promulgation of comparable standards within six months of OSHA publication in the **Federal Register**, and within 30 days for emergency temporary standards. Although adopted State standards or revisions to standards must be submitted for OSHA review and approval under procedures set forth in Part 1953, they are enforceable by the state prior to federal review and approval. By letter dated December 23, 1985, from Donald D. Owsley, Administrator, Wyoming Occupational Health and Safety Division, to Byron R. Chadwick, OSHA Regional Administrator, the State submitted rules and regulations in response to Federal OSHA's General Industry Standards (29 CFR 1910.1000: Air Contaminants, and 29 CFR 1910.1047: Ethylene Oxide, 49 FR 122, Friday, June 23, 1984).

The above adoptions of Federal standards have been incorporated in the State Plan, and are contained in the Wyoming Occupational Health and Safety Rules and Regulations for General Industry, as required by Wyoming Statute 1977, section 27–11–105(a)(viii). In addition, the standards were published in newspapers or general/major circulation throughout the State pursuant to the Wyoming Administrative Procedures Act 1977, section 16–3–103(a)(1).

State standards for 29 CFR Part 1910: Air Contaminants and Ethylene Oxide were adopted by the Health and Safety Commission of Wyoming on November

9, 1984 (effective January 3, 1985) pursuant to Wyoming statute 1977, section 27–11–105. The State standard on Air Contaminants is substantially identical to the federal standard action, with the only exception being paragraph numbering. Wyoming's Air Contaminant Substance list at their Chapter VII, section 1, is also identical to the Federal Standard. The State's Ethylene Oxide Standard of substantially identical, with the exception of paragraph numbering and location of the requirement to provide the examining physician and the employees of information of Federal Appendices A, B, and C. Rather than this requirement being noted within the body of the standard to follow the Federal format, Wyoming has placed this requirement within the Appendices. Also, the State's delayed effective date(s) in its standard are different from the Federal dates(s). Since the Wyoming engineering controls implementation date has passed, there is no negative impact on the State program that requires corrections.

2. Decision

The above State Standards have been reviewed and compared with the relevant Federal Standards. OSHA has determined that the State Standards are at least as effective as the comparable Federal Standards, as required by section 18(c)(2) of the Act. OSHA has also determined that the differences between the State and Federal Standards are minimal and that the Standards are thus substantially identical. OSHA therefore approves these standards; however, the right to reconsider this approval is reserved should substantial objections be submitted to the Assistant Secretary.

3. Location of Supplement for Inspection and Copying

A copy of the standards supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Room 1576, Federal Office Building, 1961 Stout Street, Denver, Colorado 80294; the Occupational Health and Safety Department, 604 East 25th Street, Cheyenne, Wyominng 82002; and the Office of State Programs, Room N–3700, 200 Constitution Avenue, NW., Washington, DC 20210.

4. Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplements to the Wyoming State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason:

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious. This decision is effective March 7, 1986.

(Sec. 18, Pub. Law 91–596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Denver, Colorado, this 21st day of January, 1986.

Byron R. Chadwick,

Regional Administrator.

[FR Doc. 86–5017 Filed 3–6–86; 8:45 am]

BILLING CODE 4510-26-M

Wyoming State Standards; Notice of Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State Plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On May 3, 1974, notice was published in the **Federal Register** (39 FR 15394) of the approval of the Wyoming Plan and adoption of Subpart BB to Part 1952 containing the decision.

The Plan provides for the adoption of Federal Standards as State Standards by:

1. Advisory Committee coordination.
2. Publication in newspapers of general/major circulation with a 45-day waiting period for public comment and hearings.
3. Adoption by the Wyoming Health and Safety Commission.
4. Review and approval by the Governor.
5. Filing with Secretary of State and designation of an effective date.

OSHA regulations (29 CFR 1953.22 and 1953.23) require that States respond to the adoption of new or revised permanent Federal standards by State promulgation of comparable standards within six months of OSHA publication in the **Federal Register**, and within 30 days for emergency temporary standards. Although adopted State standards or revisions to standards must be submitted for OSHA review and approval under procedures set forth in Part 1953, they are enforceable by the state prior to federal review and approval. By letter dated July 19, 1985, from Donald D. Owsley, Administrator, Wyoming Occupational Health and Safety Division, to Byron R. Chadwick, OSHA Regional Administrator, the State submitted rules and regulations in response to Federal OSHA's General Industry Standards (29 CFR 1910.243: Power Lawnmowers; Amendments, 50 FR 4648, February 1, 1985).

The above adoptions of Federal standards have been incorporated in the State Plan, and are contained in the Wyoming Occupational Health and Safety Rules and Regulations for General Industry, as required by Wyoming Statute 1977, section 27–11–105(a)(viii). In addition, the standards were published in newspapers of general/major circulation throughout the State pursuant to the Wyoming Administrative Procedures Act 1977, section 16–3–103(a)(1).

State standards for 29 CFR 1910.243: Power Lawnmowers; Amendment was adopted by the Health and Safety Commission of Wyoming on September 13, 1985 (effective November 12, 1985) pursuant to Wyoming statute 1977, section 27–11–105. The State standard on Power Lawnmower; Amendment is identical to the federal standard action, with the only exception being paragraph numbering.

2. DECISION

The above State Standard has been reviewed and compared with the relevant Federal Standard and OSHA has determined that the State Standard is at least as effective as the comparable Federal Standard, as required by section 18(c)(2) of the Act. OSHA has also determined that the differences between the State and Federal Standards are minimal and that the Standards are thus substantially identical. OSHA therefore approves this standard.

3. Location of Supplement for Inspection and Copying

A copy of the standard supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Room 1576, Federal Office Building, 1961 Stout Street,

VOL 51 ISS 45 MR 7 1986 UMI

Denver, Colorado 80294; the Occupational Health and Safety Department, 604 East 25th Street, Cheyenne, Wyoming 82002; and the Office of State Programs, Room N–3700, 200 Constitution Avenue, NW., Washington, DC 20210.

4. Public participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplements to the Wyoming State Plan as proposed changes and making the Regional Administrator's approval effective upon publication for the following reason(s):

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious. This decision is effective March 7, 1986.

(Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Denver, Colorado, this 14th day of December, 1985.

Harry C. Borchelt,

Acting Regional Administrator.

BILLING CODE 4510–26–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 86–16]

National Commission on Space; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the National Commission on Space.

DATE AND TIME: March 13–14, 1986, 8:30 a.m. to 5:30 p.m. each day.

ADDRESS: 490 L'Enfant Plaza East SW., Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Mr. Steve Hartman, National Commission on Space, Suite 3212, 490 L'Enfant Plaza East SW., Washington, DC 20024 (202/453–8685).

SUPPLEMENTARY INFORMATION: The National Commission on Space was established to study existing and proposed U.S. space activities; formulate an agenda for the U.S. civilian space program; and identify long-range goals, opportunities, and policy options for civilian space activity for the next 20 years. The Commission, chaired by Dr. Thomas O. Paine, consists of 15 voting members.

The meeting must be held at this time in order to meet the publishing deadline of the final report. This is the earliest opportunity to assemble the Commissioners subsequent to the distribution of the final draft report for review. The meeting will be closed to the public in order to control the premature disclosure of information in the case of the Commission report that would likely to significantly frustrate the implementation of the proposed Commission action pursuant to the exemption contained in 5 U.S.C. 552b(c)(9)(b).

Type of meeting: Closed.

Dated: February 28, 1986.

Richard L. Daniels,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 86–4937 Filed 3–6–86; 8:45 am]

NATIONAL FOUNDATION ON ARTS AND HUMANITIES

National Endowment for the Arts; Media Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Media Arts Advisory Panel (Film/Video Production Section) to the National Council on the Arts will be held on March 24–28, 1986 from 9:00 a.m. to 6:00 p.m., Room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW, Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

March 3, 1986.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Qualifications Review Panel for the Position of Director, John Fitzgerald Kennedy Library; Meeting

Notice is hereby given that the Qualifications Review Panel for the Position of Director, John Fitzgerald Kennedy Library, will meet on Monday, March 24, 1986, at 10:30 a.m. at the Kennedy Library, Columbia Point, Boston, Massachusetts.

The agenda for the meeting will be:

1. Discuss personnel procedures leading to the selection of the Director.
2. Propose individuals who might be solicited to apply for the position.
3. Discuss qualifications of those who have applied for the position.

The meeting will be closed to the public in accordance with 5 U.S.C. 552b(6) in order to avoid unwarranted invasion of the personal privacy of the applicants.

Dated: March 5, 1986.

BILLING CODE 7515–01–M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Submitted for Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regultory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reducation Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: New.

2. The title of the information collection: Survey of Licensees Possessing Strategic Special Nuclear Material.
3. The form number if applicable: Not applicable.
4. How often the collection is required: One time.
5. Who will be required or asked to report: Nonpower reactor licensees, including research, test, and critical facilities, and certain other research licensees, possessing strategic special nuclear material.
6. An estimate of the number of responses: 33.
7. An estimate of the total number of hours needed to complete the requirement or request: 264.
8. An indication of whether section 3504 (h), Pub. L. 96–511 applies: Not applicable.
9. Abstract: The Nuclear Regulatory Commission will survey nonpower reactor and certain other licensees to evaluate plans for reduction quantities of strategic special nuclear material stored at sites and to evaluate the need for additional physical protection measures.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395–7340.

The NRC Clearance Officer is R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland, this 4th day of March 1986.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

BILLING CODE 7590–01–M

[Docket Nos. 50–369 and 50–370]

Duke Power Co. and McGuire Nuclear Station, Units 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of partial exemption from the requirements of Appendix J to 10 CFR Part 50 to Duke Power Company (the licensee) for the McGuire Nuclear Station, Units 1 and 2, located in Mecklenburg County, North Carolina.

Environmental Assessment

Indentification of Proposed Actions: Section III C.2(a) of Appendix J to 10 CFR Part 50 which addresses the test pressure to be used in the performance of local leak rate tests provides: "Valves, unless pressurized with fluid (e.g., water, nitrogen) from a seal system, shall be pressurized with air or nitrogen at a pressure of Pa." The proposed exemption from Section III C.2(a) would allow performance of the local leak rate test for the ice condenser refrigeration system without draining the gylcol from the seats of the diaphragm valves at the mechanical containment penetrations. The proposed exemption and the bases thereto, are in accordance with the licensee's letters dated September 24, 1985 and February 14, 1986.

The Need for the Proposed Actions: The proposed exemption would reduce the downtime for the ice condenser refrigeration system, which maintains the temperature and mass of the ice bed at acceptable levels. The exemption would also reduce the amount of toxic waste (approximately 200 gallons of glycol for each McGuire unit) which might otherwise require disposal.

Evironmental Impacts of Proposed Actions: The proposed exemption would provide for the substitution of an alternate test for the mechanical containment penetration diaphragm valves in the ice condenser refrigeration system. The proposed test procedure includes a glycol leakage rate acceptance criterion on those diaphragm valves of zero indicated leakage (not including instrument error). We find that a valve meeting a zero leakage criterion using glycol would allow no leakage of containment atmosphere. If the leak rate using glycol should be found to be greater than zero, the penetration would then be fully drained and the valves leak tested in accordance with Appendix J. Thus, performing the local leakage rate test on these penetrations without fully draining them would not compromise containment integrity. Plant operation with the exemption would be at least as safe as requiring compliance with the leak testing requirement of the regulations. The probability of an accident would not be increased and the post-accident radiological releases would not be greater than previously detemined, nor would the proposed exemption otherwise affect radiological plant effluents, nor result in any significant occupational exposure. Likewise, the exemption would not adversely affect non-radiological plant effluents or have other adverse environmental impact. Therefore, the Commission concludes that there would be no significant radiological or non-radiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Actions: Because we have concluded that there would be no significant adverse environmental impact associated with the proposed exemption, any alternative to this exemption would have either no environmental impact or greater environmental impact.

The principal alternative would be to deny the requested exemption. Such action would not reduce environmental impacts of plant operation but would increase the amount of toxic waste (glycol) requiring disposal. Also, denial of the exemption would require the ice condenser refrigeration system to be down for 24 to 36 hours which has a potential negative impact on the mass of ice in the ice bed.

Alternative Use of Resources: This action does not involve the use of resources not previously considered in connnection with the "Final Environmental Statement Related to Operation of McGuire Nuclear Station," dated April 1976.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's requests that support the proposed exemption. The NRC staff did not consult other agencies or persons.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, we conclude that the proposed exemption will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to the proposed actions, see the licensee's requests for exemption dated September 24, 1985, and February 14, 1986, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Dated at Bethesda, Maryland, this 4th day of March 1986.

For the Nuclear Regulatory Commission.

Advisory Committee on Reactor Safeguards, Ad Hoc Subcommittee on TVA; Meeting

The ACRS Ad Hoc Subcommittee on TVA will hold a meeting on March 27, 1986, Room 1046, 1717 H Street, NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows: *Thursday, March 27, 1986—8:30 a.m. until the conclusion of business.*

The Subcommittee will discuss TVA reorganization and related technical and management issues.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Anthony Cappucci (telephone 202/634–3267) between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: March 3, 1986.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

[Docket No. 50–416]

Mississippi Power & Light Co., Middle South Energy, Inc. and South Mississippi Electric Power Association; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–29, issued to Mississippi Power & light Company, Middle South Energy, Inc., and South Mississippi Electric Power Association (the licensees), for operation of the Grand Gulf Nuclear Station, Unit 1, located in Claiborne County, Mississippi.

The amendment would change a Technical Specification surveillance requirement for the heaters in the standby gas treatment system (SGTS). To demonstrate operability of the SGTS, the heaters would be required to dissipate 48±5.0 KW instead of the presently required 50±5.0 KW when tested in accordance with Technical Specification 4.6.6.3.d.5 This change was requested in the licensees' application for amendment dated February 17, 1986.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. One of the examples (vi) is a change which may reduce a safety margin, but where the results of the change are clearly within acceptable criteria with respect to the component specified in the Standard Review Plan (SRP) (NUREG–0800).

The SRP Section 6.5.1 "ESF Atmospheric Cleanup Systems" states in relevant part that systems such as the SGTS are acceptable if they meet the guidelines of Regulatory Guide 1.52. The relevant recommendation in Regulatory Guide 1.52 is that the heater should be designed to reduce the relative humidity of the air flowing through the SGTS from 100% to 70% under design basis accident conditions. The licensee has determined in its submittal of February 17, 1986 that a heater dissipating 21.5 KW will meet the design recommendation in Regulatory Guide 1.52. The staff concludes, based on a preliminary review of the licensees' submittal that the small change in the minimum heater dissipation requirement (from 45 KW to 43 KW) is clearly within the relevant criterion in the Standard Review Plan. Therefore, the proposed change is similar to Example vi. Accordingly, the Commission proposes to determine that this change does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Comments may also be delivered to Room 4000, Maryland National Bank Building, Bethesda, Maryland, from 8:15 a.m. to 5:00 p.m. Monday through Friday. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

By April 7, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW, Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Walter R. Butler: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Nicholas Reynolds, Esquire, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Dated at Bethesda, Maryland, this 3rd day of March 1986.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Chief, BWR Project Directorate No. 4, Division of BWR Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–323]

Pacific Gas and Electric Co., Diablo Canyon Nuclear Power Plant, Unit 2; Exemption

I

Pacific Gas and Electric Company (the licensee) holds Facility Operating License No. DPR–82, which authorizes operation of the Diablo Canyon Nuclear Power Plant, Unit No. 2 (the facility or Diablo Canyon 2) at power levels not in excess of 3411 megawatts thermal. This license provides, among other things, that the facility is subject to all rules, regulations, and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility is a pressurized water reactor located on the licensee's site in San Luis Obispo County, California.

II

Section 50.46(a)(1) to 10 CFR Part 50 requires, in part, that for a reactor its ECCS cooling performance shall be calculated in accordance with an acceptable evaluation model. Furthermore, § 50.46 to 10 CFR Part 50 requires that the calculated maximum fuel element cladding temperature or peak cladding temperature (PCT) shall not exceed 2200° F.

III

By letter dated February 21, 1986 the licensee requested an Exemption from the requirement of 10 CFR 50.46(a)(1) identified in II above for a temporary relief to complete the ECCS cooling performance calculations for Diablo Canyon 2 using plant specific data and actual operating conditions with an approved ECCS evaluation model in

VOL

1986
UMI

order to verify that the calculated peak cladding temperature (PCT) for Diablo Canyon 2 does not exceed the criterion of 2200° F specified in 10 CFR 50.46(b). In an earlier letter dated February 14, 1986 the licensee had informed the staff that the calculated ECCS cooling performance for Diablo Canyon 2, as discussed in the Final Safety Analysis Report (FSAR), is not based on the actual operating conditions for the facility. The letter provided substantial information demonstrating the safe operation of Diablo Canyon 2 under those conditions as discussed below.

The large break ECCS analysis for Diablo Canyon 2, as documented in FSAR Section 15.4.1, was performed with the Westinghouse 1978 Evaluation Model. It resulted in a peak cladding temperature of 2187° F. The analysis was based on the nominal average reactor coolant temperature, Tavg, of 577.6° F, a heat flux hot channel factor, Fq, of 2.32, and a discharge coefficient, Cd, of 0.8. The Diablo Canyon 2 startup testing has shown that there is little or no steam generator heat transfer fouling. Consequently the licensee has projected that the reactor coolant system (RCS) will operate more efficiently at a Tavg of 572° F. Westinghouse sensitivity studies using the approved 1978 Westinghouse ECCS Evaluation Model show that operation at a Tavg of 572° F could result in a PCT increase of 20° F, causing the peak cladding temperature to exceed the 2200° F limit specified in 10 CFR 50.46(b) by as much as 7° F.

The change in the PCT with a variation in Tavg was the subject of many discussions between the staff and Westinghouse in mid-1977. It was found that a decrease in Tavg could result in either an increase of decrease of PCT. Therefore, the staff concluded that plant specific analyses should be performed for the nominal Tavg for the plant under evaluation.

Since the staff approval of the 1978 Westinghouse Evaluation Model, the staff has approved a new Westinghouse analytical method, called BART, for reflooding calculations. This model describes the LOCA phenomena in a more mechanistic way. The 1978 Evaluation Model uses empirical correlations to calculate reflooding heat transfer. The BART method models the heat transfer and fluid flow processes during reflood, including entrainment and deentrainment of droplets, the heat transfer at the quench front and, as an option, the effect of spacer grids. Because BART is more mechanistic, calculations made with an evaluation model including BART show increased margin to the peak cladding temperature limit.

Westinghouse has informed the licensee that a reanalysis of the PCT for Diablo Canyon 2 using the BART Model is expected to result in a decrease in peak clad temperature of 70° F or more. This is supported by analyses done for other Westinghouse four-loop plants designed and operated similarly to Diablo Canyon 2. While the magnitude of this margin differs from plant to plant, the staff agrees that an analysis of the large break LOCA for Diablo Canyon 2 using the BART model would demonstrate sufficient margin to accommodate the 7° F by which the 1978 analysis would exceed the 10 CFR 50.46(b) peak cladding temperature limit using actual plant operating conditions. In addition, there is no reason to expect that the other criteria of 10 CFR 50.46 in terms of cladding oxidation and long term cooling would not continue to be met.

To provide further assurance that Diablo Canyon 2 will continue to meet the PCT criterion of 10 CFR 50.46(b), the licensee has limited the heat flux hot channel factor, Fq, by administrative control to a value of 2.30, which is a reduction of 0.02 in Fq units from the value of 2.32 used in Technical Specification 3.2.2. The licensee has revised the applicable operating procedures for Diablo Canyon 2 which implement the Technical Specifications to ensure that the appropriate action statements in Technical Specification 3.2.2 will be implemented if Fq has a value of 2.30 or greater. Diablo Canyon 2 currently is operating with a measured Fq of less than 2.00. The licensee has stated that using the 1978 Evaluation Model, this decrease of 0.02 in Fq would result in a reduction of the calculated PCT of approximately 20° F. These results are based upon sensitivity studies performed by Westinghouse with the 1978 Model and are consistent with previous analyses reviewed by the staff for other facilities.

Based on the above discussion, the licensee's proposed reanalysis of the calculated ECCS cooling performance with the more recent BART Model and using actual plant operating conditions, in conjunction with the interim reduction of the heat flux hot channel factor, Fq, to a value of 2.30 under administrative control is acceptable. This is a one-time only exemption for temporary relief from the requirement of 10 CFR Part 50, § 50.46(a)(1) regarding the plant specific ECCS cooling performance calculated with an approved model. The staff also finds acceptable the schedule proposed by the licensee in the February 21, 1986 letter to complete the reanalysis by July 25, 1986 and to submit the results to the staff no later than August 19, 1986.

IV

Accordingly, the Commission had determined that, pursuant to 10 CFR 50.12, this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(ii), are present justifying the exemption, namely that application of the regulation in the particular circumstance for the short period involved is not necessary to achieve the underlying purpose of the regulation to assure the integrity of the fuel cladding in the event of a postulated design basis LOCA by requiring that the peak cladding temperature as calculated with an approved model and using appropriate plant conditions does not exceed the 2200 °F limit specified in 10 CFR 50.46(b). Specifically, based on the discussion above and on its experience with the BART Model as applied to similarly designed and operating four-loop Westinghouse plants, the staff concludes that requiring the shutdown of the facility solely to perform a reanalysis confirming these results on a plant specific basis for Diablo Canyon Unit 2 is not necessary for this temporary period. The licensee has demonstrated a good faith effort to achieve compliance by: promptly informing the staff upon notification by Westinghouse of the discrepancy between system preformance and the model assumption; by immediately directing Westinglhouse to perform necessary studies to assess the safety significance of this difference; and by requesting Westinghouse to provide as promptly as possible a revised plant specific analysis using an improved Westinghouse ECCS evaluation model.

Accordingly, the Commission hereby grants an exemption as described in Section III above from 10 CFR 50.46(a)(1), provided:

1. Heat flux hot channel factor, Fq, shall not exceed 2.30.

2. All other operating conditions shall conform with the requirements of License No. DPR–82 and the associated Technical Specifications.

3. The Licensee shall complete a revised plant specific ECCS analysis for Diablo Canyon Unit 2, in accordance with the schedule stated in its letter of February 21, 1986 and shall not submit the results of such analysis no later than August 20, 1986.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this Exemption will have no significant impact on the environment (February 28, 1986, 51 FR 7160).

This exempiton is effective upon issuance.

Dated at Bethesda, Maryland, this 3rd day of March 1986.

For the Nuclear Regulatory Commission.

Thomas M. Novak,

Acting Director, Division of PWR Licesnsing-A.

BILLING CODE 7590-01-M

[Docket No. 50–338]

Virginia Electric and Power Co., et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–4, issued to Virginia Electric and Power Company and Old Dominion Electric Cooperative (the licensee), for operation in the North Anna Power Station, Unit No. 1 (NA–1) located in Louisa County, Virginia, in accordance with the licensee's application for amendment dated January 17, 1986.

The proposed change would allow 7 percent Steam Generator (SG) tube plugging levels at NA–1 to support power operation at the currently licensed reactor thermal power of 2775 Megawatts thermal (MWt). The currently approved level for SG tube plugging is 5%.

Recent eddy current inspections of the NA–1 SG tubes indicated a need to plug additional tubes beyond the Fuel Cycle 5 level of 3.17%. The plugging level was increased to 3.89% during the recent NA–1 Cycle 5 to Cycle 6 refueling outage. Since it is possible that future eddy current inspections may require that the plugging level be increased to a level beyond the currently approved 5% limit, the licensee has provided an evaluation of the impact on Loss-of-Coolant Accidents (LOCA) and non-LOCA analyses at higher levels of SG tube plugging up to 7%.

Since sufficient tube plugging can reduce primary system flow, result in more severe pump coastdown characteristics, and reduce the primary system volume, the impact of tube plugging on non-LOCA transient analyses was previously evaluated by the licensee and submitted to the NRC by letter dated February 12, 1982. The evaluation provided a conservative estimate of actual Reactor Coolant System (RCS) flowrate versus SG tube plugging level for NA–1&2. The evaluation showed that at 7% tube plugging the primary system flowrate would still be more than 2.5% greater than the current NA–1&2 thermal design flow. Thus the current licensing analyses, in which flowrate is an important concern (DNB limited events), remain valid at 7% plugging. Seven percent SG tube plugging results in a 3% change in the total loop resistance. The evaluation indicated that this change would have a minimal impact on the pump coastdown curve. Also, the evaluation determined that 7% steam generator tube plugging would reduce the RCS volume by 2% and this would reduce the dilution time by 2%. However, during dilution events it was determined that sufficient time (approximately 60 minutes) remained to criticality to allow operator action.

The currently docketed analysis is based on a SG tube plugging level of 5%. A new LOCA analysis has recently been submitted by the licensee to the NRC (by letter dated May 2, 1985) in support of the Phase 3 NA–1&2 core uprate program which assumes a SG tube plugging level of 7%. This analysis, which is being submitted by the licensee to support the proposed change for 7% SG tube plugging at the currently licensed thermal power level for NA–1, bounds the currently licensed design conditions for NA–1.

The primary conservatisms in the new LOCA analysis are the higher reactor power and the lower reactor coolant flow, both of which tend to increase the peak clad temperature during a LOCA. The 50 pounds per square inch absolute (psia) reduction in steam pressure and the one degree difference in vessel average coolant temperature are shown to have a minor impact on peak clad temperature. Previous experience has shown that the effects of the power and RCS flow will dominate the other differences to produce a conservative peak clad temperature. Therefore, operation at the current licensed reactor thermal power of 2775 MWt will be bounded by the results of the uprated analysis when operating at the FQ limit (2.15) determined from the new analysis.

Three aspects must be considered when evaluating the effect of steam generator tube plugging level on small break LOCA transients. They are reduced heat transfer area, the increased initial temperature difference between the primary and secondary side and the countercurrent flow limit (CCFL). Since only a small portion of the steam generator heat transfer area is required to provide an effective heat sink during a small break transient, plugging some steam generator tubes will not affect small break LOCA transients in view of the available heat transfer area. The increased temperature difference between the primary and secondary side disappears immediately after the break when the secondary side pressur reaches the steam generator safety valve setpoint and therefore, has no impact on the peak clad temperature for small levels of steam generator tube plugging (up to approximately 20%). Since the plugging levels will not exceed 7%, there will be no impact on small break LOCA and the currently approved small break LOCA analysis (Section 15.3.1 of the NA–1&2 Updated Final Safety Analysis Report) remains bounding.

The Commission has made a proposed determination that the request for amendment involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a signficant reduction in a margin of safety. Specifically, as discussed above, the proposed change will not increase the probability of occurrence or consequences of any malfunction or accident previously addressed. The re-analyzed large break LOCA analysis, which is attached, shows that operation under the revised specifications would not result in any increase in accident consequences. The analysis assumptions for the remainder of the UFSAR Chapter 15 transient analyses have not changed and they remain bounding. Also, new accident types or equipment malfunction scenarios will be introduced as a result of operating in accordance with the revised specifications. And, finally, the margin of safety, as defined in the basis for the affected Technical Specifications, is not reduced. Operation at the lower FQ limit will not reduce the margin to the LOCA acceptance limits. Therefore, based on these considerations and the criteria given above, the Commission has made a proposed determination that the amendment request does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received

VOL 51
ISS 45
MR 7
1986
UMI

within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Rules and Records Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

By April 7, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which mush include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specifity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If a final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Lester S. Rubenstein: (petitioner's name and telephone number), (date petition was mailed), (plant name), and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael W. Mauphin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated January 17, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia, 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Dated at Bethesda, Maryland, this 3rd day of March, 1986.

For the Nuclear Regulatory Commission.

Lester S. Rubenstein,

Director, PWR Project Directorate No. 2, Division of PWR Licensing–A, Office of Nuclear Reactor Regulation.

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Losses and Goals Advisory Committee; Meeting

AGENCY: The Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council).

ACTION: Notice of meeting.

Status: Open.

SUMMARY: The Northwest Power Planning Council hereby announces a forthcoming meeting of its Losses and Goals Advisory Committee to be held pursuant to the Federal Advisory Committee Act, 5 U.S.C Appendix I, 1–4. Activities will include:

- Contributions issue review.
- Hydropower obligation issue scoping.
- Other.
- Public comment.

DATE: March 17, 1985. 9:30 a.m.

ADDRESS: The meeting will be held at the Council's Meeting Room, 850 S.W. Broadway, Suite 1100, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: John Marsh, 503–222–5161.

Edward Sheets,

Executive Director.

POSTAL SERVICE

Postal Rates, Fees, and Mail Classifications; Adjustment of Preferred Rates of Postage

On February 4, 1986, the Governors of the Postal Service announced that the preferred rates of postage might change on March 9, 1986, and that they were considering implementing one of two sets of rates. Their action took into account the original reductions in revenue forgone appropriations which have already been enacted plus further reductions contemplated under the Balanced Budget and Emergency Reduction Act, commonly known as Gramm-Rudman-Hollings. The Governors of the Postal Service on March 4, 1986, adoped Resolution 86–6, adjusting preferred rates of postage to the levels shown in the attached schedules. The new rates will be effective at 12:01 a.m. on March 9, 1986.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-22960; File No. SR-CBOE-85-22]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Granting Accelerated Approval to Proposed Rule Change

On January 27, 1986, the Chicago Board Options Exchange, Incorporated ("CBOE" or "Exchange"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] Amendment No. 2 to

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1985).

VOL 51 ISS 45 MR 7 1986 UMI

a proposed rule change providing that the Exchange's Order Support System ("OSS") be utilized to route orders on options on stocks selected by the Exchange to printers at trading posts for handling by floor brokers.

The proposed rule change was noticed in Securities Exchange Act Release No. 22879 (February 7, 1986), 51 FR 5624 (February 14, 1986). No comments were received on the proposed rule change.[3]

The proposal to grant CBOE the discretion to select those options for which OSS may be utilized is an amendment to a previous proposal which would have permitted the electronic routing of OSS-eligible options orders on over-the-counter stocks to a printer at the trading post for direct representation by floor brokers in the trading crowd. The proposal as originally submitted to the Commission was not approved in order that the CBOE could clarify how the process would work. This amendment to the proposed rule change is intended to broaden the options classes where the crowd printer may be used, and to describe more fully how the process will operate.

OSS currently allows a firm's public customer orders to be routed either to the book or the firm's booth. The proposed rule change provides a third alternative for orders on options on stocks selected by the Exchange by permitting member firms to have an OSS order print at the trading crowd when the parameters do not allow the order to be accepted by the book.[4] Under the proposed rule change, member firms will have the ability to set individual parameters for routing orders to the book, the printer at the crowd, or the firm's booth on the floor; or to set one parameter for routing orders to the book with all other orders directed either to the crowd printer or the firm's booth.

The CBOE believes that the proposed rule change will expedite both the delivery of orders and fill reporting. The Commission concurs with the CBOE in this belief and finds therefore, that the proposed rule change is consisent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 [5] and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of the proposal in the **Federal Register** in that the CBOE would like to make the efficiencies of the system available to member firms at the earliest possible date, and initially will limit the availability of the proposed enhancements to OSS to four posts on the trading floor.[6] Moreover, although the filing as originally submitted to, and noticed by, the Commission contemplated the use of direct routing to the trading crowd in certain options classes, the Commission did not receive any comment on that proposal.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Dated: February 28, 1986.

John Wheeler,

Secretary.

[Release No. 34-22959; File No. SR-NYSE-85-47]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

I. Introduction

On December 31, 1985, the New York Stock Exchange, Inc. ("NYSE") submitted for Commission consideration, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 ("Act"), comprehensive amendments to the NYSE Constitution. The proposed amendments will result in a significant re-organization in the current Exchange Constitution, including numerous drafting changes, deletions of outdated provisions[1] and placement of several existing constitutional provisions into the NYSE's rules.[2] The Exchange states that a substantial majority of the changes are intended primarily to streamline, update, or clarify the current Exchange Constitution, and do not represent major substantive revisions.[3]

In addition to the drafting and organizational changes, several significant changes to the NYSE's governance procedures have been proposed:

(1) The composition of the NYSE Board of Directors would be modified to: (a) Increase the size of the Board from 20 to 24 (12 public directors and 12 industry directors), as well as a Chairman, Executive Vice Chairman, and a President (the latter two positions are not required to be filled); (b) provide that at least one public director must be associated with an NYSE listed company, and at least one must be associated with a financial institution that is a significant investor in equity securities; (c) provide that, of the 12 industry directors, three must be registered as NYSE specialists, one must be associated with an NYSE specialty firm, and one must be an NYSE floor broker; and (d) change the eligibility requirements for industry or public directors on the NYSE Board.

(2) Future NYSE electronic access members would not be permitted to vote at any NYSE election or on any matter requiring a membership vote, with current electronic access members retaining their ½ vote.

(3) The Exchange would delete an existing provision prohibiting participation by a person in any matter in which he is personally interested.

The Commission regards the proposed constitutional revisions as appropriate. The Commission, however, has determined to take no action on the proposed deletion of the provision in Article III, Section 2, paragraph 7 of the current Constitution relating to conflicts of interest by board members. The Commission believes that retention of such a provision, which is not otherwise explicitly included in the proposed NYSE Constitution or current NYSE rules, is critical. In response to a request from the Commission staff, the NYSE has committed to propose at the next meeting of its membership an amendment to the NYSE Constitution reinserting this conflicts of interest provision.[4]

II. Proposed Constitutional Amendments

Section 19(b) of the Act provides that, to be approved by the Commission, a proposed rule change must be consistent with the requirements of the Act and the rules and regulations thereunder. Section 6(b) of the Act sets forth the general requirements for exchange rules. Section 6(b)(3) of the Act requires exchange rules to "assure a fair representation of its members in the selection of its directors and administration of its affairs." Section 6(b)(3) also requires that the exchange "provide that one or more directors shall be representative of issuers and investors and not be associated with a member of the exchange, broker, or dealer." Section 6(b)(5) requires that exchange rules promote just and equitable principles of trade and that they not be designed to permit unfair discrimination between issuers, brokers, or dealers. Section 6(b)(7) requires that exchange rules provide a fair procedure for the disciplining of members and persons associated with members. Section 6(b)(8) prohibits any exchange rule from imposing any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The Commission believes that the changes made in the proposed revised Constitution have resulted in a more streamlined and efficient document. Provisions which were eliminated generally were either redundant, outdated, were clearly implied in other provisions, or could be dealt with in the NYSE's rules. The drafting changes condensed and clarified the wording of the parallel provisions in the current Constitution. The reorganization of the Constitution served primarily to provide a more topical placement of functionally related provisions.

In regard to the three specific changes highlighted above, the Commission believes that the change in the number and composition of directors on the NYSE's Board of Directors and the elimination of voting rights for new electronic access members are reasonable and appropriate changes by the Exchange and has determined to approve them. As noted above, however, the Commission is not taking action in this order with respect to the deletion in Article III, Section 2, paragraph 7 of the current Constitution relating to conflicts of interest; the NYSE has indicated to the Commission that it will propose to reinsert this provision at the NYSE's next membership vote.[5]

A. Composition of NYSE Board of Directors

1. Description of Changes

Under Article II of the current NYSE Constitution, the Board of Directors is composed of 20 directors elected by members of the Exchange,[6] 10 of whom are public directors (not affiliated with brokers or dealers in securities) and 10 of whom are members or allied members of the Exchange. In addition, the Chairman (the Chief Executive Officer of the Exchange) is elected by the Board. The Board also may elect an Executive Vice Chairman, and the Chairman may appoint a President.

Under Article IV, Section 2 of the proposed revised Constitution, the size of the Board of Directors would be increased by 4 to a total of 24 directors plus the Chairman, Executive Vice Chairman and President (if the latter two positions are filled).[7] The 24 directors would include 12 public directors and 12 industry directors. At least one public director must be associated with an NYSE-listed issuer; at least one other public director must be associated with a financial institution that is a significant investor in equity securities.[8] The 12 industry directors would be required to come from the following industry categories: 7 directors from firms doing a public business (including 5 based in the New York City metropolitan area and 2 from outside New York), 3 NYSE specialists, 1 from a specialty firm based in the New York area, and 1 floor broker.[9]

As in the current Constitution, each year half of the Board of Directors, (i.e., six public directors and six industry directors) are elected. The revised Constitution designates each year's group of 12 elected directors as a class whose terms of office expire in alternate years.

The proposed amendments would revise the notice requirements for Board meetings to provide that notice be given no later than five (rather than the current two) days before the meeting or will be given by electronic means. The quorum requirement would be increased from six Board members to a majority of the entire Board.[10]

The proposed revised Constitution also changes the eligibility requirements for industry and public directors. Article II of the current NYSE Constitution requires that an industry director be a member or allied member [11] of the Exchange who is a principal executive officer and a director of a member corporation, a member of the managing committee or a principal partner of a member firm, or a member of the Exchange who does not hold voting stock in a member firm and who is not a partner in a member firm. Article I, Section 3(q) of the proposed revised Constitution would also make eligible a general partner of a member firm who has primary executive responsibilities, as well as the chief executive officer, a principal executive officer, or a director of a member corporation.

Under Article II of the current NYSE Constitution public directors are not permitted to be affiliated with brokers

---

[1] For example, many of the provisions in Article III of the current NYSE Constitution concerning the powers of the Board of Directors have been deleted in the proposed revised Constitution's Article IV (Board of Directors). Provisions governing Board procedures, contracts of employment, the Board's control of the finances of the Exchange and its authority to buy and sell real estate were deleted as unnecessary. The Board has inherent authority to act in such situations and its power to purchase or sell real property is governed by state law.

[2] For example, provisions governing arbitration procedures contained in Article XIII of the current Constitution have been deleted from the proposed revised Constitution's Article XI. Those procedures will be included in the NYSE's rules and filed with the Commission as proposed rule changes in the near future.

[3] Notice of this proposed rule change together with the terms of substance of the proposed rule change was given in Securities Exchange Act Release No. 22766 (January 6, 1986), 51 FR 1461 (January 13, 1986). No comments were received on this proposal, although the NYSE supplemented its filing by submitting two letters. *See* Letter to Michael Cavalier, Branch Chief, Division of Market Regulation, from James E. Buck, Secretary, New York Stock Exchange, Inc., dated February 6, 1986 (hereafter "February 6, 1986 letter") and letter from James E. Buck to Michael Cavalier, dated February 19, 1986 ("February 19, 1986 letter").

These amendments were submitted to the Exchange membership for approval on December 20, 1985, and were approved by a vote of 861 to 25.5.

[4] *See* February 6, 1986 letter. In a February 24, 1986, telephone conversation between Brandon Becker, Assistant Director, Division of Market Regulation, and James C. Buck, Secretary, NYSE, the NYSE agreed to the Commission's determination to take no action with respect to deletion of the conflict of interest provision.

[5] *See* February 6, 1986 letter.

[6] A class of five public and five industry directors is elected each year.

[7] Under Article II of the current Constitution, the Chairman and Executive Vice Chairman are prohibited from engaging in other business during their incumbency. This prohibition would be removed under proposed Article IV, Section 2(a).

[8] *See* Article IV, Section 2(a) of the proposed Constitution. The proportion of public directors under the revised Constitution would increase from 43% to 44% of the total Board (assuming an Executive Vice Chairman and President were sitting).

[9] *See* Article IV, Section 2(b) of the proposed Constitution. Article II of the current Constitution is somewhat less structured. It provides that the 10 industry directors include 4 from firms doing a public business (including 2 from the New York area) and at least 2 NYSE specialists. Not more than 3 industry directors may spend a substantial part of their time on the NYSE floor.

[10] *See* Article IV, Section 5 of the proposed Constitution.

[11] Under Article I, Section 3(c) of the proposed revised Constitution, an "allied member" means (i) a general partner in a member firm, or an employer who controls a member firm, who is not a NYSE member, or (ii) an employer of a member corporation who is not an exchange member and who is either (a) a principal executive officer of such corporation, or (b) a person who controls such corporation.

or dealers in securities. Article I, Section 3(r) of the proposed revised Constitution would add a definition of affiliations as being where a "person is a partner, officer, employee or director of such broker or dealer, or controls such broker or dealer, or is an officer of employee of a person, one of the significant subsidiaries of which is such broker or dealer." The proposal also would bar from a public director position any person who is an employee of an issuer of securities that are admitted to dealings on the Exchange unless that person is the chief executive officer or a principal officer of such issuer at the time of their first election to the Board as a public director.

2. Discussion

The change in the size and makeup of the NYSE Board of Directors retains the current balance between public and industry directors, thus retaining the essential input and representation of the interests of issuers, users and members in decisions affecting the operation of the Exchange.[13] The requirement that at least one public director be associated with a corporation that is not a financial institution and is the issuer of securities that are admitted for dealings on the Exchange and that at least one other public director be associated with a financial institution that is a significant investor in equity securities serves to ensure a minimum level of representation for these two important constituencies. In this regard, the Commission also notes that under the NYSE proposal the level of public director representation will remain equivalent to industry representation, and that the proportionate representation of public directors will actually increase slightly. In addition, amendments to Article IV, Section 2(b) of the proposed Constitution providing for one specialty firm industry director and one floor broker industry director impose additional representation requirements that are appropriate to ensure minimal representation by important Exchange constituencies.

The new definition of public director loosens the provisions which bar brokers or dealers or their affiliated persons generally from becoming public directors on the NYSE Board. The proposed revised Constitution would retain the general prohibition,[13] but would, according to the interpretation provided by the Exchange, permit to become a public director of the NYSE Board either (i) an outside director of a parent corporation with a broker dealer subsidiary, or (ii) an officer or employee of a corporation with a broker-dealer subsidiary, so long as it is not a significant subsidiary.[14]

The Commission recognizes that, in revising the eligibility requirements for public directors, the Exchange seeks to enable persons who have strong qualifications as public representatives but who may also be indirectly affiliated with a broker-dealer to become public directors. This is, in part, a response to the increasing proliferation of corporate subsidiaries which conduct some broker or dealer activity in the course of their business. We do not regard the presence of such individuals to be inconsistent with the *per se* section 6(b)(3) requirement of public representation on the boards of exchanges. The legislative history makes it clear that the level of public representatives— particularly on an exchange such as the NYSE with 50% public directors—is a flexible standard. In the Commission's view, however, the NYSE's decision to have multiple public directors does not relieve the NYSE from the basic requirement in section 6(b)(3) that at least one of their public directors have no association with a broker or dealer as that term is defined in section 3(a)(18).

The Commission has serious reservations as to whether the proposed definition is consistent with the standard in section 3(a)(18) of the Act defining persons associated with a broker or dealer.[15] In the Commission's view, it is questionable whether the statutory definitions will permit directors of corporations with "significant" broker or dealer subsidiaries or officers or employees of parent corporations with "non-significant" broker-dealer subsidiaries to be deemed not to be associated persons of a broker-dealer.

The requirements of this provision were intended to assure a fair representation of exchange members, issuers of securities listed on the exchange, and the public.[16] However, beyond the minimum level of one or more public directors required under section 6(b)(3), the question of the actual number of public representatives on the board of an exchange was left to each exchange and the Commission.[17]

In response to discussions between the Commission staff and the NYSE on this matter, the NYSE submitted a letter from the Exchange stating that it would ensure that at least one of the public directors will conform to this standard.[18] This letter also stated that the NYSE would base its definition of the term "significant subsidiary" on the definition of that term contained in Rule 405 of the Securities Act of 1933.[19] In addition, under the Board's authority to interpret the terms of the Constitution, the Exchange staff has stated that in considering the definition of the term "significant" the Board would independently consider the size of the subsidiary and the nature of its activities, for purposes of determining whether it was a significant subsidiary, regardless of the 10% standard in Rule 405.[20] In light of this commitment by the

---

[12] The NYSE and the American Stock Exchange, Inc. ("Amex") far exceed the minimum public director representation under section 6(b)(3) of the Act, which requires that "one or more directors shall be representative of issuers and investors and not be associated with a member of the exchange, broker, or dealer." Both exchanges have equal numbers of public and industry directors. The Boston Stock Exchange ("BSE") has 3 public governors (13.6% of the Board), the Midwest Stock Exchange ("MSE") has 8 (29.7%), the Pacific Stock Exchange ("PSE") has 3 (16.8%), and the Philadelphia Stock Exchange ("Phlx") has 3 (10%).

[13] Article I, Section 3(r) of the proposed revised Constitution provides in pertinent part:

[a] person shall be considered to be affiliated with a broker or dealer in securities if such person is a partner, officer, employee or director of such broker or dealer, or controls such broker or dealer, or is an officer or employee of a person, one of the significant subsidiaries of which is such broker or dealer.

[14] The NYSE has stated that "significant" subsidiary is intended to comport with the definition of "significant subsidiary" in Rule 405 of the Securities Act of 1933 (*i.e.*, over 10% of the parent).

[15] The term "person associated with a broker or dealer" is defined in section 3(a)(18) of the act to include "any partner, officer, director, or branch manager of such broker or dealer (or any person occupying a similar status or performing similar functions), any person directly or indirectly contolling, controlled by, or under common control with such broker or dealer, or any employee of such broker or dealer. . . ."

[16] *See* H. Rep. No. 94–123, at 60 (April 7, 1975).

[17] *Id.*, at 61.

[18] *See* February 19, 1986 letter. The NYSE stated that it would comply with the requirements of section 6(b)(3) of the act and that, as a matter of course, several of the NYSE's public directors have no affiliation with a broker or dealer.

[19] Rule 405 provides, generally, that a significant subsidiary is one where: (1) The investment in and advances to the subsidiary by the parent corporation and its other subsidiaries are over 10% of the total consolidated assets of the parent corporation and its other subsidiaries; (2) the share of the total assets of the subsidiary by the parent corporation and its other subsidiaries exceeds 10% of the total consolidated assets of the parent corporation and its other subsidiaries; or (3) the income from the subsidiary exceeds 10% of the consolidated income of the parent corporation and its other subsidiaries.

[20] For example, a large broker-dealer, even if a subsidiary of a major national corporation, still could be regarded as a significant subsidiary regardless of whether it met the test established under Rule 405. Telephone conversation on

Continued

NYSE, the Commission regards the new definition of industry and public directors as satisfying both the basic requirements of section 6(b)(3) and the provision's overall objective in seeking to ensure substantial public representation on the governing boards of the exchanges.[21] The Commission, therefore, concludes that the proposed amendments to Article IV are consistent with section 6(b)(3) of the Act.

B. Voting Rights for Electronic Access Members [22]

1. Description of Change

The current NYSE Constitution, Article IX, Section 1(c), provides for a membership class which is entitled to have electronic or telephonic access to the floor facilities of a member and access to the Designated Order Turnaround ("DOT") System of the Exchange.[23] Such members are entitled under Article VII, section 10(c) of the current Constitution to one half vote on each position to be filled in the election of Directors and on other matters at meetings of members of the Exchange. These members are required to pay annual dues and hold no equity interest in the Exchange.

Under the proposed NYSE Constitution, Article II, Section 1(c), electronic access members would remain a member class of the Exchange with the same level of access to NYSE facilities. Moreover, current electronic access members who remain in good standing would, under Article III, Section 9(b), retain their one half vote on the election of NYSE Directors and other matters presented at meetings of members. Under Article III, Section 9(c), however, an electronic access member who becomes a member on or after the "effective date" [24] would have no vote in any election or on any matter at any meeting of the exchange.

2. Discussion

The NYSE has indicated that it anticipates a large increase in the number of broker-dealers desiring direct access to the NYSE's "new and enhanced electronic order routing and execution systems." It believes that a substantial number of new electronic access memberships may add depth and liquidity to the Exchange's market. In light of the potential admission of a significant number of new electronic access members, who have no equity interest in the exchange and whose membership is of limited duration, the Exchange believes it is not "necessary or appropriate for the new electronic access members to be given the right to vote." [25]

The Exchange asserts that section 6(b)(3) of the Act, requiring that the rules of an exchange provide fair representation of its menbers in the election of directors and the administration of an exchange, does not require that all categories of members be given full voting rights. It states that the requirement of section 6(b)(3) is met when equity members of the Exchange are provided full voting rights and physical access members are given partial voting rights.[26]

In its 1978 order approving the NYSE's proposal creating a class of electronic access membership, the Commission recognized that the voting rights of electronic access and regular seat-holders would not be co-extensive, but concluded that electronic access members with only ½ of a vote would be accorded "fair representation in the selection of directors and administration

---

February 24, 1986, between Brandon Becker, Assistant Director, Division of Market regulation, and James C. Buck, Secretary, NYSE.

[21] In two recent actions, the Commission has addressed issues of proportional representation on the boards of directors of exchanges. The Commission disapproved a proposal by the CBOE (Securities Exchange Act Release No. 22056 (May 21, 1985), 50 FR 23090) which would have increased the minimum number of On-Floor Directors. The Commission noted that domination by the floor membership of the CBOE Board and a resulting decrease in the proportion of retail firm and public governors on the Board would have seriously weakened the ability of the Board to carry out the purposes of the Act and enforce compliance with Exchange and Commission rules, as required by section 6(b)(1). In addition, the Commission stated that the numerical domination by one faction of the CBOE membership, in contravention of Section 6(b)(3), might make it difficult for the Board to act in the best interests of the public or the CBOE as a whole and could impede efforts by the Board to vigorously enforce Commission or Exchange rules not favored by the floor membership. The Commission also viewed the proposal as being inconsistent with section 6(b)(5) which requires the rules of an exchange to be designed to protect investors and their public interest.

Subsequently, in Securities Exchange Act Release No. 22728 (December 19, 1985), 50 FR 53051, File No. SR–Phlx–85–23, the Commission approved a proposal by the Phlx to amend its by-laws to create a classified Board of Governors and specify the number of Governors that would serve as On-Floor, Off-Floor, At Large and Public members of the Board. Phlx's rule change was viewed as conforming to the Commission's governance policy set out in the CBOE proceedings. The Commission noted in its order that then current Phlx By-Laws, which proivded no limitations on the number of On-Floor or Off-Floor representatives who could be elected to the 21 unclassified broker governor positions, had the potential for allowing the domination of the 30 member Board by one sector of the Phlx membership. The Commission stated that Phlx's By-Law amendment would conform the structure of the Phlx Board of Governors with the fair representation principles the Commission set out in reviewing CBOE's proposal. *See CBOE Order at 2, 3.*

[22] There are currently 82 NYSE electronic access members who pay $37,000 annually for such access. On the date of the membership vote on the constitutional amendments, December 20, 1985, there were 77 such members. Of these, 29 voted for the proposed amendments and 3 voted against (the remaining such members not voting).

[23] DOT is computerized order routing system for small orders (currently the system is limited to orders of 2,099 shares or less). DOT routes these orders directly to the specialist post.

[24] The "effective date" means the date that is thirty days after the proposed new Constitution becomes effective.

[25] *See* February 6, 1986 letter.

[26] In its February 6, 1986 letter, the NYSE points out that the Amex, Phlx, and the CBOE all have member categories which have trading privileges but no right to vote. It also notes that options trading right holders on the NYSE have trading rights but no voting rights.

Options trading right holders for the NYSE were approved by the Commission in Securities Exchange Act Release No. 20202, September 20, 1983 (File Nos. SR–NYSE–83–29, SR–NYSE–83–30). Under Article XIII of the current NYSE Constitution, options trading right holders are permitted to maintain facilities on the trading floor for the execution of options orders but are not provided with any membership rights in the Exchange. The proposed revised NYSE Constitution retains this provision substantially unchanged in Article II, Sections 8 and 9.

In addition, as the NYSE suggests, several other exchanges have categories of non-voting participants. The Amex has two such membership categories. Options Principal Members ("OPM's") are only permitted to trade in options on the trading floor of the Amex. OPM's have no vote in election of Governors or officers of the Exchange or in other matters which require a membership vote except for those matters which would affect any provision in the Amex's certificate of incorporation and which would adversely affect the OPM's rights upon dissolution or liquidation of the Amex. Amex also has an Associate Member category. Those members are only permitted electronic access tothe trading floor of the Exchange and have no voting rights in any of the affairs of the Exchange.

CBOE has two categories of permit holders (foreign currency options and debt options) who are only allowed to trade on the floor of the Exchange in their specific type of option. These are three year non-renewable permits and the permit holders have no voting rights in any of the affairs of the Exchange. CBOE also has a Special Membership which was granted to former MSE options members. Such membership is for a ten year period (non-renewable) and it only permits the member to trade in 16 options on the Exchange. Special Members have 1/6 the vote of a regular member in the affairs of the Exchange.

At the Cincinnati Stock Exchange, Inc., Access Participants have a one year renewable membership that entitles them to access the trading floor of the Exchange but only allows them to conduct trading through regular Proprietary Members (who have a full vote and equitable interest in the Exchange). Access Participants may only vote for access participants to the Exchange's Board of Trustees and on issues which would have the effect of either increasing or decreasing their membership rights.

On the Phlx, Foreign Currency Options Participation holders are only permitted to trade foreign currency options on the Exchange. They have no equity interest in the Exchange and have no vote in any of its affairs.

VOL 51 ISS 45 MR 7 1986

of the NYSE's affairs."[27] The order focused on the temporary nature of these annual memberships, and the lack of any equity interest in the Exchange by such members, as the basis for its decision to approve the NYSE's limitation on such members' voting privileges. Specifically, the Commission approved a one-half vote for electronic access members, with a limitation on voting on matters involving the disposition of Exchange assets or matters "relating to the rights, privileges or limitations of annual membership. . . ."[28] With respect to the latter provision, the Commission stated that "it is pertinent to note that annual members, upon expiration of their memberships, would have no unalterable claim to acquire future memberships which confer precisely the same rights and privileges as earlier memberships."[29] The Commission noted in the order, however, that proposed NYSE constitutional amendments limiting "the rights or privileges of *then current* annual members would raise questions as to the fair representation and unfair discrimination provisions of the Act. . . ."[30]

The Commission recognized in its 1978 order that, in creating means of Exchange access in addition to purchase of a regular seat, the NYSE was not required to grant equivalent voting powers among various membership classes, in light of the temporary nature of these memberships and the lack of any equity interest in the Exchange accruing from such membership. In view of the fact that the sole interest of the electronic access member is, by payment of $37,000 annually, to gain direct access to the NYSE's DOT system or a member's floor facilities for more efficient and less expensive order execution, the Commission believes that the NYSE is not required to provide these members the voting rights provided to regular members who pay substantially more for their privileges and who have a considerably greater stake in membership decisions relating to the conduct of business on the Exchange floor and to Exchange governance procedures. In addition, the Commission notes that, under the amended voting provisions, electronic access members would be able to appeal to the Commission, under section 19(d) of the Act, any disciplinary action taken by the Exchange against such member or any denial or limitations on access imposed by the Exchange upon such member.

The Commission concludes the proposed amendment is consistent with sections 6(b)(5) and 6(b)(8) of the Act in that the proposal in no way impinges on the rights of electronic access members to access the NYSE's DOT system or other Exchange facilities to which such members are currently permitted access.

C. Directors' Participation in Matters in Which They Have a Personal Interest

1. Description of Change

The current NYSE Constitution, Article III, Section 2, provides that no person shall participate in the adjudication of any matter in which he is personally interested. This provision would be deleted in the proposed Constitution and no comparable conflict of interest provision in the Constitution exists which would replace its requirement of mandatory disqualification of persons with a personal interest in an adjudication.

2. Discussion

The NYSE has stated that it regards the Constitution's current conflict of interest provision as unnecessary and that it intends to move this provision to the rules. The NYSE has noted, however, that if the Commission finds it is necessary to retain this provision, the Exchange will commit to proposing an amendment to reinsert this provision.

The Commission believes that section 6(b)(7) of the Act, which provides that the Commission shall insure that the rules of the exchange provide a fair procedure for the disciplining of members and persons associated with members, makes it essential that an appropriate conflict of interest provision—applying equally to proceedings by the Board of Directors as well as actions by all other members of the Exchange—be present in the NYSE Constitution.

Accordingly, the Commission has determined to take no action on the proposed deletion of the conflict of interest provision contained in Article III, Section 2, paragraph 7 of the current Constitution. The NYSE has committed to propose to its members at the next NYSE membership vote that a conflict of interest provision similiar to that included in current Article III, Section 2 be added to its revised Constitution.[31]

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

Dated: February 28, 1986.

By the Commission.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Inc.

February 28, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following securities:

First Wachovia Corporation
  Common Stock, $5.00 Par Value (File No. 7–8847)
Morton Thiokol, Inc.
  Common Stock, $1.00 Par Value (File No. 7–8848)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 21, 1986, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

[File No. 1–1790]

Issuer Delisting; Application To Withdraw From Listing and Registration; Russell Corp.; Common Stock, Par Value $.01 per Share

February 28, 1986.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc.

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Board of Directors of Russell Corporation determined that, in connection with the listing of the Company's common stock on the New York Stock Exchange, Inc., it is desirable to withdraw the Company's common stock from listing on the American Stock Exchange to eliminate the expenses attendant in maintaining a dual listing of the Company's common stock.

Any interested person may, on or before March 21, 1986, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC–14965; File No. 812–6274]

Banco Central, S.A.; Application for an Order Granting Exemption From all Provisions of the Act

February 28, 1986.

Notice is hereby given that Banco Central, S.A. ("Applicant"), c/o Sydney H. Mendelsohn, Esq., Finley, Kumble, Wagner, Heine, Underberg, Manley & Casey, 1120 Connecticut Avenue, NW, Washington, DC 20036, filed an application on January 3, 1986, and an amendment thereto on February 25, 1986, for an order of the Commission, purusant to section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting Applicant and certain United States subsidiaries thereof from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the applicable provisions.

Applicant represents that it is a recognized bank under the laws of Spain and that it is subject to extensive regulation by Spanish, American, and other banking authorities by virtue of its worldwide activities. According to the application, Applicant currently ranks as the largest bank in Spain in terms of equity (approximately U.S. $811 million), total assets (approximately U.S. $14.4 billion) and deposits (approximately U.S. $13.4 billion).

Applicant intends to form one or more wholly-owned subsidiaries organized under the laws of the State of Delaware ("Subsidiary") to facilitate Applicant's access to the United States commercial paper market. Applicant states that the Subsidiary will serve exclusively as a financing vehicle for Applicant's proposed issuance of debt securities in the United States.

Applicant proposes to issue bearer promissory notes (the "Notes") in minimum denominations of $100,000 through commercial paper dealers to be sole only to institutional investors and other entities and individuals that ordinarily purchase commercial paper in the United States commercial paper market. Applicant states that the Notes will not be advertised, offered or sold to the general public and will have maturities not exceeding 270 days. According to the application, the Notes will be issued in one of two ways: (1) Applicant will be the issuer, in which case the Subsidiary's sole function will be to sign the Notes on behalf of Applicant as its agent. Applicant will be directly liable as principal for the payment of all Notes signed on its behalf by the Subsidiary and the Subsidiary will have no liability with respect thereto; or (2) the Subsidiary will issue the Notes which will be guaranteed by Applicant. Where the Subsidiary is the issuer it will promptly transfer to Applicant substantially all of the process of any offering of the Notes. In either case, Applicant will unconditionally guarantee the payment of principal and interest (if any) on the Notes. Applicant represents that such guarantees will rank *pari passu* among themselves and with all other unsecured unsubordinated indebtedness (including deposit liabilities) of Applicant and superior to rights of shareholders, and that holders of the Notes will have a direct cause of action against Applicant in the event of any default in payment on the Notes.

According to the application, the proceeds from sales of the Notes are expected to be used for current transactions in the ordinary course of Applicant's business and the Notes will qualify for exemption from the registration requirements of the Securities Act of 1933 (the "1933 Act"). Applicant further represents that it will not issue or sell any Notes until it has received an opinion of its United States counsel that the Notes are entitled to such exemption.

According to the application, the initial issuance of the Notes by Applicant or any Subsidiary will be for a principal amount not to exceed $500 million. However, Applicant states that in the future, it or a Subsidiary may, from time to time, offer and sell in the United States debt securities other than the Notes, which may be in denominations of less than $100,000, but neither Applicant nor a Subsidiary will offer or sell equity securities in the United States in reliance upon or pursuant to the order requested herein. In the case of any such offering of debt securities in the United States, Applicant will provide a direct, unconditional guarantee for the payment of principal, premium (if any) and interest. Such guarantees will rank *pari passu* with other debt securities of Applicant having the same degree of

BEST COPY AVAILABLE

VOL 51 ISS 45 MR 7 1986 UMI

subordination. With respect to any public offering of securities requiring registration, Applicant represents that it will not sell such securities until the registration statement pertaining thereto has been declared effective by the Commission.

Applicant states that the proposed issuance of the Notes and any future offering of debt securities in the United States shall have received, prior to issuance, one of the three highest investment grade ratings from at least one nationally recognized investment rating organization, and that Applicant's United States counsel shall have certified that such rating has been received. However, no such rating will be required if, in the opinion of Applicant's United States counsel, an exemption from registration is available with respect to such issue under section 4(2) of the 1933 Act or Regulation D thereunder.

Applicant undertakes to ensure that each dealer of the Notes, or of any future debt securities offered by Applicant or any Subsidiary, will provide each offeree, prior to any sale of such securities, a memorandum (the "Offering Memorandum") describing Applicant's business and containing Applicant's most recently published financial statements audited in accordance with Spanish auditing practices. Applicant represents that the Offering Memorandum will describe the material differences between generally accepted accounting principles employed by United States banks and accounting principles applicable to Spanish banks and used by Applicant. Applicant states that the Offering Memorandum will be at least as comprehensive as those customarily used in commercial paper offerings in the United States and will be updated as promptly as practicable to reflect material changes in Applicant's business or financial status. Applicant consents to any order granting the requested relief being expressly conditioned upon compliance by Applicant with the foregoing undertakings regarding the Offering Memorandum.

With respect to the Notes and any future issuances of debt securities in the United States, Applicant represent that it (and the Subsidiary if it is the issuer) will appoint one of its general managers or a corporate entity which acts in such capacity to accept service of process in any action commenced in any state or federal court in the United States by holders of the Notes against the Applicant based on the Notes or the guarantees thereon. Applicant (and the Subsidiary if it is the issuer) will expressly accept the jurisdiction of any state or federal court in the Borough of Manhattan and the City and State of New York in respect of any such action. Such Appointment of an authorized agent to accept service of process and such consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the Notes or other debt securities shall have been paid. The application also states that both the Applicant and the Subsidiary will be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering or otherwise.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 24, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Managment, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 35-24034; 70-7203]

The Southern Co., et al.; Proposal To Issue and Sell Short-Term Notes, Term-Loan Notes and Commercial Paper; Exception From Competitive Bidding

February 28, 1986.

The Southern Company ("Southern"), a registered holding company, 64 Perimeter Center East, Atlanta, Georgia 30346, and its public utility subsidiaries, Georgia Power Company ("Georgia"), 333 Piedmont Avenue, NE., Atlanta, Georgia 30308, Gulf Power Company ("Gulf"), 75 North Pace Boulevard, Pensacola, Florida 32520 and Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport Mississippi 39501, have filed an application-declaration subject to sections 6(a) and (b), 7, and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 45, 50(a)(2) and 50(a)(5) thereunder.

Southern, Georgia, Gulf and Mississippi propose to issue and sell from time to time, prior to April 1, 1988, short-term notes to banks and, in the case of Georgia, Gulf and Mississippi, commercial paper to dealers up to an aggregate principal amount of $100 million for Southern, $1 billion for Georgia, $35 million for Gulf and $35 million for Mississippi. In addition, Georgia is also seeking term-loan authorization. For the period ending April 1, 1987, Southern also proposes to make capital contributions to its subsidiaries, Alabama Power Company, Georgia, Gulf and Mississippi, in amounts not to exceed $45, $320, $10 and $5 million, respectively.

Southern has obtained commitments aggregating $100 million from certain banks. Each commitment currently matures December 31, 1986 and is subject to renewal in accordance with its terms. Southern can elect one of three rate options, currently producing an effective cost range of between 8.9% and 10%.

Pursuant to separate commitment agreements with 11 banks ("Bank") Georgia may borrow, through December 31, 1990, on a short-term unsecured revolving credit basis, up to an aggregate of $1.565 billion in principal amount at any one time outstanding. These borrowings have a maximum maturity of 270 days, are renewable at maturity and may be converted to term loans at any time at Georgia's option. Under the term-loan option, borrowings would be repaid in 12 equal quarterly installments beginning March 31, 1991 through December 31, 1993, or at an earlier date at Georgia's option. Under each agreement, Georgia is obligated to pay a commitment fee of .5% based upon the unused portion of the Bank's commitment. The current effective annual interest rates on individual borrowings would range from 8.5% to 9.8%, and from 8.6% to 10.1% for term-loan borrowings.

Georgia, Gulf and Mississippi also may effect short-term borrowings hereunder in connection with the financing of certain pollution control facilities through the issuance by public entities of their revenue bond anticipation notes.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by March 24, 1986, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the applicants-declarants at the addresses specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

TENNESSEE VALLEY AUTHORITY

Forms Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Forms Under Review by the Office of Management and Budget.

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

Requests for information, including copies of the forms proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; Attention: Desk Officer for Tennessee Valley Authority, 395-7313.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751-2524, FTS 858-2524.

Type of Request: Regular Submission.

Title of Information Collection: Southeastern Biomass Reporting Form.

Frequency of Use: Once per respondent.

Type of Affected Public: Businesses or other for-profit, non-profit institution, and small businesses or organizations.

Small Businesses or Organizations Affected: Yes.

Federal Budget Functional Category Code: 452.

Estimated Number of Annual Responses: 800.

Estimated Total Annual Burden Hours: 200.

Need For and Use of Information: Preliminary data indicates the existence of 800 installations in the Southeastern U.S. using cellulosic fuels for energy conversion. The states comprising the S.E. region will be surveyed to collect data describing those installations. The data will be published to serve the community by enabling biomass industries to match their needs with local resources, and by encouraging adoption of proven technologies.

Dated: February 28, 1986.

John W. Thompson,

Manager of Corporate Services, Senior Agency Official.

Scottsdale Municipal Airport; Noise Exposure Map

Federal Aviation Administration

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by the city of Scottsdale, Arizona, for the Scottsdale Municipal Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and 14 CFR Part 150 are in compliance with applicable requirements.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps is February 7, 1986.

FOR FURTHER INFORMATION CONTACT: L. Yvonne Gibson, Airport Planner, AWP–611.5, Federal Aviation Administration, Western-Pacific Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009, (213) 297–1621.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Scottsdale Municipal Airport, Scottsdale, Arizona, are in compliance with applicable requirements of FAR Part 150, effective February 7, 1986.

Under Section 103 of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict noncompatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of FAR Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by the city of Scottsdale, Arizona, on May 25, 1985. The FAA has determined that the noise exposure maps for the Scottsdale Municipal Airport are in compliance with applicable requirements. This determination is effective on February 7, 1986. FAA's determination on an airport operator's noise exposure map is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, nor is it a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under FAR Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under section 103 of the Act. The FAA has relied on the certification by the airport operator, under section 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

Copies of the noise exposure maps and the FAA's evaluation of the maps are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., Room 617, Washington, DC 20591

Federal Aviation Administration, Western-Pacific Region, Airports Division, 15000 S. Aviation Boulevard, Room 6E25, Hawthorne, CA 90261

Mr. Carder Hunt, Airport Director, Scottsdale Municipal Airport, 3939 Civic Center Plaza, Scottsdale, AZ 85251

Issued in Hawthorne, California, on February 14, 1986.

H.C. McClure,
Director, Western-Pacific Region.

BILLING CODE 4910–13–M

[Summary Notice No. PE–86–4]

Petitions for Exemption; Summary of Petitions Received and Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: March 27, 1986.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Petition Docket No. ———, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–204), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on March 3, 1986.

John H. Cassady,
Assistant Chief Counsel, Regulations and enforcement Division.

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
23386	Mid Pacific Airlines, Inc	14 CFR 121.371(a) and 121.378	To allow petitioner to utilize all Nippon Airways Company, Ltd., Air Asia Company, Ltd., and Toa Domestic Airlines and its affiliate Nitto Maintenance company for the inspection and overhaul of aircraft, including certain selected airframe accessories and appliances.
23608	Lone Star Helicopters, Inc	14 CFR 43.3(g)	To allow petitioner's appropriately trained and certificated pilots to remove, check, and reinstall magnetic chip detector plugs in the Allison 250 series turbine engines, aircraft transmissions, and tail rotor gearboxes installed on Bell 206 series helicopters.
20049	T.B.M. Inc	14 CFR 91.211(a)(1)	To allow petitioner to conduct operations of its McDonnel Douglas DC–6, and DC–7B aircraft without a flight crewmember holding a current flight engineer certificate.
20044	Air Transport Association of America	14 CFR 61.63 (b) and (c)	To allow pilots employed by Part 121 certificate holders to be issued additional category and class ratings based on normal upgrade training to second-in command.
20314	Flight Training Devices	14 CFR 61.63(d)(2)	To allow petitioner to complete a portion of the practical test for the issuance of an airplane transport pilot certificate or a type rating to be added to any grade of pilot certificate, by substituting the flight test requirement of § 61.157(a) for those of § 61.63(d)(2) and (3), limited to the items and procedures for testing in an airplane simulator as set forth in Appendix A of Part 61.
22558	Boeing Commercial Airplane Company	14 CFR 47.69(b)	Extension of Exemption 3513c to permit petitioner to use Dealer's Aircraft Registration Certificates outside the United States for flight testing and sales demonstrations.
24795	Consulting Aerospace Engineers, Inc	14 CFR 21.19(b)	To allow petitioner, to engineer and direct the modification of a Cessna 337G aircraft from the existing two Commercial 0360 engines to one Pratt and Whitney PT6A–124 engine.
24814	Centre Airlines, Inc	14 CFR 135.267(d)	To allow petitioner's pilots to accept duty during flight time without having had at least 10 consecutive hours of rest during the 24-hour period preceding the planned completion of time of the assignment.
24818	Piedmont Airlines	14 CFR 121.308	To allow petitioner to use a lavatory trash receptacle without installing a self-containing fire agent bottle internally on its F28–1000 aircraft.
24630	Gulfstream Aerospace Corporation	14 CFR 21.181	To allow petitioner to operate certain types of aircraft utilizing the provisions of a minimum equipment list.
24675	Shoukat Ali Shah	14 CFR 65.91C(1) and C(2)	To allow petitioner to take the written test for the issuance of inspection authorization without having to wait 3 years.
24924	Civil Air Patrol	14 CFR 91.79(c)	To permit petitioner to conduct operations at distances less then 500 feet from people, vehicles, structures, and vessels.
24901	United Airlines	14 CFR 61.57(c)	To allow petitioner's test pilots to accomplish a minimum of six takeoffs and landings in a 90-day period in any and/or all types of large transport category airplanes operated by petitioner in lieu of accomplishing a minimum of three takeoffs and landings in each type in which rated each 90 days to maintain currency.
15691	Air Logistics	14 CFR 43.3(g)	To allow petitioner's appropriately trained and certified pilots to remove, check and reinstall magnetic chip detector plugs in the Allison C250C series turbine engines and transmissions and tail rotor gear boxes installed on Bell Model 206 series, Aerospatiale Model 355 series, and magnetic chip detector plugs in 42° and 90° tail rotor gear boxes installed on Bell Model 212–412 series helicopters.
23869	The Relative Workshop	14 CFR 105.43(a)	To allow petitioner and Strong Enterprises to continue to make tandem parachute jumps using dual harnesses and dual parachute jacks.

DISPOSITIONS OF PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
24373	Transportes Aereos Mercantiles Panamericanos, S.A.	14 CFR 91.303	To exempt petitioner from the January 1, 1985, noise level compliance date. To permit petitioner to operate two noncompliant Boeing 707–320 aircraft in foreign air commerce until December 31, 1985. *Denied February 24, 1986.*
23863	Florida Express	14 CFR 91.307	To allow operation in the United States, under a service to small communities exemption, of specified two-engine airplanes identified by registration and serial number, that have not been shown to comply with the applicable operating noise limits as follows: Until not later than January 1, 1988: BAC 1–11:N1542, N1544, N1545, N1546, N1548, N1549, N1135J, N1136J, N102EX, and N108EX. *Granted February 3, 1986*
24800	Tennessee Air Cooperative, Inc	14 CFR 103.1(a)(1)	To allow petitioner's pilots and other disabled pilots to exceed the maximum 254 pounds empty weight requirement for ultralight aircraft up to a maximum 350 pounds to allow installation of special safety and operational equipment for the disabled. *Granted January 30, 1986.*
24670	Executive Helicopters, Inc.	14 CFR 91.169 (a) and (b)	To permit petitioner to inspect its Westland helicopters in accordance with a continous inspection program. *Granted January 31, 1986.*
24806	The Kroger Company	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list. *Granted January 31, 1986.*
24762	George Lee	14 CFR 65.91(c)(2)	To allow petitioner to apply for an Inspection Authorization Certificate prior to completing the required two years of actively maintaining aircraft. *Granted February 5, 1986.*

DISPOSITIONS OF PETITIONS FOR EXEMPTION—Continued

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
23707	Ford Motor Company	14 CFR 21.181	To allow petitioner to operate the following aircraft using a Federal Aviation Administration (FAA)-approved minimum equipment list (MEL). *Granted February 5, 1986.*
24636	United Airlines, Inc.	14 CFR 121.371 (a) and 121.378	To permit petitioner to contract with Hong Kong Aircraft Engineering Company (HAECO) for maintenance, preventive maintenance, alterations, and required inspections on Rolls Royce RB-211 engines, Auxiliary Powerplant Units (APU's); and components in support of United-operated L-1011-500 aircraft and also to cross-utilize United-owned common L-1011-500 components with Cathay Pacific Airways, Ltd. (Cathay Pacific) and Gulf Air L-1011 components. *Granted February 6, 1986.*
22441	United Airlines	14 CFR 121.433, 121.441(a)(l), 121.441(l)(e)	To extend the July 31, 1985 termination date of Exemption 3451A. That exemption allows petitioner to conduct an FAA-monitored program under which flight crewmembers are able to meet the annual ground and flight recurrent training requirements and the annual proficiency check requirements without specifically meeting requirements to the cited sections. *Granted August 1, 1985.*
21516	U.S. Epperson Underwriting Co.	14 CFR 21.181	To allow petitioner to add an aircraft and renumber an aircraft already listed in a minimum equipment list exemption. *Granted February 10, 1986.*
24485 24486	National Medical Enterprises, Inc.	14 CFR 21.181	To allow petitioner to operate a Dassault DA-10 aircraft, N150BG, using a Federal Aviation Administration (FAA)-approved minimum equipment list (MEL). *Granted February 10, 1986.*
24144	Air Atlanta	14 CFR 63.37	To allow petitioner to substitute training in a simulator for the required 5 hours of flight training in the duties of a flight engineer. *Denied February 10, 1986.*
20771	US Air	14 CFR 91.307	To amend Exemption No. 3116b to add 1 aircraft. The present exemption allows operation in the United States, under a service to small communities exemption, of specified two-engine airplanes, identified by registration and serial number, that have not been shown to comply with the applicable operating noise limits as follows: Until not later than January 1, 1988: BAC 1-11:N2111J, N1113J, N1122J, N1127J, N1128J, N1117J, N1112J, N1114J, N1115J, N1118J, N1119J, N1120J, N1123J, N1124J, N1126J, N1129J, N1130J, N1131J, N1132J and N1134J. *Amended Grant February 11, 1986.*
24645	Seven Bar Flying Service Inc.	14 CFR 141.35(b)(3)	To allow Sam Puma to serve as chief instructor for the Seven Bar Part 141 private course without meeting the regulation's full 500 hour, two-year certification requirements. *Denied February 12, 1986.*
24432	Susquehanna Airlines	14 CFR 135.175	To allow petitioner to operate DeHavilland Heron Aircraft without radar equipment. *Denied February 25, 1986.*
24753	Burnside-Ott Aviation	14 CFR 147.21 and 147.31	To allow petitioner relief from the general curriculum requirements, attendance, enrollment test, and credit for prior instruction or experience given to eleven of its students who were enrolled in the Burnside-Ott Aviation Technical School in Pensacola, Florida, prior to it having obtained Federal Aviation Administration (FAA) approval for its established curriculum. *Denied February 24, 1986.*
24582	Mr. John R. Mullin	14 CFR 61.151	To allow petitioner to qualify for an Airline Transport Pilot certificate (simulator-only) and to exercise the privileges of a simulator instructor without a first class medical certificate. Petitioner suffers from diabetes and is not eligible for a medical certificate under Part 67. *Denied February 24, 1986.*
23883	Tenneco Inc.	14 CFR 21.181	To permit petitioner to operate its fleet of corporate airplanes using a minimum equipment list (MEL) and a configuration deviation list (CDL). *Granted February 24, 1986.*
24367	Empresa Ecuatorian Island Airways, Inc.	14 CFR 91.303	To exempt petitioner from the January 1, 1985, noise level compliance date. *Amended Grant February 26, 1986.*
24660	Lineas Aereas Del Caribe, S.A. (LAC)	14 CFR 91.307	To amend Exemption No. 3116b to add 1 aircraft. The present exemption allows operation in the United States, under a service to small communities exemption, of specified two-engine airplanes, identified by registration and serial number, that have not been shown to comply with the applicable operating noise limits as follows: Until not later than January 1, 1988: SE-210: HK2850, HC-BAJ *Amended Grant February 26, 1986.*
24630 24631	Gulfstream Aerospace Corporation	14 CFR 21.181	To allow petitioner to operate certain aircraft using a Federal Aviation Administration (FAA)-approved minimum equipment list (MEL). *Granted February 12, 1986.*
24278	Richard F. Main	14 CFR 61.73(c)	To allow the addition of a multiengine rating to petitioner's commercial single-engine land instrument rating based on military competence. *Denied February 12, 1986.*
21959	Deere & Company	14 CFR Portions of Parts 21 & 91	To permit operation of a Grumman G-1159 (N400JD); Three Cessna C-550's, (N30JD, N60JD, N90JD) and a Lockheed L-1329 (N500JD) using the provisions of a FAA-approved minimum equipment list for each type of aircraft. *Granted February 12, 1986.*
24632	Crown Central Petroleum Corp.	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list. *Granted February 12, 1986.*
24276	Western Airlines	14 CFR 63.37 (b) and Part 63, Appendix C	To allow an applicant for a flight engineer certificate with a turbojet class rating to obtain the certificate without having received the required 5 hours of flight training in an airplane. *Denied February 14, 1986.*
24648	Allied Corporation	14 CFR 21.181	Amendment to exemption No. 4524 to allow petitioner to operate additional aircraft utilizing the provisions of a minimum equipment list. *Granted February 13, 1986.*
24776	Eagle Jet Charter	14 CFR 43.3	To allow pilots of the petitioner who have been properly trained to remove or install aircraft seats on its Cessna and Learjet aircraft. *Granted February 19, 1986.*
20796	Prince Corporation	14 CFR 21.181	To allow petitioner to operate certain aircraft utilizing the provisions of a minimum equipment list. *Withdrawn January 31, 1986.*
22867	Executive Helicopters	14 CFR 141.41 (a)(1) and (iii)	To allow petitioner to utilize the HTS-100 Primary Helicopter Training system in their Part 141 Helicopter Pilot School, No. PC-205-2. The amendment would increase the maximum flight training credits up to 5 hours. *Withdrawn February 13, 1986.*
24146-2	South Pacific Island Airways	14 CFR 91.303	To allow petitioner to operate one Stage 1 B707-323B aircraft until hush kits are installed. *Granted February 26, 1986.*

BILLING CODE 4910-13-M

Radio Technical Commission for Aeronautics (RTCA) Special Committee 153; Airborne VOR Equipment; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 153 on Airborne VOR Equipment to be held on April 7-8, 1986, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC, commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of the Meeting Held on January 14-15, 1986; (3) Review and Discuss European Organization for Civil Aviation Electronics (EUROCAE) Working Groups WG-5 and WG-7A Activities; (4) Review Third Draft of Committee Report on Minimum Operational Performance Standards for Airborne ILS Glide Slope Equipment; (5) Review Fourth Draft of Committee Report on Minimum Operational Performance Standards for Airborne ILS Localizer Equipment; (6) Consideration of Further Changes to Eighth Draft of Committee, Report on Minimum Operational Performance Standards for Airborne VOR Receiving Equipment; and (7) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on February 27, 1986.

Karl F. Bierach,

Designated Officer.

BILLING CODE 4810-40-M

Internal Revenue Service

Privacy Act of 1974; Reinstated System of Records

AGENCY: Internal Revenue Service, Department of the Treasury.

ACTION: Notice of Reinstatement of a System of Records. Treasury/IRS 00.001, Corresponding Files and Correspondence Control Files

SUMMARY: The Internal Revenue Service consolidated System 00.001 with System 00.002 in the 1977 annualy compilation of Privacy Act Systems of Records, 42 FR 49099, September 26, 1977, in an effort to reduce the number of systems of records for ease of use. The consolidation combined a system which was not exempt from any provisions of the Privacy Act with one that contains investigatory material exempt under (k)(2). Although not intended, this merger resulted in a system which was entirely exempt from access. The substance (contents and uses) of the systems were not intended to be changed, only the systems description. For this reason, the systems or records, as they appeared in 41 FR 45285, October 14, 1976, and the full text of their descriptions with a few editorial changes, are reinstated to replace consolidated system IRS 00.002, Correspondence Files (Including inquiries about enforcement activities), last published in the Department's 1985 republication of Notices of Systems of Records; 50 FR 29894, July 22, 1985.

This is an administrative action which has been initiated for the benefit of the public to properly reflect the system descriptions in the **Federal Register**. It does not require submissions to the Congress and OMB, nor does it require a public comment period as it is a reinstatement of a previously approved system of records.

DATE: These changes are effective March 7, 1986.

FOR FURTHER INFORMATION CONTACT: Marcus Farbenblum, (202) 566-3359, Chief, Public Services Branch.

Dated: February 27, 1986.

John F.W. Rogers,

Assistant Secretary of the Treasury (Management).

Treasury/IRS 00.001

SYSTEM NAME:

Correspondence Files and Correspondence Control Files—Treasury/IRS.

SYSTEM LOCATION:

Various offices of the Internal Revenue Service maintain files of correspondence received. (See IRS Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Initiators of the correspondence. (2) Persons upon whose behalf the correspondence was initiated. (3) Subjects of the correspondence.

CATEGORIES OF RECORDS IN THE SYSTEM:

(1) Correspondence received. (2) Responses to correspondence. (3) Associated records. Special categories of correspondence may be included in other systems of records described by specific notices. Files are maintained in connection with a variety of correspondence received and the uses vary widely in accordance with the content of the correspondence. Correspondence may include letters, telegrams, memoranda of telephone calls, and other forms of communication.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 26 U.S.C. 7801 and 7802.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

A record or information from a record maintained in this system of records may be disclosed as a routine use: (1) To the Department of Justice in connection with actual or potential criminal prosecution or civil litigation, and in connection with requests for legal advice. Disclosure may be made during judicial processes. (2) To other agencies to the extent provided by law or regulation and as necessary to report apparent violation of law to appropriate law enforcement agencies. (3) To appropriate Federal, state, local, or foreign agencies responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, registration, order, or license. (4) To a Federal, State, or local agency, maintaining civil, criminal or other relevant enforcement information or

other pertinent information, which has requested information relevant to or necessary to the requesting agency's or the bureau's hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit. (5) In response to a court subpoena, to appropriate parties engaged in litigation or in preparation of possible litigation such as potential witnesses for the purpose of securing their testimony to courts, magistrates or administrative tribunals, to parties and their attorneys in connection with litigation or settlement of disputes, to individuals seeking information through established discovery procedures in connection with civil, criminal or regulatory proceedings. (6) To foreign governments in accordance with formal or informal international agreements. (7) To a Congressional office in response to an inquiry made at the request of the individual to whom the record pertains. (8) To the news media, in accordance with guidelines contained in 28 CFR 50.2, concerning this agency's functions relating to civil and criminal proceedings. (9) To unions recognized as exclusive bargaining representatives under Civil Service Reform Act of 1978, 5 U.S.C. 7111 and 7114. (10) To third parties during the course of an investigation to the extent necessary to obtain information pertinent to the investigation. (11) To the extent that any records in this system constitute return information, they may be disclosed only as provided by 26 U.S.C. 6103.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING FOR RECORDS IN THE SYSTEM:

STORAGE:

Paper records and/or magnetic media.

RETRIEVABILITY:

Controlled items are generally retrievable by name; some items are not retrievable, depending upon the controls established locally. No centralized index exists.

SAFEGUARDS:

Access controls will be not less than provided for by the Physical and Document Security Handbook, IRM 1(16)41.

RETENTION AND DISPOSAL:

Disposition varies in accordance with the nature of the correspondence file, but is made in accordance with the Records Disposition Handbook, IRM 1(15)59.

SYSTEM MANAGER(S) AND ADDRESS:

Head of the office maintaining the file. (See IRS Appendix A.)

NOTIFICATION PROCEDURE:

Individuals seeking to determine if a system of records contains a record pertaining to themselves may inquire in accordance with instructions appearing at 31 CFR Part 1, Subpart C, Appendix B. Inquiries should be addressed to the office believed to have received the correspondence. (See IRS Appendix A).

RECORD ACCESS PROCEDURES:

Individuals seeking access to any record contained in a system of records or seeking to contest its content, may inquire in accordance with instructions appearing at 31 CFR Part 1, Subpart C, Appendix B. Inquiries should be addressed to the office believed to have received the correspondence.

CONTESTING RECORD PROCEDURES:

See Access above.

RECORD SOURCE CATEGORIES:

Information supplied by the initiators of the correspondence and information secured internally from other systems of records.

SYSTEMS EXEMPTED FORM CERTAIN PROVISIONS OF THE ACT:

None.

Treasury/IRS 00.002

SYSTEM NAME:

Correspondence Files/Inquiries About Enforcement Activities—Treasury/IRS.

SYSTEM LOCATION:

National Office, National Computer Center, Date Center, Regional Offices, District Offices, and Service Centers. (See IRS Appendix A).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(1) Initiators of correspondence. (2) Persons upon whose behalf the correspondence was initiated. (3) Persons who are subjects of the correspondence. Includes individuals for whom tax liabilities exist, individuals who have made a complaint or inquiry relative to an Internal Revenue tax matter, or individuals for whom a third party is intereeding relative to an Internal Revenue tax matter.

CATEGORIES OF RECORDS IN THE SYSTEM:

Taxpayer name, address, taxpayer identification number (if applicable), information about tax matters (if applicable), chronological investigative history. Other information relative to the conduct of the case and/or the taxpayer's compliance history (if applicable). Correspondence may include letters, telegrams, memoranda of telephone calls and other forms of communication.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 26 U.S.C. 7802; 26 U.S.C. 7801, 7802.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and information in these records may be used: (1) To disclose information to the Department of Justice in connection with actual or potential criminal prosecution or civil litigation, and in connection with requests for legal advice. (2) To appropriate Federal, state, local, or foreign agencies responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, registration, order, or license. (3) To a Federal, State, or local agency, maintaining civil, criminal or other relevant enforcement informaiton or other pertinent information, which has requested information relevant to or necessary to the requesting agency's or the bureaus's hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit. (4) To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations, in response to a subpoena, or in connection with criminal law proceedings. (5) In response to a court subpoena, to appropriate parties engaged in litigation or in preparation of possible litigation such as potential witnesses for the purpose of securing their testimony to courts, magistrates or administrative tribunals, to parties and their attorneys in connection with litigation or settlement of disputes, to individuals seeking information through established discovery procedures in connection with civil, criminal or regulatory proceedings. (6) To a congressional office in response to an inquiry made at the request of the individual to whom the record pertains. (7) To the news media, in accordance with guidelines contained in 28 CFR 50.2, concerning this agency's functions relating to civil and criminal proceedings. (8) To unions recognized as exclusive bargaining representatives under the Civil Service Reform Act of 1978, 5 U.S.C. 7111 and 7114. (9) To third parties during the course of an investigation to the extent necessary to obtain information pertinent to the investigation. (10) Disclosure of returns and return information may be made only as provided by 26 U.S.C. 6103. (11) Disclosure may be made to other agencies to the extent provided by law or regulation and as necessary to report apparent violation of law to appropriate law enforcement agencies. (12) Information may be disclosed to States, the District of Columbia, the Commonwealth of Puerto Rico, or possessions of the United States, to assist in the administration of tax laws. (13) Disclosure may be made to other parties when necessary in the administration and enforcement of law as authorized by 26 U.S.C. 7801 and 7802. (14) Disclosure may be made during judicial processes.

POLICIES AND PRACTICES FOR STORING, RETRIEVING ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records and/or magnetic media.

RETRIEVABILITY:

Controlled items are generally retrievable by name; some items are not retrievable, depending upon the controls established locally. No centralized index exists.

SAFEGUARDS:

Access controls will be not less than provided for by the Physical and Document Security Handbook, IRM 1 (16) 41.

RETENTION AND DISPOSAL:

Disposition varies in accordance with the nature of the correspondence file, but is made in accordance with the Records Disposition Handbook, IRM 1 (15) 59.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Commissioners, Regional Commissioners, District Directors and Service Center Directors of Internal Revenue.

NOTIFICATION PROCEDURE:

This system is exempt from the notification provisions of the Privacy Act.

RECORD ACCESS PROCEDURE:

This system is exempt from the Access and Contest provisions of the Privacy Act.

CONTESTING RECORD PROCEDURES:

26 U.S.C. 7852(e) prohibits Privacy Act amendment of tax records.

RECORD SOURCE CATEGORIES:

This system of records contains investigatory material compiled for law enforcement purposes whose sources need not be reported.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system has been designated as exempt from certain provisions of the Privacy Act.

Sunshine Act Meetings

Federal Register
Vol. 51, No. 45
Friday, March 7, 1986

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Item
Consumer Product Safety Commission	1, 2
Equal Employment Opportunity Commission	3
Federal Energy Regulatory Commission	4
Federal Reserve System	5, 6

1

CONSUMER PRODUCT SAFETY COMMISSION.

TIME AND DATE: 9:30 a.m., Thursday, March 13, 1986.

LOCATION: Third Floor Hearing Room, 1111 18th Street, NW., Washington, DC.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED:

Section 15 Guidelines

The staff will brief the Commission on the staff's response to comments on the Statement of Enforcement Policy on Substantial Product Hazard Reports, published in the **Federal Register** on April 6, 1984.

FOR A RECORDED MESSAGE CONTAINING THE LATEST AGENDA INFORMATION, CALL: 301–492–5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207, 301–492–6800.

Sheldon D. Butts,

Deputy Secretary.

March 5, 1986.

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: Approximately 11:00 a.m., Wednesday, March 12, 1986, following a recess at the conclusion of the open meeting.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Street, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed purchase of computers within the Federal Reserve System.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: March 5, 1986.

James McAfee,

Associate Secretary of the Board.

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 10:00 a.m., Wednesday, March 12, 1986.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Summary Agenda

Because of its routine nature, no substantive discussion of the following item is anticipated. This matter will be voted on without discussion unless a member of the Board requests that the item be moved to the discussion agenda.

1. Publication for comment of an application by the State of Wisconsin for an exemption from Subpart B of Regulation AA (Unfair or Deceptive Acts or Practices).

Discussion Agenda

2. Proposed revisions to Regulations D (Reserve Requirements of Depository Institutions) and Q (Interest on Deposits) to reflect the expiration of the Depository Institutions Deregulation Act. (Proposed earlier for public comment; Docket No. R-0565)
3. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452-3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: March 5, 1986.

James McAfee,

Associate Secretary of the Board.

Department of State

Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1985

VOL 51
ISS 45
MR 7
1986
UMI

DEPARTMENT OF STATE

[Public Notice 958]

Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1985

The Department of State submits the following comprehensive listing of the statements which, as required by law, Federal employees filed with their employing agencies during calendar year 1985 concerning gifts received from foreign government sources. The compilation includes reports of both tangible gifts and gifts of travel or travel expenses of more than minimal value, as defined by statute.

Publication of this listing in the **Federal Register** is required by section 7342(f) of Title 5, United States Code, as added by section 515(a)(1) of the Foreign Relations Authorization Act, Fiscal Year 1978 (Pub. L. 95–105, August 17, 1977, 91 Stat. 865).

Dated: February 21, 1986.

Ronald I. Spiers,

Under Secretary for Management.

Executive Office of the President, All Gifts Received From Foreign Officials Over Minimum Dollars

REPORT OF TANGIBLE GIFTS

[Jan. 1 through Dec. 31, 1985]

Name and title of recipient	Gift, date of acceptance, estimated value, and current disposition or location	Identity of foreign donor and government	Circumstances justifying acceptance
